☐ IF NECESSARY, PLEASE INCREASE MY BIDS BY ☐1 ☐2 ☐3 INCREMENT(S)*Lots will be purchased as much below top bids as possible.*☐ I WANT TO LIMIT MY BIDDING TO A TOTAL OF \$

at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?

☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

(Signature required) Please make a copy of this bid sheet for your records.☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS☐ I HAVE A RESALE PERMIT – please contact 800-872-6467

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

Current Bid	Bid Increment	
\$10,000 – \$19,999	\$1,000	
< – \$10	\$1	\$20,000 – \$29,999 \$2,000

7 Easy Ways to Bid

1 Internet

Simply go to www.pearsoncmg.com

Simply go to www.HA.com, find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

2 e-Mail

You can also

You can also e-mail your bids to us at Bid@HA.com. List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

3 Postal Mail

Simply complete the B

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

4 In Person

Come to the auction and view the lots in person and bid live on the floor.

5 FAX
Follow t

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 p.m. CT the day prior to the auction date.

6 Live By Phone

Call 1-800-872-6467 Ext. 11

Call 1-800-872-6467 Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

7 Live using HERITAGE Live!®
Auctions designated as "Heritage Live Enabled" have

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit HA.com/Live and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.

Dear Bidder:

Welcome to New York! Our year-opening FUN auction was a record-setter and we are eager to build on that success. With more than 2500 lots in our Floor Sessions, including more than 500 lots in our special Premier Session, this auction has plenty to offer you, no matter your U.S. Coin specialty.

We invite you to read about this auction's Featured Collections below:

The Collection of Donald E. Bently, sold for the benefit of the Bently Foundation

Christopher Bently has decided to sell the collection of Donald E. Bently to build a new legacy of creativity, sustainability, and animal rights in the Bay Area and Northern Nevada communities with Bently Foundation.

Donald E. Bently was founder, owner and Chief Executive Officer of Bently Nevada Corporation, and President of Bently Pressurized Bearing Corporation. He pioneered technology that created the foundation of a new discipline of Mechanical Engineering, the Diagnostics of Machinery Malfunctions.

Donald's tradition of innovation, sustainability, and community development are carried on by his son Christopher through the Bently Foundation. All proceeds will go to the Bently Foundation and help bring Christopher Bently's forward-thinking vision — one of community and local sustainability — into reality.

The Teich Family Collection

The Teich Family Collection began in 1952, following a chance encounter between Dr. Samuel Teich (and his family) and the coin-collecting owner of their vacation motel. An Indian cent rolling across the floor gave rise to hours of conversation with the Teichs and their three sons – and the result was a lifetime pursuit of these fabulous pieces of history. Serious collecting began a short time later when Dr. Teich and his wife Beatrice met Robert Friedberg in the coin department at Gimbels in New York City. The couple bought albums for themselves and their three sons, and the acquisition of their many treasures began in earnest. The Teichs also worked with other major dealers, and over time became numismatic connoisseurs with an eye for quality.

The sons of Dr. Samuel and Beatrice Teich grew up in the hobby, as their searches graduated from pocket change to thousands of rolls carried back-and-forth from local banks. At this time, even key coins could be found in circulation with diligent searching, and each tantalizing find was placed into their albums with celebration. With increased sophistication came increased pursuit of important rarities at auction or from dealer inventory, but it was always a family adventure – two generations of collecting excitement by the Teich family.

Christopher Bently's Nob Hill Collection

The impressive Nob Hill Collection of Christopher Bently begins with three carefully selected gold highlights. His 1929 half eagle, AU58 NGC, is an important lightly circulated example of one of the most underrated keys in the late gold series. A 1920-S eagle, MS60 NGC, is a more famous melt rarity. Most intriguing of all is a 1930-S eagle, MS65 PCGS, which is not only scarce regardless of grade but conditionally challenging.

The Greensboro Collection, Part VI

The magnificent Greensboro Collection continues with important small-denomination proof coins, half cents through half dimes with an emphasis on the rare issues struck before 1858. Major offerings with fewer than a dozen examples known include an 1830 half dime, V-5, LM-9.1 variety, PR66 NGC; an 1839 half dime No Drapery obverse, PR65 Cameo NGC; an 1841 half dime, PR65 NGC; and an 1846 half dime, PR67 NGC.

As always, you have seven ways to win in this Heritage event. We accept pre-auction bids through our website, HA.com, and by postal mail, fax, and e-mail. For real-time bidding excitement wherever you are in the world, bid by telephone or through our award-winning proprietary Internet platform, Heritage LIVE!™ Should you be able to join us in New York, of course, we would love to see you there.

Good luck!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

SESSION ONE

COLONIALS

St. Patrick Farthing, Choice VF
Nothing Below King, W-11500

- 3001** (1670-75) St. Patrick Farthing VF35 PCGS. Breen-208, W-11500. The typical St. Patrick farthing is well worn, but the present piece displays pleasing detail, particularly on the harp and church. The dark brown surfaces are unabraded and moderately granular. Listed on page 41 of the 2014 *Guide Book*. Population: 31 in 35, 43 finer (12/13). PCGS# 42

- 3002** 1773 Virginia Halfpenny, Period MS64 Brown NGC. N. 24-K, W-1570, R.1. A satiny and nicely struck near-Gem. The obverse is chocolate-brown and olive-green. The reverse has substantial mint red along with medium brown high points. Struck from prominently clashed dies. Listed on page 45 of the 2014 *Guide Book*. PCGS# 240

- 3003** 1787 Massachusetts Half Cent XF45 NGC. Ryder 1-D, W-5900, R.4. A glossy medium brown representative of this better Ryder die marriage. Surprisingly without any marks, spots, or flan detractors. Listed on page 59 of the 2014 *Guide Book*. PCGS# 296

- 3004** 1787 Massachusetts Cent, Horned Eagle AU53 NGC. Ryder 2b-A, W-6040, R.3. The popular "Horned Eagle" variety is listed in the *Guide Book* and attributed by a die break above the eagle's head. A medium brown representative without any identifying marks. Listed on page 59 of the 2014 *Guide Book*. PCGS# 305

- 3005** 1787 New York Excelsior Copper, Eagle Left — Environmental Damage — PCGS Genuine. VG Details. W-5785, R.6. As is the case with the extremely rare Brasher doubloons, Ephraim Brasher is associated with the rare Excelsior tokens. They feature the New York State Coat of Arms on the obverse. The reverse imitates the Federal Seal. This dark brown example is pitted but the major types are evident. Listed on page 64 of the 2014 *Guide Book*. PCGS# 427

- 3006** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays — Cleaning — PCGS Genuine. XF Details. N. 19-M, W-6970, R.6. A rare die combination. The N in MIND is broadly repunched and ARE is widely spaced. The jade-green toning is unusual for the type and a lamination is noted near the sundial at 3 o'clock. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

1787 Fugio Cent, MS61 Brown
N. 13-X, 4 Cinquefoils

- 3007** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS61 Brown PCGS. CAC. N. 13-X, W-6855, R.2. A mark-free chocolate-brown Fugio type coin that likely originated from the Bank of New York holdings. Generally well struck though the left borders show softness. Both sides display minor toned laminations, as coined. In a green label holder. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

- 3008** 1795 Washington Liberty & Security Halfpenny, BIRMINGHAM Edge MS63 Brown PCGS. Baker-31B, W-11010, R.5. Part of the Conder series of British tokens, the 1795 Washington Liberty and Security tokens have four edge variants. The BIRMINGHAM lettered edge is moderately less rare than the other three varieties. A dusky mahogany-brown example with satin luster, a typical strike, and relatively few marks. Listed on page 84 of the 2014 *Guide Book*. PCGS# 758

HALF CENTS

- 3009** 1793 — Environmental Damage — PCGS Genuine. Fine. C-2, B-2, R.3. A collectible example with granular dark gray fields and mahogany-brown high points. Rotation reveals distributed traces of aqua verdigris. The date, reverse legends, and major motifs are evident. Our EAC grade Fair 2. NGC ID# 2222, PCGS# 1000

- 3010** 1794 VG8 PCGS. C-9, B-9, R.2. Manley Die State 2.0. A dark gray example with moderate granularity and only minimal marks. The obverse is fairly sharp. On the reverse, HALF CENT is faint and AMERICA and the fraction are well worn. Encased in a green label holder. Our EAC grade AG3. NGC ID# 2223, PCGS# 1003

Double Struck 1804 Half Cent, VF30
First Strike 10% Off Center
C-10, B-9, Crosslet 4, Stems

- 3011** 1804 Crosslet 4, Stems — Double Struck, First Strike 10% Off Center — VF30 PCGS. C-10, B-9, R.1. Manley Die State 2.0. The first strike was struck approximately 10% off center toward 7 o'clock. The coin was properly centered for the second strike. The PCGS insert incorrectly states that the second strike was 10% off center. The iridescent multicolor toning appears unnatural and the lower half of the right obverse field is smoothed, as is Liberty's chin and a portion of her cheek. Our EAC grade VF20. NGC ID# 222F, PCGS# 1069

- 3012 1806 Small 6, No Stems AU58 NGC. C-1, B-3, R.1.** Predominantly gunmetal-blue though faded mint red lurks in design crevices. Minimally abraded. Due to slightly misaligned and moderately rotated dies, the date and STATES are well struck while LIBERTY and the denominator are incompletely impressed. Our EAC grade XF40.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 222J, PCGS# 1093

- 3013 1809/6 9 Over Inverted 9 MS61 Brown NGC. C-5, B-5, R.1.** Manley Die State 1.0. Cohen-5 cannot be a true overdate, since the 1806 half cent bore Draped Bust designs, as did its 1807 and 1808 successors. The present deep lavender and golden-brown example is sharply struck and shimmers with mint gloss. One thin mark beneath the LF in HALF. Our EAC grade XF45. NGC ID# 222N, PCGS# 1126

1811 Classic Half Cent, XF Details C-2, B-2

- 3014 1811 — Filed Rims — PCGS Genuine. XF Details. C-2, B-2, Low R.3.** The Close Date subtype. The rims on this otherwise XF-level example have been filed a large part of the way around, more notably on the reverse. Portions of the fields are smoothed. Deep mahogany surfaces have considerable remaining luster and blue overtones. Our EAC grade Fine 15. NGC ID# 222S, PCGS# 1135

- 3015 1828 13 Stars MS63 Red and Brown PCGS. C-3, B-2, R.1.** Manley Die State 3.0. The portrait is toned deep brown but the stars, date, and a majority of the reverse remain Red. Slender marks are noted at 1 o'clock on the obverse and 5:30 on the reverse. Our EAC grade MS62. NGC ID# 222V, PCGS# 1148

PROOF BRAIDED HAIR HALF CENTS

1855 C-1 Half Cent PR63 Red and Brown

- 3016 1855 PR63 Red and Brown PCGS. C-1, B-1, R.5 as a proof.** An intricately struck Select proof. The obverse is principally orange-red though the high points are steel-gray. The reverse has a plum-mauve center and a sea-green border. A lens reveals infrequent minor spots. The only 1855 die pair, also used to coin the business issue. Our EAC grade PR60.
From The Teich Family Collection. PCGS# 1327

1856 Half Cent, PR64 Brown Very Rare Breen-1 Variety

- 3017 1856 PR64 Brown PCGS. B-1, R.7.** Large die lump on the I of UNITED. Most proof 1856 half cents are from a different reverse die (B-3) with doubling on CENT and the ribbon. The present sharply struck specimen has excellent eye appeal. The obverse displays substantial faded red along with blushes of olive-brown. The reverse is lime-green with occasional hints of cobalt-blue and lavender. Our EAC grade PR60.
From The Teich Family Collection. NGC ID# 26ZX, PCGS# 1329

LARGE CENTS

- 3018 1793 Wreath Cent, Vine and Bars AG3 NGC. S-6, B-7, R.3.** The sprig beneath the bust is bold, and allows definitive attribution despite significant wear and several granular streaks. Toned deep lavender-brown. Much of ONE CENT and AMERICA are readable. Our EAC grade Fair 2. NGC ID# 223H, PCGS# 1347

- 3019 1794 Head of 1794 VF20 PCGS. CAC. S-22, B-6, R.1.** Medium brown high points contrast with deep lavender fields. The moderately granular surfaces display spots only near the CA in AMERICA and on the wreath below the T in CENT. Our EAC grade VG10. NGC ID# 223P, PCGS# 901374

- 3020 1797 Reverse of 1797, Stems XF40 NGC. S-137, B-8, R.2.** Struck a few degrees off center toward 9 o'clock, though only the left-side dentils are affected. Close examination locates infrequent slight rim nicks, but the dark brown and plum-mauve surfaces are minimally abraded. The strike shows softness near the T in CENT. Our EAC grade VF20. NGC ID# 2242, PCGS# 1422

- 3021 1800/1798 — Rim Damage — PCGS Genuine. S-190, B-5, R.3.** The base of the E in AMERICA is repunched, one way to distinguish B-5 from its B-2 to B-4 predecessors. This glossy steel-gray representative has several noticeable marks along the reverse periphery. Our EAC grade Fine 12. NGC ID# 2U59, PCGS# 1452

- 3022 1803 Small Date, Small Fraction XF40 NGC. S-256, B-15, R.3.** Readily attributable by the arc-shaped crack through the D in UNITED and the E in STATES. A die line between the UN in UNITED is also diagnostic. This chocolate-brown cent is lightly abraded aside from a faded thin field mark above the bust tip. The strike is most sharp through the CA in AMERICA is faint. Our EAC grade VF20. NGC ID# 224G, PCGS# 1482

- 3023 1803 Small Date, Large Fraction VF35 NGC. S-261, B-20, R.2.** The obverse has an arcing die crack from 6 o'clock through the date, hair, ribbon, and on to the border at 9 o'clock. Die flaws on Liberty's neck are barely visible. This pleasing cent has olive-brown surfaces with considerable tan, faded from mint red, on the obverse. The reverse has minor reverse corrosion alongside removable verdigris. Our EAC grade VF20. NGC ID# 224G, PCGS# 1485

- 3024 1807/6 Large 7 AU55 NGC. S-273, B-3, R.1.** The Large 7 variant of this prominent overdate. The deep brown surfaces display clash marks near the profile but the obverse is unabraded. The reverse has a slender strike-through beneath the left ribbon end and moderate granularity on the lower right reverse periphery. A cluster of thin marks is noted above the I in AMERICA. Our EAC grade VF30. NGC ID# 224N, PCGS# 1528

1810 S-285 Cent, Choice AU

- 3025 1810 AU55 NGC. S-285, B-2, R.2.** A faint crack through the right-side stars helps attribute this collectible but conditionally rare Sheldon marriage. Refreshingly void of contact though protected areas of the reverse display build-up. A late die state with bold clash marks, flowlined fields, and blurry peripheral elements. Our EAC grade XF40. NGC ID# 224S, PCGS# 1549
- 3026 1820 Large Date MS65 Brown NGC. N-13, R.1.** N-13 is the most available of the Randall Hoard varieties but lustrous Gems are invariably in demand. Fire-red lingers near the stars and letters though a majority of the coin is medium brown. A small spot and a few wispy marks are near the T in CENT. Our EAC grade MS62. NGC ID# 2256, PCGS# 1615
- 3027 1821 XF40 PCGS. CAC. N-1, R.1.** A rich chocolate-brown representative with moderate high point wear. Marks are confined to a single small tick on the cheekbone. The reverse border has minor build-up, mostly near the IT in UNITED. Our EAC grade VF20. NGC ID# 2258, PCGS# 1621
- 3028 1824 — Improperly Cleaned — NGC Details. Unc. N-4, R.2.** The late die state with a crack between stars 5 and 6. This lustrous cent is free from hairlines but was once recolored. Retoned steel-blue with lilac-red high points on the portrait. Only lightly abraded. The strike is good though the stars and curls near the ear are incomplete. Our EAC grade XF45.
- 3029 1833 AU53 NGC. N-4, R.4.** The N-4 obverse is sometimes called an 1833/2 overdate for the trace of recutting below the upper knob of the final digit. A die crack inside the lower curve of that digit resembles the base of a 2. Both sides have trivial marks on the pleasing light brown surfaces with hints of bluish patina. Our EAC grade XF40. NGC ID# 225P, PCGS# 1696
- 3030 1836 MS64 Brown PCGS. CAC. N-4, R.3.** The E's in the reverse peripheral legend have weak or absent bases. Fine obverse die cracks confirm the attribution. This beautiful golden-brown cent is void of contact or marks and would be a handsome addition to any quality holding. Our EAC grade AU50.
Ex: Dallas Signature (Heritage, 7/2006), lot 110, which realized \$977.50. NGC ID# 225T, PCGS# 1726
- 3031 1852 MS66 Brown NGC. CAC. N-17, R.1.** Grellman Die State c. A beautiful chocolate-brown cent with powder-blue undertones. Lustrous and exquisitely preserved. The strike is bold with incompleteness confined to a couple of star centers. Both sides display a partial wire rim. Our EAC grade MS62. NGC ID# 226J, PCGS# 1898
- 3032 1853 MS66 Brown NGC. CAC. N-3, R.1.** Grellman Die State c. Traces of the initial mint orange outline stars, letters, and other design crevices. This chocolate-brown Premium Gem is nicely struck and exceptionally free from perceptible carbon and contact. Our EAC grade MS60. NGC ID# 226K, PCGS# 1901
- 3033 1854 MS66 Brown PCGS. N-20, R.3.** Grellman Die State b. On this later die state example, the die lump at the base of the neck is more prominent than the misplaced date digit beneath the right side of the 8. Golden-brown overall with mint red clinging to design elements. Outstanding quality. Likely among the finest certified examples of the Newcomb variety. Our EAC grade MS62. NGC ID# 226L, PCGS# 1904

- 3034 1857 Small Date MS64+ Brown PCGS. N-4, R.1.** Grellman Die State a, the scarce early die state with a line connecting the dentils to star 1. A few low areas are the result of debris on the dies when this piece was struck. The olive-brown surfaces are attractive and retain considerable mint red. Our EAC grade MS63. PCGS# 1931

FLYING EAGLE CENTS

- 3035 1857 MS63 PCGS. CAC. Ex: Teich Family Collection.** A frosty tan Flying Eagle cent with slight design weakness on the leading edge of the upper wing. A few small specks of dark toning are noted on each side of this Select Mint State cent.
From The Teich Family Collection. NGC ID# 2276, PCGS# 2016
- 3036 1857 MS64 PCGS.** Mellowed peach-red and yellow-gold encompass this lustrous and unabraded example. Outstanding from the technical perspective, but the market grade is limited by a typical strike on the tail feathers and cotton leaves. NGC ID# 2276, PCGS# 2016
- 3037 1857 MS64 NGC.** Soft reddish-tan color on the obverse cedes to yellow-tan on the reverse. The design elements are well-impressed except for the often-seen softness on the feathers at the back of the tail. A couple of faint marks in the upper-left obverse quadrant likely preclude gem status. NGC ID# 2276, PCGS# 2016
- 3038 1857 MS64 PCGS.** This attractive Choice example exhibits well-detailed design elements and original mint luster under shades of light brown toning. No large or distracting surface flaws are evident. This date is always popular with series enthusiasts and type collectors alike. NGC ID# 2276, PCGS# 2016
- 3039 1857 MS64 PCGS. CAC.** A well preserved wheat-gold near-Gem. The strike is crisp except on STATES, though the obverse field retains hints of the planchet surface. The reverse field displays myriad tiny strike-throughs, as issued. Housed in a first generation holder.
Ex: St. Louis Central States (Heritage, 5/2005), lot 5132, which realized \$1,610. NGC ID# 2276, PCGS# 2016
- 3040 1858 Large Letters MS64 PCGS. CAC.** High Leaves. Closed E in ONE. An unusually prooflike example that boasts an intricate strike and flashy fields. The pumpkin-gold, rose-red, and sea-green surfaces are essentially free from contact or carbon. The obverse has a wire rim between 10 and 2 o'clock.
From The Teich Family Collection. NGC ID# 2277, PCGS# 2019
- 3041 1858 Small Letters MS63 NGC. CAC.** Low Leaves, Open E in ONE. A scarce reverse subtype. A lustrous honey-gold representative with minimal carbon and only trivial marks. The eye appeal is superior for the designated grade. The strike shows softness on the tail and the opposite portion of the wreath. NGC ID# 2279, PCGS# 2020
- 3042 1858 Small Letters MS64 PCGS. CAC.** Low Leaves. Open E in ONE. The rich walnut-brown surfaces exhibit sea-green undertones. A nicely struck and satiny Choice Flying Eagle type coin. Minor marks are noted on the right obverse field and beneath the E in CENT.
From The Teich Family Collection. NGC ID# 2279, PCGS# 2020
- 3043 1858 Small Letters MS64 PCGS. CAC.** Low Leaves. Open E in ONE. A fully struck chestnut-gold near-Gem that boasts satin sheen and an essentially pristine reverse. The few ticks on the upper obverse field fail to challenge the designated grade. NGC ID# 2279, PCGS# 2020

**1858 Flying Eagle Cent, MS65
Small Letters**

- 3044 1858 Small Letters MS65 PCGS.** The AME of AMERICA are completely separated on the Small Letters variety, with AM joined on the Large Letters variant. This Gem has a bold strike with complete delineation of the tail feathers. Both sides have lovely golden-tan surfaces with satin luster. Darker toning spots are scattered across the surfaces. Population: 69 in 65, 9 finer (12/13). NGC ID# 2279, PCGS# 2020

PROOF FLYING EAGLE CENT

**Proof 1858 Flying Eagle Cent
Small Letters, Low Leaves**

- 3045 1858 Small Letters PCGS Genuine. Proof. Snow-PR4.** Low Leaves Reverse. Closed E in ONE hubbed over an Open E in ONE. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this is a proof coin with Uncirculated details that has environmental damage. The obverse is unimpaired but the reverse has several small spots, mostly near ONE CENT and near the rim at 10 o'clock. Fully struck and toned orange-gold and apple-green.
From The Teich Family Collection. NGC ID# 227D, PCGS# 2043

INDIAN CENTS

- 3046 1859 MS64 PCGS.** Pale copper-gold, richer peach, and even lavender are among the hues of this first-year near-Gem Indian cent. The strike is remarkably sharp on the feather-tips and elsewhere. NGC ID# 227E, PCGS# 2052
- 3047 1859MS64PCGS.CAC.Ex:** TeichFamilyCollection. An attractive Choice specimen of this one-year type coin, with lustrous surfaces that show few signs of contact and sharply detailed design elements.
From The Teich Family Collection. NGC ID# 227E, PCGS# 2052
- 3048 1861 MS65 PCGS. CAC. Ex:** Teich Family Collection. A delightful Gem, with well-detailed design elements and vibrant mint luster on both sides. The copper-red surfaces show no mentionable distractions.
From The Teich Family Collection. NGC ID# 227G, PCGS# 2061

**1862 Copper-Nickel Cent, MS66
Sharp Strike, Nickel-Colored Surfaces**

- 3049 1862 MS66 PCGS.** The most available date in the copper-nickel subset of the Indian Head cent series, this gleaming Premium Gem would be an excellent selection for type collectors. An unusual patina graces the surfaces of this copper-nickel cent, which appears more like the color of a brilliant nickel than the tan or reddish toned surfaces normally seen on this date. A strong strike provides almost-full definition to the headdress feathers, while the four diamonds on the ribbon are complete. The reverse is rotated approximately 45°. Smooth, silverlike surfaces are unabraded with no spots or other distractions. Population: 77 in 66 (7 in 66+), 9 finer (12/13). NGC ID# 227H, PCGS# 2064

**1862 Indian Cent, MS66
Struck from Worn Dies**

- 3050 1862 MS66 PCGS. CAC.** This splendid Premium Gem is a worn dies impression that shows several fine die cracks, faded clash marks, and wavy fields from dies that have seen extensive use. This beauty has brilliant and highly lustrous golden-tan surfaces with minuscule carbon-like flecks but no other marks. Population: 75 in 66 (6 in 66+), 9 finer (12/13). NGC ID# 227H, PCGS# 2064
- 3051 1863 MS66 NGC.** A Premium Gem copper-nickel cent with pleasing, copper-tan color over lustrous, spot-free surfaces. An exceptional strike displays full headdress details and a fully brought-up wreath. One of the finest survivors of this date. Census: 21 in 66 (1 in 66 ★), 1 finer (12/13). NGC ID# 227J, PCGS# 2067
- 3052 1864 L On Ribbon MS64 Red and Brown PCGS. CAC. Snow-5a, FS-2304.** The 18 is boldly repunched north. The obverse is peach-red while the reverse is russet and orange. A satiny and mark-free example of this semikey Civil War issue. The strike is bold except across portions of the dentils.
From The Teich Family Collection. NGC ID# 227M, PCGS# 2080
- 3053 1864 L On Ribbon MS64 Red and Brown PCGS. CAC.** The mint red is surprisingly strong on this near-Gem. It is, in fact, mostly present, only diminished by streakiness in the planchet — a result of improper mixture of the bronze alloy. Sharply defined, the only exception are the ends of the top two feathers in the headdress. NGC ID# 227M, PCGS# 2080

3054 1866 MS64 Red PCGS. Ex: Teich Family Collection. This frosty Choice Mint State Indian cent has brilliant light orange mint color with a few splashes of mellow brown toning. Both sides have sharp design motifs with a few dark toning spots. Population: 42 in 64 (2 in 64+) Red, 30 finer (12/13).
From The Teich Family Collection. NGC ID# 227P, PCGS# 2087

3055 1867 MS64 Red and Brown PCGS. This fully struck early bronze Indian cent displays remarkable mixture of red and brown color over each side. When closely examined much of the brown is streaky, indicating improper mixture of the bronze alloy rather than actual mellowing of the original red. NGC ID# 227R, PCGS# 2089

3056 1867/67 AU55 PCGS. Snow-1, FS-301. The 67 in the date is obviously repunched north. A sharply struck Choice AU example with blended mahogany-brown and steel-gray toning. The portrait displays a spot on the cheekbone and a few small to moderate marks.
From The Teich Family Collection. PCGS# 92088

3057 1869 MS64 Red and Brown PCGS. CAC. Ex: Teich Family Collection. The pleasing surfaces of this well-detailed Choice example show a mix of original red and light brown patina. Bright mint luster shines through the toning and eye appeal is quite strong.
From The Teich Family Collection. NGC ID# 227T, PCGS# 2095

1869/69 Cent, MS64+ Red and Brown Snow-3f, FS-301

3058 1869/69 MS64+ Red and Brown PCGS. CAC. Snow-3f, FS-301. The horizontal die crack through the top of the shield confirms the Snow subvariety. Seven different reverses were paired with the 1869/69 obverse, yet the variety is rare in the present quality. Well struck, lustrous, and unabraded with peach-gold fields and a lavender-tinged portrait.
From The Teich Family Collection. PCGS# 37475

3059 1870 MS64 Red and Brown PCGS. CAC. Bold N in ONE. Variegated sun-gold and gunmetal-gray shades encompass this well struck and lustrous near-Gem. Smooth aside from a solitary tiny tick on the cheekbone.
Ex: Orlando FUN Signature (Heritage, 7/2011), lot 3080, which realized \$862.50. NGC ID# 227U, PCGS# 2098

3060 1870 MS64+ Red and Brown PCGS. CAC. Snow-38. Bold N in ONE. An unabraded and beautiful orange-red near-Gem. ONE CENT, particularly the E in CENT, exhibits minor die doubling. The strike shows incompleteness on the left wreath border and the top of the shield.
From The Teich Family Collection. NGC ID# 227U, PCGS# 2098

3061 1871 MS64 Red and Brown PCGS. CAC. Bold N in ONE. The lustrous orange-gold surfaces have only slightly mellowed. Crisply struck and pleasing despite minor marks on the chin and the field near the R in AMERICA.
From The Teich Family Collection. NGC ID# 227V, PCGS# 2101

1872 Cent, MS66 Red and Brown Low-Mintage Date

3062 1872 MS66 Red and Brown NGC. Bold N in ONE. Low-mintage dates from the 1870s constitute many semikeys of the Indian cent series. The 1872 production barely exceeded 4 million pieces and relatively few were saved. The present sharply struck and lustrous Premium Gem has unabraded honey-gold and jade-green surfaces. A few trivial reverse flecks are noted near 2 o'clock. NGC ID# 227W, PCGS# 2104

3063 1873 Closed 3 MS64 Red and Brown PCGS. CAC. Ex: Teich Family Collection. The pleasing surfaces of this impressive Choice example are mostly original red, with some accents of light brown and crimson. The design elements are well-detailed and eye appeal is quite strong. Population: 98 in 64 (1 in 64+) Red and Brown, 35 finer (12/13).
From The Teich Family Collection. NGC ID# 227X, PCGS# 2110

3064 1874 MS64 Red PCGS. CAC. Ex: Teich Family Collection. The well-struck design elements of this near-Gem include strong definition on the feather tips. An occasional freckle of orange-gold and lavender visits the lustrous surfaces. Population: 68 in 64 Red, 40 finer (12/13).
From The Teich Family Collection. NGC ID# 227Z, PCGS# 2120

3065 1876 MS65 Red and Brown PCGS. CAC. Ex: Teich Family Collection. Whispers of light tan do not significantly impede the gold luster issuing from this sharply struck Gem. CAC appropriately affirms the coin's outstanding eye appeal. Population: 75 in 65 (1 in 65+) Red and Brown, 2 finer (12/13).
From The Teich Family Collection. NGC ID# 2283, PCGS# 2125

1877 Indian Cent Key, AU58 Popular Collecting Grade

3066 1877 AU58 PCGS. The grades of AU55 and especially AU58 are highly popular with collectors looking for a good value, combining quality and affordability. This lovely near-Mint specimen exhibits a trace of wear on the high points, with golden-tan surfaces that retain traces of faded red luster. NGC ID# 2284, PCGS# 2127

3067 1891 MS65 Red PCGS. CAC. Eagle Eye Photo Seal, card not included. This peach-red Gem is highly lustrous and intricately struck. No marks are evident though a few pinpoint flecks are noted on the upper left obverse quadrant. NGC ID# 228K, PCGS# 2180

- 3068 1894 MS65 Red PCGS.** The design elements of this Gem are sharply struck, including most of the feather tips. Both sides are awash with vibrant orange-gold luster. Population: 70 in 65 (1 in 65+) Red, 27 finer (12/13). NGC ID# 228N, PCGS# 2189
- 3069 1894 Misplaced Date MS64 Red PCGS. Snow-2, FS-402.** The top portions of a 9 and a 4 protrude from the denticles below the primary numbers. Orange-gold luster issues from both sides of this near-Gem. A few minuscule obverse marks determine the grade. PCGS# 37581
- 3070 1895 MS65 Red PCGS.** Lustrous, fire-orange surfaces are tinged with deeper red accents. This sparkling Gem Indian Head cent is full Red and spot-free. Sharply struck with only slight weakness noted at the end of several of the feathers in the headdress. A thoroughly attractive example, scarce any finer. NGC ID# 228P, PCGS# 2192
- 3071 1902 MS67 Red NGC.** The feather tips and the top of the shield are slightly weak, but all other design elements are bold on this brilliant Superb Gem. Satin luster appears with hints of rich reddish-orange patina on the bright golden surfaces. Census: 18 in 67 Red, 1 finer (1/14). NGC ID# 228X, PCGS# 2213
- 3072 1906 MS66 Red NGC.** A lovely orange-gold Indian type coin. Incidental contact is confined to the obverse, while the few carbon flecks are relegated to the central reverse. Census: 35 in 66 Red, 1 finer (12/13). NGC ID# 2293, PCGS# 2225
- 3073 1906 MS66 Red PCGS.** Vibrant golden-orange luster cascades over both sides of this Premium Gem. Well-struck except for weakness in the tips of the first three feathers. Light contact is visible on the jaw and traces of carbon are scattered about, especially on the obverse. Population: 19 in 66 Red, 2 finer (12/13). NGC ID# 2293, PCGS# 2225
- 3074 1908-S MS65 Red and Brown PCGS. CAC.** Whispers of cobalt-blue and crimson reside on the lustrous yellow-gold surfaces of this Gem semi-key example. Well-struck save for the usual softness in the first few feather tips. Devoid of mentionable marks or spots, and yielding pleasing eye appeal. NGC ID# 2296, PCGS# 2233
- 3075 1908-S MS64 Red PCGS. CAC.** The first branch mint copper or nickel issue, the 1908-S is low mintage and scarce in quality Uncirculated grades. This sun-gold near-Gem is lustrous and nicely struck. Carbon and contact are minor.
Ex: Empire Collection (Stack's, 11/1957), lot 381.
From The Teich Family Collection. NGC ID# 2296, PCGS# 2234
- 3076 1908-S MS64 Red PCGS. CAC.** *Ex: Teich Family Collection.* This well-detailed Choice specimen displays a touch of softness on the headdress feathers and blazing original red surfaces with few signs of contact. Eye appeal is outstanding.
From The Teich Family Collection. NGC ID# 2296, PCGS# 2234
- 3077 1909-S MS62 Brown PCGS. CAC.** Cataloged as "almost full mint red" for its 1960 Stack's appearance, this coruscating key date cent is now rich sea-green and tan-brown. Refreshingly free from marks.
Ex: Jim S. White Collection (Stack's, 2/1960), lot 354.
From The Teich Family Collection. NGC ID# 2298, PCGS# 2238
- 3078 1909-S MS63 Brown NGC.** Faint blue and violet overtones visit the mushroom-brown surfaces of this final-year San Francisco Indian cent. Strong overall detail with four complete diamonds on the hair ribbon. NGC ID# 2298, PCGS# 2238
- 3079 1909-S MS64 Brown PCGS. CAC.** This attractive Choice specimen represents the final date of the Indian design. The well-preserved surfaces are an even shade of medium brown, with minor signs of contact and no trace of carbon. Population: 53 in 64 Brown, 6 finer (12/13). NGC ID# 2298, PCGS# 2238
- 3080 1909-S MS63 Red and Brown PCGS.** *Ex: Teich Family Collection.* A pleasing example of the final Indian cent issue, this S-Mint piece has intermingled light orange mint frost with olive overtones. A prominent carbon spot is noted at the top of the obverse.
From The Teich Family Collection. NGC ID# 2298, PCGS# 2239

**1909-S Indian Head Cent, MS64 Red
Splendid, Bright-Orange Appeal**

- 3081 1909-S MS64 Red PCGS. CAC.** A key issue in the series and arguably more scarce than its Lincoln cent counterparts, the 1909-S Indian cent seems undervalued. Both the obverse and reverse surfaces of this pleasing San Francisco cent are unencumbered and appear refreshingly new. Bright orange color with red accents cover clean, lustrous surfaces without any mentionable abrasions. One small defect appears on the reverse near the T of CENT, and perhaps some slight rounding of the headdress feathers are all that limit the near-Gem grade of this splendid key issue.
From The Teich Family Collection. NGC ID# 2298, PCGS# 2240

**1909-S Indian Head Cent, MS64 Red
Lively Orange Surfaces**

- 3082 1909-S MS64 Red PCGS. CAC.** Excellent mint luster swirls on this orange-red cent, the final date of the series with a low mintage of 309,000 pieces. The strike, while not full, is relatively sharp in critical areas such as the headdress feather detail. A few obverse flecks do not detract from overall eye appeal of this vibrant Red San Francisco issue.
From The Teich Family Collection. NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

- 3083 1859 PR63 PCGS. CAC.** Though Laurel Wreath Indian cents are plentiful in business format, proofs are scarce and an important single-year type. Crisply struck and satiny with pleasing chestnut-gold surfaces.
Ex: Jim Spaulding White Collection (Stack's, 2/1960), lot 511.
From The Teich Family Collection. NGC ID# 2299, PCGS# 2247
- 3084 1860 PR64 PCGS. CAC.** *Ex: Teich Family Collection.* This lovely Choice proof copper-nickel Indian cent represents the first year of the modified design with a shield at the top of the wreath. This example has the rounded bust point as do all proofs. The fully mirrored light tan surfaces host intermingled gold and iridescent toning.
From The Teich Family Collection. NGC ID# 229A, PCGS# 2253

3085 1861 PR64 PCGS. Ex: Teich Family Collection. The white-tan surfaces of this near-Gem Proof cent display modest field-motif contrast when the coin is tilted slightly under a light source. All design elements are fully brought up. A couple of greenish flecks are noted on the obverse. Population: 60 in 64, 25 finer (12/13).
From *The Teich Family Collection*. NGC ID# 229B, PCGS# 2256

3086 1862 PR64 Cameo PCGS. CAC. Only 550 proof Indian cents were struck in 1862. This sharply detailed Choice specimen exhibits deeply reflective fields with only minor signs of contact. Bold field-device contrast is evident on both sides. Population: 23 in 64 Cameo, 47 finer (12/13). PCGS# 82259

3087 1862 PR64 Cameo PCGS. CAC. Luminous caramel-gold fields contrast with fully struck motifs. Scattered pinpoint flecks are all that preclude a higher grade. 550 proofs struck for this Civil War date. Ex: *Empire Collection (Stack's, 11/1957)*, lot 326.
From *The Teich Family Collection*. PCGS# 82259

3088 1863 PR63+ PCGS. CAC. Cherry-red, lemon-gold, and pumpkin-orange patina endows this razor-sharp and flashy specimen. Faint marks accompany a minor spot below the O in OF. Ex: *Public Auction Sale (Stack's, 6/1958)*, lot 1167.
From *The Teich Family Collection*. NGC ID# 229D, PCGS# 2262

3089 1864 Copper-Nickel PR64 PCGS. The obverse is light wheat-gold and highly attractive. The reverse is dusky olive-brown. Cataloged as "very high wire edge" in its 1957 Stack's auction appearance, though the encapsulation makes this feature difficult to discern. Only 370 proofs struck. Ex: *Empire Collection (Stack's, 11/1957)*, lot 329.
From *The Teich Family Collection*. NGC ID# 229E, PCGS# 2265

**1864 Copper-Nickel Cent, PR66
Good Reflectivity, Attractive Color**

3090 1864 Copper-Nickel PR66 PCGS. The 1864 and 1862 are the best-produced and most frequently used copper-nickel cents. And for obvious reasons. They are by far the best-produced dates in this short and highly collectible series. The fields on this piece are deeply reflective and each side shows a reddish accent of color over the otherwise gray-tan color of the copper-nickel alloy. Fully struck, as one would expect, with no mentionable flaws. Population: 8 in 66, 2 finer (12/13). NGC ID# 229E, PCGS# 2265

3091 1864 Bronze No L PR63 Red and Brown PCGS. CAC. Lemon-gold, cherry-red, and forest-green bathe this fully impressed and flashy proof Civil War cent. The obverse periphery has a few small spots, most evident near OF. A *Guide Book* mintage of only 150+ pieces. Ex: *Philip G. Straus Collection (Stack's, 5/1959)*, lot 430.
From *The Teich Family Collection*. NGC ID# 229F, PCGS# 2277

**1865 Indian Head Cent, PR64
Rare in Red Cameo**

3092 1865 PR64 Red Cameo PCGS. A brilliant Red proof with deep mirrors and frosted devices — a rarity for this date. While fully Red proofs of his vintage are seldom original, this example has no telltale hairlines or distractions. A rather sizeable area of carbon on the reverse beneath the N in CENT accounts for the near-Gem grade. The coin is otherwise pristine and highly attractive with a full strike and lustrous orange surfaces. Population: 6 in 64 Cameo, 2 finer (12/13).
From *The Teich Family Collection*. PCGS# 82284

3093 1868 PR65 Red and Brown PCGS. Orange-red is predominant though olive-green is also present. Fully struck and flashy with scattered minuscule flecks on the left obverse field. The dies are widely rotated. Ex: *Metropolitan New York Numismatic Convention (Stack's, 5/1958)*, lot 1496.
From *The Teich Family Collection*. NGC ID# 229L, PCGS# 2292

**1873 Indian Head Cent, PR66 Red
Closed 3, Tied for Finest Certified**

3094 1873 Closed 3 PR66 Red PCGS. An estimated mintage of 1,100 proofs are all of the Closed 3 design, as opposed to business strikes of the date where coins were minted with both Closed and Open 3s. This example is deeply mirrored with a full strike on the devices. Attractive orange surfaces show violet accents at the centers. No mentionable contact marks are seen under magnification except for a single, thin mark on the T of CENT. The surfaces are carbon-free to the eye with only a few microscopic flecks visible under a glass. Population: 3 in 66 Red, 0 finer (12/13). NGC ID# 229S, PCGS# 2308

3095 1876 PR66 Red and Brown PCGS. CAC. Ex: Teich Family Collection. This delightful Premium Gem shows a few hints of light brown toning on the deeply reflective red surfaces, with sharply detailed design elements and outstanding eye appeal. Population: 12 in 66 (1 in 66+) Red and Brown, 0 finer (12/13).
From *The Teich Family Collection*. NGC ID# 229V, PCGS# 2316

Proof 1877 Cent

- 3096 1877 PCGS Genuine. Proof.** Bold N in ONE. The PCGS number ending in .91 suggests Questionable Color as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin is a proof with Uncirculated details that has been recolored. The obverse displays attractive bands of peach, apple-green, and ruby-red. The reverse has a lavender center but wheat-gold and jade-green are also evident.
From The Teich Family Collection. NGC ID# 229W, PCGS# 2318

1877 Indian Head Cent, PR64 Brown Orange and Purple-Brown Patina

- 3097 1877 PR64 Brown PCGS. CAC.** Because of its scarcity as a circulation strike, demand for this date in Proof format far outstrips the number of proof survivors available. Despite its "brown" designation, this attractive example has a large amount of orange flash, particularly on the obverse. The strike is bold and well brought-up. The reverse is sharp and appealing, with a couple of tiny specks apparently keeping this attractive cent from an even higher grade. Few are certified finer. Population: 24 in 64 Brown, 11 finer (12/13).
From The Teich Family Collection. NGC ID# 229W, PCGS# 2318

- 3098 1878 PR65 Red and Brown PCGS. CAC.** This better-date Indian cent is popular in both business strike and proof formats. There is very little evidence of brown or mellowing on the almost completely red surfaces. Fully struck and nicely reflective. NGC ID# 229X, PCGS# 2322

- 3099 1878 PR65 ★ Red Cameo NGC.** The Star designation is rare on proof 1878 cents. As of (12/13), NGC has certified just two such specimens, a PR65 Red and Brown and the present Gem. Probably, the dazzling field reflectivity is the reason for the Star notation. In addition, the strike is intricate and the pumpkin-gold color shows only occasional mellowing to purple. PCGS# 82323

- 3100 1879 PR66 Red and Brown PCGS.** Ex: Teich Family Collection. Rich red color is intermixed with bright yellow over each side with an arc of deep blue at the margin of each side. Evidence of heavy die polishing can be seen on each side, giving the coin added brightness and vibrancy. Population: 32 in 66 Red and Brown, 9 finer (12/13).
From The Teich Family Collection. NGC ID# 229Y, PCGS# 2325

- 3101 1881 PR65 Red PCGS.** Ex: Teich Family Collection. The design elements of this impressive Gem exhibit razor-sharp definition throughout, with deeply reflective fields and well-preserved original red surfaces. Population: 54 in 65 Red, 25 finer (12/13).
From The Teich Family Collection. NGC ID# 22A2, PCGS# 2332

1882 Indian Cent, PR67 Red and Brown None Certified Finer by PCGS or NGC

- 3102 1882 PR67 Red and Brown PCGS. CAC.** While 3,100 proofs were produced for the year, few have survived in the near-flawless condition of this Superb Gem. Mirrored fields surround fully struck, lightly frosted devices. Exquisite, blended colors include violet and orange-red centers with yellow-orange accents. A few scattered, microscopic carbon flecks do not distract from the intense appeal of this remarkable proof. Population: 3 in 67 Red and Brown, 0 finer (12/13).
From The Teich Family Collection. NGC ID# 22A3, PCGS# 2334

- 3103 1883 PR66 Brown PCGS. CAC.** Ex: Teich Family Collection. The original red surfaces of this delightful Premium Gem have mellowed to include shades of violet and lilac patina. The design elements are sharply detailed and eye appeal is terrific. Population: 43 in 66 (3 in 66+) Brown, 13 finer (12/13).
From The Teich Family Collection. NGC ID# 22A4, PCGS# 2336

- 3104 1884 PR66 Red and Brown PCGS.** If displayed obverse-up, this would appear as a full red coin. However, the reverse is slightly and evenly mellowed. The fields are brightly reflective and there are no obvious contact marks on this high-grade proof. Population: 48 in 66 Red and Brown, 16 finer (12/13). NGC ID# 22A5, PCGS# 2340

1888 Cent, PR65 Red Vibrant Color

- 3105 1888 PR65 Red PCGS. CAC.** The fully Red surfaces of this Gem proof make it an unusual delight. The colors, pale copper-gold and apricot on the obverse with richer orange and peach on the reverse, are vibrant and delightful. Sharply struck and pleasingly preserved. Population: 9 in 65 Red, 2 finer (12/13). NGC ID# 22AA, PCGS# 2353

- 3106 1890 PR65 Red PCGS.** Razor-sharp definition is evident on all design elements of this delightful Gem and the original orange-red surfaces are deeply reflective, with a few dark color specks on both sides. Population: 21 in 65 Red, 2 finer (12/13). NGC ID# 22AC, PCGS# 2359

- 3107 1894 PR65 Red PCGS.** Ex: Teich Family Collection. The well-preserved original red surfaces of this delightful Gem display few signs of contact. The sharply detailed design elements and reflective fields add to the outstanding eye appeal. Population: 29 in 65 Red, 9 finer (12/13).
From The Teich Family Collection. NGC ID# 22AG, PCGS# 2371
- 3108 1901 PR66+ Red and Brown PCGS.** Ex: Teich Family Collection. Crimson patination resides on the obverse of this high-end Premium Gem, ceding to brilliant orange-gold on the reverse. Fully struck design features and immaculately preserved surfaces ensure the coin's fantastic eye appeal. Population: 3 in 66+ Red and Brown, 10 finer (12/13).
From The Teich Family Collection. NGC ID# 22AP, PCGS# 2391
- 3109 1901 PR66 Red NGC.** Light gold color overall with only occasional hints of mint-green and autumnal orange. An attractive 20th century proof with minimal carbon. Census: 10 in 66 Red, 6 finer (12/13). NGC ID# 22AP, PCGS# 2392
- 3110 1902 PR66 Red PCGS.** Ex: Teich Family Collection. Sharply struck design elements include needle-like detail on the feather tips and all four diamonds. Whispers of crimson visit the luminous orange-gold surfaces. A tiny green spot is visible on the crossbar of the N in CENT. Population: 28 in 66 Red, 9 finer (12/13).
From The Teich Family Collection. NGC ID# 22AR, PCGS# 2395

LINCOLN CENTS

- 3111 1909-S VDB AU50 PCGS.** Light to medium tan patination runs over both sides of this AU Lincoln. The design elements are well-defined. NGC ID# 22B2, PCGS# 2426
- 3112 1909-S VDB AU55 PCGS.** Soft light brown color graces both sides of this well-struck key-date example. Both sides are devoid of significant marks or spots. NGC ID# 22B2, PCGS# 2426
- 3113 1909-S VDB AU55 PCGS.** Just a trace of wear shows on the well-detailed design elements of this famous first-year key, and the designer's initials remain boldly visible. The lightly abraded surfaces show a mix of original red and light brown patina. NGC ID# 22B2, PCGS# 2426
- 3114 1909-S VDB — Improperly Cleaned — NGC Details. Unc.** Peach-gold and steel-blue are evident with the prior shade more prevalent. Highly lustrous and fully struck, but likely recolored at one time. Smooth aside from a single hair-thin line on Lincoln's coat near the bowtie. NGC ID# 22B2, PCGS# 2426
- 3115 1909-S VDB MS64 Brown PCGS. CAC.** Pleasing apple-green and golden-brown blend throughout this coruscating and mark-free near-Gem. The strike is crisp, especially on the all-important VDB initials. Certified in an older generation holder. NGC ID# 22B2, PCGS# 2426
- 3116 1909-S VDB MS63 Red and Brown PCGS.** A dusky orange and sun-gold key date cent that boasts vibrant luster and a sharp strike. The reverse is exemplary while the obverse displays distributed minute flecks.
Ex: S.E. Goldsmith Collection (Stack's, 10/1958), lot 29.
From The Teich Family Collection. NGC ID# 22B2, PCGS# 2427
- 3117 1909-S VDB MS64 Red and Brown NGC.** Considerable copper-orange color remains on otherwise mahogany and olive surfaces. Minimally abraded, though a carbon spot appears behind Lincoln's head. NGC ID# 22B2, PCGS# 2427
- 3118 1909-S VDB MS64 Red and Brown NGC.** The lustrous surfaces of this near-Gem key-date representative display hints of golden-tan patination and sharply struck devices, including the VDB initials. An occasional fleck or light mark do not disturb. NGC ID# 22B2, PCGS# 2427

- 3119 1909-S VDB MS64 Red and Brown PCGS.** Ex: Teich Family Collection. The pleasing surfaces of this important series key show a mix of original red and light brown patina, with well-detailed design elements and bold designer's initials.
From The Teich Family Collection. NGC ID# 22B2, PCGS# 2427
- 3120 1909-S VDB MS64 Red and Brown PCGS. CAC.** A pleasing Choice specimen of this low-mintage key, with sharply detailed design elements and traces of mint luster. The surfaces display a mix of light brown and original red toning. NGC ID# 22B2, PCGS# 2427
- 3121 1909-S VDB MS64 Red and Brown PCGS. CAC.** This dusky peach-red key date near-Gem is precisely struck and exhibits a natural wood-grain texture on the fields. A hair-thin mark is noted above the date and both sides display infrequent minute flecks.
Ex: S.E. Goldsmith Collection (Stack's, 10/1958), lot 30.
From The Teich Family Collection. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red and Brown A Collector Classic

- 3122 1909-S VDB MS65 Red and Brown PCGS.** Rich violet, mahogany, and peach hues mingle on this gorgeous Red and Brown example of the famous 1909-S VDB cent. Satiny fields are smooth, as are the well-defined features of Lincoln. Housed in a green label holder. PCGS has graded only 32 coins as MS66 Red and Brown or finer in the color category (12/13). NGC ID# 22B2, PCGS# 2427
- 3123 1909-S VDB MS64 Red PCGS.** The lustrous surfaces of this key-date near-Gem display yellow-gold color imbued with traces of reddish-gold, especially on the reverse. The design elements are sharply struck, including excellent definition in the date, mintmark, and VDB initials. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS65 Red An American Classic

- 3124 1909-S VDB MS65 Red PCGS.** This low mintage, first year of issue is destined to remain a classic in American coinage as it has for more than a century now. This full red example has a fine woodgrain texture that is often found on cents from this year, with slightly mellowed mint color. Sharply struck. Housed in a green-label PCGS holder. NGC ID# 22B2, PCGS# 2428
- 3125 1909-S MS65 Red PCGS. CAC.** Yellow-gold luster dominates both sides of this razor-sharp Lincoln Gem. Both sides have been well cared for. Excellent overall eye appeal. Housed in a prior generation green-label holder. NGC ID# 22B4, PCGS# 2434

3126 1909-S S Over Horizontal S MS65 Red PCGS. CAC. FS-1502. The lustrous orange and yellow-gold surfaces exhibit sharply struck design features. Both sides have been well cared for. Population: 4 in 65 Red, 1 finer (12/13). PCGS# 92434

3127 1910-S MS66 Red NGC. A few splashes of light green visit the orange-gold surfaces of this early date Premium Gem Lincoln cent. Nicely struck except for the usual softness in the right part of the right wheat stalk. Census: 45 in 66 Red, 4 finer (12/13). NGC ID# 22B6, PCGS# 2440

1910-S Lincoln Cent, MS66 Red

3128 1910-S MS66 Red PCGS. CAC. Scattered carbon specks appear on the highly lustrous light orange mint surfaces of this lovely Premium Gem. The strike is bold and no other marks of any consequence appear on the brilliant surfaces. Population: 66 in 66 (1 in 66+) Red, 3 finer (12/13). NGC ID# 22B6, PCGS# 2440

3129 1911-D MS65 Red PCGS. CAC. Orange luster adorns this well-defined, impeccably preserved D-mint Gem. The reverse is rotated a few degree counterclockwise. Very difficult to obtain any finer. NGC ID# 22B8, PCGS# 2446

3130 1911-S MS65 Red and Brown PCGS. CAC. Hints of delicate azure-blue make occasional visits to the reddish-gold surfaces of this lovely Gem. The design features are sharply struck throughout. Population: 61 in 65 (1 in 65+) Red and Brown, 0 finer (12/13). NGC ID# 22B9, PCGS# 2448

3131 1912 MS66 Red PCGS. CAC. Both sides of this Premium Gem are awash with copper-red luster and each exhibits crisply struck motifs. Great overall eye appeal, aptly recognized by CAC. Population: 87 in 66 (2 in 66+) Red, 8 finer (12/13). NGC ID# 22BA, PCGS# 2452

1912-S Cent, Red Gem Little-Saved on Release

3132 1912-S MS65 Red PCGS. Light copper-gold color has occasional strawberry-cream accents. Better-defined than often seen for this San Francisco issue that was neglected in its day. Red Gems such as the present coin are significant in Registry collecting. Population: 58 in 65 (3 in 65+) Red, 0 finer (12/13). NGC ID# 22BC, PCGS# 2458

3133 1913 MS66 Red PCGS. The lustrous surfaces of this Premium Gem exhibit well-struck design elements. Both sides have been well cared for. Population: 63 in 66 Red, 7 finer (12/13). NGC ID# 22BD, PCGS# 2461

3134 1913 MS66 Red PCGS. Magnificent yellow-gold color along with occasional splashes of apricot yield highly pleasing eye appeal on this early date Lincoln. Sharply struck throughout and revealing no mentionable marks or spotting. Population: 63 in 66 Red, 7 finer (12/13). NGC ID# 22BD, PCGS# 2461

3135 1914-D XF45 PCGS. Light wear on the cheekbone confirms brief circulation, but this key date cent retains rich design definition. Toned deep chocolate-brown. The surfaces are generally unmarked though minor carbon is localized near the date. Encapsulated in a green label holder. NGC ID# 22BH, PCGS# 2471

1914-D Lincoln Cent, MS62 Red and Brown Key Date, Problem-Free

3136 1914-D MS62 Red and Brown PCGS. With just under 1.2 million pieces produced, the 1914-D is the scarcest Denver Mint Lincoln cent. This example is original and pleasing, with an abundance of mint Red blended with auburn toning for excellent eye appeal. A few short abrasions on the obverse account for the assigned grade. The strike is nearly full, with strong detail on Lincoln's hair, beard, and shoulder.

From The Teich Family Collection. NGC ID# 22BH, PCGS# 2472

3137 1915 MS65 Red PCGS. CAC. Ex: Teich Family Collection. Only a single pair of dies were used to strike the 1,150 matte proof cents in 1915. This is a full red example with no mellowing. A few tiny specks of carbon are apparently all that keep this from an even higher grade.

From The Teich Family Collection. NGC ID# 22BK, PCGS# 2479

3138 1916-S MS64 Red PCGS. CAC. Ex: Teich Family Collection. All of the early branch-Mint Lincoln cents are rare with fully brilliant mint color. This example has a typical strike with satiny luster and brilliant reddish-orange mint color. A few scattered spots are expected at this grade. PCGS has only certified 23 finer examples. *From The Teich Family Collection.* NGC ID# 22BR, PCGS# 2494

3139 1917 MS66 Red PCGS. Orange and yellow-gold luster issues from both sides of this Premium Gem, each of which is nicely preserved. All design elements are exceptionally well-struck. NGC ID# 22BS, PCGS# 2497

1917 Lincoln Cent, MS62 Brown FS-101, Doubled Die Obverse

3140 1917 Doubled Die Obverse MS62 Brown NGC. FS-101. Formerly attributed as FS-013, as marked on the NGC label. This olive-brown example has streaks of light gold on both sides, giving a classic woodgrain appearance that is often seen on the early Lincoln cents. The appearance is especially noticeable on the reverse. Census: 2 in 62 Brown, 2 finer (12/13). PCGS# 92495

- 3141 1918 MS66 Red PCGS.** Bright orange-gold luster emanates from this sharply struck Premium Gem. A few toning freckles are visible, especially on the reverse. NGC ID# 22BV, PCGS# 2506
- 3142 1918-S MS65 Red and Brown PCGS. CAC.** Whispers of crimson and electric-blue make occasional visits to this S-mint Gem, somewhat more so on the obverse. Well struck for the most part, though softness is seen on some of the letters in UNITED STATES OF AMERICA. Both sides are devoid of mentionable contacts or spots. Population: 21 in 65 Red and Brown, 0 finer (12/13). NGC ID# 22BX, PCGS# 2511
- 3143 1919 MS66 Red PCGS. CAC.** This boldly defined Premium Gem has frosty orange luster. The few light marks are within the parameters of the designated grade. A great fit for a high-grade Lincoln collection. NGC ID# 22BY, PCGS# 2515
- 3144 1919-S MS64 Red PCGS. CAC.** An exquisite orange-red Choice better date cent. The strike shows inexactness on the O in ONE but marks are absent and carbon is minor. A high mintage branch issue but relatively few were saved.
Ex: S.E. Goldsmith Collection (Stack's, 10/1958), lot number unrecorded.
From The Teich Family Collection. NGC ID# 22C2, PCGS# 2521
- 3145 1921-S MS65 Red and Brown PCGS. CAC.** An occasional splash of crimson and sky-blue visit the reverse of this otherwise peach-gold S-mint cent. Both sides are sharply struck and devoid of mentionable marks or spots. Housed in a prior generation green-label holder. Population: 39 in 65 Red and Brown, 0 finer (12/13). NGC ID# 22C7, PCGS# 2535
- 3146 1922 No D Strong Reverse XF40 ANACS. FS-401. Die Pair 2.** The Strong Reverse Die Pair 2 is the only widely collected and highly valued 1922 No D die pairing of the three known. Light brown and golden-brown patination runs over both sides, each of which is devoid of significant marks or spots. NGC ID# 22C9, PCGS# 3285

**1922 No D Cent, Choice AU
Splendid Multicolor Toning**

- 3147 1922 No D Strong Reverse AU55 NGC. FS-401. Die Pair 2.** Luster fills the borders of this beautifully toned key date cent. Lilac-red, pumpkin-orange, and lime-green encompass both sides. Carbon is confined to two minute flecks, one near the base of the shoulder and the other to the right of the date. Two thin marks are noted, on the right base of the portrait and east of the E in ONE. NGC ID# 22C9, PCGS# 3285
- 3148 1923-S MS64 Red and Brown PCGS.** Rich fire-red and gunmetal-gray embrace this essentially mark-free better date Denver cent. The strike is good and the sole apparent imperfection is a small spot east of the E in ONE. NGC ID# 22CB, PCGS# 2547
- 3149 1923-S MS64 Red and Brown PCGS. CAC.** *Ex: Teich Family Collection.* The glossy surfaces of this attractive Choice specimen display a mix of original red and light brown patina, with bright mint luster underneath and sharply detailed design elements. PCGS has graded 16 numerically finer examples (12/13).
From The Teich Family Collection. NGC ID# 22CB, PCGS# 2547

- 3150 1924-S MS64 Red and Brown PCGS. CAC.** *Ex: Teich Family Collection.* The sharply detailed design elements of this impressive Choice specimen are complemented by lustrous surfaces that show a mix of original red and light brown patina. PCGS has graded 23 numerically finer examples (12/13).
From The Teich Family Collection. NGC ID# 22CE, PCGS# 2556

**1925-D Cent, MS65 Red
Significant Registry Coin**

- 3151 1925-D MS65 Red PCGS.** Surprisingly fresh with a mix of pale copper-gold and richer peach shadings, the deepest hues concentrated on the inner reverse. The portrait side is minimally marked, though a shallow cut affects the top of the O and the middle of the N in ONE. Population: 43 in 65 Red, 2 finer (12/13). NGC ID# 22CG, PCGS# 2563
- 3152 1926 MS67 Red PCGS.** Both sides of this sharply struck Superb Gem are awash with orange-gold luster, and each is nicely preserved. Population: 93 in 67 Red, 0 finer (12/13). NGC ID# 22CJ, PCGS# 2569
- 3153 1926 MS67 Red PCGS. CAC.** Vibrant copper-gold luster reaches out to the observer of this exemplary Superb Gem. A few minor unobtrusive marks might actually prevent an even finer grade. NGC ID# 22CJ, PCGS# 2569
- 3154 1926-D MS65 Red and Brown PCGS. CAC.** Considerable copper-gold luster shows through the veneer of soft bluish-tan patina. Well-struck except for the usual softness in parts of the wheat stalks. Population: 23 in 65 Red and Brown, 1 finer (12/13). NGC ID# 22CK, PCGS# 2571
- 3155 1926-S MS64 Brown PCGS.** Glossy surfaces are minimally abraded. For a "Brown" coin this piece shows considerable color, particularly on the reverse with its interior violet-rose and peach shadings. Population: 55 in 64 Brown, 4 finer (12/13). NGC ID# 22CL, PCGS# 2573
- 3156 1926-S MS63 Red and Brown PCGS. CAC.** Mostly violet surfaces have a window of unfaded peach at the left reverse. A pleasing example of this surprisingly challenging issue of fewer than 4.6 million pieces. NGC ID# 22CL, PCGS# 2574
- 3157 1926-S MS64 Red and Brown PCGS. CAC.** Although over 4.5 million pieces were minted, this San Francisco issue is a key date and a condition rarity in mid-to-higher Mint State grades. Generous amounts of lustrous, mint Red appear on both the sides of the coin. The issue is seldom fully struck, but a strong obverse strike adds to the appeal of this example. The reverse displays several prominent die cracks. A glass reveals a few tiny carbon flecks as well as one notable reverse abrasion on the O of OF. PCGS has certified just 14 pieces finer in Red and Brown (1/14). NGC ID# 22CL, PCGS# 2574

**1926-S Lincoln Cent, MS64 Red and Brown
Few Certified Finer**

- 3158 1926-S MS64 Red and Brown PCGS. CAC.** A splendid, strongly struck example of this scarce date, which had a relatively small mintage of just over 4.5 million pieces. Seasoned collectors of Lincoln cents gravitate toward attractive Red and Brown examples, drawn to the original “skin” of the coin and the natural interplay between the red and brown hues. This example is exceptional in that regard, with fiery red accents merging with brown-copper surfaces. Lustrous surfaces show only a few tiny abrasions, none of them significant.
From The Teich Family Collection. NGC ID# 22CL, PCGS# 2574

- 3159 1927-D MS65 Red PCGS.** A pumpkin-orange Gem with a crisp strike and dynamic luster. A pair of small spots noted on the left reverse. Housed in a green label holder. Population: 52 in 65 Red, 2 finer (12/13). NGC ID# 22CN, PCGS# 2581

**1929 Lincoln Cent, MS67+ Red
None Certified Finer by Either Service**

- 3160 1929 MS67+ Red PCGS. CAC.** This is a common Philadelphia issue — more than 185 million pieces were minted — in a clearly uncommon state of preservation. As the only PCGS representative of the date certified MS67 with the Plus designation for quality, it ranks high on the list of finest known 1929 cents in Red condition. The coin is fully struck with superior shoulder detail and sharpness on all the devices. Blazing, orange-red toning enhances surfaces that are lustrous, spot-free, and without meaningful abrasions. Population: 54 in 67 (1 in 67+) Red, 0 finer (12/13). NGC ID# 22CU, PCGS# 2596

- 3161 1930 MS67 Red PCGS.** Uniform orange-gold luster graces both sides of this well-struck superb Gem. Free of mentionable marks or spots. Population: 81 in 67 (1 in 67+) Red, 1 finer (12/13). NGC ID# 22CX, PCGS# 2605

- 3162 1931-D MS65 Red PCGS. CAC.** Lustrous surfaces display attractive copper-orange color and exhibit strong definition on the design elements. Housed in a prior generation holder. Fully red specimens are difficult to locate in higher grades. NGC ID# 22D3, PCGS# 2617

- 3163 1931-S MS65 Red PCGS.** Copper-gold luster cascades throughout this sharply struck Gem. A couple of minor flecks of carbon are visible on the reverse. NGC ID# 22D4, PCGS# 2620

- 3164 1931-S MS65+ Red PCGS. CAC.** While saved in large numbers, few display the bright mint luster seen on this piece. A few streaks of grease were struck into the lower reverse, the only feature we can remotely call a defect on this splendid cent. NGC ID# 22D4, PCGS# 2620

- 3165 1931-S MS66 Red PCGS.** This well-struck Premium Gem displays deep orange-gold luster on the obverse, ceding to lighter hues on the reverse except for a splash of deeper orange in the center. A few minute marks are visible, more so on the reverse. Population: 84 in 66 Red, 0 finer (12/13). NGC ID# 22D4, PCGS# 2620

- 3166 1932 MS66+ Red PCGS Secure. CAC.** Yellow-gold luster cascades over the impeccably preserved surfaces of this high-end Premium Gem. The design elements are sharply impressed throughout. Population: 3 in 66+ Red, 25 finer (12/13). NGC ID# 22D5, PCGS# 2623

- 3167 1932-D MS66 Red PCGS. CAC.** Copper-orange luster emanates from both sides of this Premium Gem, each of which exhibits sharply struck design elements. Occasional whispers of reddish-gold occur on the upper reverse. NGC ID# 22D6, PCGS# 2626

- 3168 1944-D/S MS65 Red NGC. FS-512.** One of two different 1944-D/S varieties, FS-512 shows the undermintmark to the left and beneath the D, while the more dramatic FS-511 *Guide Book* variety shows the top of the S above the D. Given the old-style FS-021 designation on the NGC insert. A lustrous fire-red example with minor carbon above LIBERTY and east of ONE. PCGS# 37837

- 3169 1945 MS67 Red PCGS.** This spectacular Superb Gem displays original red surfaces with vibrant mint luster and no mentionable signs of contact. The design elements are sharply detailed and eye appeal is tremendous. Population: 53 in 67 Red, 0 finer (12/13). NGC ID# 22EG, PCGS# 2734

**1946-D Lincoln Cent, MS67+ Red
Among the Finest Certified**

- 3170 1946-D MS67+ Red PCGS. CAC.** While some examples of this issue are weakly struck due to die spacing, this Superb Gem appears bold on all the devices. Lincoln's hair and beard have good detail, and the shoulder (the deepest area of the dies) is fully formed. Orange-red surfaces are lustrous and clean, with no visible spots or significant abrasions. No example of this Denver date have been certified finer by PCGS or NGC, although PCGS has given one other coin the Plus designation in MS67 (12/13). NGC ID# 22EL, PCGS# 2746

- 3171 1952-D MS67 Red PCGS Secure. CAC.** Bright orange-gold luster drapes this boldly struck Superb Gem cent. Some light carbon, mostly on the reverse, is visible. Population: 55 in 67 Red, 0 finer (12/13). NGC ID# 22F7, PCGS# 2800

- 3172 1954-D MS67 Red PCGS.** This is a lovely coin for the collector who demands the ultimate in technical quality for their Lincoln cent collection. There is a shimmering blanket orange tinted luster over both sides, as well as a noteworthy lack of distractions. Unknown any finer.
Ex: Long Beach Signature (Heritage, 6/2001), lot 8709. NGC ID# 22FD, PCGS# 2818

- 3173 1955 Doubled Die Obverse XF45 ANACS. FS-101.** A collector-grade example of this spectacular mint error. Olive-green overall with rose-red high points. No marks are obtrusive though we note a small spot on the tip of the nose. Certified in an ANA cache holder. NGC ID# 22FG, PCGS# 2825
- 3174 1955 Doubled Die Obverse AU55 PCGS. FS-101.** A lightly circulated but problem-free Choice AU example of this desirable doubled die variety. Smooth and sharply struck with rich plum-mauve patination. Certified in an old green label holder. NGC ID# 22FG, PCGS# 2825
- 3175 1955 Doubled Die Obverse AU58 NGC. FS-101.** This satiny chocolate-brown example has minimal marks and a good strike. High points such as the jaw and cheekbone display light wear. The best known of all doubled die varieties, regardless of denomination. NGC ID# 22FG, PCGS# 2825
- 3176 1955 Doubled Die Obverse MS62 Brown NGC. FS-101.** The most famous of all doubled die varieties, the 1955 FS-101 was also the first to receive widespread publicity. The present chocolate-brown example has pleasing luster and is free from relevant marks. Traces of faded red cling to design elements. NGC ID# 22FG, PCGS# 2825
- 3177 1955 Doubled Die Obverse MS62 Brown PCGS. FS-101.** A chocolate-brown representative of this famous and dramatic mint error. Protected areas display ocean-blue and ruby-red. Marks are inconsequential save for faint contact on the AT in STATES. NGC ID# 22FG, PCGS# 2825
- 3178 1955 Doubled Die Obverse MS62 Brown NGC. FS-101.** Glimmers of mint red outline design elements, but the fields and high points are deep brown. A lustrous example of the strongest doubled die of the series. The jaw shows minor marks and the central reverse has a subtle gray spot. NGC ID# 22FG, PCGS# 2825
- 3179 1955 Doubled Die Obverse MS62 Brown PCGS Secure. FS-101.** This golden-brown representative is minimally abraded and displays cartwheel sheen. Lincoln's cheekbone and jaw show slight blending. One of the few doubled die varieties that can be observed by the unaided eye. NGC ID# 22FG, PCGS# 2825

1955 Doubled Die Obverse Cent MS64 Brown, FS-101

- 3180 1955 Doubled Die Obverse MS64 Brown PCGS. CAC. FS-101.** Fire-red fills the legends and outlines the portrait, but most of this satiny near-Gem is lavender-brown. Carbon is essentially absent, and a loupe reveals only a few scattered small marks. The rarity of FS-101 in full Red is sometimes ascribed to their purported distribution in vending machine cigarette packs. NGC ID# 22FG, PCGS# 2825
- 3181 1956 MS67 Red PCGS.** Coppery-gold surfaces exhibit pleasing luster and are nicely impressed. Neither side reveals mentionable contact marks or spots. Population: 20 in 67 Red, 0 finer (12/13). NGC ID# 22FK, PCGS# 2836
- 3182 1957-D MS67 Red PCGS.** Bright orange-gold luster emanates from both sides of this impeccably preserved Superb Gem. An impressive strike imparts strong definition to the devices. Population: 48 in 67 Red, 0 finer (12/13). NGC ID# 22FN, PCGS# 2845

- 3183 1957-D MS67 Red PCGS.** A magnificent Superb Gem, with original red surfaces that radiate vibrant mint luster and show no mentionable signs of contact. The design elements are well-detailed and eye appeal is terrific. Population: 49 in 67 Red, 0 finer (12/13). NGC ID# 22FN, PCGS# 2845
- 3184 1957-D MS67 Red PCGS. CAC.** The bright-orange surfaces flash with radiant mint luster on this Superb Gem Red 1957-D cent, among the top-graded examples of the issue at either PCGS or NGC. A few tiny flecks on each side that appear only with a loupe do not disturb the appeal, and the bold strike and paucity of marks make this a premium piece. Population: 49 in 67 Red, 0 finer (12/13). NGC ID# 22FN, PCGS# 2845

1960-D Large Date Lincoln Cent, MS67 Red Modern Condition Rarity

- 3185 1960-D Large Date MS67 Red PCGS.** Incredibly, from the nearly 1.6 billion pieces minted of this issue, just 12 examples have been certified by PCGS in this Superb Gem condition with none finer (12/13). This lustrous, Large Date cent is sharply struck given the state of the dies showing evidence of hub wear. The surfaces are free of spots or significant abrasions. The visual appeal is excellent, with vivid, red-orange toning over smooth fields and a small amount of pink near the rims. A Registry Set candidate in this rare grade. NGC ID# 22FY, PCGS# 2866
- 3186 1968 MS67 Red PCGS.** Vibrant luster emanates from both sides of this sharply struck Memorial cent. A few tiny flecks are visible on the reverse. Population: 16 in 67 Red, 0 finer (12/13). NGC ID# 22GC, PCGS# 2905
- 3187 1972 Doubled Die Obverse MS66 Red PCGS. FS-101.** The remarkable die doubling is surpassed only by the 1955 FS-101. Beautiful peach-red luster bathes this virtually mark-free mint error. The reverse is carbon-free while the reverse has microscopic flecks at the center and a pair of tiny spots. Housed in a green label holder. NGC ID# 22GU, PCGS# 2950
- 3188 1972 Doubled Die Obverse MS66 Red PCGS. FS-101.** A gorgeous orange-red Premium Gem that boasts consistent color, potent luster, and virtually mark-free surfaces. When the variety was first publicized, a well known dealer recalled he had a sealed bag of 1972 cents in the trunk of his car. Once opened, the bag revealed a sizeable count of the dramatic *Guide Book* variety. NGC ID# 22GU, PCGS# 2950
- 3189 1972 Doubled Die Obverse MS66 Red PCGS. FS-101.** An obvious doubled die variety comparable with the even more famous 1955 FS-101. Lustrous and boldly struck with rich orange and rose color and occasional small marks. NGC ID# 22GU, PCGS# 2950
- 3190 1972 Doubled Die Obverse MS66 Red PCGS. CAC. FS-101.** By far the most prominent of the several doubled die varieties known for this issue. Gorgeous orange-red centers are bounded by sea-green peripheries. Nearly pristine save for a small spot near the F in OF. NGC ID# 22GU, PCGS# 2950
- 3191 1984 Doubled Die Obverse MS67+ Red PCGS. FS-101.** Lincoln's ear is widely die doubled. This thoroughly lustrous peach-red Superb Gem is well struck and impressive. Trivial field grazes are confined to the vicinity of the date. Tiny air bubbles are trapped beneath the copper plate, as made and usual for the variety. NGC ID# 22HZ, PCGS# 3062

- 3192 1985 MS68 Red PCGS.** Orange luster shimmers throughout the immaculately preserved surfaces of this MS68 cent. The design detail is quite strong. Population: 20 in 68 (1 in 68+) Red, 0 finer (12/13). NGC ID# 22J3, PCGS# 3071

PROOF LINCOLN CENTS

- 3193 1911 PR64 Red and Brown PCGS.** From a mintage of 1,725 proofs, few remain in higher grades and noticeable amounts of original red remaining. This nicely textured, near-Gem matte proof displays chestnut-brown toning on the obverse with hints of orange. An area of vivid orange hugs the rim near the date. The reverse is primarily full-orange with a few flecks of brown. NGC ID# 22KU, PCGS# 3310
- 3194 1911 PR64 Red PCGS.** Ex: Teich Family Collection. This delightful Choice proof displays blazing original red surfaces, with razor-sharp definition on all design elements. No mentionable distractions are evident and eye appeal is terrific. Population: 21 in 64 Red, 34 finer (12/13).
From The Teich Family Collection. NGC ID# 22KU, PCGS# 3311
- 3195 1914 PR64 Brown PCGS. CAC.** An early state of the dies, with no heavy die lines visible below the chin or the 1 in the date. Just 1,365 proofs were struck. This example shows rich brown toning blending into orange peripheries, with a strong strike on matte surfaces and generous eye appeal. No significant contact marks appear on the coin, which is rare in near-Gem proof format. Population: 27 in 64 Brown, 38 finer (12/13).
From The Teich Family Collection. NGC ID# 22KX, PCGS# 3318
- 3196 1914 PR65 Red and Brown NGC.** The copper-gold surfaces of this Gem are visited by freckles of light blue on the obverse. The design elements are crisply struck throughout. The 1914 matte proofs are very scarce. Census: 34 in 65 Red and Brown, 29 finer (12/13). NGC ID# 22KX, PCGS# 3319
- 3197 1915 PR64 Brown PCGS.** Colorful green, aqua, bronze, and magenta toning highlights appear on this low-mintage matte proof, with just 1,150 pieces produced. The strike is particularly strong on the hair, beard, and bowtie. Several microscopic carbon specs exist on the reverse but do not detract from the distinctive eye appeal of this coin, which likely acquired its unusual color from the sulfur in mint-wrapped tissue paper. Population: 27 in 64 Brown, 41 finer (12/13).
From The Teich Family Collection. NGC ID# 22KY, PCGS# 3321
- 3198 1915 PR64 Red and Brown PCGS. CAC.** Considerable reddish-orange luster shows on this Red and Brown near-Gem matte proof. Crisply defined and gorgeous with just a few minor flecks. Population: 64 in 64 Red and Brown, 65 finer (12/13). NGC ID# 22KY, PCGS# 3322
- 3199 1916 PR63 Red and Brown PCGS. CAC.** Ex: Teich Family Collection. A bold strike and solid, squared rims are hallmarks of this Select matte proof Lincoln cent. Both sides have a blend of mellow orange mint color with bluish-olive toning, and trivial, grade-consistent spots.
From The Teich Family Collection. NGC ID# 22KZ, PCGS# 3325
- 3200 1936 Type One — Satin Finish PR65 Red and Brown NGC.** A flashy rose-red Gem that possesses an intricate strike and exceptional eye appeal. Carbon is virtually absent. Satin finish proofs were only struck in 1936, though brilliant finish pieces were also coined that year. NGC ID# 22L2, PCGS# 3331
- 3201 1936 Type Two — Brilliant Finish PR65 Red NGC.** Luminous golden-orange surfaces are devoid of mentionable marks or spots. Nicely struck throughout. NGC ID# 22L3, PCGS# 3335

- 3202 1936 Type Two — Brilliant Finish PR65 Red PCGS.** Ex: Teich Family Collection. This lovely Gem proof has brilliant orange surfaces with splashes of deep red, over full mirrors. This highly attractive example will make a nice addition to a specialized collection or type set.
From The Teich Family Collection. NGC ID# 22L3, PCGS# 3335
- 3203 1936 Type Two — Brilliant Finish PR65 Red NGC.** The deeply reflective surfaces of this delightful Gem are blazing original red, with no mentionable distractions. The design elements are sharply detailed and eye appeal is outstanding. Census: 68 in 65 (2 in 65 ★) Red, 20 finer (1/14). NGC ID# 22L3, PCGS# 3335
- 3204 1938 PR66 Red Cameo NGC.** Razor-sharp definition is evident on all design elements of this impressive Premium Gem, and the frosty devices contrast boldly with the deeply reflective red fields. Cameo examples are seldom encountered because the Mint used an all-brilliant finish on proofs in 1938. Census: 15 in 66 Red Cameo, 2 finer (1/14). NGC ID# 22L5, PCGS# 83341
- 3205 1942 PR66 Red PCGS. CAC.** Luminous orange-gold surfaces greet the observer of this sharply struck Premium Gem proof. A small toning fleck to the lower left of the 9 in the date may barely prevent an even finer numerical grade. Nevertheless, fantastic overall eye appeal, aptly recognized by CAC. Housed in a prior generation green-label holder. NGC ID# 22L9, PCGS# 3353

TWO CENT PIECES

- 3206 1864 Small Motto MS63 Brown NGC. CAC. FS-401.** A sharply struck Select representative of the initial and ephemeral Small Motto subtype. The ocean-blue and walnut-brown surfaces are satiny and virtually unabraded. NGC ID# 22N8, PCGS# 3579

1864 Small Motto Two Cent, MS65 Brown None Finer by PCGS in Brown

- 3207 1864 Small Motto MS65 Brown PCGS. CAC. FS-401.** A response to the demand for "hard money" and sandwiched between large mintages of Indian Head cents in 1863 and the new nickel three-cent piece in 1865, the two-cent piece found a brief moment of acceptance in 1864 when nearly 20 million pieces were minted. Most were of the Large Motto variety — the Small Motto issue is scarce in all grades and rare in Gem condition such as this appealing example. A pleasing rich-brown color with purple-brown centers, vestiges of mint red appear at the margins of this attractive coin. Virtually no abrasions are present. The strike is especially strong, with the Small Motto fully struck and the shield lines and leaf detail complete. Population: 12 in 65 Brown, 0 finer (12/13). NGC ID# 22N8, PCGS# 3579
-

**1864 Small Motto Two Cent Piece
MS63 Red and Brown**

- 3208 1864 Small Motto MS63 Red and Brown PCGS. FS-401.** Though the introductory 1864 two cent piece has a mintage of nearly 20,000,000 pieces, the vast majority of the production was the Large Motto subtype. The Small Motto was issued only briefly. Uncirculated examples with partial mint red are very scarce. Sharply struck and nearly unabraded. The orange, gold, and tan coloration is closer to Red than Brown.
From The Teich Family Collection. NGC ID# 22N8, PCGS# 3580

- 3209 1864 Small Motto MS64 Red NGC. FS-401.** The Small Motto has been one of the most treasured varieties for the two cent series since collectors first tackled it in earnest. The present coin is pale copper-gold overall with some carbon at the upper right obverse and a degree of spotting at the lower and central reverse. Census: 13 in 64 Red, 30 finer (12/13).
Ex: Baltimore Signature (Heritage, 3/2009), lot 352. NGC ID# 22N8, PCGS# 3581

- 3210 1864 Large Motto MS66 Red and Brown NGC. CAC.** Although the 1864 was produced in large numbers and saved in relatively large numbers, few show the preservation of overall surfaces that this piece displays. Additionally, a significant amount of the original red remains on each side. This will make an excellent type choice for some lucky collector. NGC ID# 22N9, PCGS# 3577

- 3211 1864 Large Motto MS65 Red NGC.** An intricately struck and lustrous Gem with unblemished and dusky peach, olive, and cherry surfaces. Carbon-free aside from a fleck inside the wreath at 9 o'clock.
Ex: Long Beach Signature (Heritage, 9/2007), lot 420, which realized \$1,092.50. NGC ID# 22N9, PCGS# 3578

- 3212 1864 Large Motto MS65+ Red PCGS. CAC.** This is a marvelously preserved two cent piece. The surfaces exude bright yellow-red mint luster that is undiminished over the past 150 years. The strike is strong throughout, and only a few specks of carbon prevent an even higher numerical designation. NGC ID# 22N9, PCGS# 3578

- 3213 1869 MS64 Red PCGS.** An attractive Choice two cent piece, with sharply detailed design elements and partially prooflike original red surfaces. Population: 29 in 64 Red, 26 finer (12/13). NGC ID# 22ND, PCGS# 3605

PROOF TWO CENT PIECES

- 3214 1864 Large Motto PR63 Red and Brown PCGS.** Rich fire-red, apple-green, and lavender shades embrace this razor-sharp and unblemished Select proof. The recorded proof mintage is 100 pieces, though an additional number were likely struck.
*Ex: Public Auction (Stack's, 5/1957), lot 31.
From The Teich Family Collection. NGC ID# 274T, PCGS# 3622*

**1864 Two Cent Piece, PR65 Red and Brown
Large Motto Variety**

- 3215 1864 Large Motto PR65 Red and Brown PCGS.** Two cent pieces were struck for the first time in 1864 and the 100 or so proofs that were struck that year all feature the Large Motto. This impressive Gem is sharply detailed throughout and the fields are deeply mirrored. The original red surfaces have mellowed to crimson in some areas. Population: 36 in 65 Red and Brown, 9 finer (12/13). NGC ID# 274T, PCGS# 3622

**1864 Large Motto Two Cent
Appealing PR65 Red and Brown**

- 3216 1864 Large Motto PR65 Red and Brown PCGS. CAC.** Reddish-gold surfaces are visited by whispers of forest-green on the obverse and sky-blue and crimson on the reverse. Sharply struck design elements and well-preserved surfaces heighten the coin's pleasing eye appeal. Population: 36 in 65 Red and Brown, 9 finer (12/13). NGC ID# 274T, PCGS# 3622

- 3217 1865 PR65 Brown PCGS. Plain 5.** This deeply patinated razor-sharp Gem exhibits rich sea-green and lavender undertones. The flashy fields appear undisturbed. A scant 500+ proofs were issued. NGC ID# 274U, PCGS# 3627

- 3218 1865 PR65 Brown PCGS. CAC. Plain 5.** A well struck walnut-brown Gem that displays lighter streaks of golden-brown toning when rotated beneath a light. Outstanding for the designated grade despite a tiny obverse dentil fleck at 3 o'clock. NGC ID# 274U, PCGS# 3627

**1866 Two Cent Piece, PR65 Red
Two Finer Coins at PCGS**

- 3219 1866 PR65 Red PCGS.** An outstanding proof two cent piece. Even after several years of increasing prices, these type coins are still underrated when compared to type coins of other denominations. Although not designated on the insert, the devices on this coin show a light bit of frost which gives a slight but noticeable cameo effect. Light and bright and deeply mirrored with virtually flawless surfaces. Population: 31 in 65 Red, 2 finer (12/13).
From The Greensboro Collection, Part VI. NGC ID# 274V, PCGS# 3632

- 3220 1867 Cameo PR66 Red and Brown NGC.** The original red surfaces of this delightful Premium Gem display a few hints of lavender and gold toning, but this does little to lessen the bold cameo contrast between the deeply mirrored fields and the sharply detailed frosty design elements. Census: 4 in 66 RB Cameo, 0 finer (1/14). PCGS# 83634

- 3221 1869 PR66 Red and Brown NGC. CAC.** The well-preserved reflective surfaces of this impressive Premium Gem are mostly original red, with a trace of light brown toning on the reverse. The design elements are sharply detailed throughout. Census: 26 in 66 Red and Brown, 2 finer (1/14). NGC ID# 274Y, PCGS# 3640

- 3222 1870 PR64 Red NGC.** One of the more available proof issues of the series with an estimated 1,000 pieces produced, this Red example has the look of undipped originality with a sprinkling of copper-red tone over vibrant orange surfaces. The fields have medium reflectivity and are free of all but a couple of microscopic contact marks. There are no carbon spots to mention, with only a couple of small gatherings of copper toning freckles on the pleasing surfaces. Census: 24 in 64 Red, 41 finer (1/14). NGC ID# 274Z, PCGS# 3644

- 3223 1871 PR65 Red and Brown PCGS. CAC.** This well struck sun-gold Gem nearly qualifies as full Red despite occasional pinpoint carbon. TRUST and the right arrow are die doubled counterclockwise, as usual for proofs of this date.
From The Teich Family Collection. NGC ID# 22NH, PCGS# 3646

**1871 Two Cent, PR65 Red
Fresh Luster**

- 3224 1871 PR65 Red NGC.** Remarkably fresh-looking for a copper coin more than a century old, glossy orange overall with a substantial peach element on the reverse. Exquisitely detailed devices are carefully preserved and the sum of post-striking faults is trifling. Census: 31 in 65 (1 in 65+) Red, 8 finer (12/13). NGC ID# 22NH, PCGS# 3647

- 3225 1872 PR64 Red and Brown PCGS.** Evenly mellowed surfaces still exhibit considerable underlying mint red. Fully struck, of course, and showing no obvious surface flaws. NGC ID# 2752, PCGS# 3649

- 3226 1872 PR64 Red and Brown PCGS. CAC. Ex:** Teich Family Collection. This lovely Choice proof has intermingled orange mint color and light brown toning, with fully mirrored fields and sharp details. The reverse has a dark spot at OF.
From The Teich Family Collection. NGC ID# 2752, PCGS# 3649

- 3227 1872 PR64+ Red and Brown PCGS. CAC. Ex:** Teich Family Collection. The original red surfaces of this high-end Choice example have mellowed to include shades of green and light brown patina, with no trace of carbon. The design elements are sharply detailed throughout.
From The Teich Family Collection. NGC ID# 2752, PCGS# 3649

- 3228 1872 PR65 Red and Brown NGC.** With an estimated 950 proofs produced, the date saw an expected number of proofs made but is pressured by date collectors due to a low circulation-strike production. This strongly struck Gem has multiple toning accents including magenta, sea-green, blue, and red on nicely reflective proof surfaces. No contact marks or other distractions are seen except for a single carbon fleck on the lower left of the shield. Census: 77 in 65 (2 in 65+) Red and Brown, 41 finer (1/14). NGC ID# 2752, PCGS# 3649

- 3229 1872 PR64 Red NGC. CAC.** This late-date issue is generally unavailable as a business strike and about the only way to locate an 1872 with full red color is as a proof. This is a magnificent striking that shows bright yellow-red centers surrounded by slightly deeper red margins. A few flyspecks are present and account for the grade. Census: 13 in 64 Red, 26 finer (12/13). NGC ID# 2752, PCGS# 3650

**1873 Two Cent Piece, PR63 Brown
Closed 3 Variety**

- 3230 1873 Closed 3 PR63 Brown PCGS. CAC.** An original example from a proof-only mintage of 600 pieces, although some of the unsold originals may have been melted after April 1, 1873 when the new Coinage Act abolished the denomination. This appealing example is medium-brown with orange accents. The areas of orange are more noticeable on the reverse, where proof surfaces show obvious reflectivity. A bold strike is confirmed by strong details on the motto, horizontal shield lines, and wreath.
From The Teich Family Collection. NGC ID# 2753, PCGS# 3651

**1873 Closed 3 Two Cent, PR65 Brown
Rich, Multicolor Toning**

- 3231 1873 Closed 3 PR65 Brown NGC.** The Closed 3 in the date identifies this coin as an original proof two cent piece, with later restrikes utilizing an Open 3 design. This example shows deeply mirrored fields surrounding boldly struck design elements. Deep mahogany toning displays red-orange accents and violet undertones. Few contact marks are visible anywhere on this distinctive, glossy proof. Only 600 original proofs were made. Census: 14 in 65 Brown, 8 finer (12/13). NGC ID# 2753, PCGS# 3651

**1873 Two Cent, PR64 Red and Brown
Original Strike, Closed 3**

- 3232 1873 Closed 3 PR64 Red and Brown PCGS. CAC.** The Closed 3 Variety was confirmed as "original" by checking known 1873 proof sets in the ANS archives, the Smithsonian, and in a presentation set given to Charles A. Whitney in 1874. Restrikes issued in later years featured an Open 3.

This near-Gem example has satin luster on smooth surfaces with glowing orange margins and purple-brown centers. A bright-orange band crosses the reverse between ten and two o'clock. Sharply struck, this attractive proof has no significant contact marks or other signs of post-mint handling.

From The Teich Family Collection. NGC ID# 2753, PCGS# 3652

**1873 Closed 3 (Original) Two Cent Piece
PR65 Red and Brown**

- 3233 1873 Closed 3 PR65 Red and Brown PCGS.** A low mintage combined with the final year of this odd denomination combine to make the Closed 3 1873 two cent piece a popular collector coin. Designated Red and Brown, there is significant red remaining as well as small speckles of blue on each side. Light flyspecking is present. NGC ID# 2753, PCGS# 3652

**1873 Two Cent, Closed 3 in Date
PR65 Red and Brown**

- 3234 1873 Closed 3 PR65 Red and Brown NGC. CAC.** Mahogany hues cover much of each side but pale copper-gold outlines at the rims and central devices make the Red and Brown designation accurate. A pleasingly preserved Gem from the proof-only issue that finished the two cent denomination. Census: 62 in 65 Red and Brown, 40 finer (12/13). NGC ID# 2753, PCGS# 3652

- 3235 1873 Open 3 PR58 PCGS. CAC.** The proof-only 1873 is limited to 600 Closed 3 originals and 500 Open 3 restrikes. It is possible that the "restrikes" were also coined in 1873. The Open 3 variety is rarer, though Breen's 1988 comment "possibly 10 times as rare" is clearly an exaggeration. A well struck chocolate-brown specimen with occasional minute contact. NGC ID# 2754, PCGS# 3654

- 3236 1873 Open 3 PR63 Red and Brown PCGS.** The proof-only 1873 is a key date within the collectible two cent series. The Open 3 variety has a mintage of just 500 pieces, fewer than its Closed 3 predecessor. A sharply struck specimen with brick-red and olive-gray toning. One small flan flaw at 4:30 on the reverse. Certified in an old green label holder. NGC ID# 2754, PCGS# 3655

THREE CENT SILVER

- 3237 1851 MS66 PCGS.** Soft luster resides on the silver-gray surfaces of this Premium Gem. A few localized areas of weakness are noted on the design elements. NGC ID# 22YX, PCGS# 3664

- 3238 1851 MS66 PCGS. CAC.** First year of issue for this unusual denomination, this is a pleasing Premium Gem example with lively mint luster beneath a dusting of golden-gray toning. Only 13 pieces have been certified finer than this sharply struck example by PCGS (12/13). NGC ID# 22YX, PCGS# 3664

- 3239 1855 MS63 PCGS.** Rich apple-green and rose-red intermingle across this satiny and unmarked example. The strike is uncommonly sharp at the centers, though some border stars are incomplete. Low mintage due to unprecedented Seated production. Struck from a clashed reverse die.

Ex: Public Auction (Stack's, 5/1957), lot 46.

From The Teich Family Collection. NGC ID# 22Z4, PCGS# 3671

- 3240 1857 MS64 NGC.** Silver-gray and electric-blue patination adheres to the lustrous surfaces of this near-Gem Type Two silver three cent piece. Generally well-struck save for weakness in the upper part of the reverse. NGC ID# 22Z6, PCGS# 3673

- 3241 1858 MS64 PCGS.** Layers of color range from gray to green to vivid blue and rose over each side, with strong underlying mint luster that is bright enough to shine through the toning. Irregularly struck, but well-preserved. NGC ID# 22Z7, PCGS# 3674

- 3242 1858 MS65 NGC.** Richly toned blue-to-gray over the obverse with a more sea-green appearance to the reverse. Well-defined overall, if a trifle soft on a few of the reverse stars. Census: 48 in 65, 33 finer (12/13). NGC ID# 22Z7, PCGS# 3674

**1860 Three Cent Silver, MS66
Tied for the Finest at PCGS**

- 3243 1860 MS66 PCGS. CAC.** Delicate clash marks appear on the obverse of this lovely Premium Gem. Both sides have delicate gold toning, lighter on the obverse, with frosty silver luster and exceptional design definition. Although the 1860 is a plentiful date in the series, high grade examples are rarely encountered. Population: 14 in 66 (1 in 66+), 0 finer (12/13). NGC ID# 22Z9, PCGS# 3678

- 3244 1861 MS65 NGC.** This boldly defined Gem has brilliant luster that shines through the pale lilac, delicate gold, and deep steel-blue toning that is intermingled on both sides. The reverse is rotated to medallion alignment.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 22ZA, PCGS# 3679

**1861 Three Cent Silver, MS67
Beautiful Multicolor Toning**

- 3245 1861 MS67 NGC.** An impressively toned Superb Gem, this early three cent piece has frosty mint luster shining through bands of rose, gold, violet, blue, and green toning over the entire obverse and reverse surfaces. An extraordinary example for the specialist or type collector. Census: 28 in 67, 6 finer (12/13). NGC ID# 22ZA, PCGS# 3679

- 3246 1862/1 MS66 PCGS. CAC. FS-301.** This high grade Civil War example displays coruscating luster and is devoid of marks. The strike shows occasional blending. Encapsulated in a green label holder. Population: 67 in 66 (1 in 66+), 15 finer (12/13). NGC ID# 22ZC, PCGS# 3681

PROOF THREE CENT SILVER

**1857 Three Cent Silver, PR62
Rare Type Two Proof**

- 3247 1857 PR62 PCGS.** Light autumn-brown and aquamarine toning is principally relegated to the margins. A well struck and flashy example. Hairlines are minimal though we note a small abrasion beneath the second S in STATES. Type Two proofs (1854 to 1858) have an unknown mintage and are rare.

Ex: Stack's, 3/1958, lot 319.

From The Teich Family Collection. NGC ID# 27C4, PCGS# 3704

- 3248 1858 PR62 PCGS. CAC.** *Ex: Teich Family Collection* An attractive specimen from the first year of commercial proof offerings, the design elements are well-detailed and the reflective fields show hints of lavender and champagne-gold toning. Population: 7 in 62, 83 finer (12/13).

From The Teich Family Collection. NGC ID# 27C5, PCGS# 3705

- 3249 1863 PR64 PCGS.** A beautifully toned near-Gem with caramel-gold, lilac-red, powder-blue, and lime-green shades. The central reverse is brilliant. Fully struck and pleasing. Just 460 proofs were issued for this Civil War date.

Ex: Public Auction Sale (Stack's, 6/1958), lot 1240.

From The Teich Family Collection. NGC ID# 22ZP, PCGS# 3712

**1864 Silver Three Cent, PR65 Cameo
Multicolor Bullseye Toning**

- 3250 1864 PR65 Cameo PCGS.** A mere 470 proofs were struck in addition to 12,000 strikes for circulation. This colorful Gem is concentrically toned in a progression of colors including purple, turquoise, and gold. Although richly toned, the fields retain deeply mirrored surfaces that offset frosted devices. A full strike is evident throughout, with virtually no evidence of contact appearing on the surfaces of this jewel-like trime. Population: 16 in 65 Cameo, 6 finer (12/13).

From The Teich Family Collection. PCGS# 83714

3251 1865 PR64 PCGS. Ex: Teich Family Collection. This sharply defined deep steel-blue proof has fully mirrored fields around bold design motifs with a few grade-limiting hairlines at the upper obverse. From *The Teich Family Collection*. NGC ID# 27CB, PCGS# 3715

3252 1866 PR64 PCGS. Pale peach-gold centers cede to jade-green peripheries. Nicely struck and moderately mirrored with a small granular area near the ED in UNITED. Ex: *Public Auction (Stack's, 5/1957), lot 51*. From *The Teich Family Collection*. NGC ID# 27CC, PCGS# 3716

3253 1867 PR63+ Cameo PCGS. CAC. Ex: Teich Family Collection. This high-end Select example displays sharply detailed design elements with a rich coat of mint frost that contrasts boldly with the deeply mirrored fields. A few hints of greenish-gold toning are present. Population: 3 in 63 (1 in 63+) Cameo, 45 finer (12/13). From *The Teich Family Collection*. PCGS# 83717

3254 1868 PR65 PCGS. Mirrored reflectivity shows through the layer of bluish and golden-gray toning, especially on the obverse. This is a well-struck and nicely preserved specimen. Population: 46 in 65 (1 in 65+), 14 finer (12/13). NGC ID# 27CE, PCGS# 3718

3255 1869 PR64 PCGS. Ex: Teich Family Collection. Splashes of cobalt-blue and iridescent toning appear on both sides over the fully mirrored brilliant silver surfaces of this Choice proof. A hint of cameo contrast is noted. From *The Teich Family Collection*. NGC ID# 22ZR, PCGS# 3719

3256 1870 PR64 PCGS. CAC. Ex: Teich Family Collection. A wonderful Choice proof, this example has brilliant silver surfaces with a hint of champagne toning over the mirrored fields and lustrous devices. Light cameo contrast is noted. From *The Teich Family Collection*. NGC ID# 27CF, PCGS# 3721

1870 Three Cent Silver, PR66 Richly Toned, Deeply Reflective Fields

3257 1870 PR66 PCGS. CAC. The 1870 three cent silver had only 1,000 proofs struck in addition to the paltry output of 3,000 business strikes. This piece shows surprising depth of mirrors in spite of the significant blue-green toning that covers each side. A scarce and problem-free example of this scarce issue. Population: 24 in 66 (2 in 66+), 1 finer (12/13). NGC ID# 27CF, PCGS# 3721

3258 1873 PR62 PCGS. Ex: Teich Family Collection. Sharply detailed in most areas, this pleasing specimen shows a touch of flatness on the stars. The reflective fields show only minor contact marks and hairlines, with a hint of greenish-gold toning. From *The Teich Family Collection*. NGC ID# 27CJ, PCGS# 3724

1873 Three Cent Silver, PR64 Green-Label Holder Undesignated Cameo Proof

3259 1873 PR64 PCGS. CAC. This impressive final-year three cent silver piece, a proof-only issue, is housed in a green-label PCGS holder, before that service began recognized Cameo and Deep Cameo proofs. For that reason, there is no designation. However, make no mistake formulating your bid, for this piece is an impressive Choice Cameo proof, and a borderline deep cameo example. Both sides are fully brilliant and untoned, save for a crescent of delicate gold at the left obverse border. Although PCGS has certified 70 finer proofs, they have only 19 finer Cameo proofs, and just three finer Deep Cameo proofs (12/13). NGC ID# 27CJ, PCGS# 3724

1873 Three Cent Silver, PR65 Cameo End of the Series

3260 1873 PR65 Cameo NGC. Blue-green through most of each side with lighter sea-green highlights on the central devices and at the rims. This final-year issue was proof-only with a mintage of only 600 pieces and has been popular from the time of issue to the present. Census: 14 in 65 Cameo, 18 finer (12/13). PCGS# 83724

THREE CENT NICKELS

1866 Three Cent Nickel, MS66 Beautiful Pastel Toning

3261 1866 MS66 PCGS. This sharply defined Premium Gem has frosty light gray surfaces with brilliant luster and exceptional iridescent toning, with lavender, gold, and sea-green at the upper obverse and lower reverse. A lovely example for a date or type collection. Population: 28 in 66 (2 in 66+), 2 finer (12/13). NGC ID# 22NK, PCGS# 3732

3262 1873 Closed 3 MS65 PCGS. Light golden-gray toning adorns this lustrous and unabraded Gem. The shoulder curl and first column show inexactness of impression. Struck from clashed dies. Population: 34 in 65, 10 finer (12/13). NGC ID# 2758, PCGS# 3739

3263 1888 MS66 PCGS. Only 36,501 pieces were struck of this penultimate date of the series. Untoned surfaces with frosty luster reveal a strong strike with full detail everywhere except the high points of Liberty's hair. A pair of short, radial die cracks appear on the reverse, where a small luster graze is seen beneath the III. Population: 58 in 66, 38 finer (12/13). NGC ID# 275H, PCGS# 3757

PROOF THREE CENT NICKELS

3264 1865 PR64 Cameo PCGS. Ex: Teich Family Collection. Pale greenish-gold toning highlights the contrast between the sharply detailed frosty design elements and the deeply reflective fields. Population: 22 in 64 Cameo, 63 finer (12/13).
From The Teich Family Collection. PCGS# 83761

3265 1867 PR65 Cameo PCGS. CAC. Ex: Teich Family Collection. This sharply detailed Gem displays bold cameo contrast between the frosty devices and the deeply reflective fields, with hints of pale gold toning and outstanding eye appeal. Population: 36 in 65 (2 in 65+) Cameo, 26 finer (12/13).
From The Teich Family Collection. PCGS# 83763

3266 1867 PR65 Cameo NGC. CAC. Only an estimated 625 proofs were struck of the 1867 three cent nickel. This is an all-brilliant, nicely contrasted example whose only flaw is localized weakness on the fluting of the first two digits in the Roman numeral on the reverse. PCGS# 83763

3267 1867 PR66 Cameo PCGS. CAC. Strong field/motif contrast is evident over both sides of this color-free Premium Gem Cameo. The design elements are well-defined and neither side reveals significant marks or spots. Population: 26 in 66 (1 in 66+) Cameo, 0 finer (12/13). PCGS# 83763

3268 1868 PR65 PCGS. Ex: Teich Family Collection. A well struck Gem that has good reflectivity and only minimal carbon. Light golden patina denies full brilliance. A scant 600+ proofs were issued.
From The Teich Family Collection. NGC ID# 275N, PCGS# 3764

3269 1875 PR65 PCGS. Glimmering reflective luster pools in the fields of this Gem proof. Mildly contrasted with a thin layer of green-gold toning that is more visible on the reverse. NGC ID# 22NV, PCGS# 3771

3270 1875 PR65 PCGS. With an estimated 700 proofs made, this issue is one of the 1865 through 1876 dates that are difficult to find as true Gems. This is an exception, with lustrous silver surfaces and deeply reflective mirrors. Raised die polishing lines are seen on the reverse. A brilliant and attractive Gem proof. Population: 96 in 65, 18 finer (12/13).
From The Teich Family Collection. NGC ID# 22NV, PCGS# 3771

1876 Three Cent Nickel, PR66 Ultra Cameo Only One Certified Finer

3271 1876 PR66 Ultra Cameo NGC. This impressive Premium Gem Ultra Cameo proof exhibits intensely frosty mint luster on the devices over a deeply mirrored field. Both sides are essentially brilliant with a hint of champagne toning. Census: 9 in 66 Ultra Cameo, 1 finer (12/13). PCGS# 93772

1877 Three Cent Nickel, Lightly Toned PR65

3272 1877 PR65 NGC. This popular, low-mintage date is the key to the proof three cent nickel series, along with the 1865. Just over 500 pieces were struck, all proofs. This example is more shallowly mirrored, and each side displays light, even golden-rose patina. A single planchet void is noted between Liberty's nose and the E in STATES. NGC ID# 275X, PCGS# 3773

1877 Three Cent Nickel, PR64 Cameo Proof-Only Key to the Series

3273 1877 PR64 Cameo PCGS. With just 510 proofs produced, collectors vigorously compete for attractive examples of the 1877 date. This is a lovely, near-Gem Cameo example of the date, with a hint of gray-gold iridescence surrounding lightly frosted devices. A sharp strike enhances Liberty's hair detail and rounded cheek. The lines in the III denomination are complete. Mirrored fields appear unsullied except for occasional delicate hairlines, which limit the grade. Population: 20 in 64 Cameo, 81 finer (12/13).
From The Teich Family Collection. PCGS# 83773

3274 1878 PR66 PCGS. CAC. Ex: Teich Family Collection. Straw-gold fields accompany stone-gray devices. Fully struck and satiny with a pristine appearance. The middle of the three proof-only dates of the underappreciated series.
From The Teich Family Collection. NGC ID# 275Y, PCGS# 3774

- 3275 1879 PR66+ Cameo PCGS. CAC.** A splendid Premium Gem Cameo proof, this piece has strong eye appeal as the plus designation indicates. This well defined coin exhibits frosty luster and hints of champagne toning, particularly on the reverse. Population: 3 in 66+ Cameo, 36 finer (12/13). PCGS# 83775
- 3276 1883 PR67 PCGS. CAC.** Ice-blue and olive-green enrich this crisply struck and satiny Superb Gem. The 1883 is a low mintage date. Proofs (6,609 pieces) are more plentiful than business strikes (4,000 pieces). Encapsulated in an old green label holder. NGC ID# 2765, PCGS# 3779
- 3277 1887/6 PR65 NGC. FS-302.** The 6 underdigit is obvious, and the 8s exhibit repunching. Fully struck and lustrous with light butter-gold toning and scattered tiny obverse tan freckles. Struck from clashed dies, and encapsulated in a prior generation holder. NGC ID# 276A, PCGS# 3784
- 3278 1887/6 PR66 Cameo PCGS. CAC. FS-302.** Designated as a "strong overdate" by PCGS. The 8s are clearly repunched and generous portions of the 6 are apparent. Light straw-gold toning visits this satiny and fully struck Premium Gem. *From The Teich Family Collection.* PCGS# 83784
- 3279 1888 PR67 ★ Cameo NGC.** NGC has yet to certify any 1888 proofs as PR68 or higher. As of (12/13), 3 are graded PR67 ★ Cameo, and the only arguably finer examples are a PR67+, a PR67+ Cameo, and two PR67 Ultra Cameo pieces, none of which have a Star designation. This brilliant white-on-black specimen is pristine aside from a tiny reverse spot at 7:30. PCGS# 83785
- 3280 1889 PR67 Cameo PCGS. CAC.** Deeply reflective fields contrast with pleasing mint frost on the devices for a satisfying, Cameo appearance. The critical areas of strike — Liberty's hair curls, cheek, and the vertical lines on the Roman numeral III — are sharp. This is an impressively appealing final-year, Superb Gem proof. Population: 19 in 67 Cameo, 1 finer (12/13). PCGS# 83786

SHIELD NICKELS

- 3281 1867 Rays MS64 PCGS. CAC.** This well-detailed Choice example shows some softness on the centers, with dramatic clash marks and die cracks on the reverse. The brilliant surfaces show few signs of contact, with vibrant mint luster on both sides. PCGS has graded 37 numerically finer examples (12/13). NGC ID# 22NY, PCGS# 3791

1868 Shield Nickel, MS66+ Bright Mint Luster

- 3282 1868 MS66+ PCGS. CAC.** The 1868 is one of the more frequently encountered dates in the series; undoubtedly because of its significant mintage of 28.8 million pieces. This is a lustrous, sharply struck example with just a hint of pale golden patina present on each side. A couple of larger obverse die cracks indicate the Mint's problems were still not solved in 1868 with striking nickel coins. NGC ID# 22P2, PCGS# 3795
- 3283 1883/2 MS60 PCGS. CAC. FS-303.** A die break beneath the 18 in the date attributes the overdate variant. Boldly struck, lustrous, and lightly toned. Marks are inconsequential and carbon is confined to a few specks on the right obverse border. Encapsulated in an old green label holder. NGC ID# 22PD, PCGS# 3814

PROOF SHIELD NICKELS

- 3284 1866 Rays PR62 PCGS. Ex:** Teich Family Collection. A sharply detailed proof, this example has light champagne toning over its mirrored surfaces with a hint of contrast between the fields and devices. *From The Teich Family Collection.* NGC ID# 276G, PCGS# 3817
- 3285 1867 No Rays PR64 Cameo PCGS. CAC. Ex:** Teich Family Collection. Despite the scattered grade-limiting carbon flecks, this Choice Cameo proof has excellent eye appeal with fully mirrored fields and light gray surfaces, exhibiting hints of champagne toning. Population: 19 in 64 Cameo, 54 finer (12/13). *From The Teich Family Collection.* PCGS# 83821

1867 No Rays Shield Nickel, PR65 Cameo Deeply Mirrored Fields, Frosted Devices

- 3286 1867 No Rays PR65 Cameo PCGS. CAC.** The Without Rays variety. This attractive proof has a hint of overall clear-gold toning over bright silver surfaces. The devices are generously covered with mint frost for the coveted Cameo designation. A single small, cloudy fleck appears at 9 o'clock on the obverse but does not detract from the overall appeal of this brilliant, deeply mirrored proof. Population: 44 in 65 Cameo, 9 finer (12/13). *From The Teich Family Collection.* PCGS# 83821

1867 Shield Nickel, PR65 Cameo No Rays Type

- 3287 1867 No Rays PR65 Cameo PCGS. CAC.** Nicely frosted motifs are distinct from the glassy fields. Delicate gold patina enriches this unperturbed and exactly struck Gem. The final dates in the proof Shield nickel series have high mintages, but the initial proof issues are very scarce. For the 1867 No Rays, only 600+ pieces were struck. Population: 44 in 65 Cameo, 9 finer (12/13). PCGS# 83821
- 3288 1868 PR65 NGC.** Light champagne-gold patina is joined on the obverse by soft ice-blue in the cent. Sharply struck and nicely preserved. Faint roller marks are visible on the central reverse. Census: 65 in 65, 20 finer (12/13). NGC ID# 276J, PCGS# 3822

**1868 Shield Nickel, PR66 Cameo
Bright, Problem-Free Striking**

- 3289 1868 PR66 Cameo PCGS. CAC.** In spite of a mintage of only 600 proofs, at least two die pairings were used. The planchet quality of this proof is remarkably bright and problem-free, compared to earlier years and even compared to the business strikes from this year. Strong mint luster is seen over the devices and sets up the cameo effect against the illimitable depth of reflectivity in the fields. Population: 13 in 66 Cameo, 0 finer (12/13). PCGS# 83822

- 3290 1869 PR66 PCGS. CAC.** The mirrored fields display a fair degree of contrast with the motifs when the coin is tilted slightly under a light source. Sharply struck throughout and devoid of mentionable marks or spots. Population: 22 in 66, 1 finer (12/13). NGC ID# 276K, PCGS# 3823

**1869 Shield Nickel, PR66 Cameo
Only One Finer Coin at PCGS**

- 3291 1869 PR66 Cameo PCGS.** This is the second die noted in Breen, the date widely spaced but close to the ball ornament, as in the Garrett-Johns Hopkins coin. Light champagne-pink patina on the obverse accents unmarked and well-contrasted surfaces, one of the nicest of perhaps 600 made. The reverse shows pastel pink, gold, and jade patina, a really pretty coin. Population: 14 in 66 (2 in 66+) Cameo, 1 finer (12/13). PCGS# 83823

- 3292 1870 PR65 PCGS.** Rose-red and olive-gold embrace this nicely struck and satiny Gem. A loupe reveals only a couple of trivial flecks. A lint mark near the U in UNITED is of mint origin. Ex: Samuel W. Wolfson Collection, Part II (*Stack's*, 5/1963), lot 316. From *The Teich Family Collection*. NGC ID# 276L, PCGS# 3824

- 3293 1875 PR66 PCGS. CAC.** Delicate shades of golden-brown toning blanket the flawless surfaces of this delightful Premium Gem. The design elements are sharply detailed and eye appeal is terrific. Population: 13 in 66, 0 finer (12/13). NGC ID# 276S, PCGS# 3829

- 3294 1875 PR66 Cameo NGC.** Precisely struck and clearly contrasted with canary-yellow accents across a pearl-gray base. The scarcity of high-grade business-strike 1875 nickels gives this Premium Gem Cameo proof a small price boost. Census: 11 in 66 Cameo (2 in 66 ★ Cameo), 1 finer (12/13). PCGS# 83829

**1877 Shield Nickel, PR64
Important Key Issue**

- 3295 1877 PR64 PCGS.** A touch of champagne-gold toning resides on the mirrored surfaces of this scarce, proof-only date. The devices are sharply struck and have some mint frost (but not enough for a Cameo designation). The surfaces show no significant marks other than a few grade-limiting hairlines, as often found on proofs of this era.

The 1877 proof nickel — along with its successor, the 1878 proof-only issue — form a one-two punch of scarce dates eagerly sought by collectors of the series.

From *The Teich Family Collection*. NGC ID# 276U, PCGS# 3831

**1877 Shield Nickel, PR64 Cameo
Key Proof-Only Date**

- 3296 1877 PR64 Cameo NGC.** Ex: Teich Family Collection. Deeply mirrored fields and frosted devices are devoid of toning, giving this scarce proof nickel a dramatic, silverlike appearance. Just 900 proofs were produced. This example is sharply struck with full shield details and complete star centers. One or two tiny carbon spots exist, but overall the appeal of this coin is suggestive of an even higher grade.

From *The Teich Family Collection*. PCGS# 83831

- 3297 1878 PR63 ANACS.** Swirling steel-gray luster appears on clear surfaces, with a touch of yellow toning adding further flash to the coin. NGC ID# 276V, PCGS# 3832

- 3298 1878 PR64 PCGS.** An intricately struck and essentially untuned proof-only near-Gem. Devoid of contact, and carbon is mostly confined to a tiny spot above the S in TRUST. Certified in an old green label holder. NGC ID# 276V, PCGS# 3832

- 3299 1878 PR64 NGC. CAC.** Intricately struck and free of all but a few tiny carbon flecks, this is a high-end example of the proof-only 1878 Shield nickel. The shallowly mirrored surfaces are smooth and lustrous, with a single minimal contact mark near the numeral 5 defining the grade. Attractive and Choice. NGC ID# 276V, PCGS# 3832

- 3300 1878 PR64 PCGS. CAC.** Honey-gold and stone-gray blend throughout this intricately struck and mark-free specimen. A strong loupe locates moderate peripheral carbon. A popular proof-only date. NGC ID# 276V, PCGS# 3832

- 3301 1878 PR65 PCGS. Gold CAC.** This beautifully toned Gem has peach-gold centers bounded by powder-blue and lilac-red margins. Fully struck and unabraded with vibrant cartwheel sheen. Though a proof-only date, late state specimens often display satin luster. Certified in a first generation holder.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 276V, PCGS# 3832

- 3302 1878 PR65+ PCGS. CAC.** Ex: Teich Family Collection. Hints of champagne toning grace the brilliant nickel-gray surfaces of this proof-only nickel. This sharply detailed Gem is unusual for its mirrored fields, as the issue is usually encountered with satiny, lustrous fields.

From The Teich Family Collection. NGC ID# 276V, PCGS# 3832

- 3303 1879/8 PR66 Cameo PCGS. CAC.** Ex: Teich Family Collection. A brilliant Premium Gem Cameo proof with the hallmark spike at the upper right curve of the ball over the date. This light nickel-gray Premium Gem Cameo proof has delicate toning over its mirrored fields. Population: 33 in 66 Cameo, 8 finer (12/13).

From The Teich Family Collection. PCGS# 83834

- 3304 1882 PR67 Cameo PCGS. CAC.** An impressively preserved example, this piece displays great all-around visual appeal for this penultimate Shield nickel issue. The gleaming nickel-white surfaces offer clear field-to-device contrast. PCGS# 83837

LIBERTY NICKELS

- 3305 1885 VF35 NGC. CAC.** Green-gold and olive shadings cross the faintly luminous surfaces of this Choice VF key-date nickel. Small flyspecks and a shallow pinscratch below the chin are noted on the obverse. NGC ID# 2773, PCGS# 3846

- 3306 1885 VF35 PCGS. CAC.** The 1885 Liberty nickel claims a series-low mintage of 1.4 million pieces. This Choice VF specimen retains much interior detail on the design elements, including all letters in LIBERTY. NGC ID# 2773, PCGS# 3846

- 3307 1885 AU58 NGC. CAC.** Modestly rubbed and toned in various grays, this key-date Liberty nickel carries plenty of eye appeal. A shallow pinscratch is noted in the lustrous right obverse field. NGC ID# 2773, PCGS# 3846

- 3308 1886 MS62 PCGS.** Pale-rose and gray-blue toning reside on softly lustrous surfaces of this attractive, key-date nickel. Except for a few flat stars, the strike is bold. One small, V-shaped abrasion on Liberty's cheek is visible with a glass, as are some curving die cracks among the stars and legends. A strong coin for the grade. NGC ID# 22PK, PCGS# 3847

- 3309 1886 MS62 ANACS.** The 1886 Liberty nickel claims the second-lowest business-strike mintage of the series, at 3.3 million pieces. This well-detailed MS62 example shows an interesting network of die cracks through the stars on the right, with a few minor planchet flaws near the rim. NGC ID# 22PK, PCGS# 3847

1886 Liberty Nickel, MS64 Low-Mintage Date, Elusive in High Grade

- 3310 1886 MS64 PCGS.** The 1886 Liberty nickel claims a low business-strike mintage of 3.3 million pieces, making the date very scarce in high grade. This attractive Choice example is well-detailed, with a touch of softness on the stars and wreath. The pale gold and lavender-gray surfaces show only minor signs of contact. PCGS has graded 45 numerically finer examples (12/13). NGC ID# 22PK, PCGS# 3847

1889 Nickel, MS66 Tied for Finest at PCGS

- 3311 1889 MS66 PCGS.** Delicate champagne toning appears on the brilliant nickel-gray surfaces of this impressive Premium Gem, with lavender and iridescent toning rings on each side. A few trivial marks are noted on Liberty's cheek, and on the reverse. Population: 18 in 66 (1 in 66+), 0 finer (12/13). NGC ID# 2775, PCGS# 3850

1889 Nickel, Immaculately Preserved MS66

- 3312 1889 MS66 NGC. CAC.** The lustrous surfaces of this Premium Gem possess soft gold and ice-blue color over both sides, each of which exhibits strong design detail. This immaculately preserved nickel is well deserving of the CAC sticker. The 1889 is elusive in high grades. Census: 43 in 66, 2 finer (1/14). NGC ID# 2775, PCGS# 3850

- 3313 1893 MS65 PCGS. CAC.** Softly frosted luster shines through mauve and green-gold patina. Unevenly struck, particularly on the obverse stars, but all-in-all a pleasing Gem. Population: 83 in 65 (1 in 65+), 20 finer (12/13). NGC ID# 2778, PCGS# 3854

- 3314 1905 MS66 PCGS.** Green-gold and pink overtones cross satiny and pleasingly preserved surfaces. Generally well-defined with only minor softness on the usual trouble-spots. Population: 70 in 66 (2 in 66+), 0 finer (12/13). NGC ID# 277G, PCGS# 3866

- 3315 1908 MS65 PCGS. CAC.** Struck from heavily used dies, metal flow is obvious at the margins. The mint luster is bright and unphased by the abrasions that are often seen on Liberty nickels. Slight striking softness is noted. NGC ID# 22PT, PCGS# 3869

- 3316 1911 MS66 PCGS. CAC.** Glowing luster issues from well-preserved surfaces bathed in soft violet, ice-blue, and champagne-gold patina. A sharp strike occurs on the devices save for the usual weakness in the corn ear left of the bow knot. Population: 43 in 66 (2 in 66+), 2 finer (12/13). NGC ID# 277M, PCGS# 3872

**1912-S Liberty Nickel, MS64
Final Date of the Series**

- 3317 1912-S MS64 PCGS.** With a low mintage of just 238,000 pieces, the 1912-S nickel is prized by collectors for its scarcity as well as its status as the final regular issue of the series. This highly lustrous near-Gem has the appeal of a finer grade, limited only by a number of small carbon specs (the most obvious beneath Liberty's eye). Vibrant gold luster enlivens satin-smooth surfaces.

The strike is sharp in most regards, including the star centers and wreath details. Diagnostic weakness in the corn ear near the reverse ribbon bow and softness in the hair above Liberty's forehead do not detract from the appeal of this key date nickel.

From The Teich Family Collection. NGC ID# 277R, PCGS# 3875

**1912-S Nickel, MS64
Low-Mintage Branch Issue**

- 3318 1912-S MS64 PCGS.** The strike is uncommonly sharp for this key date nickel, especially on Liberty's forehead curls. The left ear of corn has minor incompleteness. Lightly toned overall despite a vertical streak of rose-red through the large V. Pristine aside from a solitary slender mark on the cheek. NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

**1883 Liberty Nickel, PR67 Cameo
Storied No Cents Issue**

- 3319 1883 No Cents PR67 Cameo NGC.** The popular and storied No Cents design, once a target of charlatans, is now a classic American coinage variety. This Superb Gem Cameo proof has impressive contrast between its mirrored fields and satin devices, with bold design definition, and brilliant, untuned surfaces. Census: 22 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (12/13). PCGS# 83878

- 3320 1885 PR64 PCGS. CAC.** Ex: Teich Family Collection. Frosty, well-struck devices stand out on this near-Gem proof nickel. Freckles of gray patina show up under magnification. *From The Teich Family Collection.* NGC ID# 277T, PCGS# 3883

**1885 Liberty Nickel, PR67
Only One Finer at PCGS**

- 3321 1885 PR67 PCGS.** This scarce date Liberty nickel is housed in an old green-label PCGS holder. Both sides of this exquisite Superb Gem offer peripheral gold and iridescent toning around light lilac-gray centers with brilliantly mirrored fields and sharply defined, satin devices. Population: 14 in 67 (1 in 67+), 1 finer (12/13). NGC ID# 277T, PCGS# 3883

- 3322 1885 PR66 Cameo NGC. CAC.** This lovely Premium Gem Cameo proof exhibits subtle champagne and blue toning on fully mirrored fields with lustrous, boldly defined design elements. Census: 41 in 66 Cameo (3 in 66 ★ Cameo), 17 finer (1/14). PCGS# 83883

- 3323 1891 PR66 Cameo PCGS.** Untoned surfaces reveal pleasing field/motif contrast. Sharply defined save for the usual weakness in the corn ear left of the bow knot. Population: 23 in 66 (3 in 66+) Cameo, 1 finer (12/13). PCGS# 83889

- 3324 1891 PR66 Cameo PCGS. CAC.** Full, sharp details are seen in all areas, as only a proof can display. The field-device contrast is strong on each side, in spite of moderate rose and lilac toning on the reverse (the obverse has almost no color.) Population: 24 in 66 (3 in 66+) Cameo, 1 finer (12/13). PCGS# 83889

- 3325 1892 PR66+ PCGS.** Ex: Teich Family Collection. This high-end Premium Gem displays sharply detailed design elements and deeply reflective surfaces under attractive shades of greenish-gold and cerulean-blue toning. Population: 28 in 66 (2 in 66+), 0 finer (12/13). *From The Teich Family Collection.* NGC ID# 2782, PCGS# 3890

- 3326 1894 PR66 PCGS. CAC.** Ex: Teich Family Collection. This impressive Premium Gem displays razor-sharp definition on all design elements and deeply mirrored fields under shades of champagne-gold toning. Population: 14 in 66 (1 in 66+), 2 finer (12/13). *From The Teich Family Collection.* NGC ID# 2784, PCGS# 3892

**1896 Liberty Nickel, PR66
Strong Cameo Contrast**

3327 1896 PR66 Cameo PCGS. A readily available proof in lesser grades, this Premium Gem is extremely scarce at this grade level and rare any finer. Few 1896 proofs were imparted with nice Cameo contrast. This example has liquid-looking, mirrorlike fields and the devices show substantial mint frost. Two or three tiny contact marks are visible under magnification, but overall the fields are clean and unbothered. The star centers are detailed and the corn kernels to the left of the reverse wreath bow are strong, attesting to a full strike. Population: 12 in 66 Cameo, 1 finer (12/13). PCGS# 83894

3328 1897 PR66 Cameo PCGS. Mottled, pale-gold iridescence overlays surfaces that are deeply mirrored in the fields and crisply detailed over the devices. Expectantly blemish-free for the assigned grade. Ex: *Central States Signature (Heritage, 5/2003)*, lot 5695. PCGS# 83895

3329 1898 PR66 PCGS. CAC. Ex: Teich Family Collection. A sharply defined Premium Gem proof, this brilliant nickel-gray example has delicate champagne and blue toning over fully mirrored fields. Population: 24 in 66, 1 finer (12/13). From *The Teich Family Collection*. NGC ID# 2788, PCGS# 3896

3330 1898 PR66 Cameo NGC. This spectacular Premium Gem exhibits sharply detailed design elements with a frosty texture that contrasts boldly with the deeply mirrored fields. No mentionable distractions are evident and eye appeal is terrific. Census: 24 in 66 Cameo (1 in 66+ Cameo, 3 in 66 ★ Cameo, 1 in 66+★ Cameo), 3 finer (1/14). PCGS# 83896

3331 1898 PR66 Cameo PCGS. CAC. Though the luster is more flashy than deeply mirrored, the sharply struck and clearly frosted devices win through for the Cameo designation. Minimally toned save for a hint of peripheral green-gold that is most obvious at the upper reverse. Population: 19 in 66 (1 in 66+) Cameo, 5 finer (12/13). PCGS# 83896

**1901 Liberty Nickel, PR67
Chameleon-Like Toning**

3332 1901 PR67 PCGS. CAC. An extraordinary turn-of-the-century Superb Gem, this lovely nickel displays brilliant proof surfaces with mirrored fields and satin devices beneath delicate lemon-yellow, pale lilac, and light turquoise toning. A few minuscule carbon flecks are noted on each side of this delightful Liberty nickel. The chameleon-like toning changes colors with different light angles. Population: 30 in 67 (1 in 67+), 1 finer (12/13). NGC ID# 278B, PCGS# 3899

3333 1901 PR67 PCGS. CAC. A touch of gold toning visits the deep blue surfaces of this lovely Superb Gem. Both sides are sharply defined with considerable contrast for this undesignated example. Population: 31 in 67 (1 in 67+), 1 finer (12/13). NGC ID# 278B, PCGS# 3899

3334 1901 PR66 Cameo PCGS. CAC. Pleasing mint frost throughout the portrait contrasts favorably with the glassy obverse field. The wreath is also icy, and toning is limited to a hint of tan on the reverse center. Population: 17 in 66 (3 in 66+) Cameo, 6 finer (12/13). PCGS# 83899

3335 1902 PR67 PCGS. A boldly detailed Superb Gem, this 1902 Liberty nickel exhibits a hint of contrast, although insufficient for a Cameo designation. Both sides have light gray surfaces with wispy iridescent toning. Population: 12 in 67, 0 finer (12/13). NGC ID# 278C, PCGS# 3900

**1905 Liberty Nickel, PR67
Only One Finer at PCGS**

3336 1905 PR67 PCGS. CAC. A delightful Superb Gem from a generous proof mintage of 2,152 pieces, this coin exhibits sharply detailed design elements and deeply reflective fields that show no mentionable distractions. The pleasing surfaces display shades of greenish-gold and lavender toning. Population: 12 in 67, 1 finer (12/13). NGC ID# 278F, PCGS# 3903

3337 1906 PR66 Cameo PCGS. CAC. Subtle pastel iridescence is seen over each side of this noticeably contrasted high-grade proof. Fully struck in all areas and showing no apparent contact marks. Population: 25 in 66 (3 in 66+) Cameo, 18 finer (12/13). PCGS# 83904

**1906 Liberty Nickel, PR67 Cameo
Amazing Contrast**

3338 1906 PR67 Cameo NGC. Cameo contrast is rarely encountered on any coins struck during the first decade of operations at the third Philadelphia Mint that opened in 1901. This gorgeous Superb Gem Cameo proof is fully brilliant and untuned, with impressive field-to-device contrast. Census: 12 in 67 Cameo (1 in 67+ Cameo), 0 finer (12/13). PCGS# 83904

3339 1908 PR67 ★ NGC. CAC. Essentially brilliant obverse and reverse surfaces with hints of peripheral gold toning. Although designated as a ★ coin by NGC, they failed to mention the Cameo contrast that exists at various angles. The devices have moderate luster, and they are surrounded by deeply mirrored fields. Census: 22 in 67 (1 in 67+, 3 in 67 ★), 3 finer (12/13). Ex: *CSNS Signature (Heritage, 4/2006)*, lot 1018. NGC ID# 278J, PCGS# 3906

1909 Nickel, Brilliant PR68

3340 1909 PR68 NGC. A brilliant and satiny Superb Gem with essentially pristine preservation. The strike is razor-sharp, even on the kernels of the left ear of corn. The design change for cents in 1909 increased demand for proof sets, but few specimens remain in such exemplary condition. Census: 9 in 68 (1 in 68 ★), 0 finer (12/13). NGC ID# 278K, PCGS# 3907

3341 1909 PR66 Cameo PCGS. CAC. The frosty design elements provide bold cameo contrast with the deeply reflective fields, despite the attractive champagne-gold patina that blankets the well-preserved surfaces. Population: 60 in 66 Cameo, 19 finer (12/13). PCGS# 83907

3342 1910 PR66 Cameo PCGS. CAC. The sharply detailed design elements of this delightful Premium Gem exhibit a frosty texture that contrasts boldly with the deeply reflective fields. The pristine surfaces are blanketed in shades of pale gold toning. Population: 27 in 66 (4 in 66+) Cameo, 16 finer (12/13). PCGS# 83908

BUFFALO NICKELS

3343 1913-S Type Two MS63 PCGS. Ex: Teich Family Collection. A well-detailed Select example of this popular first-year type, with satiny mint luster and shades of bluish-gray and golden-brown toning. Only minor signs of contact are evident. *From The Teich Family Collection.* NGC ID# 22R3, PCGS# 3923

3344 1913-S Type Two MS64 NGC. This low mintage issue is pursued in all grades but provides greater value in Mint State. Toned slate-gray with brick-red and straw-gold accents. Struck from long in use and boldly clashed dies. Certified in a former generation holder. NGC ID# 22R3, PCGS# 3923

3345 1914-D MS65 PCGS. Ex: Teich Family Collection. Shades of bluish-gray and champagne-gold toning enliven the well-preserved surfaces of this delightful Gem. The design elements are sharply detailed for an early series issue. *From The Teich Family Collection.* NGC ID# 22R5, PCGS# 3925

3346 1915-S MS64 NGC. Ice-blue and yellow-gold patina is more evident on the reverse of this near-Gem. Radiantly lustrous surfaces exhibit sharply struck design elements. A faint streak is visible on the bison's rump. NGC ID# 22R9, PCGS# 3929

3347 1917 MS66 PCGS. Subtle gold and gray-blue overtones converge on this satin-smooth Premium Gem. The reverse has above-average detail with only minor softness at shoulder and tail. NGC ID# 22RD, PCGS# 3934

3348 1917-D MS64+ PCGS. CAC. Ex: Teich Family Collection. The surfaces are brightly lustrous and show just a tinge of light red patina. The strike is a bit soft, as expected, for this challenging early issue. *From The Teich Family Collection.* NGC ID# 22RE, PCGS# 3935

3349 1917-S MS64+ PCGS. CAC. Ex: Teich Family Collection. A virtual gem with brilliant, satiny gray luster, exhibiting delicate splashes of champagne toning. The design elements are bold on this conditionally scarce Buffalo nickel. *From The Teich Family Collection.* NGC ID# 22RF, PCGS# 3936

3350 1918 MS65 PCGS. This Gem displays better striking quality than ordinarily encountered. The hair on the bison's head, for example, is well-defined, as is the horn and tail. Lustrous surfaces are nicely preserved. NGC ID# 22RG, PCGS# 3937

3351 1918 MS65 PCGS. The lustrous surfaces of this Gem exhibit well-struck design elements save for the typical softness in the hair on the bison's head. While the coin appears untuned to the unaided eye, magnification reveals whispers of sky-blue color. NGC ID# 22RG, PCGS# 3937

1918 Buffalo Nickel, MS66 Bold Strike and Remarkable Appeal

3352 1918 MS66 PCGS. CAC. Reflective, steel-blue surfaces display an appealing overtone of iridescent lavender, making this Premium Gem nickel a memorably toned specimen. Unusually sharp devices are the result of a strong strike, with excellent details on the bison and the Indian's braid.

While the 1918 nickel is a plentiful date, it is scarce in Premium Gem condition and rare any finer. This is a wonderful example of the date for type collectors and, almost certainly, it is an upgrade for specialists of the series. Population: 51 in 66, 7 finer (12/13). *From The Teich Family Collection.* NGC ID# 22RG, PCGS# 3937

3353 1918/7-D Good 6 NGC. FS-101. The broad downstroke of the 7 can be distinguished despite this key date coin's service in Prohibition-era commerce. Stone-white with charcoal toning in recesses. Unabraded, though a minor diagonal lamination (as made) is noted on the Indian's neck. NGC ID# 22RJ, PCGS# 3939

3354 1918-D MS62 PCGS. Gold CAC. Ex: Teich Family Collection. Gold Label CAC coins always show something special, and that is certainly the case here. The surfaces are unusually vibrant for an MS62. There are almost none of the post-striking impairments one would expect for the grade, plus the strike is stronger than the majority of this scarce issue. *From The Teich Family Collection.* NGC ID# 22RH, PCGS# 3938

1918-S Buffalo Nickel, MS64
Visually Pleasing

- 3355 1918-S MS64 PCGS. CAC.** Sky-blue and rose-pink highlights complement pearly gray, reflective surfaces on this appealing San Francisco issue. The 1918-S date is challenging to obtain in full Gem condition or better. The near-Gem category is more obtainable and much more affordable — and seemingly undervalued when represented by a high-end specimen such as this coin.

Like most examples of this date, eroded dies resulted in poor detail on the bison's shoulder, back and leg. Central weakness is noted above the tie on the braid. On the plus side, the coin is virtually free of abrasions, specks, and spots. It presents exceptional eye appeal. *From The Teich Family Collection.* NGC ID# 22RK, PCGS# 3940

- 3356 1919-D MS64 PCGS. CAC. Ex:** Teich Family Collection. A few specks of dark toning appear on the gray and delicate champagne surfaces of this attractive Denver Mint nickel. Although not a full strike, this example shows sharper detail than most. PCGS has only certified 74 finer examples (12/13). *From The Teich Family Collection.* NGC ID# 22RM, PCGS# 3942

- 3357 1919-S MS63 PCGS. CAC. Ex:** Teich Family Collection. This fully lustrous Select Mint State nickel has a typical strike for the 1919-S, with satiny surfaces. Both sides have light gold toning with dappled iridescence. *From The Teich Family Collection.* NGC ID# 22RN, PCGS# 3943

- 3358 1920-D MS63 PCGS.** Dove-gray and olive-green blanket this satiny and unmarked early branch mint nickel. Only trivial carbon is detected beneath a lens. The mintmark is bold, and the overall strike is above average though incomplete. NGC ID# 22RR, PCGS# 3945

- 3359 1920-D MS63 NGC.** This multicolor better date Buffalo nickel displays satin luster over minutely granular lilac-red, powder-blue, and olive-gold surfaces. An opportunity for the collector of vibrantly toned examples. NGC ID# 22RR, PCGS# 3945

- 3360 1920-D MS64 PCGS. CAC. Ex:** Teich Family Collection. This lovely Choice Mint State nickel has a bold strike, including a strong hair braid and a partially split tail. The lustrous gray surfaces are apparent through lovely pale blue and delicate gold toning. *From The Teich Family Collection.* NGC ID# 22RR, PCGS# 3945

1920-S Nickel, MS64
Well Defined on the Reverse

- 3361 1920-S MS64 PCGS.** The 1920-S is a scarce, early Buffalo nickel, especially in high grade and with a decent strike. This piece exhibits good definition on the reverse, but the Indian's braid is softly defined on the obverse. Bright mint luster shines through the light reddish patina seen on each side. NGC ID# 22RS, PCGS# 3946

1920-S Buffalo Nickel, MS64
Excellent Eye Appeal

- 3362 1920-S MS64 PCGS. CAC.** Struck with overused dies, this lustrous nickel somehow retains above-average details for the date. Typical areas of weakness exist, but they are less severe than most of this issue. Moderate sharpness remains above the braid knot and on the bison's tail, shoulder, and fur line.

Eye appeal and luster are exceptional. Rich, golden toning intermingles with light-blue and orange accents. The surfaces are reflective and smooth with no major flecks, spots, or abrasions worth mention. This is a rare date in the series and difficult to find any finer.

From The Teich Family Collection. NGC ID# 22RS, PCGS# 3946

- 3363 1921 MS66 PCGS.** Sharply struck with blue and gold patina over the highly lustrous surfaces. A small mark is noted just to the right of the bridge of the nose. PCGS has graded 20 numerically finer examples (12/13). NGC ID# 22RT, PCGS# 3947

- 3364 1921 MS66 PCGS. CAC. Ex:** Teich Family Collection. A boldly detailed nickel, this Premium Gem is better than most, with only 20 finer examples submitted to PCGS (12/13). Both sides have brilliant light gray luster with lovely pale gold overtones. *From The Teich Family Collection.* NGC ID# 22RT, PCGS# 3947

**1921-S Buffalo Nickel, MS64
Sharp and Colorful**

- 3365 1921-S MS64 PCGS. CAC.** Sunset-orange toning with lilac accents combine with a strong strike to make this scarce nickel eminently desirable. The quality of strike is particularly important for this 1920s era, S-Mint issue. While not full, the strike on this example is better than most and strong for the assigned grade. A couple of short abrasions are seen in the obverse fields but nothing significant. The reverse is refreshingly unabraded. A nice 1921-S nickel is always a challenge and this near-Gem fits well in any collection.
From The Teich Family Collection. NGC ID# 22RU, PCGS# 3948

- 3366 1923 MS66+ PCGS. CAC.** The mint luster on this nickel is remarkably thick and frosted for a Philadelphia product. The reverse is strongly brought up, but the obverse less so. Just a hint of pinkish-lilac toning covers each side. NGC ID# 22RV, PCGS# 3949

- 3367 1924 MS66 PCGS.** Sun-gold, rose-red, and lime-green adorn this lustrous high-grade nickel. Marks are of no import though a loupe reveals minute flecks. The tail and centers show slight incompleteness. Housed in a green label holder. NGC ID# 22RX, PCGS# 3951

- 3368 1924 MS66 PCGS.** Hints of light gold-tan color become visible under magnification, especially on the reverse. The devices exhibit sharp detail. Population: 85 in 66, 6 finer (12/13). NGC ID# 22RX, PCGS# 3951

- 3369 1924 MS66 PCGS. CAC. Ex: Teich Family Collection.** Rose-gold and olive-green visit highly lustrous and essentially mark-free surfaces. The reverse has a few pinpoint flecks. The strike is good though the centers show softness. Population: 86 in 66, 6 finer (12/13).
From The Teich Family Collection. NGC ID# 22RX, PCGS# 3951

- 3370 1924-D MS64 PCGS. Ex: Teich Family Collection.** Smooth mint luster and remarkably abrasion-free surfaces confirm the near-Gem classification. A number of small specks of carbon are scattered over each side.
From The Teich Family Collection. NGC ID# 22RY, PCGS# 3952

- 3371 1924-D MS64 PCGS.** Lustrous surfaces exhibit well struck devices except for the usual softness in the bison's hair above the forehead. A few tiny flecks are visible on each side. NGC ID# 22RY, PCGS# 3952

**1924-S Buffalo Nickel, MS63
Attractive, Challenging Issue**

- 3372 1924-S MS63 PCGS.** While the date is not always identified for its scarcity in the same breath as the 1921-S and 1926-S nickels, collectors know how challenging it can be. Attractive examples are highly prized. This Select Uncirculated example has pleasing warm-gray surfaces with subtle, pinkish-gold highlights. The surfaces are smooth and lustrous. The 1924-S date is known for weakness of the reverse strike due to fatigued dies, as demonstrated by this example. The obverse strike is noticeably stronger. Few abrasions are seen anywhere on the coin.
From The Teich Family Collection. NGC ID# 22RZ, PCGS# 3953

- 3373 1925-S MS63 PCGS.** The lustrous surfaces of this Select Buffalo nickel are essentially color free and well-struck. A few very light streaks are visible on the Indian's cheek. NGC ID# 22S4, PCGS# 3956

- 3374 1926-S XF45 NGC.** The 1926-S Buffalo nickel is a low-mintage key to the series and examples are prized by collectors in all grades and conditions. This Choice XF specimen displays some light wear on the braid and bison's horn. Only minor abrasions are present. NGC ID# 22S7, PCGS# 3959

- 3375 1927-D MS64+ PCGS. CAC.** Lightly gold-toned over much of each side with substantial pearl-gray as well. Softly struck, as often seen, but pleasing by near-Gem standards. NGC ID# 22S9, PCGS# 3961

**1930 Nickel, MS67
Significant Registry Coin**

- 3376 1930 MS67 PCGS.** Frost-bright surfaces have a hint of quicksilver in the luster. Both sides are mostly pale blue with green-gold and orange peripheral touches that are most prominent at the upper obverse rim. Only minor striking softness visits the high points. Population: 28 in 67, 0 finer (12/13). NGC ID# 22SH, PCGS# 3969

- 3377 1930-S MS66 PCGS. Ex: Teich Family Collection.** Medium intensity nickel-gray surfaces and frosty luster shine through the delicate gold toning of this impressive Premium Gem. Although many have been certified at this grade level, PCGS has only certified five finer pieces, and NGC has seen none finer (12/13).
From The Teich Family Collection. NGC ID# 22SJ, PCGS# 3970

3378 1930-S MS66 PCGS. CAC. The lower-mintage 1930-S nickel commands a substantial premium in the better grades of Uncirculated. This is a thickly lustrous example that lacks absolute high-point detail, as almost all do. Very slight toning is present. NGC ID# 22SJ, PCGS# 3970

3379 1936 MS67 NGC. Ex: Teich Family Collection. Exceptional quality in a Buffalo nickel. The fields are bright and borderline reflective. Sharply struck throughout. There is just the faintest suggestion of golden patina over each side.
From The Teich Family Collection. NGC ID# 22SS, PCGS# 3977

3380 1936-S MS67 PCGS. Well-defined on the bison's horn and elsewhere. A bright Superb Gem with broad peripheral toning, largely green-gold and yellow-orange. Population: 71 in 67, 0 finer (12/13). NGC ID# 22SU, PCGS# 3979

3381 1936-S MS67 PCGS. The mostly untoned, thickly lustrous surfaces are free from any noticeable marks. (But really, would you expect any on an MS67?) Exceptional quality for type purposes. NGC ID# 22SU, PCGS# 3979

3382 1937-D Three-Legged AU55 NGC. FS-901. Both sides of this cream-gray key date nickel exhibit ample luster. The bison's hip and horn nonetheless display light wear. Virtually unabraded. Variety diagnostics are clear, such as the bison's textured back leg. NGC ID# 22SX, PCGS# 3982

3383 1937-D Three-Legged AU55 ANACS. FS-901. Lovely pastel orange-red and olive-green toning encompass this lustrous and moderately bright key date nickel. Slight wear on the bison's hip denies a higher grade. Housed in a small-sized holder. NGC ID# 22SX, PCGS# 3982

3384 1937-D Three-Legged AU55 PCGS. FS-901. A briefly circulated Choice AU dove-gray representative of the famous mint error. The horn shows slight wear but all diagnostics of the variety are evident, such as the trail of die dots below the bison's flank and an eroded texture on the bison's back leg. NGC ID# 22SX, PCGS# 3982

3385 1937-D Three-Legged AU55 PCGS. CAC. FS-901. Ex: Teich Family Collection. Tobacco-brown and steel-gray encompass unmarked and richly detailed surfaces. Slight wear on the tip of the tail and the nearby hip confirms a brief sojourn in circulation.
From The Teich Family Collection. NGC ID# 22SX, PCGS# 3982

3386 1937-D Three-Legged AU58 NGC. FS-901. Traces of mint luster shine through the light patina on this near-Mint three legged nickel. Appropriate design detail is evident, save for the usual weakness in the hair on the bison's head. NGC ID# 22SX, PCGS# 3982

1937-D Three-Legged Nickel, Lightly Toned MS62

3387 1937-D Three-Legged MS62 NGC. FS-901. Intermingled, soft reddish-gold, ice-blue, and yellow-gold colors reside on the lustrous surfaces of this classic twentieth-century key-date five cent. Areas of expected soft strike are noted, though the braid and the bison's horn and tail are sharp. A pleasing coin for the designated grade. NGC ID# 22SX, PCGS# 3982

PROOF BUFFALO NICKELS

1913 Type One Nickel, PR65 Even Patina, Strong Underlying Satiny Luster

3388 1913 Type One PR65 PCGS. Only struck in this one year, the Type One design was limited to 1,520 proofs. This fully struck example displays even reddish patina over each side that is enlivened by the bright, underlying satiny luster. A couple of flyspecks are seen on the lower right of the obverse. NGC ID# 278R, PCGS# 3988

1913 Nickel, PR66 High-Grade Type One Variant

3389 1913 Type One PR66 PCGS. CAC. This important Premium Gem matte proof nickel is housed in an older green-label PCGS holder and displays impressive light gold toning with delicate blue at the central obverse. The strike is bold, as expected. PCGS has only certified 52 finer examples (12/13). NGC ID# 278R, PCGS# 3988

3390 1916 PR64 PCGS. CAC. Ex: Teich Family Collection. A lovely Choice proof Buffalo nickel, this matte example has dark toning spots on its pinkish-champagne surfaces with a single carbon spot below the bison's tail.
From The Teich Family Collection. NGC ID# 278V, PCGS# 3993

1916 Buffalo Nickel, PR65 Vibrant and Colorful

3391 1916 PR65 PCGS. From the final matte proof mintage of only 600 pieces, the 1916 proof Buffalo nickel is very scarce in today's market. This attractive Gem displays sharply detailed design elements and vibrant mint luster, with a mixed patina of lime-green, lavender, and ice-blue. Eye appeal is outstanding. NGC ID# 278V, PCGS# 3993

3392 1936 Type One — Satin Finish PR66 PCGS. Ex: Teich Family Collection. An impressive Premium Gem, this satin proof has light gray surfaces with splashes of delicate gold and pale blue toning. *From The Teich Family Collection.* NGC ID# 278X, PCGS# 3994

3393 1936 Type One — Satin Finish PR67 PCGS. This Type One proof Buffalo nickel exhibits a razor-sharp strike that confirms its proof status. Interesting die lines extend across the bottoms and tops of 36 in the date, and may represent remnants of the rectangular punch device used to impress the date onto the die. Pleasing olive coloration is augmented by hints of speckled rose and sunset-orange patina. Impeccably preserved on both sides. *Ex: FUN Signature (Heritage, 1/2008), lot 828, which realized \$2,300.* NGC ID# 278X, PCGS# 3994

3394 1936 Type One — Satin Finish PR67 PCGS. CAC. The fields of this Superb Gem appear to be more brilliant and mirrored than what might be expected for a Satin finish, and display a degree of contrast with the devices that are more satiny. In any event, a veneer of soft champagne-gold color shows up under magnification, and all design elements are razor sharp. NGC ID# 278X, PCGS# 3994

1936 Buffalo Nickel, PR67 Brilliant Finish Few Certified Finer

3395 1936 Type Two — Brilliant Finish PR67 PCGS. Watery-blue surfaces display deep-mirrored reflectiveness and a notably full strike. The fields and devices are glossy and pure. Piercing, ice-blue patina is enhanced by subtle lilac accents. This is a memorable Superb Gem proof both for its technical quality and visual impact. PCGS and NGC combined have certified just 23 numerically finer Brilliant Finish proofs of the date (12/13). *From The Teich Family Collection.* NGC ID# 278Y, PCGS# 3995

3396 1937 PR64 PCGS. Rich golden-brown, powder-blue, and rose-red embrace this well struck specimen. Minuscule flecks are scattered. Although commercial Buffalo nickels were struck at Denver in 1938, proof production ended the year before. NGC ID# 278Z, PCGS# 3996

3397 1937 PR65 PCGS. Ex: Teich Family Collection. This exquisite Gem offers fully struck design elements and deeply mirrored fields with no mentionable distractions. A few hints of pale gold toning enhance the incredible eye appeal. *From The Teich Family Collection.* NGC ID# 278Z, PCGS# 3996

3398 1937 PR66 PCGS. CAC. Gleaming, highly reflective surfaces have the watery appeal of deep mirrors surrounding chromelike devices. A touch of clear gold color enhances the centers of this Premium Gem proof Buffalo nickel. A visually impressive example. NGC ID# 278Z, PCGS# 3996

3399 1937 PR67 PCGS. The fields display the deep reflectivity this issue is so well known for. Each side shows just the slightest tinge of rose-colored patina around the margins with essentially brilliant centers. Problem-free in all respects. NGC ID# 278Z, PCGS# 3996

3400 1937 PR62 Cameo NGC. CAC. Although the Mint used an all-brilliant finish on proof coins in the 1930s, this example displays considerable mint frost on the sharply detailed devices, contrasting boldly with the brightly mirrored fields. Cameo proofs are very rare. Light flecks of carbon are visible. Census: 1 in 62 Cameo, 6 finer (12/13). PCGS# 83996

JEFFERSON NICKEL

3401 1957 MS66 Full Steps PCGS. this spectacular Premium Gem exhibits razor-sharp definition on all design elements including Full Steps on Monticello. The brightly lustrous surfaces show hints of champagne-gold toning. Population: 11 in 66 (1 in 66+) Full Steps, 0 finer (12/13). NGC ID# 22V2, PCGS# 84061

PROOF JEFFERSON NICKEL

3402 1940 Reverse of 1938 PR66 PCGS. An elusive variant distinguished by the wavy steps on Monticello. Hints of light blue and gold color appear under magnification. Population: 31 in 66, 18 finer (12/13). NGC ID# 279Y, PCGS# 94177

EARLY HALF DIMES

3403 1796 — Plugged, Repaired, Whizzed — ANACS. VF35 Details. V-1, LM-1, R.3. A former hole is plugged below the ER in LIBERTY and opposite near the U in UNITED. Those letters are re-engraved, as are the upper curls and the left ribbon end, left ribbon loop, and wreath stem. Stars 9 through 11 are damaged. Both sides are microgranular and glossy from whizzing. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 22ZW, PCGS# 4254

3404 1797 15 Stars — Damaged, Cleaned — ANACS. Fine 12 Details. V-2, LM-1, R.3. This stone-gray Small Eagle half dime displays full legends and shows partial hair detail. Both sides are hairlined and exhibit several tiny digs. A scratch is noted from Liberty's neck to the bust tip. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 22ZZ, PCGS# 4258

BUST HALF DIMES

1829 V-2, LM-3 Half Dime, MS63

3405 1829 MS63 NGC. V-2, LM-3, R.2. Ex: "Col." E.H.R. Green. An intermediate die state before the rim break appears over IT of UNITED. The LM-3 is a plentiful variety that is known in business strike and proof format, and this piece is recorded as a proof on the accompanying envelope. Light heather toning is noted over mirrored surfaces on both sides of this Select specimen. It is an attractive prooflike Mint State example. *Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$5.00; Eric P. Newman Numismatic Education Society.* NGC ID# 232B, PCGS# 4276

3406 1829 MS64 NGC. V-2, LM-3, R.2. Light to medium rose-red toning adorns the left obverse and much of the reverse. Crisply struck and unabraded with good luster. An interesting lint mark (as produced) is noted above the date. NGC ID# 232B, PCGS# 4276

3407 1831 MS64 NGC. V-6, LM-1, R.1. Golden-brown, cherry-red, and aquamarine toning encompass this flashy and precisely struck silver type coin. Inspection beneath a lens reveals only the most trivial contact. NGC ID# 232D, PCGS# 4278

- 3408 1831 MS64 PCGS. V-1, LM-6, R.1.** Intermingled navy-blue, pumpkin-gold, and sun-gold toning illuminate this coruscating and evenly struck near-Gem. A well preserved prize for the collector of patinated early silver type. NGC ID# 232D, PCGS# 4278
- 3409 1831 MS64 PCGS. V-1, LM-6, R.1.** A "Scarface" die variety with a slender vertical crack (as made) on Liberty's cheek. A wheat-gold Choice Bust type coin. Vibrant luster illuminates well struck and clashed surfaces. Smooth aside from minor field grazes near the profile. NGC ID# 232D, PCGS# 4278
- 3410 1832 MS63 NGC. CAC. V-1, LM-3, R.1.** Rich blue-green, plum-mauve, and walnut-tan toning encompass this well struck and lightly abraded Bust type coin. Star 12 is repunched, and die cracks extend below both wingtips. NGC ID# 232E, PCGS# 4279
- 3411 1832 MS64 NGC. V-8, LM-5, R.1.** Rich caramel-gold toning adorns the obverse, though the reverse is brilliant. Well struck and satiny with a smooth reverse and light contact on the obverse field. A minor lamination, as made, affects the NI in UNITED. NGC ID# 232E, PCGS# 4279
- 3412 1832 MS64 PCGS. V-1, LM-3, R.1.** An attractive blanket of autumn-brown, forest-green, and plum-mauve confirms the originality of this satiny and crisply struck near-Gem. Minor contact on the cheek is all that limits the grade. NGC ID# 232E, PCGS# 4279
- 3413 1836 3/Inverted 3 MS64 NGC. CAC. V-4, LM-3, R.1.** The U in UNITED is boldly recut on this plentiful variety. Both sides are frosty with brilliant luster shining through the medium intensity iridescent toning. PCGS# 94288

SEATED HALF DIMES

- 3414 1844-O XF45 PCGS. CAC.** Medium O. Despite a reported mintage of 220,000 pieces, the 1844-O half dime is rare. In fact, it is rarer than the much promoted 1844 dime, which has a mintage of 72,500 pieces. This unmarked example has mottled sea-green and rose-red toning and exhibits inconsistency of strike. NGC ID# 2336, PCGS# 4334
- 3415 1845 MS66 NGC.** Faint champagne toning is evident at the center of the obverse and over much of the reverse, with vibrant blue and iridescent toning. Light obverse clash marks and heavier reverse clashing adds to the intrigue of this important condition rarity. Census: 5 in 66 (1 in 66 ★), 3 finer (1/14). NGC ID# 2337, PCGS# 4335
- 3416 1853 Arrows MS65 NGC.** In 1853, and continuing through 1855, small arrow heads flanked the date on the smaller silver denominations from the half dime to the half dollar, signifying a minor reduction in the weight of silver, intended to halt hoarding activities of the previous few years at a time when silver value was greater than face value. This Gem has a nice strike with satiny silver luster and attractive iridescent splashes.
Ex: New York Signature (Heritage, 6/2005), lot 5329. NGC ID# 233Y, PCGS# 4356
- 3417 1856 MS65 NGC.** Both sides have considerable ivory-gold toning with deep blue along the left obverse and reverse borders. The strike is typical for the 1856 half dimes, bold at the centers and indistinct at the borders.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 233P, PCGS# 4363
- 3418 1861/0 MS64 PCGS. FS-301.** A raised curve (above the left foot of the final 1 in the date) suggests a 0 underdigit. This high grade example is also interesting for its bold clash marks, as made. Smooth and coruscating with a typical strike and light peripheral golden-brown and aqua patina. NGC ID# 2349, PCGS# 4380
- 3419 1868-S MS66 NGC.** Gold and blue-green overtones are strong on this lustrous Premium Gem. Great eye appeal with quality detail on both Liberty and the wreath. Census: 6 in 66, 0 finer (12/13). NGC ID# 234P, PCGS# 4393

PROOF SEATED HALF DIMES

1858 Seated Half Dime, PR64 Seldom Seen in Cameo

- 3420 1858 PR64 Cameo PCGS. CAC.** 1858 was the first year proof sets were widely sold to collectors. An estimated 300 proof half dimes were produced for the year, of which 210 pieces were included in proof sets. While the exact origin of this near-Gem example is unknown, it is a largely brilliant, mirrored proof with a touch of reddish-gold toning at the margins. The reflective fields offset fully struck devices covered with pleasing mint frost. This is one of the few proof 1858 half dimes that exist with the Cameo designation. Population: 2 in 64 Cameo, 2 finer (12/13).
From The Teich Family Collection. PCGS# 84437

- 3421 1859 PR63 PCGS. CAC.** Ex: Teich Family Collection. The last of the Stars obverse type, this issue has the so-called "Hollow Stars" with the rays extend out from a sunken center. Both sides are fully mirrored with hints of gold toning and a dash of blue on the brilliant silver surfaces.
From The Teich Family Collection. NGC ID# 235P, PCGS# 4438

- 3422 1860 PR64+ Cameo PCGS.** Honey-gold borders cede to stone-white centers. This needle-sharp near-Gem exhibits undeniable contrast between the luminous motifs and the darkly mirrored fields.
Ex: Samuel W. Wolfson Collection, Part II (Stack's, 5/1963), lot 485.
From The Teich Family Collection. PCGS# 84443

1860 Half Dime, PR65 Cameo Brilliant with Frosted Devices

- 3423 1860 PR65 Cameo PCGS.** This is the first year for a new design type, with the legend moved to the obverse and the "cereal wreath" introduced to the reverse. While 1,000 proofs were made, apparently only a small percentage survive in Gem or better condition based on the PCGS and NGC statistics. This example is a brilliant-white Gem, with nicely frosted devices. The mirrored fields show just a few tiny abrasions that keep it from an even higher grade. The coin is sharply struck including full details on Liberty's head. Population: 3 in 65 Cameo, 5 finer (12/13).
From The Teich Family Collection. PCGS# 84443

**1862 Seated Half Dime, PR67
Vivid Multicolor Toning**

- 3424 1862 PR67 NGC.** The interiors of this wondrously preserved Civil War era proof are layered in lilac-gray and mint-green patina, while amber hues form about the peripheries. Evidence of die rust is clearly discernible on the portrait. Census: 13 in 67 (4 in 67 ★), 0 finer (12/13).

Ex: Long Beach Signature (Heritage, 6/2005), lot 5726.

From The Greensboro Collection, Part VI. NGC ID# 235X, PCGS# 4445

- 3425 1862 PR64 Cameo PCGS. CAC.** *Ex:* Teich Family Collection. Hints of gold toning appear on each side of this lovely Choice Cameo proof, with deeply mirrored fields around its lustrous devices. Population: 4 in 64 Cameo, 12 finer (12/13).

From The Teich Family Collection. PCGS# 84445

- 3426 1866 PR65 NGC.** This highly reflective Gem proof 1866 half dime displays moderate gray-lilac and rose patina over each side. Fully detailed in all areas. Only 725 proofs were struck of this issue. NGC ID# 2363, PCGS# 4449

- 3427 1867 PR65+ PCGS. CAC.** Iridescent aquamarine toning encompasses the obverse. The reverse has a peach center bounded by lime-green, plum-red, and navy-blue patina. Well struck and undisturbed.

Ex: George O. Walton Collection (Stack's, 10/1963), lot 508.

From The Teich Family Collection. NGC ID# 2364, PCGS# 4450

- 3428 1867 PR66 PCGS.** An exquisite Premium Gem from a low proof mintage of only 625 coins, this half dime has deep blue and amber toning over fully mirrored fields. Light contrast is visible beneath the toning. Population: 12 in 66, 5 finer (12/13). NGC ID# 2364, PCGS# 4450

- 3429 1868 PR65 NGC.** Sharply struck with vivid original toning, on both sides, that becomes deeper near the borders. Well preserved and virtually mark-free, a splendid Gem proof. Census: 22 in 65, 20 finer (1/14).

Ex: Long Beach Signature (Heritage, 6/2005), lot 5730. NGC ID# 2365, PCGS# 4451

- 3430 1869 PR65 Cameo PCGS. CAC.** *Ex:* Teich Family Collection. This lovely Gem proof has excellent field-to-device contrast beneath attractive gold, blue, and violet toning. Population: 6 in 65 Cameo, 4 finer (12/13).

From The Teich Family Collection. PCGS# 84452

EARLY DIMES

**1796 JR-4 Dime, XF Details
Rare Early Silver Type**

- 3431 1796 — Repaired, Whizzed — ANACS. XF40 Details. JR-4, R.4.** The introductory dime issue is the rarer date of the two-year Small Eagle type. Both sides are whizzed, and subtle repairs are evident on the portrait above the ear and the eagle's right (facing) leg. Subsequently toned light walnut-brown and steel-gray.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236B, PCGS# 4461

- 3432 1798/97 16 Stars on Reverse — Whizzed — NGC Details. AU. JR-1, R.3.** This early Heraldic Eagle dime has minimal wear and is devoid of visible marks. Both sides are hairlined and minutely granular. Attractively retoned golden-brown on the obverse and sea-green on the reverse.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236F, PCGS# 4468

- 3433 1805 4 Berries — Reverse Scratched — NGC Details. XF. JR-2, R.2.** The 4 Berries Reverse, JR-2 in the JRCS dime reference, is the usual variety seen for 1805 by a small margin, as JR-1 is rated R.3. This gold and gray-brown example has strong detail, with an intermittent bright silver scratch across the lower reverse from 7 o'clock to 5 o'clock. NGC ID# 236S, PCGS# 4477

- 3434 1807 — Damaged — ANACS. XF40 Details. JR-1, R.2.** JR-1 must have been struck from well prepared dies, since they lasted through the full run of 165,000 pieces. Most examples, including the present piece, nonetheless display obverse clash marks. This silver-gray example has a vertical scratch behind Liberty's neck and a scrape above the drapery. Lesser marks are near the TA in STATES.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236T, PCGS# 4480

BUST DIMES

- 3435** 1820 Large 0 MS61 ANACS. JR-13, R.2. The flag of the 1 in 10 C is repunched. Richly patinated ocean-blue, lime-green, and lavender. The strike shows occasional softness but marks are minor for the designated grade. Struck from clashed dies.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236X, PCGS# 4492

1821 Large Date Dime, Good 4 Extremely Rare JR-2

- 3436** 1821 Large Date Good 4 PCGS. JR-2, R.7. By far the rarest 1821 die marriage, JR-2 pairs the obverse of JR-1 with the reverse of JR-4. The present circulated example has stone-white motifs and medium gray fields. The left-side stars and the date show wear but LIBERTY and PLURIBUS UNUM are bold. No marks are of any import. NGC ID# 236Y, PCGS# 4496

- 3437** 1835 MS62 PCGS. JR-4, R.2. Wide 10 C. The 83 in the date is repunched. A stone-white and well struck silver type coin. Only minor marks are apparent. Luster fills the borders and devices. NGC ID# 237F, PCGS# 4527

- 3438** 1835 MS62 NGC. CAC. JR-9, R.2. The 3 in the date is boldly repunched. Die chips affect the M in AMERICA. Rich aquamarine and olive-brown toning encompasses this satiny, precisely struck, and unabraded Capped Bust type coin. NGC ID# 237F, PCGS# 4527

1835 JR-5 Dime, MS64 Sharply Struck

- 3439** 1835 MS64 NGC. CAC. JR-5, R.1. An available variety featuring a Block 8 date style. The obverse of this well struck near-Gem has pearl-white with speckled golden-brown toning along the border. The reverse has deeper dove-gray and walnut-brown toning. Evaluation beneath a loupe locates only a minor reverse rim nick at 7 o'clock. NGC ID# 237F, PCGS# 4527

SEATED DIMES

- 3440** 1837 No Stars, Large Date AU58 PCGS. CAC. Fortin-101b. Bold obverse radial die cracks at 4:30 and 7 o'clock intersect near the left (facing) knee. Dusky gunmetal-gray and chestnut, and forest-green toning embraces well struck and satiny surfaces. NGC ID# 237R, PCGS# 4561

1841 Seated Dime, MS65 Attractive Natural Toning

- 3441** 1841 MS65 NGC. The 1841 Seated Liberty dime claims a mintage of 1.6 million pieces, but few examples have survived in high grade and specimens in MS65 condition are quite rare. This delightful Gem features sharply detailed design elements and vibrant mint luster under shades of pale gold, lavender, and gray. Census: 9 in 65, 7 finer (12/13). NGC ID# 2384, PCGS# 4579

- 3442** 1842-O AU53 PCGS. Fortin-105. Medium O. A die defect gives Liberty an additional finger near the shield. The reverse has a curiously round die lump at 12:30. An untuned and well defined New Orleans dime with a couple of thin field marks on each side. NGC ID# 2387, PCGS# 4582

1844 Dime, MS61 'Little Orphan Annie'

- 3443** 1844 MS61 NGC. The "Little Orphan Annie" (or 1844) is infrequently offered at auction in Uncirculated grades, making the presence of this coin and a Gem example quite extraordinary. Each side of this bright, satiny example displays a mixture of sea-green and golden-rose. The strike details are somewhat soft, and the most obvious pedigree identifier is a horizontal planchet void in the right obverse field. Census: 2 in 61, 7 finer (12/13). NGC ID# 238A, PCGS# 4585

- 3444** 1853 Arrows MS64 PCGS. This fully struck near-Gem offers light tan toning and dynamic cartwheel sheen. Smooth save for a tick between the upper wreath ends. Struck from clashed dies, and housed in a green label holder.
Ex: Dallas Signature (Heritage, 12/2005), lot 435, which realized \$747.50. NGC ID# 2398, PCGS# 4603

- 3445** 1872 MS65 PCGS. Soft cobalt-blue and crimson patina resides on the lustrous surfaces of this well-defined Gem. Both sides are nicely preserved. Population: 8 in 65, 2 finer (12/13). NGC ID# 23A7, PCGS# 4656

**1872-S Dime, MS62
Condition Rarity**

3446 1872-S MS62 NGC. Light silver-gray luster overall with mild green elements visiting the margins. A number of small and choppy marks visit the fields, but the arm's-length eye appeal is excellent for the grade. Out of 190,000 pieces struck, only a handful survive in Mint State. Census: 3 in 62, 5 finer (12/13). NGC ID# 23A9, PCGS# 4658

3447 1876 MS66+ NGC. CAC. Fortin-104. Type Two Reverse. Fortin writes, "the Type I reverse is very common while the Type II reverse is considered scarce." Third party holders have yet to note the distinction. Attractively toned fire-red, apple-green, and powder-blue with the latter color dominant on the reverse. Census: 25 in 66 (1 in 66+, 3 in 66 ★), 7 finer (12/13). NGC ID# 23AH, PCGS# 4679

3448 1876-S MS65 PCGS. CAC. Fortin-102. Type One Reverse. The 6 in the date is obviously repunched, but the truly curious feature of Fortin-102 is the N in ONE, which leans strongly to the left. A lustrous Gem with original tan-brown, aquamarine, and powder-blue toning. Encased in an old green label holder. NGC ID# 23AK, PCGS# 4681

1877-CC Dime, Frosty MS66

3449 1877-CC MS66 PCGS. Type Two Reverse with E in ONE further from the wreath. Both sides of this Premium Gem are awash with frosty luster and each exhibits strong detail on the design elements. The surfaces are essentially untoned and very nicely cared for. Population: 37 in 66 (2 in 66+), 5 finer (12/13). NGC ID# 23AM, PCGS# 4683

**1881 Dime, Highly Lustrous MS66+
Only One Finer PCGS-Certified Coin**

3450 1881 MS66+ PCGS. CAC. The 1881 is a highly collectible dime whose mintage is limited to 975 proofs and a paltry 24,000 strikes for circulation. This is an all-brilliant example whose primary focal point is its thick mint frost. A few tiny field marks can be picked up with a loupe, but the luster more than compensates. Population: 10 in 66 (1 in 66+), 1 finer (12/13). NGC ID# 23AU, PCGS# 4689

3451 1883 MS66 NGC. A frost-white example, this piece displays billowing mint luster. An appealing Premium Gem with exceptionally clean fields and a strong strike, with only a touch of weakness on Liberty's head, as often seen on this issue. Census: 41 in 66 (1 in 66+, 1 in 66 ★), 23 finer (12/13). NGC ID# 23AW, PCGS# 4691

3452 1884 MS67 NGC. Areas of toning appear on both sides of this Superb Gem including several shades of sea-green, along with tan and russet colors. Vibrant luster and a sharp strike further the appeal. Census: 27 in 67 (1 in 67 ★, 1 in 67+★), 7 finer (12/13). NGC ID# 23AX, PCGS# 4692

3453 1886 MS66 PCGS. CAC. Russet, gold, deep green, cherry, orange, and sea-green toning flecks cover large portions of both sides of this Premium Gem, adding to the eye appeal. The coin is well-struck, displaying attractive detail. Population: 30 in 66, 8 finer (12/13). NGC ID# 23B3, PCGS# 4696

**1886 Seated Dime, MS67
Tied for Finest Certified**

3454 1886 MS67 PCGS Secure. CAC. This amazing Superb Gem has a delicate die crack at the top of the obverse. Both sides have frosty silver luster beneath medium golden-tan toning, and peripheral light blue and bright gold accents. Population: 8 in 67 (1 in 67+), 0 finer (12/13). NGC ID# 23B3, PCGS# 4696

3455 1887-S MS65 PCGS. Soft cobalt-blue patina runs over the lustrous surfaces of this Gem. The design elements are well-impressed. Population: 27 in 65 (1 in 65+), 5 finer (12/13). NGC ID# 23B6, PCGS# 4699

3456 1890-S MS65 NGC. This well-struck Gem's dappled toning offers broad coverage across each side. Jade-green and plum-gray are the major hues. Census: 15 in 65, 8 finer (12/13). NGC ID# 23BC, PCGS# 4705

3457 1891-O MS66 PCGS. Lustrous silver-white surfaces display strongly defined design features. As made clash marks are visible on the obverse. Population: 11 in 66, 3 finer (12/13). NGC ID# 23BE, PCGS# 4707

3458 1891-S MS65 PCGS. A spectacular Gem from the last year of the Seated Liberty design, this coin exhibits well-detailed design elements and vibrant mint luster, with hints of greenish-gold toning at the peripheries. Population: 23 in 65, 9 finer (12/13). NGC ID# 23BF, PCGS# 4708

PROOF SEATED DIMES

3459 1860 PR64 Cameo PCGS. Ex: Teich Family Collection. The brilliant reflective surfaces of this impressive Choice example show only a few minor hairlines and contact marks and contrast boldly with the sharply detailed frosty design elements. Population: 9 in 64 Cameo, 18 finer (12/13).
From The Teich Family Collection. PCGS# 84753

3460 1860 PR65 Cameo PCGS. A fully struck Gem with frosty devices and lustrous fields. Light rose toning is confined to the margins. Both sides exhibit faint clash marks. Though 1,000 proofs were struck, a majority were eventually melted as unsold. Population: 6 in 65 Cameo, 12 finer (12/13).
Ex: Empire Collection (Stack's, 11/1957), lot 807.
From The Teich Family Collection. PCGS# 84753

3461 1861 PR63 Cameo PCGS. CAC. Ex: Teich Family Collection. A sharply detailed Select proof from the first year of the Civil War, the frosty design elements establish bold cameo contrast with the deeply reflective fields. Population: 4 in 63 Cameo, 6 finer (12/13).
From The Teich Family Collection. PCGS# 84754

3462 1862 PR64 PCGS. CAC. Lovely golden-brown, steel-gray, ruby-red, and aquamarine toning enriches this intricately struck Choice proof. A mere 550 proofs were issued. Population: 39 in 64, 6 finer (12/13).
Ex: Nate Smith Collection (Stack's, 3/1973), lot 592.
From The Teich Family Collection. NGC ID# 23CL, PCGS# 4755

3463 1867 PR65 NGC. CAC. Blue-violet and rose hues enrich each side, while the reverse peripheries add a measure of green-gold. A well-defined Gem proof that glimmers with reflectivity. Census: 19 in 65, 15 finer (12/13). NGC ID# 23CR, PCGS# 4760

3464 1867 PR64+ Deep Cameo PCGS. CAC. Ex: Teich Family Collection. The sharply detailed frosty design elements contrast profoundly with the deeply mirrored fields and there are no mentionable distractions. Eye appeal is extraordinary. Population: 2 in 64 (1 in 64+) Deep Cameo, 0 finer (12/13).
From The Teich Family Collection. PCGS# 94760

3465 1868 PR65 Cameo NGC. A boldly defined Gem Cameo proof, this early Reconstruction Era dime has excellent contrast with deeply mirrored fields hosting attractive turquoise and violet patina. Census: 6 in 65 Cameo (1 in 65 ★ Cameo), 5 finer (1/14). PCGS# 84761

3466 1869 PR66 NGC. The low mintage of only 600 proofs severely limits the number of high-grade survivors. The surfaces are nicely toned in rich shades of blue-green and rose with strong mirrors that flash brightly through the patina on each side. Census: 8 in 66 (1 in 66+), 5 finer (1/14). NGC ID# 23CT, PCGS# 4762

3467 1872 PR65 PCGS. Fortin-109. The 2 in the date is widely misplaced on Liberty's rock. A fairly obscure but dramatic variety. Very scarce, since most proofs for the date are Fortin-103. Blue-green, peach-gold, and ruby-red dominate this nicely struck and glossy Gem.
Ex: Samuel W. Wolfson Collection, Part II (Stack's, 5/1963), lot 608.
From The Teich Family Collection. NGC ID# 23CW, PCGS# 4765

3468 1872 PR64 Cameo PCGS. Ex: Teich Family Collection. Bold cameo contrast is evident between the sharply detailed frosty devices and the deeply reflective fields of this attractive Choice proof. A few hints of greenish-gold toning enhance the well-preserved surfaces. Population: 9 in 64 Cameo, 12 finer (12/13).
From The Teich Family Collection. PCGS# 84765

3469 1873 No Arrows, Closed 3 PR64 PCGS. CAC. Cobalt-blue, lavender-red, and apple-green toning encompasses this impressively patinated Choice proof. Minor obverse lint marks are strictly of mint origin.
Ex: Samuel W. Wolfson Collection, Part II (Stack's, 5/1963), lot 610.
From The Teich Family Collection. NGC ID# 23CX, PCGS# 4766

3470 1873 Arrows PR62 PCGS. Ex: Teich Family Collection. A sharply detailed proof example of this short-lived design, with reflective surfaces that show a few minor hairlines and contact marks. From a proof mintage of 800 pieces.
From The Teich Family Collection. NGC ID# 23DH, PCGS# 4769

3471 1873 Arrows PR63 PCGS. The obverse is golden-brown save for a peripheral band of ruby-red and navy-blue. The reverse has a tan center and a blue-green border. The well struck surfaces appear splendidly preserved beneath a coating of lacquer.
Ex: Samuel W. Wolfson Collection, Part II (Stack's, 5/1963), lot 612.
From The Teich Family Collection. NGC ID# 23DH, PCGS# 4769

3472 1873 Arrows PR64 NGC. Deep electric-blue and reddish-gold on the obverse cedes to light electric-blue at the reverse margin. Sharply struck throughout. A few hairlines are visible in the central reverse. Census: 34 in 64, 28 finer (12/13). NGC ID# 23DH, PCGS# 4769

3473 1874 Arrows PR63 PCGS. Ex: Teich Family Collection. Fully struck design elements exhibit modest contrast against the fields of this Select Proof dime. Both sides are essentially untoned.
From The Teich Family Collection. NGC ID# 23DJ, PCGS# 4770

3474 1875 PR65 PCGS. CAC. This deeply toned Gem proof has vibrant blue and lilac toning on the obverse, with gorgeous blue and turquoise on the reverse. Here is an incredible example for the toning enthusiast. Population: 14 in 65, 5 finer (12/13). NGC ID# 23CY, PCGS# 4772

3475 1876 PR64 Cameo PCGS. Fortin-103. Type One Reverse. The reverse is lightly die doubled, strongest on the E in DIME. A wisp of golden patina precludes full brilliance. Peripheral design elements show minor inexactness of strike. Population: 12 in 64 Cameo, 11 finer (12/13).
From The Teich Family Collection. PCGS# 84773

1877 Seated Dime, PR64 Sole Deep Cameo for the Date

3476 1877 PR64 Deep Cameo PCGS. CAC. From a small mintage of 510 proofs, just one 1877 dime — this coin — has earned the PCGS Deep Cameo designation in any grade (12/13). Boldly struck and richly frosted, the devices are surrounded by deep, liquid mirrors that reveal only scattered delicate hairlines under magnification. A slight golden hue is seen at the rims, but the visual impression of this stunning, near-Gem is one of an untuned and brilliant-white proof coin.
From The Teich Family Collection. PCGS# 94774

3477 1879 PR65 PCGS. The obverse offers bright sea-green and gold patina, while the reverse exhibits deep lilac toning at the center. A well struck and magnificently preserved Gem. A low mintage date. Certified in an old green label holder. Population: 30 in 65, 23 finer (12/13).

Ex: *Orlando FUN Signature (Heritage, 1/2003)*, lot 6439. NGC ID# 23D4, PCGS# 4776

3478 1880 PR64 PCGS. Dusky gray and orange-gold toning cover each side of this shimmering, reflective proof, especially apparent when rotated under a light. A low-mintage date for business strikes, the 1880 proofs are always in demand by both circulation strike and proof collectors. NGC ID# 23D5, PCGS# 4777

3479 1880 PR64 Cameo PCGS. The light golden overtones at the obverse margins show more extensive coverage on the reverse. Both sides are powerfully reflective in the fields with frosty contrasting devices. Population: 16 in 64 Cameo, 40 finer (12/13). PCGS# 84777

3480 1880 PR64 Cameo PCGS. CAC. Fortin-101. Ice-white designs rise in bold detail above the mirrored fields. Light rose-red and navy-blue toning is confined to the margins. Lapping reduces drapery definition, as made. A low mintage date.

Ex: *T.K. Harvin Collection (Stack's, 6/1959)*, lot 567.

From *The Teich Family Collection*. PCGS# 84777

3481 1882 PR66 PCGS. A spectacular Premium Gem from a generous proof mintage of 1,100 pieces, this coin displays sharply detailed design elements and deeply mirrored fields, with hints of pale gold and amber toning. Population: 20 in 66, 10 finer (12/13). NGC ID# 23D7, PCGS# 4779

3482 1882 PR66 PCGS. CAC. Fortin-101. Cameo contrast is substantial but the coin is undesignated as such due to its green label holder. The drapery is lapped, as made, and both sides display light butter-gold toning. Pristine save for minute carbon on the lower reverse. NGC ID# 23D7, PCGS# 4779

3483 1883 PR64 PCGS. CAC. Ex: *Teich Family Collection*. Attractive shades of pale gold toning blanket the surfaces of this impressive Choice example. Sharply detailed design elements and deeply mirrored fields add to the outstanding eye appeal. Population: 80 in 64, 80 finer (12/13).

From *The Teich Family Collection*. NGC ID# 23D8, PCGS# 4780

3484 1883 PR65 PCGS. Ex: *Teich Family Collection*. Cobalt-blue toning on the obverse of this Gem proof cedes to soft champagne-gold on the reverse. A solid strike imparts sharp detail to the design features. Population: 40 in 65, 40 finer (12/13).

From *The Teich Family Collection*. NGC ID# 23D8, PCGS# 4780

3485 1884 PR65 NGC. Light cameo contrast is noted on both sides of this brilliant, virtually untuned Gem Seated dime. The design elements are bold and the reverse exhibits delicate peripheral champagne toning.

From *the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation*. NGC ID# 23D9, PCGS# 4781

1885 Seated Dime, PR67 Cameo Wonderful Contrast

3486 1885 PR67 Cameo NGC. Extraordinary contrast meets the eye on this impressive Superb Gem Cameo proof, with gorgeous silver surfaces that show hints of peripheral champagne toning. Deeply mirrored fields provide a wonderful back drop for the highly lustrous devices. Census: 21 in 67 Cameo (1 in 67 ★ Cameo), 7 finer (12/13). PCGS# 84782

3487 1886 PR66 PCGS. CAC. Blue and green-to-gold toning saturates the obverse margins and the vast majority of the reverse. Captivating mirrors and clear contrast between Liberty and the surrounding fields give this coin winning eye appeal. Population: 21 in 66 (1 in 66+), 6 finer (12/13). NGC ID# 23DB, PCGS# 4783

3488 1886 PR64 Cameo PCGS. Untoned surfaces display pleasing field-motif contrast and sharply defined design elements, save for the usual softness in Liberty's hair. Population: 18 in 64 Cameo, 20 finer (12/13). PCGS# 84783

3489 1886 PR65 Cameo PCGS. This flashy Gem has an intricate strike and exemplary preservation. Tobacco-brown toning deepens near the borders. A scant 886 proofs were produced.

Ex: *George A. Powers Collection (Stack's, 12/1959)*, lot 307.

From *The Teich Family Collection*. PCGS# 84783

3490 1887 PR65 PCGS. The glassy surfaces are undisturbed beneath deep walnut-brown, cobalt-blue, and cherry-red toning. The strike is crisp except on a small upper left portion of the wreath.

Ex: *George A. Powers Collection (Stack's, 12/1959)*, lot 308.

From *The Teich Family Collection*. NGC ID# 23DC, PCGS# 4784

3491 1889 PR62 Cameo PCGS. CAC. Ex: *Teich Family Collection*. Sharply detailed and frosty, the design elements of this attractive proof contrast boldly with the reflective fields. A few hints of greenish-gold and cerulean-blue toning accent the surfaces. Population: 1 in 62 Cameo, 19 finer (12/13).

From *The Teich Family Collection*. PCGS# 84786

BARBER DIMES

3492 1893/2 — Cleaning — PCGS Genuine. Unc Details. Breen-3479. The base of a 2 is visible inside the lower loop of the 3 on this bright silver dime. Both sides exhibit cleaning lines that are especially obvious on the obverse. NGC ID# 23DP, PCGS# 4799

3493 1893-O MS65 NGC. This second-year issue out of New Orleans had few of its 1.76 million pieces saved at the time of release, and Gems such as this richly toned beauty are condition rarities. The obverse is pink-gray with peach and antique-gold enrichment at the margins, while the reverse has deeper versions of the same colors. Census: 10 in 65 (1 in 65+), 8 finer (1/14).

Ex: *FUN Signature (Heritage, 1/2005)*, lot 6179; *CSNS Signature (Heritage, 4/2006)*, lot 1287; *Houston Signature (Heritage, 12/2008)*, lot 1126. NGC ID# 23DR, PCGS# 4801

3494 1895 MS64 PCGS. CAC. Splashes of cobalt-blue and orange patination reside on the lustrous surfaces of this well-struck near-Gem. Some light marks preclude Gem status. Population: 32 in 64 (2 in 64+), 28 finer (12/13). NGC ID# 23DV, PCGS# 4806

- 3495 1895-S MS64 PCGS.** Deep orange and lilac patination resides on radiantly lustrous surfaces, and a solid strike leaves sharp definition on the design elements. A handful of obverse marks precludes a higher grade. Nevertheless, a challenging coin in Mint State. Population: 29 in 64 (3 in 64+), 9 finer (12/13). NGC ID# 23DX, PCGS# 4808

**1899-O Barber Dime, MS65
Attractive Multicolor Toning**

- 3496 1899-O MS65 NGC.** The 1899-O Barber dime issue is seldom seen in finer grades than the present Gem example. The obverse is silver-white with scattered powder-gray and aqua flecks, the reverse is largely pinkish-gray, but both sides are free of any major marks and generate considerable eye appeal. Minor strike weakness appears on the lower reverse. Census: 8 in 65, 4 finer (12/13). NGC ID# 23EA, PCGS# 4819
- 3497 1907-D MS64 PCGS.** Golden-russet and cream-gray dominate though the borders offer glimpses of forest-green. A satiny and well struck Denver Mint dime. Very scarce in the present quality despite a mintage of more than 4 million pieces. Population: 16 in 64, 17 finer (12/13). NGC ID# 23F4, PCGS# 4843
- 3498 1912 MS66 PCGS.** Sharply detailed design elements and especially vibrant mint luster are the calling cards of this delightful Premium Gem. Attractive shades of champagne-gold patina visit the well-preserved surfaces. Population: 50 in 66 (1 in 66+), 4 finer (12/13). NGC ID# 23FM, PCGS# 4860

PROOF BARBER DIMES

- 3499 1892 PR65+ Cameo PCGS. Flynn-RPD-002.** The date is nicely repunched west. A precisely struck Gem with only a hint of golden toning. The devices are white and contrast with the smooth and reflective fields.
*Ex: George A. Powers Collection (Stack's, 12/1959), lot 319.
From The Teich Family Collection. PCGS# 84875*
- 3500 1893 PR65 NGC.** Green-gold and light blue-gray are the main hues on this second-year Gem proof Barber dime. Both sides offer mild contrast, particularly the obverse. NGC ID# 23G4, PCGS# 4877
- 3501 1893 PR66 PCGS. CAC.** Vivid shades of champagne-gold and violet toning blanket the well-preserved surfaces of this delightful Premium Gem. The design elements are sharply detailed and eye appeal is outstanding. Population: 22 in 66, 14 finer (12/13). NGC ID# 23G4, PCGS# 4877

1893 Dime, Patinated PR67

- 3502 1893 PR67 PCGS.** This is the second year of issue for the Barber dime series, and one of only 792 proofs that were minted. Deep electric-blue toning in the fields highlights the more lightly-shaded motifs. All design features are crisply struck. Wonderful overall eye appeal. Population: 13 in 67, 1 finer (12/13). NGC ID# 23G4, PCGS# 4877
- 3503 1893 PR62 Cameo PCGS.** *Ex: Teich Family Collection.* The sharply detailed frosty design elements show intense cameo contrast with the reflective fields that display only minor hairlines and contact marks. Population: 3 in 62 Cameo, 69 finer (12/13).
From The Teich Family Collection. PCGS# 84877
- 3504 1893 PR65 Cameo PCGS.** Green-gold, blue, and violet-rose toning overall with lighter centers. Both sides are well-contrasted, the reverse in particular. Population: 17 in 65 Cameo, 30 finer (12/13). PCGS# 84877
- 3505 1894 PR64 Cameo PCGS. CAC.** *Ex: Teich Family Collection.* Excellent contrast ensures the Cameo designation of this lovely near-Gem. Needle-sharp design detail is apparent throughout. There are fewer marks than what might be expected for the numerical grade. Population: 19 in 64 (1 in 64+) Cameo, 39 finer (12/13).
From The Teich Family Collection. PCGS# 84878
- 3506 1894 PR64 Deep Cameo PCGS.** This early Barber dime is almost brilliant. The fields are deeply mirrored and establish a dark background for the thickly frosted devices. PCGS# 94878
- 3507 1895 PR65 PCGS. CAC.** Peach-gold is prevalent though the portrait is brilliant and the right reverse is lilac-red. A fully struck and undisturbed Gem. An identical proof mintage as its silver dollar counterpart, but eminently more affordable.
*Ex: S.E. Goldsmith Collection (Stack's, 10/1958), lot 1317.
From The Teich Family Collection. NGC ID# 23G8, PCGS# 4879*
- 3508 1897 PR66 PCGS. CAC.** Lovely cherry-red, pumpkin-gold, and lime-green patina enriches this needle-sharp dime. Pristine aside from a pair of hairlines on the left obverse field.
*Ex: Powers Collection (Stack's, 12/1959), lot 329.
From The Teich Family Collection. NGC ID# 23GA, PCGS# 4881*
- 3509 1898 PR65 Cameo PCGS.** Light caramel-gold toning visits this nicely mirrored and well preserved Gem. The devices are luminous and provide good contrast. Only 735 proofs were coined.
*Ex: Jim Spaulding White Collection (Stack's, 2/1960), lot 795.
From The Teich Family Collection. PCGS# 84882*

**1899 Barber Dime, PR66
Toned Cameo Example**

3510 1899 PR66 Cameo PCGS. CAC. Only 846 proof Barber dimes were struck in 1899 and high-grade specimens, with the Cameo designation, are quite rare. This delightful Premium Gem exhibits sharply detailed frosty design elements that contrast noticeably with the deeply reflective fields. The virtually pristine surfaces are toned in shades of greenish-gold and cerulean-blue, with outstanding eye appeal. Population: 11 in 66 (2 in 66+) Cameo, 6 finer (12/13). PCGS# 84883

3511 1900 PR64 Cameo PCGS. Ex: Teich Family Collection. Subtle aqua-blue, crimson, and reddish-gold patination around the borders frames the virtually color-free centers. Excellent detail is apparent on the design features. Population: 21 in 64 Cameo, 38 finer (12/13). *From The Teich Family Collection.* PCGS# 84884

3512 1901 PR65 Cameo PCGS. CAC. Ex: Teich Family Collection. This Gem Cameo is nearly untuned except for a few wisps of crimson and orange-gold that gravitate to the margins. Crisply defined, impeccably preserved, and highly appealing. Population: 12 in 65 (1 in 65+) Cameo, 17 finer (12/13). *From The Teich Family Collection.* PCGS# 84885

3513 1903 PR64+ PCGS. CAC. Ex: Teich Family Collection. This high-end Choice specimen exhibits pinpoint definition on all design elements and deeply reflective fields that show a few faint traces of champagne gold toning. Population: 66 in 64 (2 in 64+), 69 finer (12/13). *From The Teich Family Collection.* NGC ID# 23GG, PCGS# 4887

3514 1903 PR65 NGC. This toned Gem has fully mirrored surfaces with reflective devices showing little contrast as practiced in Philadelphia at the time. Both sides are entirely toned in cobalt-blue, teal, lavender, and light gold, the latter found only at the central reverse. Census: 44 in 65, 47 finer (1/14). NGC ID# 23GG, PCGS# 4887

3515 1905 PR65 PCGS. The 5 in the date is broadly repunched north. The variety is mentioned in passing in the Lawrence reference to the series. This fully struck Gem is attractively toned ocean-blue, sun-gold, tan-brown, lavender, and slate-gray. *From The Teich Family Collection.* NGC ID# 23GJ, PCGS# 4889

3516 1905 PR64+ Cameo PCGS. CAC. Exemplary frost on the portrait and wreath confirms the PCGS designation. Lightly toned butter-gold with gray freckles noted near the denomination. A couple of faint slide marks on the cheek deny an even higher grade. Population: 13 in 64 (2 in 64+) Cameo, 32 finer (12/13). *Ex: Empire Collection (Stack's, 11/1957), lot 908.* *From The Teich Family Collection.* PCGS# 84889

3517 1906 PR66 PCGS. Ex: Teich Family Collection. Cobalt-blue, lavender, and gold-orange toning adorns both sides of this gorgeous, impressively struck dime, each of which has been well cared for. Population: 19 in 66 (2 in 66+), 13 finer (12/13). *From The Teich Family Collection.* NGC ID# 23GK, PCGS# 4890

**1906 Barber Dime, PR67
Vivid Toning, Exceptional Eye Appeal**

3518 1906 PR67 PCGS. CAC. Only 675 proof Barber dimes were struck in 1906 and few survivors can match the quality and eye appeal of the present coin. Vivid shades of greenish-gold and violet toning blanket the well-preserved surfaces and the design elements are sharply detailed throughout. Population: 12 in 67 (1 in 67+), 1 finer (12/13). NGC ID# 23GK, PCGS# 4890

3519 1907 PR64 Deep Cameo PCGS. Strong field/motif contrast shows on both sides of this sharply struck near-Gem. A faint horizontal streak is visible on Liberty's cheek and another on the neck. This piece is the single finest seen by either PCGS or NGC (12/13)! PCGS# 94891

3520 1908 PR66 NGC. Light cobalt-blue, lavender, and gold-orange toning around the borders frames the untuned centers of this Premium Gem. Razor-sharp design detail and impeccably preserved surfaces heighten the coin's eye appeal. Census: 29 in 66, 22 finer (12/13). NGC ID# 23GN, PCGS# 4892

3521 1910 PR65 Cameo PCGS. Ex: Teich Family Collection. Remarkably deep mirrors in the fields establish the "black" background for the frosted devices and the subsequent Cameo designation. Most of each side is brilliant, but the obverse shows just the slightest hint of rose patina around the periphery. Population: 12 in 65 (1 in 65+) Cameo, 13 finer (12/13). *From The Teich Family Collection.* PCGS# 84894

3522 1913 PR65 NGC. From a proof mintage of 622 pieces, this attractive Gem displays sharply defined design elements and reflective fields under shades of light blue and greenish-gold toning. Census: 20 in 65, 28 finer (1/14). NGC ID# 23GU, PCGS# 4897

3523 1915 PR64+ PCGS. CAC. An attractively toned specimen with splashes of peach-gold, apple-green, and plum-red at the peripheries. The reverse is brilliant near ONE. A scant 450 proofs were issued. *From The Teich Family Collection.* NGC ID# 23GW, PCGS# 4899

MERCURY DIMES

**1916 Dime, MS67+ Full Bands
Excellent Color**

3524 1916 MS67+ Full Bands PCGS. CAC. An exquisitely detailed first-year Mercury dime with a touch of satin to the luster. Interiors are more-or-less silver with bold green-gold, amber-orange, and violet hues around, most visibly at the margins. PCGS has graded only nine pieces as MS68 Full Bands or finer (12/13). NGC ID# 23GX, PCGS# 4905

- 3525 1916-D VG8 PCGS.** This key-date example displays silver-gray surfaces and is a bit better defined than expected for the designated grade. However, a patch of corrosion is located under the T of UNITED. NGC ID# 23GY, PCGS# 4906
- 3526 1916-D VG8 PCGS. CAC.** The obverse rims are completely raised, and those on the reverse nearly so. Golden-gray surfaces are remarkably clean and original. An excellent lower-grade example for a Mercury dime collection. NGC ID# 23GY, PCGS# 4906
- 3527 1916-D — Scratch — PCGS Genuine. Fine Details.** A pinscratch between the forehead curl and the L in LIBERTY corresponds to the PCGS designation. The portrait has a few faint horizontal hairlines. Light tan-gold toning visits this primarily stone-gray key date example. NGC ID# 23GY, PCGS# 4906
- 3528 1916-D — Obverse Scratched — NGC Details. VF.** Four obverse pinscratches (two near the T in LIBERTY, one behind the eye, and another on the field near the chin) confirm the NGC designation. The reverse border has a few tiny spots. Most survivors of this key date dime are well worn. The median certified grade is Good 4. NGC ID# 23GY, PCGS# 4906

1916-D Dime, Sharply Struck AU55

- 3529 1916-D AU55 PCGS.** The silver-gray surfaces of this Choice AU key-date example display considerable luster and are devoid of mentionable abrasions. The design elements are sharply struck, including some separation on the bands of the fasces. Minute greenish flecks (PVC or other material?) are scattered about, especially on the reverse. NGC ID# 23GY, PCGS# 4906
- 3530 1917-D MS64 Full Bands PCGS. CAC.** Lustrous surfaces reveal traces of light golden-tan color under magnification. The only factor precluding Gem classification is a few grazes on the cheek. NGC ID# 23H3, PCGS# 4913

1917-D Dime, MS65 Full Bands A Seldom-Seen Offering

- 3531 1917-D MS65 Full Bands PCGS.** A precisely struck second-year Mercury dime with clear bands on the reverse. Warm luster filters through ample dappled patina, bronze and violet overall with aspects of green-gold. The 1917-D is among the Full Bands key dates of the mintmarked series. Population: 38 in 65 Full Bands, 8 finer (12/13). NGC ID# 23H3, PCGS# 4913
- 3532 1918-S MS64 Full Bands PCGS.** A sharply detailed early series example that exhibits Full Bands definition on the fasces. This coin displays lightly marked surfaces with a blanket of jade and ice-blue toning and a few spots of amber. Population: 63 in 64 (1 in 64+) Full Bands, 41 finer (12/13). NGC ID# 23H7, PCGS# 4921

1919-D Dime, MS64 Full Bands Important Strike Rarity

- 3533 1919-D MS64 Full Bands NGC.** The 1919-D is both a condition rarity and a strike rarity, with only a few examples that are finer than this boldly defined Choice Mint State piece. Both sides are brilliant with frosty silver luster beneath delicate champagne toning. Census: 50 in 64 (2 in 64+) Full Bands, 6 finer (12/13). NGC ID# 23H9, PCGS# 4925

1919-D Dime, MS64 Full Bands Conditionally Rare

- 3534 1919-D MS64 Full Bands PCGS.** The 1919-D Mercury dime is a strike and condition rarity, common only in the lowest circulated grades and seldom seen with Full Bands. A beautifully struck near-Gem with Full Bands, this coin reveals rich luster beneath the patina. The toning includes shades of red-brown, khaki-green, and deep red. The obverse reveals a number of interesting die cracks. NGC ID# 23H9, PCGS# 4925

- 3535 1919-S MS65 PCGS. CAC.** Ex: Teich Family Collection. A well-detailed early series Mercury dime that falls just short of Full Bands definition on the central bands, this coin possesses vibrant mint luster and outstanding eye appeal. Population: 31 in 65, 18 finer (12/13).
From The Teich Family Collection. NGC ID# 23HA, PCGS# 4926

1921 Mercury Dime, MS63 Full Bands Low-Mintage, Key Date

- 3536 1921 MS63 Full Bands PCGS. CAC.** An elusive, low-mintage date in the series with about 1.2 million coins produced, this example is brilliant-white with a hint of golden-gray toning. The strike is bold as the Full Bands designation suggests, with Liberty's hair fully defined and strong reverse details evident. The date is well-struck for the issue. Nice mint luster circulates among the devices with plenty of flash for this Select Mint State specimen.
From The Teich Family Collection. NGC ID# 23HE, PCGS# 4935

- 3537 1921-D MS65 Full Bands PCGS. CAC.** Ex: Teich Family Collection. Light champagne color shows up under magnification. An impressive strike imparts sharp detail to the design elements, culminating in Full Bands. This attribute, along with intense luster and excellent preservation, ensures the coin's magnificent eye appeal. Population: 61 in 65 Full Bands, 17 finer (12/13). *From The Teich Family Collection.* NGC ID# 23HF, PCGS# 4937
- 3538 1924 MS66 Full Bands PCGS. CAC.** A spectacular Premium Gem with vibrant mint luster and well-preserved brilliant surfaces. The design elements are sharply detailed throughout, with Full Bands definition on the fasces. Population: 77 in 66 Full Bands, 23 finer (12/13). NGC ID# 23HJ, PCGS# 4943
- 3539 1925-S MS65 Full Bands PCGS.** Traces of faint reddish-gold and violet coloration rest on the lustrous surfaces of this nicely preserved Gem. The solid strike transcends the Full Bands. Population: 62 in 65 Full Bands, 22 finer (12/13). NGC ID# 23HP, PCGS# 4953
- 3540 1926-S MS64 PCGS.** Ex: Teich Family Collection. A low-mintage date, the 1926-S is always in demand from series enthusiasts. This attractive Choice example displays well-detailed design elements and vibrant mint luster, with a few hints of golden-tan toning. Population: 49 in 64, 26 finer (12/13). *From The Teich Family Collection.* NGC ID# 23HT, PCGS# 4958
- 3541 1927-S MS66 PCGS.** This scarce mintmarked dime represents excellent value. The fields show evidence of heavy die polish, which in turn imparts brightness to each side. The central reverse bands are oh, so close to being fully split. NGC ID# 23HW, PCGS# 4964
- 3542 1929 MS67 Full Bands PCGS.** Intensely white with semiprooflike fields and strong mint luster, this Superb Gem dime has a stunning appearance. The fields and devices are free of abrasions with no luster grazes to be seen. A pair of radial die cracks — one at the neck truncation, the other near the T in LIBERTY — suggest the obverse die may have been nearing its useful end, but this is not evident in the quality of strike, which is superb everywhere. Population: 65 in 67 (2 in 67+) Full Bands, 0 finer (12/13). NGC ID# 23J2, PCGS# 4973
- 3543 1929-D MS66+ Full Bands PCGS. CAC.** A sharp strike features Full Bands and a boldly impressed portrait of Liberty. Lustrous surfaces offer a degree of semiprooflike reflectivity, and narrow crescents of gold and rose toning at the rims extend colorful accents toward the silver centers. A mark-free Premium Gem. NGC ID# 23J3, PCGS# 4975
- 3544 1930 MS66 Full Bands PCGS. CAC.** A touch of champagne color resides on the highly lustrous surfaces of this gorgeous Premium Gem, and a solid strike delivers crisp definition to the devices, culminating in Full Bands. Impeccably preserved. Population: 86 in 66 (2 in 66+) Full Bands, 16 finer (12/13). NGC ID# 23J5, PCGS# 4979
- 3545 1930-S MS66 Full Bands PCGS. CAC.** Essentially mark-free and without toning, this radiant dime offers impeccable surfaces and a well-struck reverse with Full Bands. Some softness appears on Liberty's hair — otherwise, this visually pleasing Premium Gem appears even finer. NGC ID# 23J6, PCGS# 4981
- 3546 1934-D MS66 Full Bands PCGS.** The bands are fully split and rounded and the other design elements are sharply detailed on this spectacular Premium Gem. The lustrous surfaces show shades of ice-blue and champagne-gold toning. NGC ID# 23JB, PCGS# 4991
- 3547 1936 MS68 Full Bands PCGS.** Ex: Teich Family Collection. A magnificent Mercury dime, one of the finest surviving examples, with sharply detailed devices including Full Bands on the fasces, and especially vibrant mint luster. Population: 15 in 68 Full Bands, 0 finer (12/13). *From The Teich Family Collection.* NGC ID# 23JE, PCGS# 4999

- 3548 1936 MS68 ★ Full Bands NGC.** Ex: Teich Family Collection. The single finest NGC-certified example. None are certified in grades above MS68, and among the five pieces graded MS68 Full Bands, only the present coin possesses a Star designation (12/13). Lustrous and pristine with a good strike and rich lemon-gold and ice-blue toning. *From The Teich Family Collection.* NGC ID# 23JE, PCGS# 4999
- 3549 1936-S MS67+ Full Bands PCGS. CAC.** A medley of cobalt-blue, reddish-orange, and lavender runs over the lustrous surfaces of this high-end Superb Gem. Sharply struck design elements culminate in Full Bands. Excellent overall eye appeal. Population: 6 in 67+ Full Bands, 3 finer (12/13). NGC ID# 23JH, PCGS# 5003
- 3550 1937 MS66 PCGS.** Ex: Teich Family Collection. This well-detailed Premium Gem shows just a trace of softness on the central bands, with vibrant mint luster and well-preserved brilliant surfaces. *From The Teich Family Collection.* NGC ID# 23JJ, PCGS# 5004
- 3551 1937 MS68 Full Bands PCGS.** Ebullient luster radiates from both sides of this exquisitely well-preserved ten cent, and a solid strike culminates in Full Bands on the fasces. This piece yields outstanding eye appeal. Population: 43 in 68 Full Bands, 0 finer (12/13). NGC ID# 23JJ, PCGS# 5005
- 3552 1937 MS68 Full Bands PCGS.** Ex: Teich Family Collection. A magnificent MS68 example that displays vibrant mint luster and sharply detailed design elements on both sides, with Full Bands definition on the fasces and a few hints of golden-tan toning. Population: 43 in 68 Full Bands, 0 finer (12/13). *From The Teich Family Collection.* NGC ID# 23JJ, PCGS# 5005
- 3553 1939 MS67 Full Bands PCGS Secure. CAC.** Ex: Stokely Collection. Radiant luster emanates from the untuned, impeccably preserved surfaces of this Superb Gem. Sharply struck throughout. NGC ID# 23JR, PCGS# 5017

1939-D Mercury Dime, MS69 Full Bands None Certified Finer

- 3554 1939-D MS69 Full Bands PCGS.** Vivid shades of greenish-gold, violet, and blue toning blanket the well-preserved surfaces of this incredible Mercury dime. The design elements are uniformly sharp, with Full Bands definition on the fasces, and especially vibrant mint luster adds to the terrific visual appeal. Population: 16 in 69 Full Bands, 0 finer (12/13). NGC ID# 23JS, PCGS# 5019
- 3555 1941-D MS68 Full Bands PCGS.** This wartime D-mint dime approaches technical perfection, and in fact none are certified finer at either service. Light central toning gradually deepens toward the margins. NGC ID# 23JY, PCGS# 5031
- 3556 1942/1 AU58 NGC. FS-101.** A dusky cream-gray "slider" of this elusive and blatant hubbed overdate. The unabraded surfaces are satiny and pleasing, though the central bands and the letters near the rims show minor inexactness of strike. NGC ID# 23K4, PCGS# 5036

1942/1 Dime, MS62
Lustrous and Lightly Toned

- 3557 1942/1 MS62 PCGS. FS-101.** Like most 20th century overdate varieties, wartime emergencies may be responsible for the 1942/1 dime. A lustrous and lightly toned representative of this obvious overdate. The central bands are nicely defined but fall just short of the Full Bands designation. A few minor marks on the lower right reverse field are all that limit the grade. NGC ID# 23K4, PCGS# 5036

1942/1 Dime, MS62
Key Wartime Overdate

- 3558 1942/1 MS62 PCGS. FS-101.** Only a hint of golden toning visits this lustrous key date dime. The strike is good though the central bands are incomplete and the legends exhibit minor spreading near the rims. Marks are surprisingly inconsequential for the designated grade. The 1 underdigit overlaps the 2 only slightly, and the date could be interpreted as 19412. *From The Teich Family Collection.* NGC ID# 23K4, PCGS# 5036

- 3559 1942/1-D AU55 ANACS. FS-101.** On many Denver overdates, the underdigits are less apparent than seen here. The 4 is strongly doubled on this piece and the 1 underdigit is clearly noticeable. The surfaces are lightly toned and partial mint luster remains around the devices. NGC ID# 23K6, PCGS# 5040

- 3560 1944 MS67 Full Bands PCGS.** This spectacular Superb Gem exhibits sharply detailed design elements with Full Bands definition on the fasces. The well-preserved surfaces show a few areas of shiny mint polish in the obverse field, with vibrant mint luster throughout. Population: 86 in 67 (2 in 67+) Full Bands, 1 finer (12/13). NGC ID# 23KB, PCGS# 5051

PROOF MERCURY DIMES

- 3561 1936 PR64 PCGS. CAC.** Ex: Teich Family Collection. The 1936 is the first proof issue in the Mercury dime series, and has the lowest-mintage (4,130 pieces) of the seven-year run of the series. Nearly untoned save for some milky-gold dapples. Sharply struck throughout. *From The Teich Family Collection.* NGC ID# 27DG, PCGS# 5071

- 3562 1936 PR65 PCGS.** Ex: Teich Family Collection. This dazzling Gem proof Mercury dime displays deeply mirrored fields and sharply detailed design elements with a few hints of greenish-gold toning. *From The Teich Family Collection.* NGC ID# 27DG, PCGS# 5071

- 3563 1937 PR67 PCGS.** Ex: Teich Family Collection. From a proof mintage of 5,756 pieces, this sharply detailed Superb Gem displays deeply reflective surfaces with traces of attractive greenish-gold toning. PCGS has graded 27 numerically finer examples (12/13). *From The Teich Family Collection.* NGC ID# 27DH, PCGS# 5072

- 3564 1937 PR67+ PCGS. CAC.** Low-intensity aqua-green, violet, and yellow-gold patina graces the luminous surfaces of this high-end Superb Gem Proof. Crisply struck design elements and impeccably preserved surfaces enhance the coin's eye appeal. Population: 6 in 67+, 27 finer (12/13). NGC ID# 27DH, PCGS# 5072

1938 Mercury Dime, PR68
Lightly Toned, Deeply Reflective Surfaces

- 3565 1938 PR68 NGC.** A virtually perfect Mercury dime from a low mintage of just 8,728 pieces, this coin displays the all-brilliant finish used on proof coins of this era. The design elements exhibit razor-sharp definition throughout and the deeply reflective surfaces show accents of greenish-gold toning. Census: 42 in 68 (4 in 68 ★), 1 finer (12/13). NGC ID# 27DJ, PCGS# 5073

1940 Mercury Dime, PR68
Tied for the Finest at PCGS

- 3566 1940 PR68 PCGS.** An amazing Superb Gem proof, this 1940 Mercury dime has brilliant silver surfaces with delicate gold and green peripheral toning. The fields are fully and deeply mirrored with boldly defined satin devices. Population: 22 in 68 (1 in 68+), 0 finer (12/13). NGC ID# 27DL, PCGS# 5075

- 3567 1941 PR68 NGC.** This amazing Mercury dime has fully mirrored and brilliant silver surfaces with no evidence of toning on either side. This example is tied for the finest certified. Census: 57 in 68 (11 in 68 ★), 0 finer (1/14). NGC ID# 27DM, PCGS# 5076

- 3568 1942 PR68 NGC.** Gleaming fields are silver on this bright final-year proof Mercury dime. Crisply detailed and carefully preserved, if a touch diffuse in the reflectivity. NGC ID# 27DN, PCGS# 5077

ROOSEVELT DIMES

- 3569 1960 MS67 Full Bands PCGS.** A spectacular Superb Gem, with razor-sharp definition on all design elements including Full Bands on the torch. The pristine surfaces radiate vibrant mint luster, with accents of greenish-gold and lavender toning. Population: 20 in 67 Full Bands, 0 finer (12/13). NGC ID# 23LS, PCGS# 85120
- 3570 1960 MS67 Full Bands PCGS Secure.** Ice-blue and reddish-gold patination is much deeper and more extensive on the obverse of this highly lustrous Roosevelt. Sharply struck and impeccably preserved. Population: 19 in 67 Full Bands, 0 finer (12/13). NGC ID# 23LS, PCGS# 85120
- 3571 1961-D MS67 Full Bands PCGS.** A sharply detailed Superb Gem, with Full Bands definition on the torch, this delightful Roosevelt dime displays vibrant mint luster and hints of greenish-gold and lavender toning. Population: 11 in 67 (2 in 67+) Full Bands, 1 finer (12/13). NGC ID# 23LV, PCGS# 85123
- 3572 1963-D MS67 Full Bands PCGS.** This sharply detailed Superb Gem exhibits brilliant well-preserved surfaces with vibrant mint luster on both sides. Eye appeal is outstanding. Population: 11 in 67 Full Bands, 0 finer (12/13). NGC ID# 23LZ, PCGS# 85127
- 3573 1964-D MS67 Full Bands PCGS.** This gorgeous Superb Gem represents the final silver business strike, with sharp design motifs and brilliant, untoned surfaces. Population: 16 in 67 (1 in 67+) Full Bands, 1 finer (12/13). NGC ID# 23M3, PCGS# 85129

PROOF ROOSEVELT DIMES

- 3574 1957 PR69 Ultra Cameo NGC.** An extraordinary Roosevelt dime, this lovely piece has virtually perfect surfaces with stunning black-and-white contrast, showing no toning on either side. Census: 19 in 69 Ultra Cameo, 0 finer (1/14). NGC ID# 27ES, PCGS# 95232
- 3575 1983 No S PR69 Deep Cameo PCGS.** A virtually flawless, boldly contrasted example of the fourth and (presumably) final No S error among proof Roosevelt dimes. Beautiful frost across the devices contrasts strongly with the fathomless mirrors. Population: 124 in 69 Cameo, 0 finer (12/13). NGC ID# 27FJ, PCGS# 95265

TWENTY CENT PIECE

- 3576 1875-CC PCGS Genuine.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. A brilliant Carson City type coin with substantial luster and no consequential marks. The strike is good except on the crest of the left (facing) wing.
From The Teich Family Collection. NGC ID# 23R6, PCGS# 5297

PROOF TWENTY CENT PIECES

1876 Twenty Cents, PR63 Deeply Mirrored, Lightly Contrasted

- 3577 1876 PR63 PCGS. CAC.** This second-year issue of the short-lived series is brilliant and untuned with a hint of gold at the rims. Proof mintage for the year was reduced to 1,260 pieces — less than half of the first-year's proof total. This example is boldly struck, with Liberty's head reasonably strong and the eagle feathers sharp. A light amount of mint frost appears on the devices. The expected hairlines for this grade level are well-hidden and visible with a glass under strong light. No significant contact marks are evident, especially for a coin of the assigned grade.
From The Teich Family Collection. NGC ID# 27H3, PCGS# 5304

1876 Twenty Cent Piece, PR64 Spectacular Multicolor Toning

- 3578 1876 PR64 NGC.** The twenty cent denomination made its debut in 1875, with decidedly mixed reviews. The proof mintage in 1876 was considerably smaller, with just 1,260 pieces struck. This impressive Choice specimen displays sharply detailed devices and deeply reflective fields, under shades of pale-gold and cobalt-blue toning. Census: 71 in 64, 34 finer (12/13). NGC ID# 27H3, PCGS# 5304

1876 Twenty Cent Piece, PR63 Cameo Colorful Surfaces, Nice Contrast

- 3579 1876 PR63 Cameo NGC.** Rich blue and violet hues prevail at the margins of this Select Cameo proof from the second of four years in the twenty cent series. The interiors are well-contrasted between mirrors and devices, all under a light wash of golden patina. Census: 14 in 63 Cameo (1 in 63+ Cameo), 54 finer (12/13). PCGS# 85304

**1878 Twenty Cent Piece, PR55
Final-Date Proof-Only Issue**

- 3580 1878 PR55 PCGS.** The twenty cent denomination was discontinued after 1878, with a final proof-only mintage of 600 pieces. This Choice AU specimen retains traces of bright reflectivity around the well-detailed design elements and the lightly abraded surfaces display shades of blue, gray, and amber toning. NGC ID# 27H5, PCGS# 5306

**1878 Twenty Cent, PR63
Brilliant, Deep Mirrors**

- 3581 1878 PR63 PCGS.** Relatively few examples remain of this final-year twenty cent — a proof-only issue. From a production of just 600 proofs, perhaps half that number exist today, with many survivors making multiple trips to the grading services.

This Select proof is brilliant and untuned. The fields are deeply mirrored and liquid, with Cameo devices on the reverse, while Liberty is unfrosted and reflective on the obverse. A few minor, obverse contact marks and delicate hairlines limit the grade of this pleasing proof.

From The Teich Family Collection. NGC ID# 27H5, PCGS# 5306

EARLY QUARTER

- 3582 1805 VF30 PCGS. B-2, R.2.** The fields and motifs are cream-gray while the borders exhibit blended forest-green and plum-mauve. The strike shows softness near the centers. Minimally abraded aside from a few wispy abrasions above the eagle's head. NGC ID# 23RC, PCGS# 5313

BUST QUARTERS

- 3583 1818 — Improperly Cleaned — NGC Details. AU. B-2, R.1.** The stone-gray surfaces are only mildly glossy. The reverse field near the eagle displays inconspicuous graffiti, and a faded thin mark is above the repunched star 13. NGC ID# 23RH, PCGS# 5322

- 3584 1822 VF30 PCGS. B-1, R.2.** Blended steel-gray and tan-gold toning embraces this nicely defined midgrade Bust quarter. The luminous surfaces are surprisingly unabraded despite minor contact west of Liberty's ear. NGC ID# 23RN, PCGS# 5332

- 3585 1828 VF35 PCGS. B-1, R.1.** A chestnut-gold and stone-gray Choice VF representative of this fairly low mintage yet collectible Capped Bust date. Free from distracting abrasions, and traces of luster persist here and there. NGC ID# 23RV, PCGS# 5342

- 3586 1828 25/50C Good 6 PCGS. B-3, R.5.** A rare Guide Book variety that re-uses a blundered reverse die from 1822. LIBERTY is sharp, and the underdigit 0 is obvious on the 5 in the denomination. A lavender-gray example with unmarked surfaces and a few faint hairlines on the portrait.
Ex: Boston Signature (Heritage, 8/2010), lot 4650, which realized \$1,610. NGC ID# 23RV, PCGS# 5343

- 3587 1831 Large Letters — Smoothed — PCGS Genuine. Unc. Details. B-5, FS-301, R.3.** The Large over Small 1s in the date causes Browning-5 to receive a *Cherry-pickers'* listing. Incorrectly designated by PCGS as a Small Letters variety. Satiny and lightly toned. Both sides display delicate hairlines and slightly bright areas beneath the wings and above 25 C suggest possible subtle smoothing. PCGS# 5349

- 3588 1834 MS61 NGC. CAC. B-3, R.3.** A series of slender die cracks allows ready attribution. Rich stone-gray toning blankets this unmarked and attractive Capped Bust quarter. The high points of the curls display minor blending. NGC ID# 23RZ, PCGS# 5353

**1834 B-4 Quarter, MS63
No Visible Marks**

- 3589 1834 MS63 PCGS. B-4, R.1.** Star 10 is repunched, and the reverse displays four lengthy die cracks. Steel-gray toning embraces this unabraded and satiny Select type coin. Hints of forest-green and sun-gold visit the borders. A few stars are lightly brought up but the major devices are crisp. NGC ID# 23RZ, PCGS# 5353

SEATED QUARTERS

- 3590 1842-O Small Date VG8 PCGS.** Always in demand, the 1842-O Small Date is much scarcer than the Large Date variant. It is often elusive in attractive, well-circulated grades. This nice example shows smooth wear and pleasing, golden-rose iridescence amid old-silver toning. Population: 10 in 8, 36 finer (12/13). NGC ID# 23SN, PCGS# 5403

- 3591 1854 Arrows MS63 NGC.** Bold design elements, frosty silver luster, and delicate champagne toning characterize this Select Mint State example. Diagonal draw-bench lines are mostly visible on the obverse, and elongated stains on the reverse remain from the rolling process at the Mint. NGC ID# 23U6, PCGS# 5432

- 3592 1854 Arrows MS64 NGC.** This near-Gem is well-struck with speckled russet, gold, and forest-green patina over most of the obverse. The reverse only shows slight tan toning, mostly near the peripheries. Well-preserved with just a few tiny marks on each side. Census: 69 in 64, 25 finer (1/14). NGC ID# 23U6, PCGS# 5432

- 3593 1854-O Huge O — Improperly Cleaned — NGC Details. VF. Briggs 1-A, FS-501.** The light gray surfaces reveal light hairlines, and the lower reverse is moderately corroded. The letters LIBERTY are clear. NGC ID# 23U7, PCGS# 5434

1854-O Arrows Quarter, Huge O, VF30
Popular Guide Book Variety

3594 1854-O Huge O VF30 NGC. Briggs 1-A, FS-501. The “O” mintmark on the reverse is wide, thick, and crude, an anomaly in its series. This midrange example of the popular *Guide Book* variety has a few old reed marks on still-glossy pearl-gray and slate surfaces with hints of gold and blue. Census: 6 in 30, 12 finer (12/13). NGC ID# 23U7, PCGS# 5434

3595 1857 MS65 NGC. While the 1857 quarter is readily available in most grades, thanks to a mintage of over 9.6 million pieces, Gem and better survivors are elusive. This MS65 piece is well-defined in the centers, if a trifle softly struck at the margins, with strongly lustrous, minimally toned surfaces. Pleasingly preserved and attractive. Census: 60 in 65, 66 finer (1/14). NGC ID# 23TE, PCGS# 5442

3596 1858 MS64 PCGS. Light reddish-orange, electric-blue, and silver-gray coloration bathes the lustrous surfaces of this well-struck near-Gem. A few minute marks determine the grade. Population: 80 in 64, 45 finer (12/13). NGC ID# 23TH, PCGS# 5445

3597 1858-S VF30 PCGS. Large S. Produced in only the fifth year of coinage at the San Francisco Mint and the third year for quarter production, the 1858-S Seated quarter was little-saved (or perhaps unsaved at all) in the hardscrabble West of the era. The mintage was only 121,000 pieces. This silver-gray specimen has the moderate wear expected, but abrasions are few and unworthy of singular mention. A nice, problem-free example overall. Population: 9 in 30, 33 finer (12/13).
Ex: The Perry Creek Collection (Heritage, 8/2010), lot 4688. NGC ID# 23TK, PCGS# 5447

3598 1859 MS63 PCGS. The silvery surfaces of this Select quarter display pleasing luster. A linear abrasion in the left obverse field limits the grade. Population: 11 in 63, 34 finer (12/13). NGC ID# 23TL, PCGS# 5448

3599 1859 MS64 PCGS. CAC. Light gray patina is imbued with hints of soft champagne-gold, and a solid strike imparts strong definition to the design elements. A few insignificant ticks preclude Gem status. Population: 22 in 64, 12 finer (12/13). NGC ID# 23TL, PCGS# 5448

3600 1866 Motto VF20 PCGS. A small mintage of 16,800 pieces represents the first year of the Variety Four, With Motto design. This moderately circulated example is well-detailed, with a sharp LIBERTY on the shield and no areas of excessive wear. Pleasing, multicolored toning appears on surfaces that are relatively smooth for the grade. Population: 2 in 20, 41 finer (12/13). NGC ID# 23UB, PCGS# 5468

3601 1873 Arrows AU58 PCGS. CAC. The short-lived Arrows design is a favorite among type collectors and this attractive near-Mint specimen shows just a trace of wear on the high points of the design elements. The lustrous surfaces are lightly abraded and a few hints of golden-tan toning enliven the surfaces of both sides. NGC ID# 23VU, PCGS# 5491

3602 1873 Arrows MS63 NGC. A well-struck Select example with largely satin surfaces displaying mottled toning on both sides. Areas of luster appear, particularly in the protected areas. Census: 26 in 63, 50 finer (12/13). NGC ID# 23VU, PCGS# 5491

3603 1874 Arrows MS61 PCGS. Soft golden-gray patina resides on the lustrous surfaces. Well-struck save for some weakness in the hair atop Liberty's head. Light clash marks are visible on the obverse. NGC ID# 23VX, PCGS# 5494

3604 1874 Arrows MS62 NGC. A medley of cobalt-blue, lavender, and orange-gold toning is more extensive and deeper on the reverse. The design elements are nicely struck up. Census: 11 in 62, 36 finer (12/13). NGC ID# 23VX, PCGS# 5494

3605 1875-CC — Cleaned — ANACS. MS60 Details. Type Two Reverse. Both fields display vertical hairlines but this coruscating Carson City quarter has richly retoned ocean-blue and mahogany-red.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23UY, PCGS# 5499

3606 1876 MS65 NGC. Type Two Reverse. Golden-brown and blue-green toning grace the borders of this sharply struck and lustrous type coin. The fields exhibit only wispy grazes. Census: 45 in 65 (1 in 65+), 27 finer (12/13).
Ex: Long Beach Signature (Heritage, 6/2011), lot 3479. NGC ID# 23V2, PCGS# 5501

3607 1877 MS65 NGC. This stunning 1877 Seated Liberty quarter has frosty light gray surfaces with turquoise and blue toning along the obverse border and over most of the reverse. Sharply defined with excellent eye appeal. NGC ID# 23V5, PCGS# 5504

1877 Seated Quarter, MS67
Modest Cameo Contrast

3608 1877 MS67 NGC. A beautiful survivor, this brilliant, untuned Superb Gem has exquisite surfaces with reflective white fields and lustrous, frosty devices that impart modest cameo contrast. Slight weakness is evident on a few of the design elements on this generally sharp example. Census: 34 in 67 (5 in 67 ★), 8 finer (12/13). NGC ID# 23V5, PCGS# 5504

3609 1878-S — Reverse Improperly Cleaned — NGC Details. AU. A patch of hairlines near the R in QUAR. DOL. explains the NGC notation. Field marks are noted near the branch stem and beneath the right (facing) wing. Well struck, partly lustrous, and close to brilliant. A very scarce issue. NGC ID# 23VA, PCGS# 5510

1885 Seated Liberty Quarter, MS65
Richly Toned Example

3610 1885 MS65 PCGS. CAC. The obverse of this frosty Gem has dark gray-gold toning in the peripheries and around the devices with ivory fields. The reverse has delicate green and iridescent toning. The design elements are well-detailed and the surfaces show only minor signs of contact. Population: 15 in 65, 20 finer (12/13). NGC ID# 23VH, PCGS# 5517

**1886 Seated Quarter, MS65
Fully Mirrored Fields**

3611 1886 MS65 PCGS. This lovely Gem has brilliant, fully mirrored fields beneath lovely golden-brown and sea-green toning, with lustrous ivory devices. At first glance, this Gem appears to be a splendid proof example, but closer inspection reveals its true status as a rare business strike. Population: 9 in 65, 18 finer (12/13). NGC ID# 23VJ, PCGS# 5518

3612 1888-S MS64 PCGS. Vivid shades of greenish-gold and lavender toning blanket the lightly marked surfaces of this attractive Choice example. The design elements are well-detailed and vibrant mint luster shines through the toning. Population: 30 in 64, 9 finer (12/13). NGC ID# 23VN, PCGS# 5521

3613 1891-O VF35 NGC. A lovely example showing light wear with glints of grayish-lilac on the high points, the balance toned in lovely steel-blue. Both sides exhibit minor clash marks. Census: 2 in 35, 22 finer (1/14). NGC ID# 23VS, PCGS# 5525

PROOF SEATED QUARTERS

3614 1858 PR62 PCGS. CAC. Ex: Teich Family Collection. From an estimated mintage of 100 pieces, this attractive proof exhibits sharply detailed design elements and reflective fields that show only minor signs of contact. Population: 10 in 62, 33 finer (12/13). *From The Teich Family Collection.* NGC ID# 23WK, PCGS# 5554

3615 1859 PR62+ PCGS. Type One Obverse. Type Two Reverse. A honey-gold example with traces of lavender at the margins. Crisply struck and close to Cameo status. The fields are moderately hairlined. *Ex: Eugene H. Gardner Collection (Stack's, 2/1965), lot 1651. From The Teich Family Collection.* NGC ID# 23WL, PCGS# 5555

3616 1860 PR63 PCGS. CAC. Type Two Obverse, Type One Reverse. Toned gunmetal-gray with hints of sea-green near the rims. Well struck except for the left-side stars. Due to Mint melts, much scarcer than the official mintage of 1,000 pieces suggests. *Ex: Public Auction (Stack's, 5/1957), lot 233. From The Teich Family Collection.* NGC ID# 23WM, PCGS# 5556

3617 1861 PR63 PCGS. CAC. Ex: Teich Family Collection. From a Civil War era mintage of 1,000 pieces, this sharply detailed Select proof displays deeply reflective surfaces under attractive shades of greenish-gold toning. Population: 36 in 63, 37 finer (12/13). *From The Teich Family Collection.* NGC ID# 23WN, PCGS# 5557

3618 1862 PR63 PCGS. This strikingly toned Civil War-era proof has light blue-to-steel toning across most of the obverse and deeper versions of the same colors on the reverse. Lightly hairlined but still appealing. NGC ID# 23WP, PCGS# 5558

3619 1862 PR63 Cameo PCGS. CAC. Just 550 proofs were produced of this scarce issue. Not many proofs survive in unimpaired condition with Cameo details such as this Select example. The fields are deeply mirrored and provide excellent contrast to devices covered with light mint frost. A touch of golden rim tone surrounds fully brilliant surfaces. The strike is full. Population: 8 in 63 Cameo, 12 finer (12/13). *From The Teich Family Collection.* PCGS# 85558

**1863 Quarter Dollar, PR64
Dramatic Mirrors and Toning**

3620 1863 PR64 PCGS. CAC. Only 460 proofs were struck of this scarce late-date No Motto quarter. Rings of electric-blue and lime-green encircle violet centers of this multicolor quarter dollar. A glass reveals deeply mirrored fields beneath the vivid toning, interspersed with glimpses of bright silver reflectivity. This is a spectacular proof specimen of the date, fully struck and appealing. A few contact marks in the right obverse field are hidden in the toning, and likely keep this colorful quarter from an even higher grade. Population: 56 in 64, 18 finer (12/13). *From The Teich Family Collection.* NGC ID# 23WR, PCGS# 5559

**1864 Seated Quarter, PR64 Cameo
Full Strike, Just 470 Proofs Minted**

3621 1864 PR64 Cameo PCGS. Sometimes found lightly struck, this low-mintage proof is much more desirable with sharp devices and an impeccable Liberty such as this coin presents. A touch lilac and gold toning exists near the obverse rim, but the overall obverse appearance is brilliant and deeply reflective. The devices display considerable mint frost. Golden-lilac toning is more extensive on the reverse, where the well-struck eagle and devices are frosted. A few areas of light obverse hairlines are seen under magnification and determine the near-Gem grade. Population: 10 in 64 Cameo, 8 finer (12/13). *From The Teich Family Collection.* PCGS# 85560

3622 1865 PR62+ PCGS. Ex: Teich Family Collection. A sharply detailed proof from the last year of the Civil War, with reflective surfaces that show a few contact marks and traces of pale gold toning. Population: 24 in 62 (1 in 62+), 98 finer (12/13). *From The Teich Family Collection.* NGC ID# 23WT, PCGS# 5561

3623 1865 PR63 Cameo PCGS. Ex: Teich Family Collection. Final year of the No Motto type, this is a remarkably attractive proof, much nicer in appearance than the grade suggests. Brilliant and fully struck, there is strong contrast evident between the fields and devices on each side. Population: 10 in 63 Cameo, 25 finer (12/13). *From The Teich Family Collection.* PCGS# 85561

3624 1866 Motto PR65 PCGS. Beautiful, rich shadings of royal blue and deep red are seen over each side with strongly mirrored flash evident in the fields, reflectivity that is unimpeded by the depth of toning. A magnificent Gem proof of this first year of the new type. NGC ID# 23WX, PCGS# 5565

3625 1867 PR63 Cameo PCGS. CAC. Ex: Teich Family Collection. The sharply detailed frosty design elements of this impressive Select proof contrast boldly with the deeply mirrored fields. A few hints of pale gold toning enhance the considerable eye appeal. Population: 8 in 63 Cameo, 20 finer (12/13).
From The Teich Family Collection. PCGS# 85566

3626 1868 PR64 PCGS. The surfaces appear powder-blue from certain angles, then transform to golden-brown when slightly turned. A fully struck and undisturbed near-Gem. A mere 600 proofs were produced.
Ex: Public Auction (Stack's, 5/1957), lot 238.
From The Teich Family Collection. NGC ID# 23WZ, PCGS# 5567

1868 Quarter, PR65 Cameo Elusive Contrasted Specimen

3627 1868 PR65 Cameo NGC. A hint of champagne toning appears on the brilliant silver surfaces of this impressive Gem Cameo proof. Examples with contrast are rarely encountered, and this piece is far finer than most others. The contrast is exceptional. Census: 6 in 65 Cameo (1 in 65 ★ Cameo), 1 finer (12/13). PCGS# 85567

3628 1870 PR65 PCGS. Deep lavender and blue-green encompass most of this fully struck Gem, but hints of sun-gold and lime illuminate the margins. Outstanding preservation and originality. Scarcer than the reported mintage of 1,000 pieces would suggest. NGC ID# 23X3, PCGS# 5569

3629 1872 PR63 PCGS. Ex: Teich Family Collection. A well-detailed Select example from a mintage of 950 pieces, this coin displays mostly brilliant reflective surfaces with a few hints of pale gold toning. Population: 43 in 63, 63 finer (12/13).
From The Teich Family Collection. NGC ID# 23X5, PCGS# 5571

1874 Quarter Dollar, PR64 With Arrows at the Date

3630 1874 Arrows PR64 PCGS. This Choice proof With Arrows quarter dollar has attractive cobalt-blue toning with iridescent splashes on the obverse and light gold at the central reverse. Trivial hairlines and scattered contact marks are all that keep this piece from Gem quality. NGC ID# 23XS, PCGS# 5575

3631 1875 PR63+ Cameo PCGS. CAC. Type One Reverse. The fully struck devices are frosty and the mirrored fields are lightly toned. The borders exhibit partial bands of navy-blue patina. Minor obverse hairlines are of little import.
From The Teich Family Collection. PCGS# 85576

3632 1876 PR64 PCGS. CAC. Type One Reverse. The consistent light almond-gold toning likely prevents a Cameo designation, since the boldly struck devices exhibit noticeable frost. The glassy fields are well preserved.
From The Teich Family Collection. NGC ID# 23X8, PCGS# 5577

3633 1876 PR64 Cameo PCGS. Type Two Reverse. This fully struck specimen has light orange-gold toning at the margins. The fields are brilliant and the devices are frosty. Careful rotation reveals faint obverse hairlines. Population: 14 in 64 Cameo, 10 finer (12/13).
Ex: MacMurray Collection (Stack's, 2/1958), lot 1368.
From The Teich Family Collection. PCGS# 85577

3634 1877 PR63 Cameo PCGS. CAC. Ex: Teich Family Collection. A charming Select specimen that shows startling black-on-white cameo flash when the coin is tilted in the light. The design elements are sharply detailed and the fields are deeply mirrored. Population: 8 in 63 Cameo, 18 finer (12/13).
From The Teich Family Collection. PCGS# 85578

3635 1878 PR63 PCGS. CAC. Ex: Teich Family Collection. Sharply detailed and deeply mirrored, this attractive Select specimen shows hints of greenish-gold and cerulean-blue toning at the peripheries. Population: 54 in 63, 68 finer (12/13).
From The Teich Family Collection. NGC ID# 23XA, PCGS# 5579

3636 1879 PR63 Cameo PCGS. CAC. Ex: Teich Family Collection. The well-detailed design elements of this attractive Select specimen show a touch of softness on Liberty's gown, but the frosty devices contrast dramatically with the deeply mirrored fields. Population: 6 in 63 Cameo, 28 finer (12/13).
From The Teich Family Collection. PCGS# 85580

3637 1880 PR63 PCGS. Ex: Teich Family Collection. Type One Reverse. This fully struck specimen appears to merit a Cameo designation despite medium freckled golden-gray patina. The obverse field is moderately hairlined.
From The Teich Family Collection. NGC ID# 23XC, PCGS# 5581

3638 1880 PR66 PCGS. Blues, greens, and golds embrace most of each side, while the interior reverse adds an element of near-silver as well as appreciable contrast. Great all-around eye appeal. Population: 34 in 66 (1 in 66+), 11 finer (12/13). NGC ID# 23XC, PCGS# 5581

3639 1880 PR63 Cameo PCGS. The sharply struck design elements stand out against the mirrored fields. The essentially untuned surfaces reveal a few unobtrusive, but grade-determining marks. Population: 14 in 63 Cameo, 62 finer (12/13). PCGS# 85581

1880 Quarter, PR66 Cameo Lightly and Attractively Toned

3640 1880 PR66 Cameo NGC. Even though only 1,355 proofs were struck of the 1880 quarter, two sets of dies were used. This is a particularly well-produced example that exhibits unfathomable depth of reflectivity in the fields. Set against the fields are the highly frosted devices, which creates the desirable cameo effect. Areas of brilliance remain on each side, but light pastel shadings are what really grab the viewer's attention on this high-grade quarter. Census: 20 in 66 Cameo (1 in 66 ★ Cameo), 20 finer (12/13). PCGS# 85581

- 3641 1881 PR64 PCGS.** Ex: Teich Family Collection. The well-detailed design elements of this attractive Choice example complement the brilliant reflective fields. Few signs of contact are evident. Population: 70 in 64, 58 finer (12/13).
From The Teich Family Collection. NGC ID# 23XD, PCGS# 5582
- 3642 1884 PR64 ANACS.** This richly toned near-Gem proof is housed in a small-format ANACS holder. Blue-violet and gold-orange hues dominate save for a window of clear silver at the center of the reverse. NGC ID# 23XG, PCGS# 5585
- 3643 1884 PR64 PCGS.** Ex: Teich Family Collection. Pale shades of lavender, blue, and greenish-gold toning visit the lightly marked surfaces of this sharply detailed Choice example. Population: 79 in 64, 65 finer (12/13).
From The Teich Family Collection. NGC ID# 23XG, PCGS# 5585
- 3644 1885 PR63 PCGS.** Ex: Teich Family Collection. This sharply detailed PR63 example displays deeply mirrored fields that show hints of pale gold toning and a few minor signs of contact. From a mintage of 930 pieces.
From The Teich Family Collection. NGC ID# 23XH, PCGS# 5586
- 3645 1886 PR63 Cameo PCGS.** Ex: Teich Family Collection. A rich coat of mint frost on the well-detailed design elements provides bold field-device contrast on this attractive Select specimen. A few hints of golden-tan toning appear on both sides. Population: 15 in 63 Cameo, 35 finer (12/13).
From The Teich Family Collection. PCGS# 85587
- 3646 1887 PR63 NGC.** This Select proof represents a scarce late-date Seated quarter issue that is elusive in business strike form, and in strong demand as a proof. Faint champagne toning is nearly invisible on the brilliant silver surfaces. NGC ID# 23XK, PCGS# 5588
- 3647 1888 PR64 Cameo PCGS. CAC.** Deeply mirrored fields highlight the sharply struck, frosted design elements of this near-Gem Cameo. Were it not for a faint occasional hairline that only shows under magnification this marvelous piece would grade full Gem. Population: 16 in 64 Cameo, 15 finer (12/13). PCGS# 85589
- 3648 1889 PR63 PCGS.** Ex: Teich Family Collection. A pleasing Select specimen from a small proof mintage of 711 pieces, this coin features sharply detailed design elements and reflective fields that show accents of greenish-gold and pink toning. Population: 37 in 63, 78 finer (12/13).
From The Teich Family Collection. NGC ID# 23XM, PCGS# 5590
- 3649 1891 PR64 Cameo PCGS. CAC.** Ex: Teich Family Collection. A sharply detailed Choice example that shows intense cameo contrast between the frosty devices and the deeply mirrored fields. Both sides show hints of pale gold toning, with a long streak of amber on the back. Population: 22 in 64 Cameo, 19 finer (12/13).
From The Teich Family Collection. PCGS# 85592

BARBER QUARTERS

- 3650 1895 MS65 NGC.** Electric-blue, orange, and soft crimson runs over the obverse, leaving the reverse mostly color free. This sharply struck specimen is devoid of significant marks. Census: 20 in 65, 15 finer (12/13). NGC ID# 23Y4, PCGS# 5610
- 3651 1895-O MS64 PCGS. CAC.** Green-gold, orange-gray, and blue-violet hues enrich each side of this well-struck near-Gem. Excellent eye appeal for its New Orleans issue. Population: 44 in 64 (2 in 64+), 13 finer (12/13). NGC ID# 23Y5, PCGS# 5611

1897-O Barber Quarter, MS64

- 3652 1897-O MS64 PCGS. CAC.** The 1897-O Barber quarter has a reported mintage of 1.4 million pieces, but the issue is scarce-to-rare in all Mint State grades. This attractive Choice example exhibits well-detailed design elements and vibrant mint luster, under shades of greenish-gold and lavender-gray toning. Population: 13 in 64, 30 finer (12/13). NGC ID# 23YB, PCGS# 5617
- 3653 1898 MS66 PCGS.** The design elements of this delightful Premium Gem show razor-sharp definition throughout and vibrant mint luster shines through layers of lavender-gray and cerulean-blue toning. Population: 24 in 66 (6 in 66+), 5 finer (12/13). NGC ID# 23YD, PCGS# 5619
- 3654 1900 MS65 NGC.** Type Two Obverse. Type Three Reverse. Dusky olive-green, tan-gold, and silver-gray visit this sharply struck and lustrous Gem. A magnificently preserved and unquestionable original type coin. Census: 34 in 65, 10 finer (12/13). NGC ID# 23YK, PCGS# 5625
- 3655 1906-O MS66 PCGS.** The lack of toning allows full appreciation of the bright, satiny surfaces. The strike is remarkably strong, especially for an O-mint, and is just shy of full. As one would expect from the grade, there are no mentionable marks on either side. Population: 23 in 66 (2 in 66+), 5 finer (12/13). NGC ID# 23Z7, PCGS# 5644
- 3656 1907-O MS65 PCGS.** Shimmering luster washes each side of this O-mint Gem. Occasional wisps of russet are visible on the obverse. All design features are sharply struck. Population: 18 in 65 (1 in 65+), 16 finer (12/13). NGC ID# 23ZA, PCGS# 5647

1908-D Quarter, MS66

Little-Saved Date

- 3657 1908-D MS66 NGC.** This Premium Gem was struck in just the third year of operation for the Denver Mint and hails from an issue little-saved at the time of its release. Satiny surfaces are dappled blue-gray on the interiors with a significant green-gold and bronze presence at the margins. Census: 4 in 66, 4 finer (12/13). NGC ID# 23ZD, PCGS# 5650
- 3658 1909 MS65 PCGS.** The obverse has violet and peach outer toning around a silver interior, while the reverse has a more even pale gold color. Swirling luster framing Liberty's portrait yields to semireflective fields around the eagle. Population: 63 in 65 (2 in 65+), 22 finer (12/13). NGC ID# 23ZG, PCGS# 5653
- 3659 1909-S MS65 PCGS.** Intensely lustrous surfaces display hints of reddish-gold patina at the margins. Sharply struck except for the often-seen softness in the claws and fletchings. Population: 24 in 65 (1 in 65+), 15 finer (12/13). NGC ID# 23ZK, PCGS# 5656

- 3660 1912-S MS64 PCGS. CAC.** Light gold-orange at parts of the margins with swirling silver luster elsewhere. Three tiny reed marks on Liberty's cheek contribute to the grade. Population: 29 in 64, 33 finer (12/13). NGC ID# 23ZT, PCGS# 5663
- 3661 1913-S Good 6 NGC.** Starkly toned black-and-gray with the expected light abrasions and scratches from considerable circulation. The L of LIBERTY is visible on the headband. One of just 40,000 examples struck. NGC ID# 23ZW, PCGS# 5666

1913-S Quarter, VF Details Mintage 40,000 Pieces

- 3662 1913-S — Surface Damage — Genuine PCGS. VF Details.** With just 40,000 pieces struck, the 1913-S is chronologically the last of the Barber quarter keys. This example has a deep near-vertical cut on the upper part of the portrait and greenish-black areas in otherwise silver fields but remains a thoroughly collectible example of the issue.
- 3663 1914 MS66 PCGS. CAC.** A remarkable Premium Gem, this 1914 quarter dollar displays vibrant luster and well-struck design features, though the eagle's claws and the arrow feathers are slightly soft, as typically seen. An occasional splash of light gold visits the obverse. Population: 23 in 66, 2 finer (12/13). NGC ID# 23ZX, PCGS# 5667

PROOF BARBER QUARTERS

- 3664 1892 PR65 PCGS. Type One Reverse.** A supermajority of proof '92 quarters have a Type Two reverse, but the present Gem is from the initial delivery with the crosslet of the E in UNITED visible. Golden-brown and ocean-blue endow intricately struck surfaces. NGC ID# 2427, PCGS# 5678
- 3665 1893 PR64 PCGS.** Deep cobalt-blue, dove-gray, and plum-red embrace sharply struck and unblemished surfaces. An exemplary Barber proof type coin. Only 792 proofs were distributed. Ex: Samuel W. Wolfson Collection, Part II (Stack's, 5/1963), lot 879. From The Teich Family Collection. NGC ID# 2428, PCGS# 5679
- 3666 1894 PR64 Cameo PCGS. CAC.** Ex: Teich Family Collection. The mirrored fields of this near-Gem proof yield pronounced contrast with the motifs, especially when the coin is rotated slightly beneath a light source. A solid strike leaves razor-sharp detail on the devices. Population: 16 in 64 Cameo, 44 finer (12/13). From The Teich Family Collection. PCGS# 85680
- 3667 1895 PR66 NGC.** From a proof mintage of 880 pieces, this sharply detailed Premium Gem displays deeply mirrored fields under shades of pale gold and powder-blue toning. Census: 31 in 66, 30 finer (12/13). NGC ID# 242A, PCGS# 5681
- 3668 1895 PR64 Cameo PCGS.** Ex: Teich Family Collection. The deeply mirrored fields of this attractive Choice specimen show only minor signs of contact and the sharply detailed frosty design elements create bold cameo contrast. Population: 16 in 64 (1 in 64+) Cameo, 38 finer (12/13). From The Teich Family Collection. PCGS# 85681

- 3669 1896 PR63 Cameo PCGS. CAC.** A fully struck representative without visible hairlines beneath glossy aquamarine, lavender, and cherry-red surfaces. A mere 762 proofs were struck. Ex: Samuel W. Wolfson Collection, Part II (Stack's, 5/1963), lot 888. From The Teich Family Collection. PCGS# 85682
- 3670 1896 PR64+ Cameo NGC.** Sharply struck design features are highlighted by the deeply mirrored fields. A few minute marks on Liberty's face preclude full Gem status. Census: 1 in 64+ Cameo, 1 in 64 ★ Cameo, 69 finer (12/13). PCGS# 85682

1896 Quarter Dollar, Sharply Struck PR66 Cameo

- 3671 1896 PR66 Cameo PCGS.** The strong contrast between the satiny devices and the deeply mirrored fields yields pleasing eye appeal which is further enhanced by the sharply struck design features. Close examination reveals no mentionable contact marks on surfaces displaying just a splash or two of electric-blue and reddish-gold color. Population: 17 in 66 Cameo, 7 finer (12/13). PCGS# 85682
- 3672 1897 PR64 PCGS.** Mirrored reflectivity in the fields of this near-Gem Proof shows through the veneer of bluish-gray patina, especially on the reverse. The design elements are well impressed throughout. Housed in a first generation holder. Population: 56 in 64, 63 finer (12/13). NGC ID# 242C, PCGS# 5683
- 3673 1897 PR63 Cameo PCGS.** Ex: Teich Family Collection. Silver-gray surfaces display pleasing field-device contrast, especially when the coin is tilted slightly under a light source. Light obverse hairlines prevent a higher grade. From The Teich Family Collection. PCGS# 85683
- 3674 1897 PR65 Cameo PCGS. CAC.** Sharply struck, frosty devices are highlighted by the deeply mirrored fields. Whispers of cobalt-blue, lavender, and orange gravitate to the borders, leaving the centers untuned. Population: 8 in 65 Cameo, 25 finer (12/13). PCGS# 85683
- 3675 1898 PR64 Cameo PCGS. CAC.** A splendidly toned specimen with blue-green margins and light pumpkin-gold interiors. The portrait and eagle are frosty. A quality yet collectible Barber proof type coin. Population: 17 in 64 Cameo, 24 finer (12/13). Ex: Samuel W. Wolfson Collection, Part II (Stack's, 5/1963), lot 894. From The Teich Family Collection. PCGS# 85684
- 3676 1899 PR65 PCGS.** Ex: Teich Family Collection. Intermingled toning of cobalt-blue, crimson, orange, and yellow-gold toning dances across the luminous surfaces of this sharply struck Gem. Close inspection reveals no mentionable blemishes. Population: 25 in 65, 30 finer (12/13). From The Teich Family Collection. NGC ID# 242E, PCGS# 5685
- 3677 1899 PR63 Cameo PCGS.** Ex: Teich Family Collection. The frosty texture of the sharply detailed design elements provides startling cameo contrast with the deeply reflective fields of this impressive Select example. Population: 4 in 63 Cameo, 31 finer (12/13). From The Teich Family Collection. PCGS# 85685

1900 Quarter Dollar, Toned PR67

- 3678 1900 PR67 NGC.** Deep electric-blue, lavender, and yellow-gold patination adorns both sides of this lovely Superb Gem proof. The design elements are solidly struck throughout and exhibit modest contrast with the mirrored fields when the coin is tilted slightly under a light source. Census: 20 in 67 (3 in 67 ★), 9 finer (1/14). NGC ID# 242F, PCGS# 5686

- 3679 1900 PR63 Cameo PCGS.** Type One Obverse and Reverse. Impressive cameo frost is comprehensive across the portrait and eagle. A lightly toned specimen. Lacquer residue is evident on both sides.
From The Teich Family Collection. PCGS# 85686

1900 Barber Quarter, PR66 Brilliant Cameo Example

- 3680 1900 PR66 Cameo PCGS. CAC.** A fairly generous mintage of 912 proof Barber quarters was accomplished in 1900, and the present coin is one of the finest survivors. This spectacular Premium Gem exhibits pinpoint detail on all design elements and the frosty devices contrast dramatically with the deeply mirrored fields. Population: 18 in 66 Cameo, 11 finer (12/13). PCGS# 85686

- 3681 1901 PR65 PCGS.** Mottled forest-green, plum-red, and sky-blue alternate across this well struck and unmarked Gem. The glossy surfaces appear pristine.
Ex: Philip G. Straus Collection (Stack's, 5/1959), lot 1787.
From The Teich Family Collection. NGC ID# 242G, PCGS# 5687

- 3682 1901 PR66 NGC.** A debut issue at the Third Philadelphia Mint on Spring Garden Street, this Premium Gem proof has exceptional eye appeal with deeply mirrored fields and sharply detailed devices beneath lovely iridescent toning. Census: 30 in 66 (1 in 66+), 34 finer (12/13). NGC ID# 242G, PCGS# 5687

- 3683 1902 PR66 NGC.** Deeply toned blue-violet and emerald on the obverse. A touch of gold on the cap points to the lighter tones to be found on the reverse interior. Great eye appeal for this issue with a "lucky" mintage of 777 pieces. Census: 39 in 66 (1 in 66+, 1 in 66+★), 20 finer (12/13). NGC ID# 242H, PCGS# 5688

- 3684 1903 PR65 PCGS.** A good deal of the mirrored reflectivity in the fields shows through the veneer of cobalt-blue, lavender, and gold-orange patina. All design features are well impressed. Population: 44 in 65 (1 in 65+), 39 finer (12/13). NGC ID# 242J, PCGS# 5689

- 3685 1903 PR63 Cameo PCGS. CAC.** Ex: Teich Family Collection. This otherwise brilliant proof has tiny speckles of reddish patina scattered over the obverse. Sharp field-device contrast is evident on each side. An uncommon date to find with contrast.
From The Teich Family Collection. PCGS# 85689

- 3686 1904 PR64 Cameo PCGS.** Medium autumn-gold toning embraces this fully struck and exemplary proof quarter. The motifs are nonetheless luminous. One tiny spot is noted above the arrowheads.

Ex: T.K. Harvin Collection (Stack's, 6/1959), lot 872.
From The Teich Family Collection. PCGS# 85690

1905 Barber Quarter, PR67 Spectacular Multicolor Toning

- 3687 1905 PR67 NGC.** A melange of yellow-gold, reddish-orange, sky-blue, and bluish-gray patination adorns the obverse of this gorgeous Superb Gem proof, while sky-blue and lavender at the reverse margin flank the golden-orange central area. The design elements are fully brought up, including the upper-right shield corner and the fletchings. This piece yields stunning overall eye appeal. Census: 23 in 67 (1 in 67+), 3 finer (12/13). NGC ID# 242L, PCGS# 5691

1905 Quarter, Conditionally Rare PR66+ Cameo

- 3688 1905 PR66+ Cameo PCGS.** Although the 1905 proof quarter is not especially scarce as a date, it is notably lacking with Cameo contrast. Pleasing field-device contrast appears on this high-end Premium Gem, and a solid strike delivers razor-sharp detail to both sides. Population: 4 in 66 Cameo, (1 in 66+) Cameo, 5 finer (12/13). PCGS# 85691

- 3689 1906 PR64 PCGS. CAC.** Ex: Teich Family Collection. Whispers of cobalt-blue and orange-gold cling to the rims of this exquisitely struck near-Gem proof quarter. A few minor marks that only appear under magnification barely preclude Gem classification.
From The Teich Family Collection. NGC ID# 242M, PCGS# 5692

- 3690 1906 PR66 PCGS.** Deeply and distinctly toned with blue-to-green outer shades and yellow-to-silver interiors. Mildly contrasted but strongly appealing. Population: 35 in 66 (1 in 66+), 22 finer (12/13). NGC ID# 242M, PCGS# 5692

- 3691 1907 PR64 Cameo PCGS. CAC.** Ex: Teich Family Collection. Dramatic cameo contrast is apparent between the sharply detailed frosty design elements and the deeply reflective fields of this well-preserved Choice specimen. Population: 17 in 64 (1 in 64+) Cameo, 36 finer (12/13).
From The Teich Family Collection. PCGS# 85693

3692 1908 PR64 PCGS. Ex: Teich Family Collection. The well-preserved surfaces of this attractive Choice example are blanketed in vivid shades of bluish-gray and greenish-gold toning. The sharply detailed design elements and deeply reflective fields add to the considerable eye appeal. Population: 52 in 64 (1 in 64+), 64 finer (12/13). *From The Teich Family Collection.* NGC ID# 242P, PCGS# 5694

3693 1910 PR64 PCGS. Freckles of gold-orange and electric-blue travel through the reverse of this near-Gem. The semifrosted devices stand out against the mirrored fields when the coin is rotated beneath a light source. The design elements are well-struck throughout. NGC ID# 242S, PCGS# 5696

3694 1911 PR64 Cameo PCGS. Ex: Teich Family Collection. Dappled autumn-brown toning embraces the margins, though the well struck motifs are frosty. The fields exhibit a milk-gray appearance when tilted away from the light. Just 543 proofs were produced. *From The Teich Family Collection.* PCGS# 85697

STANDING LIBERTY QUARTERS

3695 1917 Type One MS65 Full Head PCGS. CAC. Attractive light gold toning appears on both sides of this Full Head Gem. Many type collectors who normally seek first-year issues often choose the 1917 Type One due to the rarity of the 1916. NGC ID# 242Z, PCGS# 5707

3696 1917 Type One MS66 Full Head PCGS. An excellent example of the Type One design, with Hermon A. MacNeil's original concept fully executed and attractively toned. Creamy, silver luster covers sharply struck devices enhanced by robin's egg-blue, red, and gold toning. The surfaces are free of any significant abrasions. NGC ID# 242Z, PCGS# 5707

3697 1917 Type One MS66 Full Head PCGS. Lustrous surfaces display splashes of electric-blue and lavender on the reverse. The bold strike transcends the Full Head to include the horizontal and vertical stripes in the inner shield, all the rivets, and the eagle's torso feathers. NGC ID# 242Z, PCGS# 5707

3698 1917 Type One MS66+ Full Head PCGS. CAC. Well-defined with strong satiny luster. Both sides are mostly pale silver-gray, though scattered golden-tan elements visit the reverse. NGC ID# 242Z, PCGS# 5707

3699 1917-D Type One MS66 PCGS. This well-detailed Premium Gem displays vibrant mint luster and delicate shades of champagne-gold and lavender toning. Nicely preserved throughout. Population: 19 in 66 (2 in 66+), 3 finer (12/13). NGC ID# 2432, PCGS# 5708

1917-D Quarter, MS66 Full Head Popular Type One Variant

3700 1917-D Type One MS66 Full Head PCGS. CAC. A well executed strike transcends the Full Head to include bold delineation on all design elements, including the rivets, vertical shield lines, Liberty's toes, and the eagle's plumage. Lustrous surfaces display splashes of light golden-tan patina and are devoid of significant marks. Full Head specimens are fairly available through the Gem level. Premium Gems are more challenging, and anything finer is elusive. PCGS has graded 21 numerically finer examples (12/13). NGC ID# 2432, PCGS# 5709

3701 1917-S Type One MS64 Full Head PCGS. Remarkably smooth for the designated grade, this San Francisco type coin boasts dynamic luster and an intricate strike. A hint of caramel-gold toning visits the margins. Certified in a green label holder. NGC ID# 2433, PCGS# 5711

3702 1917 Type Two MS65 Full Head PCGS. Whispers of orange, crimson, and yellow-gold patina cascade over the lustrous surfaces of this sharply struck Gem. The vertical stripes as well as some horizontal ones show on the inner shield. NGC ID# 2434, PCGS# 5715

3703 1917 Type Two MS66+ Full Head PCGS. Of the two main varieties for 1917 Standing Liberty quarters, the Type Two experienced comparative neglect at the time of release. This minimally toned and crisply struck example offers great preservation and eye appeal. Population: 72 in 66 (5 in 66+) Full Head, 9 finer (12/13). NGC ID# 2434, PCGS# 5715

3704 1918 MS66+ PCGS. CAC. This high-end Premium Gem exhibits sharp design detail, including fullness in the chain mail, rivets, and vertical stripes of the inner shield. Liberty's head also shows relatively strong definition, though not fully struck. Impeccably preserved surfaces yield intense luster and are untuned. Population: 25 in 66 (2 in 66+), 1 finer (12/13). NGC ID# 2437, PCGS# 5720

1918/7-S Quarter, VG10 Great Example for the Grade

3705 1918/7-S Overdate VG10 PCGS. CAC. FS-101. The popular *Guide Book* overdate in one of the lower grades where the 8 Over 7 feature remains visible, as the date area is one of the first to wear away on the Standing Liberty quarter design. Gold-gray surfaces show few abrasions aside from a cut below the first T in TRUST. NGC ID# 243A, PCGS# 5726

3706 1919 MS66 PCGS. Flashes of amber, gold, and violet toning highlight the well-preserved surfaces of this remarkable Premium Gem. The design elements are well-detailed and both sides radiate vibrant mint luster. Population: 93 in 66 (7 in 66+), 20 finer (12/13). NGC ID# 243B, PCGS# 5728

3707 1920 MS65 Full Head PCGS. CAC. Full Head definition is present on this impressive Gem, but some of the typical softness is apparent on the central obverse. Vibrant mint luster and well-preserved brilliant surfaces add to the tremendous eye appeal. PCGS has graded 28 numerically finer examples (12/13). NGC ID# 243E, PCGS# 5735

3708 1920-D MS63 Full Head PCGS. Ex: Teich Family Collection. This lovely Select Mint State Standing Liberty quarter combines a strike rarity with a condition rarity. Both sides are boldly defined with brilliant, untuned silver surfaces. *From The Teich Family Collection.* NGC ID# 243F, PCGS# 5737

3709 1921 MS63 PCGS. CAC. Ex: Teich Family Collection. This attractive Select specimen shows just a touch of the typical softness on Liberty's head, but the shield rivets are much bolder than usual. Vibrant mint luster adds to the outstanding eye appeal. *From The Teich Family Collection.* NGC ID# 243H, PCGS# 5740

- 3710 1923-S VF35 PCGS. CAC.** Even wear and unquestionably original surfaces make this scarce Standing Liberty quarter a must-have for the collector assembling a mid-grade collection. Cline opines that "the 1923-S is harder to locate than the 1916, particularly in VF through AU." NGC ID# 243K, PCGS# 5744
- 3711 1924 MS65 Full Head NGC. CAC.** Light straw-gold toning graces this lustrous and pristine Gem. The strike is sharp except on the date. Outstanding quality for this high mintage issue. Housed in a prior generation holder. Census: 52 in 65 Full Head, 36 finer (12/13). NGC ID# 243L, PCGS# 5747
- 3712 1927 MS65 Full Head PCGS. CAC.** This lustrous Gem shows complete striking definition on the obverse, and only lacks completeness on the reverse on the right (facing) eagle's wing. Lighter central obverse color deepens significantly around the margins. NGC ID# 243U, PCGS# 5761
- 3713 1927-S AU50 PCGS.** The 1927-S is the key issue of the Recessed Date subtype. The present partially lustrous and unmarked example has a blush of golden toning on the upper obverse border. Certified in a green label holder. NGC ID# 243W, PCGS# 5764
- 3714 1929-S MS66 Full Head NGC.** Vibrant luster invigorates this sharply struck Premium Gem. The untoned surfaces have been very well cared for. Census: 86 in 66 (2 in 66+) Full Head, 30 finer (12/13). NGC ID# 2444, PCGS# 5777
- 3715 1929-S MS66 Full Head PCGS. CAC.** An intensely lustrous Premium Gem. Just a hint of gold and orange iridescence floats on creamy-smooth, silver surfaces. A strong strike includes a Full Head and a nearly complete set of shield rivets. Just 12 pieces are certified finer by PCGS with a Full Head (12/13). NGC ID# 2444, PCGS# 5777

**1930 Quarter, MS67 ★ Full Head
The Finest Seen at NGC**

- 3716 1930 MS67 ★ Full Head NGC. CAC.** The relatively high mintage exceeding 5.6 million pieces and the fairly large number struck with a Full Head makes the 1930 quarter a popular type coin. The present Superb Gem offering is an especially notable example as it is *the* finest 1930 graded by NGC! Hints of soft rainbow-color reside on the radiantly lustrous surfaces that are impeccably well preserved. NGC ID# 2445, PCGS# 5779
- 3717 1930-S MS67 PCGS. CAC.** Originally toned golden-brown, olive-gold, and pearl-gray. Liberty's head lacks an earhole but is otherwise full. The date is sharp and the preservation is practically immaculate. Certified in an old green label holder. NGC ID# 2446, PCGS# 5780
- 3718 1930-S MS67 PCGS. CAC.** This attractive Standing Liberty quarter is an aesthetic treat, with rich and vibrant luster gleaming through an array of pastel colors. Luminous pink, light-blue, lime-green, gold, and violet toning grace the obverse, while the reverse is frost-white with golden peripheral tone. The strike is not full, but adequate for the Superb Gem category. Eye appeal is off the charts. Population: 21 in 67, 0 finer (12/13). NGC ID# 2446, PCGS# 5780

WASHINGTON QUARTERS

- 3719 1932 MS66 PCGS. Ex:** Teich Family Collection. Intense luster radiates from both sides of this lovely Premium Gem. The obverse is nearly untuned save for a couple wisps of powder-blue and orange-gold while the reverse displays a more extensive pattern of this color palette. This is a sharply impressed and nicely preserved piece. *From The Teich Family Collection.* NGC ID# 2447, PCGS# 5790
- 3720 1932 MS66 PCGS. Ex:** Teich Family Collection. Splashes of subtle powder-blue, gold-tan, and violet patination reside on the highly lustrous surfaces of this sharply struck Premium Gem. A impressive example of this first year Washington quarter. *From The Teich Family Collection.* NGC ID# 2447, PCGS# 5790

**1932 Washington Quarter, MS66+
Impressive First-Year Example**

- 3721 1932 MS66+ PCGS.** A sensational Premium Gem, this first-year Washington quarter has bold design motifs with pristine surfaces. Both sides exhibit frosty silver luster beneath outstanding pastel blue, gold, and iridescent toning. PCGS has only certified three finer examples (12/13). NGC ID# 2447, PCGS# 5790

**1932 Washington Quarter, MS66+
Ideal First-Year Type Coin**

- 3722 1932 MS66+ PCGS. CAC.** A high-end Premium Gem from the first year of the Washington design, this coin offers sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces are toned in attractive shades of sea-green and pink, with considerable eye appeal. PCGS has graded only three numerically finer examples (12/13). NGC ID# 2447, PCGS# 5790
- 3723 1932-D MS62 PCGS.** The lustrous surfaces of this key-date Washington exhibit sharply struck motifs. A few minute obverse marks preclude a higher grade. NGC ID# 2448, PCGS# 5791
- 3724 1932-D MS62 PCGS. CAC.** Booming luster and delicate gold patina provides splendid eye appeal for the grade. A few unimportant marks are detected, but this key date quarter has a precise strike and is housed in a green label holder. *Ex: Orlando FUN Signature (Heritage, 1/2008), lot 2029.* NGC ID# 2448, PCGS# 5791
- 3725 1932-D MS63 PCGS. Ex:** Teich Family Collection. A well-detailed Select example of this celebrated key issue, with dappled shades of gray and amber toning on the obverse and only minor signs of contact. *From The Teich Family Collection.* NGC ID# 2448, PCGS# 5791
- 3726 1932-D MS63 PCGS.** The lustrous surfaces of this key-date display whispers of ice-blue toning, especially on the reverse. A few minute obverse marks determine the grade. NGC ID# 2448, PCGS# 5791

- 3727 1932-D MS64 PCGS.** Cobalt-blue and autumn-brown embrace the coruscating and refreshingly mark-free surfaces of this key date quarter. Evenly struck and deserving of personal evaluation. NGC ID# 2448, PCGS# 5791
- 3728 1932-D MS64 PCGS.** Ex: Teich Family Collection. Rich shades of sea-green and amber toning accent the well-preserved surfaces of this sharply detailed Choice example. The 1932-D is the first-year key to the Washington quarter series.
From The Teich Family Collection. NGC ID# 2448, PCGS# 5791
- 3729 1932-S MS64 PCGS.** Ex: Teich Family Collection. A sharply detailed Choice example of this low-mintage key, with bright mint luster and accents of golden-tan and amber toning. The 1932-S Washington quarter is the second-rarest issue of the series.
From The Teich Family Collection. NGC ID# 2449, PCGS# 5792
- 3730 1932-S MS64 PCGS. CAC.** Softly frosted silver-white surfaces show just a trace of color on this high-end near-Gem, held back from that level only by a couple of unimportant ticks away from the prime focal points. Excellent eye appeal. NGC ID# 2449, PCGS# 5792

**1932-S Quarter, MS65
First-Year Key Date**

- 3731 1932-S MS65 PCGS.** Both sides of this 1932-S quarter are near-brilliant with subtly frosted luster and only the most delicate traces of pastel gold and blue toning. A great example of this key date. PCGS has graded just four coins as MS66 or finer (12/13).
Ex: Long Beach Signature (Heritage, 9/2008), lot 890. NGC ID# 2449, PCGS# 5792

**1932-S Washington Quarter, MS65
Very Rare in Finer Grades**

- 3732 1932-S MS65 PCGS.** The 1932-S Washington quarter is a first-year key date that claims the lowest mintage of the series, at 408,000 pieces. This impressive Gem is sharply detailed in all areas and the well-preserved surfaces radiate vibrant mint luster. A few hints of pale gold and pink toning add to the considerable visual appeal. PCGS has graded only four numerically finer examples (12/13). NGC ID# 2449, PCGS# 5792
- 3733 1934 Light Motto MS66+ PCGS. CAC. FS-401.** The blurry motto subtype from the 1932 coinage appears on a small minority of the 1934 issue. This thoroughly lustrous high grade representative has lovely lemon-gold and powder-blue toning. NGC ID# 244A, PCGS# 5794

- 3734 1934-D Medium Motto MS66 PCGS.** From a smallish mintage of 3.5 million pieces, the 1934-D Washington quarter is not readily available in high grade, and Premium Gem examples are very scarce. This well-detailed Premium Gem displays vibrant mint luster across smooth stone-gray, plum-mauve, and jade-green surfaces. NGC ID# 244C, PCGS# 5796
- 3735 1934-D Medium Motto MS66 NGC.** Blushes of peach-gold visit the obverse of this lightly toned and lustrous example. The strike is bold and there are no detractions. Like other early branch mint issues, the 1934-D is scarce in the present quality. NGC ID# 244C, PCGS# 5796
- 3736 1934-D Heavy Motto MS66 PCGS.** The obverse border is lemon-gold with glimpses of cherry-red. The remainder of this lustrous early branch mint quarter is nearly brilliant. Smooth aside from a slender mark on the forehead. Population: 18 in 66 (1 in 66+), 3 finer (12/13). PCGS# 85796
- 3737 1935-D MS66 PCGS.** Ex: Teich Family Collection. A sharply detailed Premium Gem, with vibrant mint luster and outstanding eye appeal. The obverse displays shades of sea-green and amber toning, while the reverse is essentially brilliant. PCGS has graded 16 numerically finer examples (12/13).
From The Teich Family Collection. NGC ID# 244E, PCGS# 5798
- 3738 1935-S MS67 PCGS.** A fully brilliant Superb Gem that boasts potent luster and a bold strike. Immaculate except for a stray faint mark on the cheek. Population: 26 in 67, 0 finer (12/13). NGC ID# 244F, PCGS# 5799
- 3739 1936-D MS65 PCGS.** Ex: Teich Family Collection. Vivid accents of burnt-orange and amber toning enhance the obverse of this sharply detailed Gem, while the reverse remains lustrous and brilliant.
From The Teich Family Collection. NGC ID# 244H, PCGS# 5801

**1936-S Washington Quarter, MS67
Condition Rarity, None Numerically Finer**

- 3740 1936-S MS67 PCGS.** With 3.8 million pieces produced, the 1936-S quarter is one of the 10 lowest-mintage dates of the series. It becomes rare in Superb Gem condition. This example has a kind of noble appeal, with charcoal gray rims surrounding silver surfaces that glow with frosty luster. The fields are clean and well-preserved with no significant abrasions. A bold strike completes the appeal of this Superb Gem quarter. Population: 31 in 67 (1 in 67+), 0 finer (12/13). NGC ID# 244J, PCGS# 5802
- 3741 1937 MS67 PCGS.** Ex: Teich Family Collection. A spectacular Superb Gem, with razor-sharp definition on all design elements and vibrant mint luster, under shades of greenish-gold and lavender-gray toning. Population: 63 in 67 (5 in 67+), 0 finer (12/13).
From The Teich Family Collection. NGC ID# 244K, PCGS# 5803
- 3742 1937-D MS67 PCGS.** A veneer of soft gold color resides on the lustrous surfaces of this well-struck Superb Gem. Both sides have been well cared for. Population: 46 in 67 (1 in 67+), 0 finer (12/13). NGC ID# 244L, PCGS# 5804
- 3743 1937-D MS67 NGC.** Soft yellow-gold, purple, and electric-blue toning cascades over the intensely lustrous surfaces of this Superb Gem D-mint quarter. Sharply impressed devices further enhance the coin's eye appeal. Census: 20 in 67 (2 in 67 ★), 0 finer (12/13). NGC ID# 244L, PCGS# 5804

- 3744 1938 MS67 PCGS.** An exceptional Superb Gem, this 1938 quarter has frosty silver luster beneath delightful iridescent toning. Worthwhile for the Registry collector. Population: 47 in 67 (3 in 67+), 0 finer (12/13). NGC ID# 244N, PCGS# 5806
- 3745 1938-S MS67 PCGS.** Untoned surfaces display vibrant luster and well-struck design elements. Both sides are very nicely preserved. Population: 42 in 67 (2 in 67+), 0 finer (12/13). NGC ID# 244P, PCGS# 5807
- 3746 1939-D MS67 PCGS.** An arc of orange, cherry-red, and forest-green visits the lower obverse margin of this crisply struck and highly lustrous Superb Gem. The left obverse displays wispy contact. Population: 56 in 67 (1 in 67+), 0 finer (12/13). NGC ID# 244S, PCGS# 5809
- 3747 1939-D MS67 PCGS.** The well-struck design features of this Superb Gem include strong definition in Liberty's hair. Highly lustrous surfaces are untoned and impeccably preserved. Population: 56 in 67 (1 in 67+), 0 finer (12/13). NGC ID# 244S, PCGS# 5809
- 3748 1939-S MS67 PCGS.** Vibrant luster emanates from the untoned surfaces of this well-defined Superb Gem. A couple of minute obverse marks and spots do not detract. Population: 48 in 67, 0 finer (12/13). NGC ID# 244T, PCGS# 5810
- 3749 1939-S MS67 PCGS.** Bright luster emanates from the essentially color-free surfaces of this Superb Gem. Well struck design elements add to the coin's visual appeal. Population: 53 in 67, 0 finer (12/13). NGC ID# 244T, PCGS# 5810
- 3750 1939-S MS67 NGC.** Both sides of this Superb Gem are awash with brilliant luster, and each is well-struck. Impressive eye appeal. Census: 36 in 67 (2 in 67 ★), 0 finer (12/13). NGC ID# 244T, PCGS# 5810
- 3751 1939-S MS67 PCGS.** The well-preserved brilliant surfaces of this spectacular Superb Gem radiate vibrant mint luster on both sides and the design elements are sharply detailed throughout. Eye appeal is outstanding. Population: 53 in 67, 0 finer (12/13). NGC ID# 244T, PCGS# 5810
- 3752 1939-S MS67 PCGS.** This delightful Superb Gem displays vibrant mint luster and pinpoint definition on all design elements. The brilliant surfaces show no mentionable signs of contact. Population: 53 in 67, 0 finer (12/13). NGC ID# 244T, PCGS# 5810

**1940-S Quarter Dollar, MS67+
Delicate Pastel Patina**

- 3753 1940-S MS67+ PCGS. CAC.** The 1940-S is a popular issue known for its availability and high quality of strike. In Superb Gem condition with the Plus designation, it becomes a scarce coin, too. This example will be a prime target for type collectors as well as for series specialists wanting to upgrade their set. Subtle pastel tones of gold, lime-green, and magenta have deeper orange-gold accents. The strong strike is complemented by clean, unabraded fields for high-end eye appeal. Population: 61 in 67 (4 in 67+), 1 finer (12/13). NGC ID# 244W, PCGS# 5813

**1941 Quarter, MS67+
Among the Finest of This High-Mintage Year**

- 3754 1941 MS67+ PCGS. CAC.** An astounding 79 million quarters were struck in 1941. However, few were set aside in pristine condition as seen here. The mint frost is bright and untoned, and there are no discernable or reportable abrasions on either side. Only nine other 67+ coins have been certified by PCGS, and a single MS68 is finer (12/13). NGC ID# 244X, PCGS# 5814
- 3755 1941-D MS67 PCGS. CAC.** Strong luster radiates from the impeccably well preserved and crisply struck surfaces of this Superb Gem. The only color occurs on Washington's cheek, and it is very faint. Population: 34 in 67 (7 in 67+), 1 finer (12/13). NGC ID# 244Y, PCGS# 5815
- 3756 1941-S MS67 PCGS.** Vivid shades of greenish-gold and lavender-gray toning highlight the lustrous surfaces of this sharply detailed Superb Gem. Eye appeal is extraordinary. Population: 48 in 67 (2 in 67+), 0 finer (12/13). NGC ID# 244Z, PCGS# 5816
- 3757 1941-S MS67 PCGS.** Vibrant mint luster and needle-sharp definition on all design elements create outstanding eye appeal for this delightful Superb Gem. The well-preserved brilliant surfaces show no mentionable distractions. Population: 48 in 67 (2 in 67+), 0 finer (12/13). NGC ID# 244Z, PCGS# 5816
- 3758 1941-S MS67 PCGS. CAC.** Intensely lustrous surfaces display soft orange-gold color on portions of the obverse. Well-struck devices and impeccable preservation further enhance the coin's outstanding eye appeal, appropriately recognized by CAC. Population: 48 in 67 (2 in 67+), 0 finer (12/13). NGC ID# 244Z, PCGS# 5816
- 3759 1942-S MS67 NGC.** Reddish-gold and champagne coloration adorns the lustrous surfaces of this impressively struck Superb Gem quarter. There are no marks of consequence on either side. Census: 63 in 67 (1 in 67 ★), 0 finer (12/13). NGC ID# 2454, PCGS# 5819
- 3760 1942-S MS67 PCGS.** Trumpet tail S. This World War II Superb Gem provides potent luster and pristine preservation. A wisp of golden patina visits both sides. Population: 40 in 67 (4 in 67+), 1 finer (12/13). NGC ID# 2454, PCGS# 5819
- 3761 1943-D MS67 PCGS. Ex: Teich Family Collection.** A vivid ring of burnt-orange and amber toning surrounds the brilliant center of the obverse, while the lustrous reverse is essentially untoned. The design elements are sharply detailed throughout. Population: 54 in 67 (2 in 67+), 1 finer (12/13).
From The Teich Family Collection. NGC ID# 2456, PCGS# 5821
- 3762 1943-D MS67 PCGS Secure.** The radiantly lustrous surfaces of this Superb Gem show whispers of faint bluish-green, crimson, and reddish-gold and are nicely struck. Both sides are wonderfully preserved. Population: 51 in 67 (2 in 67+), 1 finer (12/13). NGC ID# 2456, PCGS# 5821
- 3763 1947-D MS67+ PCGS. CAC.** Nearly imperceptible soft champagne patina resides on the radiantly lustrous surfaces of this high-end Superb Gem. Additionally, the design features exhibit strong definition and both sides have been well cared for. Population: 6 in 67+, 1 finer (12/13). NGC ID# 245J, PCGS# 5834

- 3764 1947-D MS67+ PCGS. CAC.** This high-end Superb Gem is sharply detailed and brightly lustrous throughout, with vivid traces of greenish-gold and lavender-gray toning at the peripheries. PCGS has graded one numerically finer example (12/13). NGC ID# 245J, PCGS# 5834
- 3765 1948-D MS67 PCGS. Ex:** Teich Family Collection. The obverse of this sharply detailed Superb Gem displays rich shades of greenish-gold and lavender-gray patina, while the reverse remains mostly brilliant. Population: 34 in 67 (2 in 67+), 0 finer (12/13). *From The Teich Family Collection.* NGC ID# 245M, PCGS# 5837
- 3766 1949-D MS67 PCGS. CAC.** Shades of sea-green, silver-gray, and amber toning enliven the pristine surfaces of this magnificent Superb Gem. The design elements are sharply detailed and both sides radiate vibrant mint luster. Population: 48 in 67 (5 in 67+), 2 finer (12/13). NGC ID# 245R, PCGS# 5840
- 3767 1949-D MS67 PCGS. CAC.** Razor-sharp definition is evident on all design elements of this impressive Superb Gem, and the well-preserved surfaces are highlighted by shades of sea-green and amber-gray toning. Population: 48 in 67 (5 in 67+), 2 finer (12/13). NGC ID# 245R, PCGS# 5840
- 3768 1951-D MS67 PCGS. CAC.** Despite a mintage of more than 35 million pieces, few examples can equal this Superb Gem for quality of strike or eye appeal. Untoned with much frosty luster, this immaculate quarter is a condition rarity and seldom seen finer. Population: 31 in 67 (1 in 67+), 1 finer (12/13). NGC ID# 245X, PCGS# 5847
- 3769 1952-S MS67+ PCGS. CAC.** Rich toning characterizes this Superb quarter. The interior of each side is speckled gray and blue with a significant trimming of russet around the margins. NGC ID# 2463, PCGS# 5851
- 3770 1952-S MS67+ PCGS. CAC.** This S-mint quarter displays the usually seen thick mint frost, but the surfaces are exceptionally clean without the abrasions that all too often interrupt the luster flow. Iridescent toning is seen on the obverse, while the reverse is essentially brilliant. NGC ID# 2463, PCGS# 5851
- 3771 1953 MS67 PCGS. CAC.** Although a common Philadelphia date with more than 18 million pieces produced, this sharply struck quarter is a condition rarity. Just one coin is certified numerically finer by PCGS and NGC combined (1/14). Gold, light-blue, and magenta accents float on lustrous, unabraded silver surfaces for excellent eye appeal. A Superb Gem. NGC ID# 2464, PCGS# 5852
- 3772 1953 MS67 PCGS. CAC.** Among the colors present on this Superb Gem are red-brown, deep violet, copper-orange, teal, and golden-yellow. The reverse includes swaths of deep yellow, cherry-red, and jade-green. The outer edge of the eagle's right wing reveals several die cracks, as-struck. Population: 64 in 67 (1 in 67+), 0 finer (12/13). NGC ID# 2464, PCGS# 5852
- 3773 1959-D MS67 NGC.** Brightly lustrous and well struck surfaces invigorate this Superb Gem. An occasional wisp of yellow-gold adds a bit of color that appears under magnification. Census: 27 in 67 (1 in 67 ★), 0 finer (12/13). NGC ID# 246J, PCGS# 5867
- 3774 1960 MS67 NGC. CAC.** Medium intensity electric-blue and crimson toning does not inhibit the flow of radiant luster from both sides of this Superb Gem. Well struck devices and impeccable preservation complement these attributes, all of which yield outstanding eye appeal. Census: 72 in 67 (4 in 67 ★), 0 finer (12/13). NGC ID# 246K, PCGS# 5868
- 3775 1962 MS67 PCGS. CAC.** Both sides of this gorgeous Superb Gem yield breathtaking luster and strong design definition. Essentially color-free surfaces. Population: 17 in 67, 0 finer (12/13). NGC ID# 246P, PCGS# 5872
- 3776 1962-D MS67 NGC.** Splashes of crimson, yellow-gold, and bluish-green reside on the lustrous surfaces of this D-mint quarter. Well-struck on the design elements. Census: 22 in 67 (2 in 67 ★), 0 finer (12/13). NGC ID# 246R, PCGS# 5873

1963-D Quarter, MS67 None Certified Finer

- 3777 1963-D MS67 PCGS.** The obverse of this Superb Gem has brilliant, satin luster with gorgeous gold and iridescent toning near the border. The reverse is also satiny and brilliant, with faint champagne hues. No finer pieces have been examined by PCGS or NGC. Population: 10 in 67 (1 in 67+), 0 finer (12/13). NGC ID# 246T, PCGS# 5875
- 3778 1964 MS67 PCGS. Type A Reverse.** Dramatic cherry-red, sea-green, and autumn-gold patina alternates across the obverse. The reverse is attractively toned but in a more conventional fashion. A lustrous Superb Gem from the waning days of the 90% silver alloy. Population: 15 in 67 (1 in 67+), 0 finer (12/13). NGC ID# 246U, PCGS# 5876
- 3779 1964-D MS67 ★ NGC. CAC. Type A Reverse.** Waves of cherry-red, orange-gold, and apple-green grace this beautifully toned, lustrous, and virtually immaculate Superb Gem. Census: 77 in 67 (11 in 67 ★, 1 in 67+★), 0 finer (1/14). NGC ID# 246V, PCGS# 5877

PROOF WASHINGTON QUARTERS

- 3780 1936 PR64 PCGS. Ex:** Teich Family Collection. Lightly toned, impeccably preserved surfaces yield well-struck design detail. Pleasing overall eye appeal. *From The Teich Family Collection.* NGC ID# 27HN, PCGS# 5975
- 3781 1936 PR64 PCGS. Ex:** Teich Family Collection. The first proof Washington quarters were struck in 1936 from a mintage of just 3,837 pieces, and are quite scarce today. Freckles of reddish-tan do not impede the brilliance of this near-Gem. All design elements are sharply impressed. *From The Teich Family Collection.* NGC ID# 27HN, PCGS# 5975
- 3782 1950 PR67 Cameo NGC.** An impressive Superb Gem Cameo proof, this Washington quarter represents the post-World War II resumption of proof coins. Both sides are brilliant and untoned with exceptional contrast. Census: 50 in 67 Cameo (1 in 67+ Cameo, 4 in 67 ★ Cameo), 13 finer (1/14). NGC ID# 27HW, PCGS# 85982

End of Session One

SESSION TWO

EARLY HALF DOLLARS

- 3783** 1795 2 Leaves AG3 PCGS. O-124, R.5. Pastel peach, lavender, and cream-gray toning blankets this well circulated but attractive Flowing Hair half. The obverse border has mildly granular streaks at 12 and 3 o'clock, but marks are trivial save for a thin diagonal line through the upper lip. PCGS# 6052
- 3784** 1795 2 Leaves — Obverse Scratched — NGC Details. VG. O-119, R.4. The right obverse field has a small number of thin pinscratches. The slate-gray and straw-gold surfaces are hairlined and minutely granular. The date is bold though a few letters in LIBERTY and AMERICA are weak. PCGS# 6052
- 3785** 1795 2 Leaves Fine 12 PCGS. O-110, R.3. Stone-gray fields accompany butter-gold and powder-blue high points. This mildly luminous example is evenly defined and smooth except for a thin mark above the bust tip. Housed in an old green label holder. PCGS# 6052
- 3786** 1795 Y Over Star, Two Leaves — Whizzed — NGC Details. VF. O-121, R.4. The Y in LIBERTY is punched over a misplaced star with three obvious star points visible. The fields are toned steel-gray, with light silver devices. This half dollar is much more attractive than the NGC description suggests.
- 3787** 1795 2 Leaves — Repaired, Whizzed — ANACS. VF20 Details. O-131, High R.4. Repaired on the field below the chin, and the portrait near the ear also shows smoothing. Both sides are evenly whizzed but this silver-gray Washington Administration type coin is attractive when viewed with the unaided eye.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 6052

1801 O-101 Half Dollar, VF25

- 3788** 1801 VF25 PCGS. O-101, R.3. Several small die breaks on the reverse distinguish O-101 from its rarer O-102 alternative. Half dollars of this date are elusive since bullion depositors preferred the silver dollar denomination. The present lightly abraded example is principally steel-gray with bands of blue-green at the margins. NGC ID# 24ED, PCGS# 6064
- 3789** 1805 VF35 PCGS. CAC. O-111, R.2. Dusky gray toning fills peripheral elements though the high points are gunmetal-blue and the fields display almond-gold. A lightly abraded Choice AU Draped Bust type coin. NGC ID# 24EG, PCGS# 6069
- 3790** 1806 Knobbed 6, Small Stars VF30 PCGS. CAC. O-106, R.4. Lavender, powder-blue, and sea-green encompass this lightly abraded half dollar. The strike is good except on the upper right reverse opposite the bust tip. The Knob 6, Small Stars is a scarce *Guide Book* variety.
Ex: Baltimore Signature (Heritage, 8/2008), lot 8327. PCGS# 6075

1807 O-105 Half Dollar, AU53 Draped Bust Design

- 3791** 1807 Draped Bust AU53 NGC. O-105, R.1. An intermediate die state, boldly clashed above the date but without the break between the ED in UNITED. Lightly toned and minimally abraded with a generous portion of luster at the borders and on the motifs. A small granular area is noted near the lower ribbon end. NGC ID# 24EM, PCGS# 6079

BUST HALF DOLLARS

1808/7 O-101 Half, AU55 Strong Underdigit

- 3792** 1808/7 AU55 PCGS. O-101, R.1. The serif of the underdigit 7, its crossbar, and its downstroke are all apparent within the second 8 in the date. Light gold toning adorns this partially lustrous Capped Bust half. A few faint field marks are noted near the eagle's head. Population: 13 in 55, 34 finer (12/13). NGC ID# 24EP, PCGS# 6091
- 3793** 1808 AU53 NGC. O-104, R.2. Overton-104 is best attributed by a die line east of the branch stem. The variety appears scarcer than R.2 and perhaps should be "promoted" to R.3. The present smooth and partially lustrous example is mostly stone-gray but shows caramel-gold toning at the margins. NGC ID# 24EP, PCGS# 6090
- 3794** 1811 Small 8 AU55 PCGS. CAC. O-110, R.1. Orange-gold toning outlines the stone-gray centers. The high points show minor wear but ample luster brightens the borders and motifs. There are no relevant marks, and the eye appeal is superior for the Choice AU level. PCGS# 6097
- 3795** 1811 Small 8 AU58 ANACS. O-106, R.3. The borders display rich apricot-gold, ruby-red, powder-blue, and jade-green toning. This lustrous representative is minimally abraded and provides superior eye appeal. Overton-106 is known for its parallel die lines above the eagle's left (facing) shoulder. PCGS# 6097

- 3796** 1814/3 XF45 NGC. O-101a, R.2. The top of a 3 underdigit is similar to, but more obvious than, its counterpart on the 1914/3 Buffalo nickel. The present half dollar is deeply toned steel-gray. Luster shimmers at the margins. Marks are absent save for wispy abrasions beneath the right scroll end. NGC ID# 24F4, PCGS# 6106
- 3797** 1817 AU58 NGC. O-112a, R.2. Golden-brown and dove-gray toning grace this partly lustrous Borderline Uncirculated half. At least three sets of clash marks are present, but the only remotely mentionable mark is a pinscratch beneath the beak. NGC ID# 24F6, PCGS# 6109
- 3798** 1818/7 Large 8 AU55 NGC. O-101a, R.1. Light golden-brown patina visits the margins of this briefly circulated and overdated half dollar. The reverse is smooth but we note faded marks near Liberty's neck and bust tip. PCGS# 6115
- 3799** 1823 AU58 PCGS. O-104, R.3. A hint of golden patina visits this lustrous and nearly unabraded half dollar. The strike is crisp except on the left-side stars. Liberty's profile is widely strike doubled. A right extension of the lowest horizontal shield line confirms this scarcer Overton variety. NGC ID# 24FJ, PCGS# 6131
- 3800** 1826 MS61 NGC. O-116a, R.1. Russet and steel-gray adorn the peripheries but the remainder of this Bust type coin exhibits only light golden patina. The satiny surfaces are minimally marked save for a few tiny ticks on Liberty's cheek. NGC ID# 24FM, PCGS# 6143
- 3801** 1828 Square Base 2, Small 8, Large Letters MS61 NGC. O-115, R.2. The reverse is cracked with die defects between the upper left wing and the left end of the scroll. This low-level Mint State half dollar has delicate champagne toning over its brilliant silver surfaces. PCGS# 6151
- 3802** 1829 Small Letters AU58 PCGS. CAC. O-112, R.1. This satiny near-Mint specimen has champagne toning on both sides, with lovely blue and iridescent peripheral toning. Trivial marks are noted on the lustrous silver surfaces. NGC ID# 24FS, PCGS# 6154

**1830 Half Dollar, MS64
O-122, Large 0**

- 3803** 1830 Large 0 MS64 PCGS. O-122, R.1. Light almond-gold patina visits this lustrous near-Gem. The fields appear pristine and the cheek and neck display minor marks. The strike is crisp except on the right-side stars. Overton relegates the four Large 0 varieties, O-120 through O-123, to the end of the 1830 listings. Population: 24 in 64, 7 finer (12/13). PCGS# 6157
- 3804** 1831 MS62 PCGS. O-109, R.1. Caramel-gold toning dominates this coruscating representative, though the left obverse field has a hint of ocean-blue patina. Marks are confined to faint contact on the cheek and the reverse field above the beak.
Ex: Long Beach Signature (Heritage, 10/2001), lot 6607. NGC ID# 24FV, PCGS# 6159

**1833 O-108 Half Dollar, MS64
Refreshingly Unabraded**

- 3805** 1833 MS64 NGC. CAC. O-108, R.1. Dusky caramel-brown fields accompany dove-gray devices and navy-blue borders. This coruscating near-Gem is remarkable free from contact and has an exceptionally consistent strike. The second-lowest horizontal shield line extends into the right (facing) wing, indicative of Overton-108. NGC ID# 24FX, PCGS# 6163
- 3806** 1834 Small Date, Small Letters MS62 PCGS. O-114, R.1. The obverse of this often-encountered variety has stars 3 and 4 recut, and the blundered reverse has a misplaced E on the scroll in the space between the properly placed E and the P in PLURIBUS. This brilliant Mint State piece has untuned silver surfaces with frosty luster and minuscule marks. PCGS# 6166

REEDED EDGE HALF DOLLARS

- 3807** 1836 Reeded Edge — Rims Filed, Cleaned — ANACS. XF40 Details. GR-1, R.2. The encapsulation may obscure portions of the rim filing but it is evident on the obverse between 7 and 8 o'clock. Mildly glossy from a wipe, and retuned in swaths of sea-green, stone-gray, and almond-gold.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2U28, PCGS# 6175

1838 GR-3 Half Dollar, MS64

- 3808** 1838 MS64 NGC. GR-3, R.2. Rich stone-gray toning embraces this satiny and well-preserved near-Gem. The right-side stars are lightly brought up but the major devices are sharp. GR-3 is identified by a lengthy reverse die crack that extends from 7 o'clock across the eagle to the right wingtip. Census: 69 in 64, 24 finer (1/14). NGC ID# 24G5, PCGS# 6177
- 3809** 1839-O XF40 PCGS. GR-1, R.1. The terminal die state with heavy cracks on both sides, especially the reverse. The repunching on the mintmark is no longer visible. The stone-gray surfaces display glimpses of luster. The sole consequential mark is a faded line beneath the first S in STATES. NGC ID# 24G7, PCGS# 6181

- 3810** 1839-O XF45 NGC. GR-1, R.1. A relatively late die state but earlier than the preceding lot, since the repunching is clear beneath the mintmark. Pockets of luster illuminate design elements of this unblemished and mildly subdued stone-gray New Orleans type coin. NGC ID# 24G7, PCGS# 6181

SEATED HALF DOLLARS

1839 Drapery Half Dollar, Toned MS64 First Year of Issue

- 3811** 1839 Drapery MS64 NGC. Strong luster issues through the layer of medium-intensity patination that consists of gunmetal-blue and reddish-gold coloration. The minimally marked surfaces exhibit sharply defined design elements. 1839 was the first year of the Seated Half design, and drapery was added beneath the elbow after about half of the mintage had been struck. Census: 16 in 64 (1 in 64+), 4 finer (1/14). NGC ID# 24GL, PCGS# 6232

1842-O Half Dollar, XF40 Small Date, Small Letters

- 3812** 1842-O Small Date, Small Letters XF40 NGC. This is the rarest subtype of the 1842 half dollars, an elusive variety in all grades. This lovely XF specimen combines golden-brown and gray surfaces with a splash of lighter gray and other splashes of darker toning that approaches an ebony appearance. A pleasing example of the rarity with minimal handling marks. Census: 5 in 40, 14 finer (12/13). NGC ID# 24GV, PCGS# 6238
- 3813** 1842 Medium Date, Large Letters AU58 NGC. Just a touch of rub visits the high points, themselves a trifle softly struck. Generous luster, liquid pearl-gray with hints of gold, lights up the fields. A line of reed marks is noted between stars 12 and 13 on the obverse. NGC ID# 27ST, PCGS# 6239
- 3814** 1844 MS62 PCGS. The well-detailed design elements of this attractive half dollar show a touch of flatness on some of the stars and the lightly marked surfaces display vivid highlights of gray, gold, blue, and amber toning. Population: 9 in 62, 29 finer (12/13). NGC ID# 24GZ, PCGS# 6245

1845 Half Dollar, MS63 Reflective Fields

- 3815** 1845 MS63 PCGS. The surface is slightly raised at the date, called an unfinished die in the Wiley-Bugert reference. Mostly brilliant with mildly reflective, striated fields and a generally sharp strike that wanes over the right obverse stars and the eagle's left talons. A very scarce early P-mint in Mint State. Population: 3 in 63, 5 finer (12/13). NGC ID# 24H3, PCGS# 6248

1846-O Medium Date Half, MS62 Ex: Eliasberg, WB-102

- 3816** 1846-O Medium Date MS62 NGC. WB-102, Die Pair 2. Ex: Eliasberg. The knob of the 6 is repunched. Beistle considered it an 1846/5-O overdate but no modern researcher agrees. This well struck half dollar is richly toned lilac-red, plum-mauve, orange-gold, and sea-green. The fields display a few tiny abrasions. A "No Drapery" variety due to mint die polishing. Census: 7 in 62, 5 finer (12/13). Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1938; Orlando FUN Signature (Heritage, 1/2010), lot 3469. NGC ID# 27SW, PCGS# 6255
- 3817** 1853 Arrows and Rays AU58 NGC. Crisply detailed with only minor rub on still-lustrous pearl-gray surfaces with tinges of gold. Light clash marks (as made) appear in the fields on each side. From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24JJ, PCGS# 6275
- 3818** 1855-O Arrows MS64 NGC. CAC. Greens and golds drape much of each side with plum hues prominent at parts of the margins. A well-defined example of the last New Orleans With Arrows half dollar issue. Census: 38 in 64 (2 in 64+, 1 in 64 ★, 1 in 64+★), 24 finer (12/13). NGC ID# 24JP, PCGS# 6283
- 3819** 1856-S XF40 NGC. This third-year San Francisco half dollar remains faintly luminous with a mix of gray hues and a faint golden overtone. A shallow scrape is noted to the right of the date. Census: 3 in 40, 18 finer (1/14). NGC ID# 24HR, PCGS# 6289
- 3820** 1858 MS63 PCGS. Whispers of electric-blue and gold-orange patina gravitate to the margins of this Select half. Sharply struck throughout, and showing just a few minute grade-determining marks. Population: 34 in 63, 76 finer (12/13). NGC ID# 24HV, PCGS# 6293
- 3821** 1858 MS64 NGC. Deep cobalt-blue, orange, and lavender patination occupies the borders of this lustrous near-Gem. The design features are sharply struck throughout. Census: 32 in 64 (1 in 64 ★), 16 finer (12/13). NGC ID# 24HV, PCGS# 6293

3822 1858-S AU55 NGC. VP-001, WB-103. The blundered obverse die has a misplaced 8 in the rock above the second 8 in the date. This popular variety is quite scarce in higher grades. The present Choice AU example has light gold toning over lustrous silver surfaces. NGC ID# 24HX, PCGS# 6295

3823 1859-O MS63 NGC. Pale silver overall with gold-to-rose peripheral elements. As a Select example of an antebellum O-mint half dollar issue, this coin is a real prize. Census: 6 in 63, 27 finer (12/13). NGC ID# 24HZ, PCGS# 6297

3824 Three-Coin 1861-O Die Progression Set NGC. All three coins are housed in a single large-size NGC holder, and are presumably ex: S.S. *Republic*, though undesignated as such on the NGC insert. The coins are ungraded and display varying degrees of granularity from exposure to seawater. **Coin #1, Wiley-5**, was struck by the State of Louisiana per Wiley, **Coin #2, Wiley-11**, was struck by the C.S.A., and **Coin #3, Wiley-11, FS-401**, was struck by the C.S.A. (Total: 3 coins) NGC ID# 24J8, PCGS# 6303

3825 1862-S AU58 NGC. WB-101. Type One Reverse. Large S. Soft ice-blue and orange patina runs over both sides of this near-Mint half dollar. The design elements are well-struck and each side retains considerable luster. Minute carbon flecks are visible, especially on the reverse. Census: 11 in 58, 21 finer (12/13). NGC ID# 24JA, PCGS# 6308

3826 1863 MS63 PCGS. Both sides of this Civil War era half are awash with bright luster and each exhibits razor-sharp design details. A few scattered, insignificant marks account for the grade. Population: 18 in 63, 33 finer (12/13). NGC ID# 24JB, PCGS# 6309

3827 1866-S No Motto VF30 ANACS. Natural gray and amber toning appears on both sides with splashes of brown and hints of light blue. The reverse has a small rim bruise at 8 o'clock, with a few other trivial marks.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24JH, PCGS# 6315

1866-S Motto Half, MS64 Important Condition Rarity

3828 1866-S Motto MS64 PCGS. A few delicate cracks and faint clash marks are the only die markers on this near-Gem Seated Liberty half dollar. The mintage of this issue was nearly 1 million coins. However, nearly all of those coins entered circulation due to a shortage of small change in the post-Civil War economy. The average grade of survivors is XF45. This impressive example is far above average, with brilliant and untuned silver surfaces showing only a few scattered marks on each side. Peripheral weakness is typical of this issue. Population: 6 in 64, 2 finer (12/13). PCGS# 6320

1871 Half Dollar, Sharply Struck MS65

3829 1871 MS65 PCGS. While a common date overall, the 1871 half dollar is a great find in MS65. Untoned lustrous surfaces exhibit uniformly sharp design elements. A few minute grade-consistent marks do not detract. PCGS and NGC have seen only 12 Gems and six specimens finer. Population: 5 in 65, 3 finer (12/13). NGC ID# 24K4, PCGS# 6330

1873-CC Arrows Half Dollar, Patinated XF45

3830 1873-CC Arrows XF45 PCGS. CAC. WB-102. Attributed by the shaft of the right arrowhead pointing below the center of the 3 in the date, a horizontal die line under Liberty's chin, small CC with close spacing, and a die crack through center of ED in UNITED. Medium gray patination covers this well-struck Choice XF specimen. Population: 22 in 45, 55 finer (12/13). NGC ID# 24L8, PCGS# 6344

3831 1874 Arrows MS63 NGC. CAC. Hints of champagne toning grace the surfaces of this lustrous Select Mint State piece, with rich gold and blue peripheral toning. The strike is bold with strong head and feather details. NGC ID# 24LA, PCGS# 6346

3832 1875 MS64 PCGS. Sharply detailed on the obverse, this attractive MS64 specimen shows a touch of softness on the motto and eagle's claw. The lustrous brilliant centers yield to shades of sea-green and cerulean-blue at the peripheries. Population: 40 in 64, 18 finer (12/13). NGC ID# 24KD, PCGS# 6349

3833 1876 MS64 PCGS. Soft golden-gray patina adhere to this well-struck near-gem half dollar. The reverse luster is somewhat stronger than that on the obverse. Population: 53 in 64, 24 finer (12/13). NGC ID# 24KG, PCGS# 6352

**1876-CC Half Dollar, MS64
Old Green Label Holder**

- 3834 1876-CC MS64 PCGS. CAC. WB-102, Die Pair WB-14.** Medium CC. Both Cs in the mintmark are repunched. Generally untoned, although light golden patina approaches the rims. A magnificent near-Gem Carson City type coin that boasts sweeping luster and a precise strike. The devices display faint mint-made roller marks, but actual abrasions are surprisingly minimal. Housed in an old green label holder. Population: 14 in 64, 18 finer (12/13).
Ex: Silbermünzen Collection (Heritage, 5/2008), lot 707, which realized \$5,462.50. NGC ID# 24KH, PCGS# 6353

**1877-CC Half Dollar, MS65
WB-12, Repunched Date**

- 3835 1877-CC MS65 PCGS. WB-104, Die Pair WB-12.** Type Two Reverse. Medium CC. The base of the 77 is repunched. The centers are close to brilliant but the borders display blushes of apricot-gold, apple-green, and lilac toning. Well struck aside from Liberty's forehead curls. Lustrous and beautifully preserved with potent luster. The reverse die is clashed, while the obverse is without clash marks. Population: 17 in 65, 4 finer (12/13). NGC ID# 24KL, PCGS# 6356
- 3836 1879 MS64 PCGS.** Type Two Reverse. Medium tan-gold toning embraces this well struck and coruscating near-Gem. The borders display narrow bands of ocean-blue and lavender. A single hair-thin mark on the right obverse field. Just 4,800 pieces were issued. NGC ID# 24KS, PCGS# 6361

PROOF SEATED HALF DOLLARS

- 3837 1858 PR62 PCGS. CAC.** *Ex: Teich Family Collection.* A mildly contrasted example from the first year of wide distribution for proofs. Silver surfaces with gold at the margins show a number of contact marks. Population: 9 in 62, 50 finer (12/13).
From The Teich Family Collection. NGC ID# 27TH, PCGS# 6412
- 3838 1858 PR63 PCGS.** This Select specimen from the first year of commercial proof offerings is patinated in vivid shades of slate-gray and cobalt-blue, with reflective fields under the toning. The design elements are sharply detailed throughout. Population: 22 in 63, 28 finer (12/13). NGC ID# 27TH, PCGS# 6412
- 3839 1860 PR62 PCGS.** *Ex: Teich Family Collection.* Light gold and blue toning drapes watery luster. Shallow contact marks and hairlines have accumulated in the fields.
From The Teich Family Collection. NGC ID# 27TK, PCGS# 6414

**1862 Half Dollar, PR64
Sharp Details, Minimally Toned**

- 3840 1862 PR64 PCGS. CAC.** A bit of almond-gold rim toning surrounds deep-silver mirrors and lightly frosted devices of this popular-date half dollar. Just 550 proofs were produced for collectors, and not all of the proofs have survived. A full strike is evident on Liberty, where the head detail is excellent and the folds of the gown are crisp and sharp. Virtually every feather on the eagle is well-defined and the shield lines are highly detailed. Population: 48 in 64 (1 in 64+), 21 finer (12/13).
From The Teich Family Collection. NGC ID# 27TN, PCGS# 6416

- 3841 1863 PR63 PCGS.** Untoned, deeply mirrored fields surround the sharply struck devices of this Select proof half dollar. Just 460 proofs were made for the year. A few delicate hairlines define the grade of this appealing, brilliant proof. NGC ID# 27TP, PCGS# 6417
- 3842 1863 PR63 Cameo PCGS.** One of only 460 proofs issued, the present Select specimen has a sharp strike except on the eagle's left (facing) ankle. Peripheral autumn-brown shades frame brilliant centers. Both sides show hairlines, most prominently on the left field.
Ex: Empire Collection (Stack's, 11/1957), lot 1427.
From The Teich Family Collection. PCGS# 86417
- 3843 1864 PR63 Cameo PCGS.** Golden patina is principally relegated to the borders. Ice-white motifs provide blatant contrast with moderately hairlined fields. A sharply struck proof.
Ex: MacMurray Collection (Stack's, 2/1958), lot 1521.
From The Teich Family Collection. PCGS# 86418
- 3844 1865 PR63+ Cameo PCGS. CAC.** *Ex: Teich Family Collection.* The last collectible proof issue of the No Motto design, this Select Cameo proof has excellent contrast with brilliant, mostly untuned silver surfaces.
From The Teich Family Collection. PCGS# 86419
- 3845 1866 Motto PR64 PCGS. CAC.** The obverse is clearly contrasted with largely peripheral toning, though on the reverse the blue and violet hues give all-over coverage. A pleasing near-Gem proof. Population: 32 in 64, 16 finer (12/13). NGC ID# 27TZ, PCGS# 6424
- 3846 1867 PR62 PCGS. CAC.** *Ex: Teich Family Collection.* Faintly gray-toned overall with significant gold-orange elements at the top and bottom obverse. Significant hairlines cross the fields.
From The Teich Family Collection. NGC ID# 27U2, PCGS# 6425
- 3847 1868 PR64 PCGS. CAC.** White devices compare favorably with the reflective fields. Faint plum-red toning is limited to the borders. Minor incompleteness of strike on the left (facing) claw. A few hairlines correspond to the grade.
Ex: Anderson Dupont, Part II (Stack's, 11/1954), lot 2183; Public Auction (Stack's, 5/1957), lot 677.
From The Teich Family Collection. NGC ID# 27U3, PCGS# 6426
- 3848 1869 PR62 PCGS.** *Ex: Teich Family Collection.* This brilliant proof half dollar exhibits moderate grade-limiting hairlines on each side, with pleasing peripheral blue and iridescent toning.
From The Teich Family Collection. NGC ID# 27U4, PCGS# 6427

- 3849 1870 PR64 PCGS.** Dramatic ocean-blue, plum-red, and peach-gold toning consumes this well struck Choice proof. Examination beneath a lens reveals delicate field hairlines.
Ex: Samuel W. Wolfson Collection, Part II (Stack's, 5/1963), lot 1201.
From The Teich Family Collection. NGC ID# 27U5, PCGS# 6428
- 3850 1871 PR63 PCGS.** *Ex:* Teich Family Collection. A splendid proof with fully mirrored fields and bold design motifs, showing a hint of field-to-device contrast. Delicate gold toning is mostly evident on the reverse. Population: 41 in 63, 49 finer (12/13).
From The Teich Family Collection. NGC ID# 27U6, PCGS# 6429
- 3851 1871 PR63 Cameo PCGS.** Mirrored fields offset the well-struck motifs at various angles. Some faint hairlines barely prevent a finer numerical grade. Population: 4 in 63 Cameo, 12 finer (12/13). PCGS# 86429
- 3852 1872 PR63 PCGS.** *Ex:* Teich Family Collection. Autumn-gold, navy-blue, and hints of violet encompass this needle-sharp and moderately hairlined proof representative.
Ex: Samuel W. Wolfson Collection, Part II (Stack's, 5/1963), lot 1206.
From The Teich Family Collection. NGC ID# 27U7, PCGS# 6430
- 3853 1872 PR63 PCGS. CAC.** *Ex:* Teich Family Collection. The obverse has a hint of golden color that grows more obvious on the reverse. A small dig is noted off Liberty's left shoulder. Population: 40 in 63, 56 finer (12/13).
From The Teich Family Collection. NGC ID# 27U7, PCGS# 6430
- 3854 1873 No Arrows PR62 PCGS.** *Ex:* Teich Family Collection. Largely pale silver-blue with an arc of gold-orange above Liberty's head. Crisply detailed devices have significant hairlines around.
From The Teich Family Collection. NGC ID# 27U8, PCGS# 6431
- 3855 1876 PR63 PCGS. FS-401.** Type One Reverse. The top of a letter punch, perhaps a "C" or "S", is visible on the base of Liberty's throat. A majority of proofs of this date are FS-401, but the variety is nonetheless of interest. Well struck and flashy with rich ocean-blue, almond-gold, and rose-red patina. NGC ID# 27UA, PCGS# 6437

**1876 Seated Liberty Half, PR64 Cameo
Popular Centennial Issue**

- 3856 1876 PR64 Cameo PCGS.** The sharply detailed design elements of this impressive Choice specimen display a rich coat of mint frost that creates intense cameo contrast with the deeply mirrored fields. The pleasing surfaces show a few minor hairlines and some hints of golden-brown toning. Population: 16 in 64 (2 in 64+) Cameo, 12 finer (12/13). PCGS# 86437

1877 Seated Half, Vividly Toned PR65

- 3857 1877 PR65 PCGS.** Only 510 proofs were struck for the 1877 Seated half. Electric-blue, plum-mauve, and almond-gold shades emerge when this well-impressed and moderately prooflike half dollar is rotated beneath a light. No distractions are evident beneath the blanket of patina. Population: 8 in 65, 3 finer (12/13). NGC ID# 27UC, PCGS# 6438
- 3858 1877 PR62 Cameo PCGS.** *Ex:* Teich Family Collection. The usual Closed Bud reverse, this lovely proof has a few faint lines that prevent a higher grade, but it exhibits excellent eye appeal. Mostly brilliant silver surfaces offer a trace of gold toning. Population: 4 in 62 Cameo, 23 finer (12/13).
From The Teich Family Collection. PCGS# 86438
- 3859 1878 PR63 PCGS. CAC.** *Ex:* Teich Family Collection. This brilliant and untuned Select proof is a borderline Cameo proof, although the field-to-device contrast just misses the requirements for that designation.
From The Teich Family Collection. NGC ID# 27UD, PCGS# 6439
- 3860 1879 PR64 PCGS.** Variegated shades of greenish-gold and cerulean-blue toning blanket the deeply reflective surfaces of this attractive Choice specimen from a generous proof mintage of 1,100 pieces. Population: 92 in 64, 41 finer (12/13). NGC ID# 27UE, PCGS# 6440

**1879 Half Dollar, PR66
Borderline Cameo Contrast**

- 3861 1879 PR66 NGC.** Some field-motif contrast is apparent on this Premium Gem proof half dollar, especially on the reverse. Razor-sharp definition shows on the design elements, and faint traces of golden cling to the margins. The low mintage of circulation strikes (4,800 pieces) places a great deal of date pressure on the proofs. Census: 18 in 66, 10 finer (12/13). NGC ID# 27UE, PCGS# 6440
- 3862 1880 PR64+ Cameo PCGS. CAC.** *Ex:* Teich Family Collection. This high-end Choice example is sharply detailed except for a touch of softness on the eagle's claw. The deeply mirrored fields are enhanced by hints of pale gold toning and show noticeable contrast with the frosty devices. Population: 26 in 64 (2 in 64+) Cameo, 45 finer (12/13).
From The Teich Family Collection. PCGS# 86441

3863 1881 PR63 PCGS. Ex: Teich Family Collection. Both sides of this Select proof are richly patinated, with grayish-gold and blue-steel toning over mirrored fields. Light cameo contrast is evident.
From The Teich Family Collection. NGC ID# 27UG, PCGS# 6442

3864 1882 PR64 PCGS. Ex: Teich Family Collection. The design elements of this attractive Choice specimen are sharply detailed and the reflective surfaces show a few hints of pale gold toning. Population: 90 in 64 (2 in 64+), 50 finer (12/13).
From The Teich Family Collection. NGC ID# 27UH, PCGS# 6443

3865 1883 PR64 Cameo PCGS. CAC. Ex: Teich Family Collection. The sharply defined frosty design elements seem to float on the liquid reflective surfaces of this impressive Choice proof. The lightly marked surfaces show patches of greenish-gold and amber patina. Population: 32 in 64 Cameo, 28 finer (12/13).
From The Teich Family Collection. PCGS# 86444

3866 1884 PR63 PCGS. Ex: Teich Family Collection. The design elements of this impressive Select example are sharply defined in most areas, but a touch of softness is evident on the eagle's claw. The deeply reflective surfaces show a few hints of greenish-gold toning.
From The Teich Family Collection. NGC ID# 27UK, PCGS# 6445

**1884 Seated Liberty Half, PR65
Rich Variegated Toning**

3867 1884 PR65 NGC. Under a strong light the deep patina resolves into pale lavender, lilac, and golden hues on each side of this lovely and sharply struck Gem proof 1884 half dollar. The proof emission of 875 coins complements the meager circulation-strike mintage of 4,400 pieces, the lowest of the 1880s. Census: 32 in 65, 19 finer (12/13). NGC ID# 27UK, PCGS# 6445

3868 1885 PR62 ANACS. The luminous and essentially untoned surfaces display razor-sharp design elements, along with moderate field-motif contrast. A few minuscule ticks in the field right of star 5 preclude a finer numerical grade. Nevertheless, this piece has great eye appeal for the grade designation NGC ID# 27UL, PCGS# 6446

3869 1885 PR63 PCGS. Ex: Teich Family Collection. Faint hairlines prevent a higher grade. this Select proof has delicate gold toning on the obverse and considerable magenta on the reverse.
From The Teich Family Collection. NGC ID# 27UL, PCGS# 6446

3870 1886 PR64 PCGS. Ex: Teich Family Collection. This Choice proof is an attractively toned example, with mirrored fields and lustrous devices beneath gold and iridescent patina.
From The Teich Family Collection. NGC ID# 27UM, PCGS# 6447

3871 1887 PR62 PCGS. Ocean-blue and almond-gold toning graces this nicely struck and flashy specimen. Minor hairlines on the right obverse field determine the grade. A low mintage date with 710 proofs and 5,000 business strikes. Housed in a green label holder. NGC ID# 27UN, PCGS# 6448

3872 1887 PR62 PCGS. CAC. Ex: Teich Family Collection. The well-detailed design elements of this attractive proof show a touch of softness on the stars. The reflective fields show a number of minor hairlines and contact marks, with shades of greenish-gold and lavender toning at the peripheries.
From The Teich Family Collection. NGC ID# 27UN, PCGS# 6448

**1887 Seated Half, PR65
Only 710 Pieces Struck**

3873 1887 PR65 PCGS. Delightful patina on this Gem captures the viewer's gaze. Both sides are nicely mirrored with lustrous devices, under ivory, gold, and iridescent toning. In the late 19th century, collectors preferred proof coins for their collections, while the few circulation strikes of the 1880s mostly escaped into commerce. Mintages were low as the Mint tried to keep up with silver dollar production required by law. Today, collectors relish the chance to acquire the proof half dollars of the decade, perhaps the only opportunity to add a particular date to an advanced cabinet. Population: 25 in 65, 10 finer (12/13). NGC ID# 27UN, PCGS# 6448

3874 1887 PR63 Cameo PCGS. CAC. Ex: Teich Family Collection. Blue-violet peripheral toning yields to silver centers. Impressively frosted central devices supply quality contrast. Lightly hairlined. Population: 9 in 63 Cameo, 34 finer (12/13).
From The Teich Family Collection. PCGS# 86448

3875 1888 PR63 PCGS. Ex: Teich Family Collection. Bright surfaces overall with just a bit of light reddish patina and a smudge of cobalt-blue in the right obverse field. The 1888 continues the low-mintage tradition shared by all dates from the 1880s, in this case with only 832 proofs produced.
From The Teich Family Collection. NGC ID# 27UP, PCGS# 6449

3876 1889 PR62 PCGS. Ex: Teich Family Collection. This impressive PR62 Seated half dollar exhibits sharply rendered design elements and hazily reflective fields with a few hints of pale gold toning.
From The Teich Family Collection. NGC ID# 27UR, PCGS# 6450

3877 1891 PR63 PCGS. Ex: Teich Family Collection. A nicely defined Select proof representing the last year of the Seated design, this piece is brilliant and mostly untuned with a hint of peripheral lilac. Faint cameo contrast is evident.
From The Teich Family Collection. NGC ID# 27UT, PCGS# 6452

BARBER HALF DOLLARS

- 3878 1892-O AU55 PCGS. CAC.** Olive-green toning drapes this briefly circulated New Orleans half dollar. The strike shows blending near the fletchings and right shield corner. Marks are essentially absent aside from a vertical line on Liberty's neck. Certified in an old green label holder. NGC ID# 24LG, PCGS# 6462
- 3879 1892-S AU58 PCGS. CAC.** Soft electric-blue toning is joined by reddish-gold on the obverse. Ample luster resides on the sharply struck, minimally marked surfaces. NGC ID# 24LJ, PCGS# 6464

1892-S Barber Half Dollar, MS64 First-Year Branch Mint Issue

- 3880 1892-S MS64 PCGS. CAC.** The Barber design made its debut in 1892 and the San Francisco Mint struck a respectable mintage of just over 1 million half dollars that year. This attractive Choice example exhibits sharply detailed design elements and lustrous surfaces, under shades of golden-brown and lavender-gray patina. Population: 33 in 64 (1 in 64+), 16 finer (12/13). NGC ID# 24LJ, PCGS# 6464
- 3881 1893-S AU55 PCGS.** Light gray, lavender, and cobalt-blue patina resides on both sides of this Choice AU, each of which displays luster in the recessed areas. This is a well-struck minimally marked piece. Population: 16 in 55, 69 finer (12/13). NGC ID# 24LM, PCGS# 6467

1895 Barber Half Dollar, MS65 Very Rare in Finer Grades

- 3882 1895 MS65 PCGS.** From a nominal mintage of 1.8 million pieces, the 1895 Barber half dollar is quite elusive in high grade. This pleasing MS65 example offers sharply detailed design elements and lustrous surfaces under shades of lavender-gray and sea-green toning. Population: 24 in 65 (1 in 65+), 7 finer (12/13). NGC ID# 24LS, PCGS# 6471
- 3883 1896 MS64 PCGS.** A frosty Choice Mint State specimen, this 1896 Barber half dollar has brilliant luster with hints of champagne toning on each side. The design elements are well-impressed. Population: 28 in 64, 18 finer (12/13). NGC ID# 24LV, PCGS# 6474
- 3884 1896-S AU55 NGC.** Sky-blue and gold-orange patination resides on both sides of this Choice AU half, each of which displays considerable luster. The only softness in the otherwise well-struck devices occurs on the upper-right shield corner. NGC ID# 24LX, PCGS# 6476

- 3885 1899 AU58 PCGS. CAC.** This lightly toned near-Mint half dollar has impressive cartwheel luster and shows no obvious indication of high point friction. Marks are minimal and the eye appeal is superior for the conservatively assessed grade. NGC ID# 24M6, PCGS# 6483

1899 Barber Half Dollar, MS65 Popular Turn-of-the-Century Issue

- 3886 1899 MS65 PCGS. CAC.** The 1899 Barber half dollar is a popular issue because of its turn-of-the-century date. This delightful Gem exhibits pinpoint definition on all design elements and the well-preserved lustrous surfaces are blanketed in shades of pale gold and lavender-gray toning. Population: 21 in 65 (1 in 65+), 11 finer (12/13). NGC ID# 24M6, PCGS# 6483
- 3887 1909 MS64 PCGS.** Delicate gold and peach overtones enrich the otherwise medium-gray surfaces of this near-Gem. Shallow reed marks to the right of Liberty's lips contribute to the grade but both sides are remarkably clean otherwise. NGC ID# 24N8, PCGS# 6516
- 3888 1912-D MS64 NGC.** Appreciable gold overtones grace each side, most visibly at the obverse margins. A handful of shallow marks on Liberty's portrait account for the grade, but the eye appeal is high. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24NH, PCGS# 6525
- 3889 1912-D MS64 PCGS. CAC.** Gold-orange and crimson outer toning fades almost to medium-gray at the innermost elements. A satiny beauty from an issue of just over 2.3 million pieces. NGC ID# 24NH, PCGS# 6525

1912-D Barber Half, MS65 Outstanding Mintmark Type Coin

- 3890 1912-D MS65 PCGS. CAC.** From a mintage of 2.3 million pieces, the 1912-D Barber half dollar is relatively available in high grade and a popular choice of mintmark type collectors. This attractive Gem is well-detailed and lustrous under shades of golden-brown and lavender-gray toning. Population: 55 in 65, 14 finer (12/13). NGC ID# 24NH, PCGS# 6525
- 3891 1915-D MS64 PCGS. CAC.** The fields display noticeable brightness and the surfaces overall have a satiny texture. The strike details are soft in the usual places, but each side is remarkably free from the abrasions that usually are seen. NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLARS

1892 Half Dollar, PR65 Cameo White-On-Black Appearance

3892 1892 PR65 Cameo NGC. The deeply mirrored fields of this Gem half dollar highlight the satiny motifs, giving the coin a black-on-white appearance when the piece is viewed from directly above. A solid strike characterizes the design elements except for the usually seen softness in the upper-right corner of the shield. Both sides are color-free. Census: 28 in 65 Cameo (1 in 65+ Cameo), 44 finer (1/14). PCGS# 86539

3893 1893 PR63 PCGS. Ex: Teich Family Collection. Both sides have fully mirrored fields that frame the satin devices, creating light contrast beneath the delicate grayish-gold toning. From *The Teich Family Collection*. NGC ID# 24NV, PCGS# 6540

3894 1894 PR64 PCGS. CAC. Ex: Teich Family Collection. The fields on this almost completely brilliant near-Gem are remarkably deep, and the devices almost show enough frost to merit a Cameo designation. While not rare in the absolute sense, the 1894 is always popular as an early date representative from the Barber series. From *The Teich Family Collection*. NGC ID# 24NW, PCGS# 6541

3895 1895 PR63 PCGS. Ex: Teich Family Collection. Toning is rich on each side in soothing gold, blue, and green hues. Hairlines on the portrait are visible at certain angles to the light. From *The Teich Family Collection*. NGC ID# 24NX, PCGS# 6542

3896 1895 PR63 NGC. The borders display light rose-red while the fields and devices exhibit straw-gold shades. A fully struck proof representative with only incidental contact on the portrait and eagle. NGC ID# 24NX, PCGS# 6542

3897 1895 PR64 Cameo PCGS. Ex: Teich Family Collection. Pinpoint definition is present on all design elements and the frosty texture of the devices contrasts boldly with the deeply reflective fields. Accents of greenish-gold toning enhance the lightly marked surfaces. Population: 12 in 64 Cameo, 25 finer (12/13). From *The Teich Family Collection*. PCGS# 86542

3898 1898 PR63 Cameo PCGS. Ex: Teich Family Collection. Razor-sharp definition is apparent on all design elements of this attractive Select specimen and the frosty devices contrast boldly with the deeply mirrored fields. Population: 17 in 63 Cameo, 57 finer (12/13). From *The Teich Family Collection*. PCGS# 86545

3899 1900 PR64 PCGS. CAC. Ex: Teich Family Collection. This lovely Choice proof has a hint of cameo contrast with delicate champagne toning over the mirrored surfaces. From *The Teich Family Collection*. NGC ID# 24P4, PCGS# 6547

3900 1902 PR64 PCGS. Ex: Teich Family Collection. The portrait is brilliant though the fields are golden-brown, ocean-blue, and plum-red. The strike shows moderate blending near the right shield corner. The reverse is die doubled, evident on the branch stem and nearby leaves. Ex: *Samuel W. Wolfson Collection, Part II* (Stack's, 5/1963), lot 1275. From *The Teich Family Collection*. NGC ID# 24P6, PCGS# 6549

3901 1903 PR63 PCGS. Magnificent sea-green, orange-gold, ruby-red, and navy-blue toning endows this nicely struck proof Barber type coin. The portrait exhibits hairlines. Ex: *Philip G. Straus Collection* (Stack's, 5/1959), lot 2015. From *The Teich Family Collection*. NGC ID# 24P7, PCGS# 6550

3902 1905 PR63 PCGS. A well struck and flashy specimen. The portrait displays few slide marks and the cloudy fields exhibit chestnut-gold and powder-blue shades. Just 727 proofs were issued. Ex: *Empire Collection* (Stack's, 11/1957), lot 1525. From *The Teich Family Collection*. NGC ID# 24P9, PCGS# 6552

1905 Barber Half, Richly Toned PR65

3903 1905 PR65 NGC. The 1905 proof is considerably more popular than most Barber half proofs because of the relatively low number of business strikes minted in Philadelphia that year. As is often the case, many collectors purchase a proof to fill that hole in their set instead of springing for a high-grade business strike. A spectacularly toned Gem, this coin features brilliant surfaces with rich shades of gold, cerulean-blue, plum, red-brown, and teal. The strike is razor sharp. Census: 37 in 65, 42 finer (12/13). NGC ID# 24P9, PCGS# 6552

3904 1906 PR63 PCGS. CAC. Ex: Teich Family Collection. Sharply detailed throughout, with unusually frosty devices, the field-device contrast falls just short of a Cameo designation on this impressive Select specimen. A few hints of greenish-gold toning add to the outstanding eye appeal. From *The Teich Family Collection*. NGC ID# 24PA, PCGS# 6553

3905 1907 PR64 PCGS. Ex: Teich Family Collection. This splendid Choice proof has dusky gray and iridescent toning over its mirrored fields. Light contrast is evident, although insufficient for a Cameo designation. From *The Teich Family Collection*. NGC ID# 24PB, PCGS# 6554

3906 1908 PR64+ PCGS. CAC. Ex: Teich Family Collection. Very close to a Gem rating, as one might expect from the Plus grade and CAC endorsement. The fields are brightly reflective and overall the surfaces show no obvious flaws. Pale golden color in the centers deepens to a thin ring of russet around the denticles. Population: 34 in 64 (2 in 64+), 52 finer (12/13). From *The Teich Family Collection*. NGC ID# 24PC, PCGS# 6555

3907 1909 PR64 NGC. Ex: Teich Family Collection. A caramel-gold near-Gem whose bold strike and smooth mirrored fields attest to both the quality and originality. A proof mintage of 650 pieces. Ex: *Frank H. Chase Collection* (Stack's, 12/1958), lot 381. From *The Teich Family Collection*. NGC ID# 24PD, PCGS# 6556

3908 1909 PR64 PCGS. Ex: Teich Family Collection. This nicely struck near-Gem would likely command a Cameo designation were it not for the pastel ice-blue and sun-gold toning that drapes both sides. A loupe locates distributed tiny flecks. Ex: *Empire Collection* (Stack's, 11/1957), lot 1540. From *The Teich Family Collection*. NGC ID# 24PD, PCGS# 6556

- 3909 1911 PR64 PCGS.** Ex: Teich Family Collection. A pleasing Choice proof Barber half dollar, this 1911 exhibits subtle gray-gold toning over fully mirrored fields with a hint of cameo contrast. *From The Teich Family Collection.* NGC ID# 24PF, PCGS# 6558
- 3910 1912 PR64 PCGS.** Ex: Teich Family Collection. Milk-gray surfaces transition into caramel-gold and lime-green shades when rotated beneath a light. A well struck and unmarked Choice proof. A scant 700 proofs were issued. *Ex: Frank H. Chase Collection (Stack's, 12/1958), lot 384. From The Teich Family Collection.* NGC ID# 24PG, PCGS# 6559
- 3911 1913 PR64 PCGS.** Ex: Teich Family Collection. This important proof Barber half dollar enjoys strong demand as a result of the business strike rarity. The obverse of this Choice proof is mostly white with delicate peripheral gold, while the reverse is entirely light gold. *From The Teich Family Collection.* NGC ID# 24PH, PCGS# 6560
- 3912 1914 PR63 PCGS. CAC.** Ex: Teich Family Collection. From a tiny proof mintage of 380 pieces, this sharply detailed Select specimen displays deeply mirrored surfaces with a few minor contact marks and traces of greenish-gold toning. Population: 51 in 63, 92 finer (12/13). *From The Teich Family Collection.* NGC ID# 24PJ, PCGS# 6561

WALKING LIBERTY HALF DOLLARS

- 3913 1916 MS64+ PCGS.** Satiny gray through the inner obverse with deep orange-to-crimson hues embracing the margins of that side and the entirety of the reverse. A gorgeous, if softly struck first-year Walking Liberty half dollar. NGC ID# 24PL, PCGS# 6566
- 3914 1916 MS64 PCGS. CAC.** This Choice Mint State 1916 half dollar exhibits brilliant mint frost and full luster beneath attractive, dappled gold toning. The strike lacks full detail, but is excellent for this issue. NGC ID# 24PL, PCGS# 6566
- 3915 1916 MS65 PCGS. CAC.** A splendid Gem, this first-year Walking Liberty half dollar has frosty silver luster with splashes of dark gold toning on each side. PCGS has only certified 91 finer examples (12/13). NGC ID# 24PL, PCGS# 6566

1916 Walking Liberty Half, MS66 Highly Lustrous, Mostly Untoned

- 3916 1916 MS66 PCGS.** While a relatively obtainable early date, especially in lower grades, the 1916 will always have an edge with collectors as the first year of the Walking Liberty type. This is a softly frosted example that is mostly brilliant, but surrounded at the margins by light golden patina. The strike is a bit soft in the centers, as one would expect. NGC ID# 24PL, PCGS# 6566
- 3917 1916-S MS62 NGC.** The 1916-S has one of the lowest mintages of the type, and is difficult to acquire in Mint State. Lustrous untoned surfaces are well-struck. NGC ID# 24PN, PCGS# 6568

1916-S Half Dollar, A Better-Struck MS64

- 3918 1916-S MS64 PCGS. CAC.** The Walking Liberty half dollar made its debut in 1916, with the San Francisco Mint producing only 508,000 pieces. While not fully struck, this near-Gem exhibits a better strike than ordinarily seen. Lustrous surfaces yield a grainy texture and are nicely preserved. NGC ID# 24PN, PCGS# 6568
- 3919 1917-D Obverse MS63 NGC.** Whispers of reddish-orange and russet visit the lustrous surfaces of this well-defined Select D-mint half. Some minuscule marks are fewer than what might be expected for the designated grade. NGC ID# 24PR, PCGS# 6570
- 3920 1917-D Obverse MS64 PCGS.** Intense luster exudes from the essentially color-free surfaces of this near-Gem. A few minute marks determine the grade. NGC ID# 24PR, PCGS# 6570
- 3921 1917-D Reverse AU58 PCGS. CAC.** A brilliant early branch mint Walker that boasts pleasing luster and an unmarked appearance. Slight rub on the high points of the skirt and obverse branch stem confirm a momentary encounter with World War commerce. NGC ID# 24PS, PCGS# 6571
- 3922 1917-S Obverse AU58 NGC.** Chestnut-gold, aquamarine, and cream-gray embrace this lustrous semikey slider. The central skirt lines show a mere trace of wear. Smooth except for unobtrusive marks on the right obverse field. NGC ID# 24PT, PCGS# 6572

1917-S Half Dollar, MS64 Reverse Mintmark

- 3923 1917-S Reverse MS64 PCGS. CAC.** A fully lustrous Choice Mint State example of the Reverse Mintmark variety, showing a typical strike for an early Walking Liberty half dollar. Both sides have brilliant, frosty silver mint luster with wisps of champagne toning. PCGS has certified 55 finer examples (12/13). NGC ID# 24PU, PCGS# 6573
- 3924 1918 MS64 PCGS.** Hints of golden-gray, orange, and powder-blue coloration reside on the lustrous surfaces of this well-struck near-Gem. A few minute ticks preclude Gem status. NGC ID# 24PV, PCGS# 6574
- 3925 1918-D AU58 PCGS.** This attractive, better-date Walker shows nearly full luster and is free of all but the most trivial abrasions. Softness exists on the high points as expected for this date and grade. An untoned and brilliant near-Mint coin. NGC ID# 24PW, PCGS# 6575

3926 1918-D AU58 NGC. The 1918-D Walking Liberty half dollar is seldom encountered in high grade. This borderline Uncirculated specimen shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces retain much original mint luster. NGC ID# 24PW, PCGS# 6575

3927 1918-D AU58 PCGS. The slightest hints of gold toning appear on the brilliant silver surfaces of this attractive early Walker, with traces of wear on the high points. A thin hairline is evident in the right obverse field at selected light angles. NGC ID# 24PW, PCGS# 6575

1918-S Walking Liberty Half, MS64 Lightly Toned Lustrous Surfaces

3928 1918-S MS64 NGC. From a mintage of more than 10 million pieces, the 1918-S Walking Liberty half dollar is not too difficult to locate in MS64 condition, but higher grades are very scarce. This attractive Choice example displays well-detailed design elements, with a touch of softness in the usual areas, like the wreath hand and eagle's leg. The lustrous surfaces show traces of golden-tan toning. NGC has graded 36 numerically finer examples (12/13). NGC ID# 24PX, PCGS# 6576

1918-S Half Dollar, MS64

3929 1918-S MS64 PCGS. Delicate splashes of champagne toning grace the obverse and reverse surfaces of this impressive Choice Mint State 1918-S Walking Liberty half dollar. The strike is typically weak along Liberty's leg and upward from the eagle's breast on this piece. PCGS has only certified 35 finer examples (12/13). NGC ID# 24PX, PCGS# 6576

3930 1919 AU53 PCGS. CAC. The early Walkers are quite popular in the AU grades, from AU50 to AU58. In fact, a complete set of certified AU Walking Liberty half dollars is a remarkable accomplishment. This piece has natural light gray surfaces, with splashes of gold toning. *From The Teich Family Collection.* NGC ID# 24PY, PCGS# 6577

3931 1919 AU58 NGC. This sharply struck near-Mint specimen displays strong detail on the branch hand and the eagle's breast and legs. A few milling marks do not detract. NGC ID# 24PY, PCGS# 6577

1919-D Walking Liberty Half, AU55 Seldom Encountered in High Grade

3932 1919-D AU55 PCGS. CAC. The 1919-D Walking Liberty half dollar is one of the most challenging issues of the series in high grade, due to chronically weak strikes and excessive surface marks. This unusually attractive Choice AU specimen exhibits well-detailed design elements that show just a touch of wear and lustrous lightly abraded surfaces, with vivid shades of greenish-gold and pink toning. NGC ID# 24PZ, PCGS# 6578

3933 1921 VF25 PCGS. CAC. Ex: Teich Family Collection. A luminous midrange example of the popular key date, mintage 246,000 pieces. Partial blue overtones grace otherwise medium-gray surfaces. *From The Teich Family Collection.* NGC ID# 24R6, PCGS# 6583

3934 1921 XF45 PCGS. CAC. A lightly worn Choice XF specimen from a low mintage of 246,000 pieces. Bold skirt lines are evident and the pleasing surfaces are blanketed in shades of lavender-gray toning. NGC ID# 24R6, PCGS# 6583

3935 1921 — Cleaning — PCGS Genuine. AU Details. This slate-gray key date half dollar has a granular obverse, especially on the upper left quadrant. The eagle and reverse legend are lustrous. There are no consequential marks. NGC ID# 24R6, PCGS# 6583

1921 Half Dollar, Pleasing AU55 Popular, Low-Mintage Issue

3936 1921 AU55 PCGS. CAC. The 1921 half dollar has the second lowest mintage of the series with 246,000 pieces, making it very popular among Walking Liberty collectors. The light silver-gray surfaces of this Choice AU example display considerable luster and are free of mentionable marks. The skirt lines are well-defined and the branch hand shows some detail on the thumb. The CAC sticker affirms the coin's pleasing quality. NGC ID# 24R6, PCGS# 6583

3937 1927-S AU58 NGC. The bright, untuned surfaces of this near-Mint example exhibit typically struck design features, in that the central areas are weak, as seen on virtually all 1927-S halves. Both sides are remarkably devoid of mentionable marks. NGC ID# 24RA, PCGS# 6587

3938 1927-S MS63 NGC. A faint partial golden overtone graces this shining Select 1927-S half. Softly struck with wispy marks and a few light cuts in the wing feathers to account for the grade. NGC ID# 24RA, PCGS# 6587

3939 1929-D MS64 PCGS. CAC. Better-defined than usually seen on Liberty's head and branch hand. Luster is subtly frosted and largely silver with hints of gold and pewter. NGC ID# 24RC, PCGS# 6589

- 3940 1929-S MS64 PCGS. CAC.** Blushes of lavender, ice-blue, and yellow-gold visit the lustrous surfaces of this S-mint near-Gem. The design elements are better struck than typically seen on this issue, with a modicum of detail on the branch hand; most of the feathers on the eagle are quite strong. NGC ID# 24RD, PCGS# 6590
- 3941 1934-D MS65 PCGS.** Large D. Tobacco-brown and forest-green shades embrace the borders of this lustrous and well struck Great Depression Gem. The reverse is splendidly smooth and the obverse has only faint marks on the right field. NGC ID# 24RG, PCGS# 6593
- 3942 1934-S MS64 PCGS.** The 1934-S is the scarcest of the Middle Date issues in the Walking Liberty series from 1934 through 1940. Appealing pewter color and hints of violet provide this near-Gem with a strong level of visual appeal. Deeper gray accents appear at portions of the outer edges, primarily on the reverse. NGC ID# 24RH, PCGS# 6594

1934-S Walking Liberty Half, MS65

- 3943 1934-S MS65 PCGS. CAC.** The ivory obverse and brilliant reverse surfaces exhibit frosty mint luster with dappled gold toning flecks on this Gem specimen. Wisps of iridescence add to the overall eye appeal of this splendid half dollar. Trivial contact marks are noted on each side, consistent with the grade. NGC ID# 24RH, PCGS# 6594
- 3944 1935-S MS65 PCGS.** The 1935-S Walking Liberty half dollar is a better date in the middle series, especially in high grade. This lustrous Gem displays well-detailed design elements and unmarked fields, with a few hints of greenish-gold toning. NGC ID# 24RL, PCGS# 6597
- 3945 1937 MS67 NGC.** Fully struck and remarkably clean surfaces make this an excellent type or date selection. Each side is pearl-gray with just a hint of golden on the reverse. The mint luster is especially pronounced. NGC ID# 24RR, PCGS# 6601
- 3946 1937 MS67 PCGS. CAC.** Intense luster radiates from this Superb Gem, and a solid strike delivers strong definition to the devices. Hints of golden-tan make occasional visits to each side. Population: 139 in 67 (17 in 67+), 4 finer (12/13). NGC ID# 24RR, PCGS# 6601
- 3947 1937-S MS66 PCGS.** Vibrant luster invigorates this essentially untuned Premium Gem Walker. The design elements are generally well-struck. NGC ID# 24RT, PCGS# 6603
- 3948 1938-D MS65 PCGS.** This well-detailed Gem shows a touch of the usual softness on Liberty's hand and the eagle's leg. The brightly lustrous surfaces display a few accents of greenish-gold toning and no mentionable distractions. NGC ID# 24RV, PCGS# 6605
- 3949 1938-D MS65 PCGS.** Ebullient luster cascades throughout the untuned surfaces of this spectacular Gem. Sharply defined devices include relatively strong detail on the branch hand and the eagle's breast feathers. NGC ID# 24RV, PCGS# 6605
- 3950 1939-S MS67 PCGS.** This outstanding Superb Gem displays vibrant mint luster and tremendous eye appeal. The usual softness appears on Liberty's branch hand, but the surfaces are pristine and alive with silver flash. PCGS has graded none in a finer numeric grade (12/13). NGC ID# 24RY, PCGS# 6608

- 3951 1939-S MS67 PCGS.** Bright mint luster and a strong strike characterize this scarce, high-grade S-mint half dollar. As one would expect, there are no observable marks on either side of this Superb coin. NGC ID# 24RY, PCGS# 6608
- 3952 1939-S MS67 NGC.** The 1939-S is an overlooked issue as it falls outside the boundaries of most Short Set collectors. High-grade pieces are especially difficult. This is a richly frosted example with oyster-gray color. The strike is notably strong for an S-mint. NGC ID# 24RY, PCGS# 6608
- 3953 1939-S MS67 PCGS. CAC.** A magnificent Superb Gem, with well-detailed design elements that show just a touch of the typical softness on Liberty's wreath hand. The pristine surfaces display a few hints of pale gold toning. PCGS has graded no examples in higher numeric grades (12/13). NGC ID# 24RY, PCGS# 6608
- 3954 1940 MS67 PCGS. CAC.** A veneer of soft champagne-gold color rests on the highly lustrous surfaces of this Superb Gem Walker. Sharply struck including the branch hand and the eagle's breast feathers. NGC ID# 24RZ, PCGS# 6609
- 3955 1941-D MS67 PCGS. CAC.** The 1941-D Walking Liberty half dollar is a scarce issue in MS67 condition, and finer grades are virtually unobtainable. This sharply detailed Superb Gem displays satiny mint luster and a few hints of greenish-gold toning. PCGS has graded one numerically finer example (12/13). NGC ID# 24S4, PCGS# 6612

1941-S Half Dollar, MS66+ Late-Date Key Issue

- 3956 1941-S MS66+ PCGS. CAC.** The 1941-S is the key issue in the late-date series, and this satiny Premium Gem is a spectacular representative with brilliant-silver surfaces. Gold and iridescent toning is noted at the right obverse border, with a small iridescent splash on the reverse. PCGS has only certified seven finer examples of this issue (12/13). NGC ID# 24S5, PCGS# 6613
- 3957 1942-S MS66 PCGS.** Trumpet tail S. This high grade San Francisco example is lustrous and nearly stone-white. The preservation is outstanding and the strike shows incompleteness at the centers usual for the facility. NGC ID# 24S8, PCGS# 6617
- 3958 1944-D MS67+ PCGS. CAC.** Whispers of soft ice-blue and lavender color adhere to the lustrous surfaces of this high-end Superb Gem. Despite the incompleteness on the branch hand, the strike is better than normally encountered on this date. Population: 12 in 67+, 1 finer (12/13). NGC ID# 24SD, PCGS# 6622
- 3959 1945-D MS67 PCGS. CAC.** Light to medium caramel-gold and dove-gray toning enriches this thoroughly lustrous World War II Walker. Uncommonly close to immaculate, and the strike is full on the skirt lines. The branch hand fingers show expected blending. NGC ID# 24SG, PCGS# 6625
- 3960 1945-S MS66+ PCGS. CAC.** Knob S. This stone-white high grade half dollar is thoroughly lustrous and close to immaculate. Well struck for the San Francisco facility despite expected softness on the branch hand. NGC ID# 24SH, PCGS# 6626
- 3961 1946-D MS67 PCGS.** This frosty Superb Gem has brilliant and fully lustrous surfaces with ivory coloration, showing peripheral dusky gold accents. An outstanding example for the advanced collector. Population: 60 in 67, 0 finer (12/13). NGC ID# 24SK, PCGS# 6628

PROOF WALKING LIBERTY HALF DOLLARS

- 3962 1936 PR62 ANACS.** Both sides exhibit a trace of cameo contrast on this brilliantly mirrored proof, with delicate gold toning splashes. A few darker toning spots are noted on the obverse.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 27V4, PCGS# 6636
- 3963 1936 PR64 PCGS.** Ex: Teich Family Collection. The obverse is brilliant and essentially untoned, while the reverse has light champagne and iridescent toning. Both sides exhibit fully mirrored fields around sharply detailed, satiny devices.
From The Teich Family Collection. NGC ID# 27V4, PCGS# 6636
- 3964 1936 PR64 PCGS.** Ex: Teich Family Collection. Following a two decade interruption, the Mint began producing proof coins in 1936. This Choice example has brilliant silver surfaces with a trace of champagne toning and subtle field-to-device contrast.
From The Teich Family Collection. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, PR65 Popular, First-Year Proof

- 3965 1936 PR65 NGC.** The first year of issue for proof Walkers, and very popular as such. The luminous surfaces are untoned except for a sliver of forest-green, crimson, and yellow-gold patina that clings to the obverse rims. This is a sharply impressed, nicely preserved specimen. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, PR65 Sharply Struck and Reflective

- 3966 1936 PR65 PCGS.** Brilliant except for a few areas of hazy golden-gray tone, this boldly struck proof has mirrored fields and reflective devices. It is an obvious representative of the highly polished dies used to strike this first-year Walking Liberty proof issue — a technique that was continued in subsequent years through 1942. No significant contact marks or hairlines are seen on this well-preserved Gem example.
From The Teich Family Collection. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, PR67 Tied for the Finest at NGC

- 3967 1936 PR67 NGC.** This impressive Superb Gem proof has extraordinary eye appeal resulting from brilliant silver surfaces showing hints of mirrored fields, satin devices, and wisps of champagne toning. The first proof Walking Liberty half dollar, and tied for the finest certified at NGC. Census: 81 in 67 (1 in 67+, 5 in 67 ★), 0 finer (12/13). NGC ID# 27V4, PCGS# 6636

- 3968 1937 PR66 PCGS.** Ex: Teich Family Collection. A lovely Premium Gem with a whisper of champagne toning on the reverse. Subtle field-to-device contrast is evident on the reverse.
From The Teich Family Collection. NGC ID# 27V5, PCGS# 6637

- 3969 1938 PR66 PCGS.** Ex: Teich Family Collection. This lovely Premium Gem has excellent contrast, although insufficient for a Cameo designation. Both sides have brilliant mirrored fields and satin devices, with essentially untoned surfaces.
From The Teich Family Collection. NGC ID# 27V6, PCGS# 6638

- 3970 1938 PR66 PCGS. CAC.** Gleaming silver surfaces are a touch watery but carefully preserved. A great third-year coin from a four-figure proof mintage. NGC ID# 27V6, PCGS# 6638

- 3971 1938 PR67 NGC. CAC.** Strongly impressed with powerful reflectivity and a near-absence of patina. An exceptionally clean example of this third Walking Liberty proof half issue, one of only 8,152 specimens struck.
Ex: 2007 St. Louis (CSNS) Signature (Heritage), lot 3102. NGC ID# 27V6, PCGS# 6638

- 3972 1941 PR67 PCGS.** Ex: Teich Family Collection. Gorgeous amber tones appear on both sides if this impressive Premium Gem. Few collectors can hope to acquire a finer example, as PCGS has only certified 16 submissions in higher grades (12/13).
From The Teich Family Collection. NGC ID# 24SP, PCGS# 6641

FRANKLIN HALF DOLLARS

- 3973 1948 MS66+ Full Bell Lines PCGS. CAC.** Swirling luster hides beneath pleasing orange and olive-green mint set toning on this original Franklin half. Well-struck for the issue and scarce this nice, PCGS has certified just 3 pieces finer with Full Bell Lines (12/13). NGC ID# 24SR, PCGS# 86651

- 3974 1948 MS66+ Full Bell Lines PCGS. CAC.** The 1948 Franklin half dollar is scarce in MS66 condition with the Full Bell Lines designation, and finer examples are very rare. This sharply detailed example features well-preserved lustrous surfaces under shades of greenish-gold and light gray patina. PCGS has graded three numerically finer examples (12/13). NGC ID# 24SR, PCGS# 86651

- 3975 1949 MS66+ Full Bell Lines PCGS.** The lustrous surfaces of this high-end Premium Gem display whispers of reddish-gold on the reverse. In addition to the Full Bell Lines, most of the bell lettering is clear. Population: 6 in 66+ Full Bell Lines, 0 finer (12/13). NGC ID# 24ST, PCGS# 86653

**1949-D Full Bell Lines Half, MS66
Probably of Mint Set Origin**

3976 1949-D MS66 Full Bell Lines PCGS. The 1949-D half is readily available through the Gem level of preservation, even with Full Bell Lines; however, the certified population drops significantly at the Premium Gem level. This piece displays scattered light toning in hues of olive-green, gold, and orange with hints of red-pink. A small spot is present beneath the N in UNUM on the reverse. Tiny marks are present, primarily on the obverse. Population: 36 in 66 (1 in 66+) Full Bell Lines, 0 finer (12/13). NGC ID# 24SU, PCGS# 86654

3977 1953 MS66 Full Bell Lines PCGS. This frosty Premium Gem exhibits brilliant silver luster beneath splendid gold and iridescent Mint Set toning. A bold strike adds to its numismatic importance. Population: 38 in 66 (1 in 66+) Full Bell Lines, 0 finer (12/13). NGC ID# 24T6, PCGS# 86664

3978 1954-D MS66 Full Bell Lines PCGS. CAC. The radiantly lustrous surfaces of this Premium Gem display faint tints of ice-blue and champagne-gold. Sharply struck design elements extend beyond the Full Bell Lines to include clarity in most of the bell lettering. NGC ID# 24TA, PCGS# 86668

**1954-S Franklin Half, MS67
Condition Rarity, Richly Toned**

3979 1954-S MS67 PCGS. This issue has one of the lowest mintages of the series with just under 5 million pieces produced. Most examples are softly struck, without bell lines. Superb Gem examples are extremely rare, with PCGS certifying just two pieces at the MS67 level as well as a single MS67 with Full Bell Lines — which garnered over \$20,000 when it traded hands about 14 years ago. This colorfully toned example is lustrous and well-struck for the issue. The bell lines are not complete but display better-than-average detail. Elsewhere, the coin is smooth and lustrous with only a few scattered abrasions. Almost impossible to find in this condition with none certified finer by either major service (12/13). NGC ID# 24TB, PCGS# 6669

3980 1960 MS66 Full Bell Lines PCGS. CAC. An impressive representative with the coveted full bell lines, this Premium Gem exhibits brilliant untuned surfaces and rich luster. A few small, scattered marks are present. Population: 48 in 66 (2 in 66+) Full Bell Lines, 0 finer (12/13). NGC ID# 24TL, PCGS# 86678

3981 1962 MS65 Full Bell Lines PCGS. Partial golden overtones with a coppery spot at the bottom left of the bell. A handful of relatively isolated marks define the grade of this Full Bell Lines Gem. NGC ID# 24TR, PCGS# 86682

3982 No Lot

PROOF KENNEDY HALF DOLLAR

3983 1981-S Type Two PR70 Deep Cameo PCGS. The 1981-S proof Kennedy half dollar with the Type Two mintmark is more elusive than its Type One counterpart. This technically perfect specimen shows profound cameo contrast between the fully struck design elements and the pristine mirrored fields. Population: 52 in 70 Deep Cameo, (12/13). NGC ID# 24WS, PCGS# 96822

EARLY DOLLARS

3984 1798 Large Eagle, Pointed 9 — Damaged, Cleaned — ANACS. B-8, BB-125, R.2. Bowers Die State II. This Heraldic Eagle silver dollar has XF sharpness but the left obverse field is granular and weakly defined, as is the opposite area between the arrowheads and the base of the left (facing) wing. The portrait is moderately granular, the reverse has a rim knock at 8 o'clock, and narrow scratches are noted above the left shield tip and above the right claw. NGC ID# 24X6, PCGS# 6873

3985 1798 Large Eagle, Pointed 9, Close Date — Obverse Repaired — NGC Details. VF. B-27, BB-113, R.2. Bowers Die State I. The right obverse field is skillfully smoothed and both sides are mildly glossy from cleaning. Toned cream-gray and wheat-gold with dusky forest-green margins.

3986 1798 Large Eagle, Pointed 9 VF30 NGC. B-24, BB-124, R.2. Bowers Die State IV. A stone-gray and wheat-gold example with a smooth reverse and scattered minor obverse marks. Traces of luster illuminate the legends. The strike is uneven, soft on the right-side reverse stars but sharper elsewhere. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24X6, PCGS# 6873

3987 1798 Large Eagle, Knob 9, 5 Vertical Lines, 10 Arrows VF20 PCGS. B-4, BB-92, R.4. The beginning stages of a die crack through the second T in STATES are noted on this intermediate die state. Bowers lists two die states, perfect and cracked, and suggests that intermediate die states may exist. The fields are dark gray with hints of lavender on the silver-tan devices. PCGS# 6874

3988 1798 Large Eagle, Knob 9, 5 Vertical Lines, 10 Arrows Fine 15 NGC. B-6, BB-96, R.3. Die State V. The lower obverse border exhibits many cracks. A dusky cream-gray and almond-gold example. The central obverse displays numerous adjustment marks, as coined. The reverse center is lightly brought up and retains hints of granular planchet texture. PCGS# 6876

**1798 Large Eagle Silver Dollar, XF40
10 Arrows, 5 Stripes, B-6, BB-96**

3989 1798 Large Eagle, Knob 9, 5 Vertical Lines, 10 Arrows XF40 PCGS. B-6, BB-96, R.3. Bowers Die State IV. A well defined gunmetal-gray and wheat-gold representative of the popular Heraldic Eagle type. Moderately granular near 9 o'clock on the obverse but abrasions are inconsequential save for minor hairlines. PCGS# 6876

3990 1798 Large Eagle, Pointed 9, Wide Date VF25 PCGS. B-19, BB-106, R.5. Bowers Die State V, with a bisecting crack through the date and down from the highest wave of hair. Both sides have deep gray toning with dappled bright silver. Inconsequential marks and scratches are noted on both sides, and hardly worth mentioning. PCGS# 6877

3991 1798 Large Eagle, Wide Date, Pointed 9 — Obverse Graffiti, Cleaned — NGC Details. AU. B-23, BB-105, R.3. Bowers Die State II. Three initials are crudely pinscratched on the field between the hair ribbon and the LI in LIBERTY. The initials are hairlined from an attempt at removal. An interesting retained lamination is on the lower reverse, most prominent near the RI in AMERICA. Otherwise, an untoned and minimally abraded example that exhibits ample luster. PCGS# 6877

3992 1799/8 15 Stars Reverse Fine 15 PCGS. CAC. B-3, BB-141, R.3. A scarce and popular variety, represented here by a pleasing, moderately worn violet and gray-gold example. Minor abrasions are of little consequence. NGC ID# 24X8, PCGS# 6883

3993 1799 7x6 Stars VF25 PCGS. B-7, BB-156, R.4. Bowers Die State II-III, with a faint die crack between the TA in STATES. This walnut-brown Heraldic Eagle dollar retains ample hair and plumage detail, although most of PLURIBUS is worn. Thorough evaluation fails to locate any mentionable abrasions.
Ex: Orlando FUN Signature (Heritage, 1/2009), lot 4282, which realized \$2,300. NGC ID# 24X7, PCGS# 6878

**1799 Bust Dollar, VF30
B-10, BB-163 7x6 Stars**

3994 1799 7x6 Stars VF30 PCGS. B-10, BB-163, R.2. Dusky walnut-brown centers are framed by darker russet margins. E PLURIBUS UNUM is sharp, as are the wings and curls. Minor obverse rim dings are present at 4 and 10 o'clock, but the fields and devices are void of relevant marks. A pleasing example of this enormously popular early silver type.
Ex: Denver Signature (Heritage, 8/2006), lot 3673. NGC ID# 24X7, PCGS# 6878

**1799 7x6 Stars Dollar, Choice VF
B-11, BB-161, Late Die State**

3995 1799 7x6 Stars VF35 ANACS. B-11, BB-161, R.3. Bowers Die State III. A horizontal break journeys from the reverse border to the beak. The rising die crack through UNITED confirms the late die state. This Choice VF stone-gray and chestnut-gold representative displays hints of luster in the curls and legends. No marks are noticeable and the eye appeal is impressive. NGC ID# 24X7, PCGS# 6878

**1799 7x6 Stars Dollar, VF35
B-5, BB-157**

3996 1799 7x6 Stars VF35 PCGS. B-5, BB-157, R.2. Bowers Die State III. Light to medium chestnut-gray toning graces this pleasing Choice VF dollar. No consequential marks are present. A problem-free representative of this imposing early large denomination silver type.
Ex: Central States Signature (Heritage, 4/2006), lot 2140; Los Angeles Signature (Heritage, 8/2009), lot 1764. NGC ID# 24X7, PCGS# 6878

**1799 B-23, BB-159 VF30
Scarce 8x5 Stars Variety**

3997 1799 8x5 Stars VF30 PCGS. B-23, BB-159, R.3. Bowers Die State III. The scarce 8x5 Stars B-23 ranks among the most important 1799 varieties. Despite light wear on the cheek and drapery, the present walnut-brown and stone-gray example is virtually abraded save for moderate hairlines. Certified in a green label holder. PCGS# 6881

3998 1800 VF25 NGC. B-4, BB-186, R.4. Bowers Die State II. A scarce Bolender die variety. The T in UNITED is repunched south, and a die crack rises through the 18 in the date. Delicate almond-gold toning visits mildly bright surfaces. Abrasions are minor and mostly near the CA in AMERICA. NGC ID# 24X9, PCGS# 6887

3999 1800 AMERICA VF20 PCGS. B-11, BB-191, R.4. The obverse of this mid-grade Draped Bust dollar is light silver-gray, with lighter toning on the devices. The reverse is mostly steel-blue. Both sides have trivial marks and scratches that are expected for the grade. The reverse die line is faint. PCGS# 6892

**1801 B-4, BB-214 Silver Dollar, VF25
Scarcest 1801 Variety**

4000 1801 VF25 PCGS. CAC. B-4, BB-214, R.4. Only four die marriages are known for the 1801 business strike silver dollars, and the B-4, BB-214 is the scarcest of those varieties. This mid-grade piece has pleasing silver-gray surfaces with bluish-green and iridescent toning. Scattered grade-consistent marks are noted on both sides. NGC ID# 24XA, PCGS# 6893

4001 1802 Narrow Date — Obverse Repaired — NGC Details. VF. B-6, BB-241, R.1. The right obverse field has been smoothed and tooled. Liberty's profile and the outer star points are also affected. Toned deep gunmetal-gray with occasional hints of tan-brown. NGC ID# 24XB, PCGS# 6895

**1803 Large 3 Dollar, XF40
B-6, BB-255**

4002 1803 Large 3 XF40 NGC. B-6, BB-255, R.2. Bowers Die State I. B-6 is the likely candidate for the famous delivery of 19,570 silver dollars in 1804 that eventually led to the circa-1835 production of novodel 1804 dollars. The present Large 3 example is toned dove-gray and charcoal with the deepest patina on the reverse. The major devices exhibit pleasing definition and there are no distracting abrasions. PCGS# 6901

SEATED DOLLARS

4003 1840 AU53 PCGS. Traces of mint luster reside in the protected areas of this AU53 dollar. The design elements are well-defined save for the typical weakness in the hair atop Liberty's head. NGC ID# 24YA, PCGS# 6926

**1841 Seated Dollar, MS62
Scarce in Uncirculated Grades**

4004 1841 MS62 NGC. The mintage was a hefty 173,000 pieces for the 1841 dollar, but apparently all were dropped into the channels of commerce and few remain today in Uncirculated grades. This is a well-struck example with the usual semiprooflike fields, and each side is covered with light rose toning. Minimally abraded for the grade, the only exception is an area of shallow pinscratching above the eagle. Census: 18 in 62, 12 finer (1/14). NGC ID# 24YB, PCGS# 6927

4005 1842 AU55 PCGS. The 1842 Seated Liberty dollar is easily located in lower circulated grades, but it becomes scarce at the AU55 level. This Choice AU example is lightly worn and lightly abraded, with pleasing lavender-gray patina. NGC ID# 24YC, PCGS# 6928

4006 1844 AU55 NGC. Scarce in all grades, this Choice Almost Uncirculated example is a deeply toned survivor of a small mintage of just 20,000 pieces. Thick bronze-gold and gunmetal-blue toning cover the surfaces of this well-struck Seated dollar. Scattered abrasions — fewer than expected — exist on surfaces that retain a measure of original mint luster around the stars and other devices. Census: 25 in 55, 62 finer (1/14). NGC ID# 24YE, PCGS# 6930

4007 1845 AU53 NGC. A better date Seated dollar, with light, clear-gold toning over silver surfaces and some remaining luster among the devices. A trace of reflectivity remains within high, wide rims. NGC ID# 24YF, PCGS# 6931

**1846-O Dollar, AU55
The First Branch Mint U.S. Silver Dollar**

4008 1846-O AU55 PCGS. The 1846-O is the first silver dollar issue ever struck at the New Orleans mint, and the only one dated in the 1840s. Production consisted of only 59,000 pieces. Only three later Liberty Seated dollar issues bear the O mintmark: 1850, 1859, and 1860. Reflectivity remains on this Choice AU representative. Speckled gray and blue-gray toning is present, primarily on the obverse. Minimally abraded. Population: 21 in 55, 40 finer (12/13). NGC ID# 24YH, PCGS# 6933

- 4009 1847 AU50 NGC.** Attractive gray, gold, and rose shades appear on this lightly circulated example. Scattered abrasions are present, as expected, with a few appearing on Liberty's face and the surrounding areas. NGC ID# 24YJ, PCGS# 6934
- 4010 1848 AU55 ANACS.** Distinctly toned gold and blue with considerable silver luster shining through. The obverse shows scattered abrasions but the reverse is comparatively clean. Housed in a small-format ANACS holder. NGC ID# 24YK, PCGS# 6935
- 4011 1849 AU55 PCGS.** The fields retain a great semiprooflike character despite light wear. The margins have a pale golden overtone, while the right reverse adds a streak of gray deeper than the rest of the coin. Decently struck but with a number of small abrasions peppering the fields. NGC ID# 24YL, PCGS# 6936
- 4012 1849 AU58 NGC.** Just a touch of rub visits still-lustrous surfaces that are largely light gray with hints of gold. Two shallow cuts affect the eagle's head. Census: 60 in 58, 74 finer (12/13). NGC ID# 24YL, PCGS# 6936
- 4013 1850-O — Improperly Cleaned — NGC Details. AU.** A well define stone-gray and chestnut-gold example. Hairlines emerge when the coin is rotated at certain angles from the light. A pair of slender marks are noted east of Liberty's shield. The scarcest New Orleans issue of the Seated dollar series. NGC ID# 24YN, PCGS# 6938
- 4014 1853 AU58 NGC.** Largely silver interiors yield to margins with partial gold toning and a blunt strike. An unusual feature is a wire rim at the top of the obverse. Just a touch of rub visits the high points. NGC ID# 24YS, PCGS# 6941
- 4015 1859-O MS62 NGC.** Silver interiors have a touch of frostiness, while the margins are gold-to-orange with touches of violet. Well-defined with scattered abrasions but good eye appeal. NGC ID# 24YY, PCGS# 6947
- 4016 1859-S VF35 PCGS.** Rich forest-green and dove-gray toning embraces lightly abraded and moderately granular surfaces. The only No Motto San Francisco issue, and rare due to West Coast circulation and a low mintage of 20,000 pieces. Encased in a green label holder. NGC ID# 24YZ, PCGS# 6948
- 4017 1859-S XF40 PCGS.** Deep plum-mauve and gunmetal-gray toning envelops this lightly circulated silver dollar. A loupe reveals small to moderate marks with the most apparent between stars 5 and 6. The low mintage '59-S is the sole No Motto S-mint issue. Housed in a green label holder.
Ex: Piedmont Sale (Superior, 1/1996), lot 1573. NGC ID# 24YZ, PCGS# 6948
- 4018 1859-S XF45 NGC. Breen-5462.** Silver dollars were minted in San Francisco for the first time in 1859, an effort to provide dollars for foreign trade (especially China) without the risk and expense of shipping from the Philadelphia Mint. Since foreign traders preferred Mexican 8 reales pieces (they contained more silver), mintage ceased at a paltry 20,000 coins. This is a bright-white example of that mintage, untuned and moderately circulated with the expected wear and abrasions for the grade. It is the Breen-5462 variety (Variety Two in the Bowers' *Encyclopedia*) with the 18 repunched at the base of the date and a high, medium-S mintmark. Described by Breen as Ex. Rare, although it is impossible to quantify as such based on auction appearances. Census: 21 in 45, 78 finer (1/14). NGC ID# 24YZ, PCGS# 6948
- 4019 1860 — Surfaces Tooled — PCGS Genuine.** This scarce date Seated dollar has a prooflike appearance because it has been polished. The luminous surfaces are lightly retuned caramel-gold. The sharpness is close to Mint State though the claws and other high points exhibit a trace of wear.
From The Teich Family Collection. NGC ID# 24Z2, PCGS# 6949
- 4020 1860-O MS62 PCGS.** A substantial mintage of 515,000 Seated Liberty silver dollars was accomplished at the New Orleans Mint in 1860, primarily for use in the China trade. This impressive MS62 specimen is darkly toned in mottled shades of gray, cerulean-blue, and golden-brown, with traces of mint luster under the toning. NGC ID# 24Z3, PCGS# 6950
- 4021 1863 VG10 PCGS.** From a low Civil War mintage of 27,200 pieces, this evenly worn example retains the L, T, and Y of LIBERTY in legible condition. The moderately abraded gray surfaces show hints of cerulean-blue at the peripheries. NGC ID# 24Z6, PCGS# 6953
- 4022 1865 — Repaired — NGC Details. AU.** Hairlined and somewhat luminous and glossy. Both sides are mildly to moderately granular. Retoned wheat-gold with lattice powder-blue patina on the reverse. A faint pinscratched X on the upper reverse field. A very scarce Civil War date. NGC ID# 24Z8, PCGS# 6955
- 4023 1865 AU50 ANACS.** From light gray to pale gold and deeper amber and blue hues, this Civil War-era Seated dollar does not lack for color. Considerable luster remains in the fields. Housed in a small-format ANACS holder. NGC ID# 24Z8, PCGS# 6955

**1865 Seated Dollar, Choice AU
Low-Mintage Date**

- 4024 1865 AU55 PCGS.** Rich golden-brown, stone-gray, and sea-green toning blankets this lightly circulated Seated dollar. Liberty's curls and the bottom of the eagle are typically struck. Smooth save for a single thin mark beneath the ES in STATES. A meager 46,500 pieces were struck. Housed in an old green label holder. Population: 18 in 55, 37 finer (12/13). NGC ID# 24Z8, PCGS# 6955
- 4025 1870 AU50 NGC.** Generous blue and green overtones grace this late-date Seated dollar. Both sides remain luminous despite light wear. Scattered marks contribute to the grade. NGC ID# 24ZD, PCGS# 6963
- 4026 1871 XF40 PCGS.** Stone-gray, chestnut-gold, and olive-green enrich this lightly circulated Motto type coin. The fields are typically abraded beneath the toning. Housed in a green label holder. NGC ID# 24ZG, PCGS# 6966
- 4027 1871 AU55 NGC.** Gold and blue overtones are prominent on each side of this still-lustrous Seated dollar. Minor rub and wispy marks combine to account for the grade. NGC ID# 24ZG, PCGS# 6966
- 4028 1872 AU53 PCGS.** The 1872 Seated Liberty dollar claims a mintage of more than 1.1 million pieces and the date is a favorite choice of type collectors. This lightly circulated example retains almost all of its design detail and much original mint luster. NGC ID# 24ZJ, PCGS# 6968
- 4029 1872 — Cleaning — PCGS Genuine. Unc. Details.** This typically struck example has been dipped white but both sides are minimally abraded and display satin luster. A majority of 1872 Seated dollars were exported, and Uncirculated examples are very scarce. NGC ID# 24ZJ, PCGS# 6968

1872-CC Silver Dollar, VG10
Rare Carson City Issue

- 4030 1872-CC VG10 PCGS.** A cream-gray example of this rare Carson City silver dollar issue. Substantial plumage detail remains. The L and Y in LIBERTY are clear and the T is faint. A mere 3,150 pieces were struck, and survivors are encountered much less often than the 1870-CC. Encapsulated in a green label holder.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24ZK, PCGS# 6969

- 4031 1872-S XF40 PCGS.** The only collectible Motto S-mint issue. Nonetheless very scarce, since just 9,000 pieces were coined. Medium stone-gray toning. No marks are noticeable except for a pinscratch between the upper arrowhead and the rim at 2 o'clock. Certified in a green label holder. NGC ID# 24ZL, PCGS# 6970

- 4032 1872-S XF45 PCGS.** The 1872-S Seated Liberty dollar claims a low mintage of only 9,000 pieces, some of which may have been melted to provide bullion for 1873 Trade dollars. The present Choice XF displays semibright silver-gray surfaces and decently struck devices. NGC ID# 24ZL, PCGS# 6970

PROOF SEATED DOLLARS

- 4033 1861 — Obverse Scratched — NGC Details. Proof.** This snow-white No Motto proof type coin has several relatively minor marks on the left obverse field, with the most noticeable near star 5 and Liberty's head. White-on-black contrast is significant though undesignated by NGC.
From The Teich Family Collection. NGC ID# 252F, PCGS# 7004

- 4034 1862 PCGS Genuine. Proof.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a proof specimen with Uncirculated details specimen that has been damaged. A lilac and golden-brown spot on the right obverse field near the drapery is accompanied by horizontal hairlines. The remainder of this well struck Civil War proof Seated dollar is essentially brilliant and demonstrates cameo contrast.
From The Teich Family Collection. NGC ID# 252G, PCGS# 7005

- 4035 1864 PR61 NGC.** An intricately struck Civil War specimen that pairs a brilliant obverse with a wheat-gold reverse. Delicate obverse hairlines are consistent with the grade. Just 470 proofs were produced.
From The Teich Family Collection. NGC ID# 252J, PCGS# 7007

1866 Motto Silver Dollar, PR62 Cameo
Excellent White on Black Contrast

- 4036 1866 Motto PR62 Cameo PCGS.** Brilliant save for a blush of sea-green and lilac near the lower left end of Liberty's rock. Frosty motifs and mirrored fields ensure blatant cameo contrast. Minor hairlines preclude a finer assessment. 725 proofs were issued, along with two known additional pieces sans Motto. PCGS# 87014

1867 Seated Liberty Dollar, PR62
Only 625 Pieces Struck

- 4037 1867 PR62 PCGS.** Ex: Teich Family Collection. From a low proof mintage of just 625 pieces, this attractive specimen offers sharply detailed design elements throughout and brightly reflective fields with the expected number of minor contact marks for the grade. Accents of gray, golden-tan, and amber toning enhance the pleasing surfaces.
From The Teich Family Collection. NGC ID# 252N, PCGS# 7015

- 4038 1868 PR61 PCGS.** Ex: Teich Family Collection. Delicate gold toning appears at the right side of the obverse and reverse on this attractive proof. Both sides are otherwise untuned, showing faint grade-limiting hairlines.
From The Teich Family Collection. NGC ID# 252P, PCGS# 7016

- 4039 1870 PR58 PCGS.** Attractive shades of golden-brown, gray, and cerulean-blue toning blanket the reflective surfaces of this lightly circulated proof. From a fairly generous proof mintage of 1,000 pieces. NGC ID# 252S, PCGS# 7018

- 4040 1870 PR60 ANACS.** Deeply toned medium-gray with gold, blue, and green elements. Considerably hairlined with scattered contact marks but still a significant proof Seated dollar. Housed in a small-format ANACS holder. NGC ID# 252S, PCGS# 7018

TRADE DOLLARS

- 4041 1873-CC — Cleaning — PCGS Genuine. XF Details. Micro CC.** The first and final year Carson City issues are keys to the business strike series. The present stone-gray example has a subdued appearance but is free from consequential marks. Lightly brought up on Liberty's head and the eagle's right (facing) leg. NGC ID# 252X, PCGS# 7032
- 4042 1873-S MS62 PCGS.** The 1873-S Trade dollar was a heavily exported issue and it is scarce-to-rare in all Mint State grades today. This MS62 example is well-detailed and lustrous, with a scattering of minor contact marks on both sides. Population: 27 in 62, 48 finer (12/13). NGC ID# 252Y, PCGS# 7033
- 4043 1875-CC Chop Mark AU58 PCGS.** Type One Reverse. A small but deep rectangular chop is on the obverse near 3 o'clock. The reverse has a chop at the right scroll end and another on the lower portion of the right (facing) wing. PCGS# 87038
- 4044 1875-CC AU58 PCGS.** Type One Reverse with a berry beneath the eagle's right (facing) claw. A lightly toned Carson City type coin with extensive luster, a good strike, and the expected number of minor field abrasions. NGC ID# 2535, PCGS# 7038
- 4045 1875-CC — Improperly Cleaned — NGC Details. Unc.** Type One Reverse. Lightly toned silver-gray. A faintly hairlined Carson City example with a semiprooflike obverse and a satiny reverse. The strike is above average and bagmarks are inconsequential. NGC ID# 2535, PCGS# 7038
- 4046 1875-S MS61 ANACS.** Type Two Reverse. Large S. Booming luster and medium chestnut-brown and steel-gray toning ensure exceptional eye appeal for the MS61 level. Roller marks on star 1 and the left border of the waves are as produced. The strike is typical and the right obverse field has minor abrasions. NGC ID# 2536, PCGS# 7039
- 4047 1875-S MS63 PCGS. CAC.** Type One Reverse. Large S. Light to medium golden-gray toning graces lustrous and unblemished surfaces. The curls and right (facing) claw are typically brought up. A high end type representative. NGC ID# 2536, PCGS# 7039
- 4048 1876 MS61 NGC.** Type One Obverse. Type Two Reverse. Deep golden-brown, sea-green, and steel-blue patina encompasses this Philadelphia Centennial-year type coin. Luster fills design elements. The obverse field is mildly prooflike. NGC ID# 2539, PCGS# 7041
- 4049 1876 MS62 NGC.** Type One Obverse. Type Two Reverse. Medium rose-gold toning adorns this coruscating example. The strike is sharp except on the eagle's right (facing) leg. Minor field grazes are of little relevance. NGC ID# 2539, PCGS# 7041

1876 Trade Dollar, MS64 Type One Obverse / Type Two Reverse

- 4050 1876 MS64 PCGS.** Type One Obverse. Type Two Reverse. Peach-gold, fire-red, and blue-green illuminate the margins but the majority of this Choice Centennial-year type coin is gunmetal-gray. The strike is bold except on Liberty's hair. A loupe reveals only unobtrusive field marks. NGC ID# 2539, PCGS# 7041

- 4051 1876-S Chop Mark MS62 NGC.** Type One Obverse and Reverse. Large S. A chop mark is placed above 900 and causes a granular texture opposite on Liberty's chest. Undesignated as chopmarked on the NGC insert. This satiny silver-gray Trade dollar displays field abrasions consistent with the designated grade. PCGS# 87043

- 4052 1876-S MS63 PCGS.** Type One Obverse and Reverse. Large S. A brilliant Select Trade dollar with potent luster and attractive eye appeal. Liberty's curls are incompletely impressed but the remainder of the strike is crisp. NGC ID# 253B, PCGS# 7043

1876-S Trade Dollar, MS64 Type One Obverse and Reverse

- 4053 1876-S MS64 PCGS. CAC.** Type One Obverse, Type One Reverse. Large S. Three combinations of obverse and reverse hub types exist for 1876 Trade dollars from all three Mints. They are the Type One obverse and reverse, Type One obverse with Type Two reverse, and the Type Two obverse and reverse. The only other possibility is a Type Two obverse with a Type One reverse, and no pieces with that combination are known.

This splendid near-Gem has satiny silver luster with mostly brilliant silver surfaces that show only a few splashes of iridescent toning, mostly along the borders. Trivial marks limit the grade of this attractive piece. PCGS has only certified five finer pieces (12/13). NGC ID# 253B, PCGS# 7043

- 4054 1877-S MS60 NGC.** Large S. The obverse is close to brilliant, while the reverse displays moderately deeper golden-tan and steel-blue toning. Mildly granular near star 2 but no abrasions are noticeable. NGC ID# 253E, PCGS# 7046

- 4055 1877-S MS62 PCGS.** Minute S, the scarcer of the two mintmark sizes. Potent luster and original medium honey-gold toning ensure the eye appeal of this well struck silver type coin. A few thin obverse field marks correspond to the grade. NGC ID# 253E, PCGS# 7046

- 4056 1878-S MS62 PCGS.** The obverse of this Mint State Trade dollar displays considerable golden-brown and iridescent toning. The reverse is mostly brilliant with a hint of pale gold. NGC ID# 253G, PCGS# 7048

PROOF TRADE DOLLARS

- 4057 1873 — Surfaces Tooled — PCGS Genuine. Proof.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a proof specimen with Uncirculated details that has been tooled. This brilliant proof Trade dollar has been dipped and is cleaned. The left obverse field has a vertical cluster of pinscratches. Lesser marks are noted near stars 9 and 10. The strike is typical on Liberty's hair and the eagle's right (facing) leg.
From The Teich Family Collection. NGC ID# 27YJ, PCGS# 7053

- 4058 1874 PR62 PCGS.** Ex: Teich Family Collection. No period after FINE. Powder-blue surfaces become autumn-brown and rose-red as the coin is tilted beneath a light. Field hairlines emerge when the piece is rotated to extreme angles.
Ex: Samuel W. Wolfson Collection, Part II (Stack's, 5/1963), lot 1519.
From The Teich Family Collection. NGC ID# 27YK, PCGS# 7054

4059 1874 PR60 Cameo NGC. Distinctly contrasted with largely silver interiors and blue-to-violet peripheral toning. Both sides are extensively hairlined in the fields and the eagle's right (facing) leg shows softness. Census: 2 in 60 Cameo, 49 finer (1/14). PCGS# 87054

4060 1876 PR62 PCGS. Type One Obverse. Type Two Reverse. A nearly brilliant Centennial-year Trade dollar. The motifs are frosty but PCGS has demurred on a Cameo designation. The fields display hairlines consistent with the grade.
From The Teich Family Collection. NGC ID# 27YM, PCGS# 7056

1877 Trade Dollar, PR62 Cameo

4061 1877 PR62 Cameo PCGS. Ex: Teich Family Collection. The collector who seeks a sharply struck 1877 Trade dollar would do well to consider a proof, as the typical Mint State piece has the head and upper stars flat. This Cameo proof has faint hairlines on its brilliant silver surfaces, but those lines are trumped by the excellent field-to-device contrast. Population: 8 in 62 Cameo, 38 finer (12/13).
From The Teich Family Collection. PCGS# 87057

1878 Trade Dollar, PR61

4062 1878 PR61 PCGS. Ex: Teich Family Collection. Both sides of this pleasing proof show moderate hairlines that prevent a higher numerical grade. The design elements are lustrous and contrast nicely with the mirrored fields of this proof-only Trade dollar issue.
From The Teich Family Collection. NGC ID# 27YP, PCGS# 7058

**1878 Trade Dollar, PR64
First Proof-Only Issue**

4063 1878 PR64 PCGS. CAC. The first proof-only issue Trade dollar, with production limited to proofs due to introduction of the Morgan dollars in 1878. This Choice proof Trade dollar has fully mirrored fields around its lustrous devices, with cameo contrast hidden beneath its lovely blue, lilac, and iridescent toning. NGC ID# 27YP, PCGS# 7058

**1878 Trade Dollar, PR62 Cameo
Nicely Contrasted**

4064 1878 PR62 Cameo PCGS. Ex: Teich Family Collection. Although minuscule contact marks limit the numerical grade, this beautiful proof Trade dollar has exquisite black-and-white contrast with delicate toning to enhance the eye appeal. Population: 14 in 62 Cameo, 65 finer (12/13).
From The Teich Family Collection. PCGS# 87058

4065 1879 PR60 PCGS. Ex: Teich Family Collection. Blue-gray toning appears as a faint overlay across much of each side. Heavy hairlines are noted to the left of Liberty's form.
From The Teich Family Collection. NGC ID# 27YR, PCGS# 7059

**1879 Trade Dollar, PR62
Popular Proof-Only Date**

4066 1879 PR62 PCGS. Ex: Teich Family Collection. From a generous proof-only mintage of 1,541 pieces, this impressive proof Trade dollar exhibits sharply detailed design elements and brightly mirrored fields with hints of gray and golden-tan toning. A few minor hairlines and contact marks explain the grade.
From The Teich Family Collection. NGC ID# 27YR, PCGS# 7059

**1880 Trade Dollar, PR63+ Cameo
Third Proof-Only Issue**

4067 1880 PR63+ Cameo PCGS. Ex: Teich Family Collection. From 1878 to 1883, the Philadelphia Mint was busy producing millions upon millions of Morgan silver dollars, leaving little time for Trade dollar production. As a result Trade dollars were only struck for collectors in proof format. This Select Cameo proof has delicate champagne toning over its brilliant silver surfaces with excellent contrast.
From The Teich Family Collection. PCGS# 87060

**1880 Trade Dollar, PR64 Cameo
Popular Proof-Only Date**

- 4068 1880 PR64 Cameo PCGS.** No business-strike Trade dollars were struck after 1878, but the Mint produced a limited number of proofs every year to satisfy collector demand. The 1880 issue claims a generous proof-only mintage of 1,987 pieces. This impressive Choice example displays well-detailed frosty design elements that contrast boldly with the deeply mirrored fields. Population: 61 in 64 (3 in 64+) Cameo, 37 finer (12/13). PCGS# 87060

**1881 Trade Dollar, PR62 Cameo
Impressive White-on-Black Contrast**

- 4069 1881 PR62 Cameo PCGS. CAC.** Ice-white devices rise in full detail above the darkly reflective fields. This brilliant specimen displays moderate hairlines but the eye appeal is nonetheless attractive. Speculation of proof-only Trade dollars had waned by 1881, since the mintage was less than half that of its 1880 predecessor. Ex: Stack's, 11/1959, lot 890. From The Teich Family Collection. PCGS# 87061

- 4070 1882 PR62 ANACS.** Light straw-gold toning visits this sharply struck and nicely mirrored specimen. The fields exhibit distributed small marks. The Trade dollar series ended with eight consecutive proof-only Philadelphia issues. The first six are scarce and the final two are very rare. From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 27YU, PCGS# 7062

**1882 Trade Dollar, PR64
Spectacular Multicolor Toning**

- 4071 1882 PR64 NGC.** Trade dollars were produced exclusively in proof format in 1882, when a generous mintage of 1,097 pieces was accomplished. This attractive Choice example exhibits well-detailed design elements, with a touch of softness on the head and upper stars. The deeply mirrored fields display vivid shades of cerulean-blue and champagne-gold patina, with outstanding eye appeal. NGC ID# 27YU, PCGS# 7062

**1882 Trade Dollar, PR62
Attractive Cameo Example**

- 4072 1882 PR62 Cameo PCGS.** Ex: Teich Family Collection. The design elements of this impressive specimen are strongly impressed, but some minor loss of detail is apparent in the eagle's feathers, due to die polishing. The frosty devices contrast boldly with the mirrored fields and eye appeal is outstanding. Population: 22 in 62 Cameo, 96 finer (12/13). From The Teich Family Collection. PCGS# 87062

**1883 Trade Dollar, PR63
Last Official Trade Dollar**

- 4073 1883 PR63 PCGS.** Ex: Teich Family Collection. This is the last official Trade dollar issue, followed by the unofficial and extremely rare 1884 and 1885 Trade dollars. This Select proof has brilliant silver surfaces with no evidence of toning on either side. From The Teich Family Collection. NGC ID# 27YV, PCGS# 7063

**1883 Trade Dollar, PR64
Last Collectible Issue**

- 4074 1883 PR64 PCGS.** Discounting the clandestine 1884 and 1885 issues, Trade dollars were struck for the last time in 1883, with a moderate proof-only mintage of 979 pieces. This impressive Choice example is sharply detailed throughout, with deeply mirrored fields under vivid shades of cobalt-blue and champagne-gold toning. NGC ID# 27YV, PCGS# 7063

MORGAN DOLLARS

- 4075 1878 8TF MS65 PCGS. VAM-16.** The obverse stars are die tripled, and the reverse is clearly die doubled. Lovely orange-gold toning adorns the peripheries of this lustrous first-year Gem. Minor marks on the left obverse are all that limit the grade. NGC ID# 253H, PCGS# 7072

1878 Eight Tailfeather Dollar, MS62 Very Rare VAM-14.7

- 4076 1878 8TF Flake on Ear MS62 NGC. VAM-14.7.** Ex: Teich Family Collection. A Hit List 40 Variety. The vertical die crack through the right foot of the 1 in the date is the best diagnostic, but tiny die lumps near the ear and below the corner of the eye also attribute this important variety. VAMworld.com states "ultra-rare with only 7 confirmed examples." Fully struck and prooflike with light peripheral golden-brown and rose-red toning. Described as "Brilliant Proof" in the 1962 Stack's catalog.
Ex: Tice Family Collection (Stack's, 6/1962), lot 960.
From The Teich Family Collection. PCGS# 133802

- 4077 1878 8TF MS63+ Deep Mirror Prooflike PCGS. VAM-2.** A stone-white first subtype representative with reflective fields and a full strike. Both sides are die doubled, the obverse on the bases of RIB and the reverse near ONE and UNITED. NGC ID# 253H, PCGS# 97073

- 4078 1878 7/8TF Strong MS65 PCGS. VAM-38.** Five tailfeather fragments appear beneath the prominent seven tailfeathers. LIBERTY and other obverse legends are strongly die doubled. This coruscating and well preserved Gem is richly patinated gunmetal-gray, olive-green, and golden-brown. NGC ID# 2TXZ, PCGS# 7078

- 4079 1878 7/8TF Weak MS65 PCGS. VAM-33A.** VAMworld.com notes, "VAM-33A is a 7/8 tailfeather variety that shows four faint tailfeathers emerging below the strong 7 feathers. It is a clashed version of VAM-33." Deep orange-red fills the obverse field and portrait. The obverse margin is blue-green. The reverse displays similar shades but is more lightly toned. PCGS# 7070

- 4080 1878 7/8TF Weak MS65 ANACS. VAM-33A.** The eagle's legs are die doubled, as are the obverse stars and E PLURIBUS. The clashed die state. Lustrous and nearly brilliant with a smooth reverse and right obverse.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 7070

1878 7/8TF Silver Dollar, AU55 Tripled Blossoms, VAM-44A Key Morgan Variety

- 4081 1878 7/8TF Tripled Blossoms AU55 PCGS. VAM-44A.** A Top 100 Variety. Among the most desirable Morgan dollar VAMs. The eagle's legs are die doubled, as also seen on VAM-33, but the key feature is the obverse tripled leaves and blossoms. Designated as VAM-44 on the PCGS insert, but this is the later die state with a bold clashed N from IN near Liberty's neck. Untoned and partly lustrous. The fields display only delicate marks from cursory circulation. PCGS# 133829

- 4082 1878 7TF Reverse of 1878 MS65 PCGS.** This is the Second Reverse variety with a flat (concave) eagle's breast and the parallel top-arrow feather, short neck variety. A brilliant, frosted example, it has a crescent of rainbow toning above Liberty's head and another at the lower right of the eagle. Each crescent displays tones of deep, electric blue, red, and gold. The coin is a fully struck Gem, primarily white aside from the toning accents, with only a few minor abrasions for the assigned grade. Excellent eye appeal. NGC ID# 253K, PCGS# 7074

- 4083 1878 7TF Reverse of 1878 MS65 NGC. VAM-83.** Various known as "1 high" or "8 low," the second as certified on the NGC holder along with the VAM attribution. The die-polished nostril of Liberty is diagnostic. A lustrous silver-white example with a good strike and no mentionable contact. NGC ID# 253K, PCGS# 7074

- 4084 1878 7TF Reverse of 1878 MS64 Deep Mirror Prooflike PCGS. VAM-114-2.** Beautiful butter-gold, powder-blue, and lavender toning endows much of the reverse. The obverse is lightly die doubled, most noticeable on the R in PLURIBUS. Encased in an old green label holder. Population: 73 in 64 (3 in 64+) Deep Mirror Prooflike, 14 finer (12/13). NGC ID# 253K, PCGS# 97075

- 4085 1878 7TF Reverse of 1879 MS65 ANACS.** The Reverse of 1879 dollars are usually not encountered in high grade, especially in solid Gem condition such as seen here. Each side displays remarkably bright mint frost and a light accent of golden patina around the margins. Fully struck.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 253L, PCGS# 7076

- 4086 1878-CC MS64 Deep Mirror Prooflike ANACS.** A few whispers of orange and lavender gravitate to the margins of this sharply struck CC-mint example. Strong field-motif contrast is evident on both sides. Very difficult to locate any finer. NGC ID# 253M, PCGS# 97081

**1878-CC Dollar, MS64 ★ Deep Mirror Prooflike
Brilliant and Strongly Contrasted**

4087 1878-CC MS64 ★ Deep Mirror Prooflike NGC. CAC. Remarkably deep mirrors are seen on each side with equally impressive mint frost covering the devices, resulting in strong cameo contrast. The luster grazes and abrasions are minimal, as indicated by the Star designation and CAC endorsement. Brilliant throughout. NGC ID# 253M, PCGS# 97081

4088 1878-S MS66+ PCGS. CAC. Light silver-gray overall with gold at the bottom and left margins. Sharply struck on the central devices with frost twinkling on the strands of Liberty's hair. NGC ID# 253R, PCGS# 7082

4089 1878-S MS66+ PCGS. CAC. A high-end Premium Gem example from the first year of the Morgan design, this sharply detailed specimen offers lustrous unmarked surfaces that are blanketed in shades of greenish-gold, cerulean-blue, and gray toning. PCGS has graded 24 numerically finer examples (12/13). NGC ID# 253R, PCGS# 7082

4090 1879 MS65+ PCGS. Orange-gold and yellow-gold toning drapes both sides of this high-end Gem and a solid strike imparts strong detail to the design elements. Wonderfully preserved and impressive eye appeal. NGC ID# 253S, PCGS# 7084

4091 1879 MS66 PCGS. The 1879 Morgan dollar is scarce in MS66 condition, and finer coins are very rare. This delightful Premium Gem exhibits well-detailed design elements and lustrous well-preserved surfaces. PCGS has graded three numerically finer examples (12/13). NGC ID# 253S, PCGS# 7084

**1879-O Morgan Dollar, MS65
Spectacular Multicolor Toning**

4092 1879-O MS65 PCGS. This early O-mint issue is rare above the Gem level. The well-preserved surfaces of this attractive Gem are blanketed in shades of champagne-gold, lavender-gray, and violet toning. Well-detailed design elements and vibrant mint luster complete the appealing package. PCGS has graded 14 numerically finer examples (12/13). NGC ID# 253V, PCGS# 7090

**1879-O Dollar, Brilliant MS65
Fully Struck, Problem-Free Surfaces**

4093 1879-O MS65 PCGS. Heavy and extensive abrasions have always been the deterrent to locating a Gem example of the 1879-O. This is a remarkably clean piece that is brilliant throughout, and the strike is absolutely full on each side. The brilliant surfaces allow full appreciation of the softly frosted mint luster. NGC ID# 253V, PCGS# 7090

1879-O Dollar, Richly Toned MS65

4094 1879-O MS65 NGC. CAC. Most of the mintage of 2.8 million 1879-O dollars entered circulation, and few are available in offerings in later decades. The two main attractions of this Gem are its bright mint luster and rich, diverse toning. The obverse is mostly cinnamon colored, while the reverse displays deep red and cobalt-blue toning. NGC ID# 253V, PCGS# 7090

4095 1879-S Reverse of 1878 MS64 NGC. VAM-9. A Top 100 Variety. The obsolete Second Reverse subtype was used on a minority of '79-S dollars. The present lustrous near-Gem is essentially brilliant and has a splendidly smooth reverse. NGC ID# 253W, PCGS# 7094

4096 1879-S Reverse of 1878 MS64 PCGS. CAC. The parallel arrow feather and concave eagle's breast confirm the 1878 Reverse. Pastels of aqua-blue, lime-green, and orange-gold reside on the lustrous surfaces of this near-Gem. Sharply struck, including good detail in the hair above the ear. Very pleasing eye appeal, affirmed by the CAC sticker. NGC ID# 253W, PCGS# 7094

4097 1879-S MS67+ PCGS. This high-end Superb Gem displays vibrant mint luster and sharply detailed design elements throughout. The virtually pristine surfaces show a few accents of pale gold toning. NGC ID# 253X, PCGS# 7092

4098 1879-S MS67 Prooflike PCGS. Conditionally rare in MS67 with prooflike surfaces, this splendid 1879-S dollar displays iridescent golden rim tone around brilliant-white, reflective surfaces. Only a few minor abrasions are visible and do not detract from the mirrored appeal of this Superb Gem. Population: 48 in 67 (3 in 67+) Prooflike, 2 finer (12/13). NGC ID# 253X, PCGS# 7093

**1880 Silver Dollar, MS61
VAM-1A2, Knob 8
Tied for Finest Known**

- 4099 1880 Knob 8 MS61 NGC. VAM-1A2.** A Top 100 Variety. The former Knob 8 VAM-1A was reclassified in recent years as VAM-1A2, due to the heavy wire-like die break through the ribbon loops of the bow. Examples without the Knob 8 obverse are VAM-1A1, but the present coin shows the bold vertical crack through the first 8 in the date along with the "knob" along the break just above the digit. Lustrous and smooth with a shallow lamination on the right wing. Very rare in Uncirculated grades. Census: 2 in 61, none finer (12/13).

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 133870

**1880-CC Silver Dollar, MS66+
Bar-Date Variety**

- 4100 1880-CC MS66+ PCGS.** A bar under the second 8 and tiny die dots inside each C make frequent appearances on the 1880-CC dollars. This Premium Gem is an exceptional specimen that exhibits fully brilliant and untuned silver surfaces with excellent eye appeal. PCGS has only certified 29 finer examples (12/13). NGC ID# 2542, PCGS# 7100

- 4101 1880/79-CC Reverse of 1878 MS64 PCGS. VAM-4.** A Top 100 Variety. Delicately toned wheat-gold. Booming luster sweeps this attractively preserved and well struck Choice Carson City dollar. A memorable VAM that pairs the clearest overdate of the series with an obsolete Reverse of 1878. NGC ID# 253Z, PCGS# 7108

- 4102 1880/79-CC Reverse of 1878 MS64+ PCGS. CAC. VAM-4.** A Top 100 Variety. Though some of the 1880 overdate VAMs from the various mints require imagination to perceive, such is not the case for the present Second Reverse variety. Well struck, lustrous, and lightly toned with clean fields and minor facial grazes. NGC ID# 253Z, PCGS# 7108

- 4103 1880/79-CC Reverse of 1878 MS65 NGC. VAM-4.** A Top 100 Variety. Only a hint of straw-gold toning adorns this lustrous overdated Second Reverse Carson City Gem. Moderate grazes are present but no marks are of singular significance. NGC ID# 253Z, PCGS# 7108

- 4104 1880/79-CC Reverse of 1878 MS65 PCGS. VAM-4.** A Top 100 Variety. This popular overdate shows the remains of an overstruck 79 below the last two digits of the date and parallel arrow feathers. Silvery surfaces are well-struck with a few grade-consistent marks. NGC ID# 253Z, PCGS# 7108

- 4105 1880/79-CC Reverse of 1878 MS65+ PCGS. VAM-4.** A Top 100 Variety. The most prominent overdate VAM of the series, since much of the 7 and 9 underdigits are clear. Light almond-gold toning graces this lustrous and minimally abraded Carson City Gem. NGC ID# 253Z, PCGS# 7108

- 4106 1880-CC 8 Over High 7 MS65 PCGS. VAM-5.** A Top 100 Variety. One of the most prominent overdates in the Morgan dollar series, VAM-5 shows two ears, a check mark, a crossbar, a downstroke, and a stem from the underdigit 7. Lustrous and well preserved with minimal golden toning. PCGS# 7102

- 4107 1880-CC 8 Over Low 7 MS65 NGC. VAM-6.** A Top 100 Variety. Lustrous and well preserved with a soft central strike and peripheral autumn-gold toning. One suspects that the Philadelphia Mint dispatched the leftover, overdated 1880 dies to Carson City since few folks in the Old West would notice the economy measure. PCGS# 7104

- 4108 1880-CC 8/7 Reverse of 1878 MS64 PCGS. VAM-7A.** A Hit List 40 Variety. Golden-brown and rose-red encompass the obverse. The reverse is brilliant aside from a peach-gold periphery. Sharply struck and lustrous with clean fields and only moderate grazes on the portrait. PCGS# 7110

- 4109 1880-O MS64 NGC.** Small or micro O. Peach-gold patina endows the borders of this lustrous and boldly struck Choice New Orleans silver dollar. No marks are noticeable except for a small bright area beneath the left (facing) wing. NGC ID# 2543, PCGS# 7114

- 4110 1880-O MS64 PCGS.** Micro or Small O. Light honey-gold toning visits portions of this lustrous and intricately struck near-Gem. The preservation is exceptional for the MS64 level, though PCGS is averse to bestowing the MS65 grade for this conditionally rare issue. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2543, PCGS# 7114*

- 4111 1880-S MS67+ PCGS. CAC.** Medium or small S. This high grade and fully struck Superb Gem is memorable for its splendid arc of cherry-red, lemon-gold, and jade-green toning on the upper left obverse. The remainder of the coin is brilliant. NGC ID# 2544, PCGS# 7118

- 4112 1880-S MS67+ PCGS. CAC.** Medium S. This stone-white Superb Gem type coin has flashy fields but falls just shy of attaining a Prooflike designation. A lens reveals only minor marks, mostly beneath the left (facing) wing. NGC ID# 2544, PCGS# 7118

- 4113 1880-S MS67+ PCGS. CAC.** Large S. Both sides display iridescent swaths of orange-gold, gunmetal-blue, and violet-red toning. Lustrous and pristine with an exemplary strike. A desirable silver type coin. NGC ID# 2544, PCGS# 7118

1880-S Dollar, Exceptional MS68

- 4114 1880-S MS68 PCGS.** Large S. Few coins, perhaps none, are found with such uniformly bright mint luster as the 1880-S dollar. Additionally, with the obvious strong quality control in the San Francisco mint in 1880, a large percentage were fully struck and preserved with problem-free surfaces. Such coins serve as perfect Morgan dollar type pieces. This is an all-brilliant example that is extraordinarily well-preserved. NGC ID# 2544, PCGS# 7118

- 4115 1881 MS65+ PCGS.** This high-grade 1881 shows the vibrant mint luster this issue is so well known for. The strike is strong throughout, there are no obvious marks, and not a speck of toning can be found. NGC ID# 2546, PCGS# 7124
- 4116 1881 MS64 Deep Prooflike NGC.** The high mintage 1881 is common in typical Mint State but Deep Prooflike examples are rare. The present flashy near-Gem displays rose-red and peach-gold peripheral toning. Certified in a prior generation holder. Census: 32 in 64 Deep Prooflike, 12 finer (12/13). NGC ID# 2546, PCGS# 97125
- 4117 1881-CC MS65 NGC.** Generous mint frost covers the devices of this Gem Carson City dollar, and a blush of rose toning extends across Liberty's face to the adjacent rim. The rest of the coin is brilliant and white. This smooth, vibrant dollar has only two or three small contact marks on the portrait. The fields are virtually without abrasions. NGC ID# 2547, PCGS# 7126
- 4118 1881-CC MS66+ PCGS.** Pleasing luster cascades over the untuned surfaces of this high-end Premium Gem. Well-struck throughout. NGC ID# 2547, PCGS# 7126

**1881-CC Dollar, MS67
Sharply Defined**

- 4119 1881-CC MS67 NGC.** Yellow-gold, electric-blue, orange-gold, and lavender toning cascades over the obverse of this Superb Gem, leaving the reverse essentially untuned. Sharply defined motifs include strong detail in the hair at Liberty's ear and the eagle's breast feathers. Lustrous surfaces are nicely preserved. NGC has seen only four pieces finer (12/13). NGC ID# 2547, PCGS# 7126
- 4120 1881-O MS65 PCGS.** Slight striking softness in the centers is no obstacle to eye appeal, as the brightly lustrous silver-white surfaces of this Gem prove. PCGS has graded 18 finer pieces (12/13). *Ex: Baltimore Signature (Heritage, 3/2009), lot 1275.* NGC ID# 2548, PCGS# 7128
- 4121 1881-O MS64 Deep Mirror Prooflike PCGS.** This Choice New Orleans dollar displays reflective fields and an exemplary strike. Brilliant save for a patch of gray on the left reverse. Smooth aside from one faint graze on the cheek. Minor die doubling is evident on Liberty's nose. PCGS has graded 13 numerically finer examples (12/13). NGC ID# 2548, PCGS# 97129
- 4122 1881-O MS64 Deep Mirror Prooflike PCGS.** Near-Gem is the finest example of a DMPL 1881-O that most collectors are likely to encounter; PCGS and NGC combined have seen fewer than 20 finer (1/14). Sharp detail is apparent on the satiny devices that stand out against the deeply mirrored fields. A few light grazes barely preclude Gem status. NGC ID# 2548, PCGS# 97129
- 4123 1881-O MS64+ Deep Mirror Prooflike PCGS. CAC.** The 1881-O Morgan dollar is slightly scarce in MS64, with the Deep Mirror Prooflike designation, but finer grades are very rare. This well-detailed example displays frosty devices and deeply reflective fields that show only minor signs of contact. PCGS has graded 13 numerically finer examples (12/13). NGC ID# 2548, PCGS# 97129
- 4124 1881-S MS67+ PCGS. CAC.** An arc of crimson, forest-green, and yellow-gold patination is concentrated along the lower border of this sharply struck S-mint Morgan. Nicely preserved, including a relatively smooth cheek and neck. NGC ID# 2549, PCGS# 7130

- 4125 1882 MS66 NGC.** A brilliant Premium Gem, frosted on the portrait with thick cartwheel luster surrounding sharply struck devices. Only a few tiny, scattered abrasions exist. This date is difficult to find any finer, with PCGS and NGC combined certifying just 15 examples in a higher numeric grade (12/13). NGC ID# 254A, PCGS# 7132

1882 Dollar, Richly Toned MS66+

- 4126 1882 MS66+ PCGS. CAC.** Only a few hundred high-grade 1882 dollars have been preserved. In our experience, most are brilliant or close to it. This is an unusual coin that displays deep shades of red and aquamarine on each side, but in differing patterns, with the expected bright mint frost shining through the layers of color. Fully struck and problem-free. NGC ID# 254A, PCGS# 7132
- 4127 1882 MS64 Deep Mirror Prooflike PCGS.** This Choice Mint State 1882 dollar has excellent eye appeal. The surfaces are brilliant and untuned with fully mirrored fields around the satiny white devices. PCGS has only certified 23 finer Deep Mirror Prooflike examples (12/13). NGC ID# 254A, PCGS# 97133
- 4128 1882-CC MS66+ PCGS. CAC.** Orange, crimson, and electric-blue patination runs over the obverse of this well-struck Morgan, and a well executed strike delivers strong definition to the design elements. Pleasing overall eye appeal. NGC ID# 254B, PCGS# 7134
- 4129 1882-CC MS65 Deep Mirror Prooflike PCGS.** Powerful mirrors shine through occasional champagne-gray shadings. The coin is decisively struck with amazing eye appeal. A handful of stray marks in the fields are consistent with the Gem designation. *Ex: 2011 FUN Sale (Heritage, 1/2011), lot 5919* NGC ID# 254B, PCGS# 97135
- 4130 1882-CC MS65 Deep Mirror Prooflike PCGS.** The essentially untuned surfaces of this gorgeous Gem display pronounced field-motif contrast. A solid strike imparts sharp detail to the devices, including strong detail in the hair over Liberty's ear. PCGS has graded fewer than 70 pieces finer (1/14). NGC ID# 254B, PCGS# 97135
- 4131 1882-O MS65 PCGS.** Plentiful in lower grades, the 1882-O Morgan dollar is rare above the MS65 level. This delightful Gem is well-detailed and brightly lustrous, with pleasing surfaces under shades of attractive champagne-gold toning. PCGS has graded 31 numerically finer examples (12/13). NGC ID# 254C, PCGS# 7136
- 4132 1882-O MS65 PCGS.** The essentially untuned surfaces of this Gem display partially prooflike fields that offer modest contrast against the sharply struck satiny motifs. The few grade-consistent marks do not disturb. Extremely difficult to locate any finer. NGC ID# 254C, PCGS# 7136
- 4133 1882-O MS65 Prooflike PCGS.** The richly frosted design elements of this delightful Gem are sharply detailed throughout and the deeply mirrored fields show just a few minor contact marks. Population: 38 in 65 Prooflike, 2 finer (12/13). NGC ID# 254C, PCGS# 7137
- 4134 1882-O MS64 Deep Mirror Prooflike PCGS.** Pleasing field reflectivity ensures the eye appeal of this fully struck, stone-white, and clean-cheeked New Orleans dollar. Encapsulated in an old green label holder.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 254C, PCGS# 97137

4135 1882-O/S Weak MS64 PCGS. CAC. VAM-5. A Top 100 Variety. The “Broken” O over S VAM, which is scarcer than the more prominent VAM-4 O/S. This lustrous and nicely struck high-end near-Gem is brilliant aside from light golden patina on the cheek. PCGS# 87138

4136 1882-S MS67 PCGS. CAC. The obverse of this spectacular Superb Gem displays vivid shades of golden-brown and cobalt-blue toning, with the color confined to the peripheries on the reverse. The design elements are sharply detailed and vibrant mint luster shines through the patina. NGC ID# 254F, PCGS# 7140

4137 1883 MS66+ PCGS. CAC. A high-end Premium Gem with razor-sharp definition on all design elements and especially vibrant mint luster on both sides. The well-preserved surfaces show a few hints of attractive pink toning. NGC ID# 254G, PCGS# 7142

4138 1883 MS67 PCGS. Well-struck, clean, and frosty, this Superb Gem Morgan is untuned and virtually unabraded. A few small luster grazes are the only mentionable marks. Few are graded finer. Population: 94 in 67 (8 in 67+), 2 finer (12/13). NGC ID# 254G, PCGS# 7142

4139 1883-CC MS66+ PCGS. CAC. Frosted white with brilliant, silver luster, this splendid Premium Gem dollar is an exceptional example of this common, Carson City issue. The surfaces are free of all but a few isolated abrasions. A bold strike fully defines Liberty's hair and the eagle's feathers. An excellent coin for type and a good choice for Carson City specialists. NGC ID# 254H, PCGS# 7144

4140 1883-CC MS66 Deep Mirror Prooflike PCGS. VAM-8A. A brilliant and beautiful Carson City type coin. The strike is sharp and the preservation is exceptional. Certified in a green label holder. VAM-8A is interesting for its bold clash marks near the lip and neck of Liberty. NGC ID# 254H, PCGS# 97145

4141 1883-CC MS65 Ultra Deep Mirror Prooflike ANACS. VAM-5A. Ice-white devices provide exemplary contrast with the glassy fields. Peripheral walnut-brown and navy-blue patina is chiefly confined to the lower reverse margin. Nicely struck and well preserved. NGC ID# 254H, PCGS# 97145

1883-O Dollar, Gorgeous MS67

4142 1883-O MS67 NGC. CAC. The silver-gray surfaces of this gorgeous Superb Gem radiate intense luster and are sharply impressed, including the hair over Liberty's ear and the eagle's breast feathers. Close inspection reveals no marks worthy of note. Census: 37 in 67 (2 in 67 ★), 0 finer (1/14). NGC ID# 254J, PCGS# 7146

4143 1883-S MS62 PCGS. Splashes of golden-russet and forest-green endow this lustrous and nicely struck silver dollar. The fields are smooth though the cheek displays moderate marks. Certified in an old green label holder.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 254K, PCGS# 7148

1883-S Dollar, MS63 Bright Mint Luster, Light Toning

4144 1883-S MS63 PCGS. CAC. Light gold toning adorns this lustrous and sharply struck silver dollar. Pleasing for the grade despite the occasional faint field graze. The 1883-S is a much better date in mint condition, but it is overshadowed by the towering conditional rarity of the 1884-S.

Ex: Central States Signature (Heritage, 4-5/2009), lot 3025. NGC ID# 254K, PCGS# 7148

4145 1884-CC MS66 PCGS. The obverse has a frosty silver interior with broad waves of blue-green, gold, and violet toning around. While the reverse is more subdued, both sides of this Premium Gem are carefully preserved. NGC ID# 254M, PCGS# 7152

4146 1884-CC MS66+ PCGS. The 1884-CC Morgan dollar is always popular with date and mintmark type collectors alike. This high-end Premium Gem is sharply detailed and brightly lustrous, with pristine brilliant surfaces. NGC ID# 254M, PCGS# 7152

4147 1884-CC MS65 Deep Mirror Prooflike ANACS. Deep mirrored fields offset the satiny devices. Well-struck, including the hair over Liberty's ear. A very impressive Gem. NGC ID# 254M, PCGS# 97153

1884-O Dollar, Conditionally Scarce MS67

4148 1884-O MS67 PCGS. The 1884-O is an available date from a mintage of more than 9.7 million pieces and is popular with mintmark type collectors. Superb Gems such as the present offering are scarce and are virtually unavailable any finer. Lustrous, untuned surfaces are impeccably preserved. Population: 82 in 67, 1 finer (12/13). NGC ID# 254N, PCGS# 7154

4149 1884-O MS67 NGC. A smooth piece, largely satin-silver with only trifling softness on the hair over Liberty's ear. A few small flecks are scattered on each side. This New Orleans issue is extremely rare any finer. NGC ID# 254N, PCGS# 7154

4150 1884-O MS67 NGC. This flashy Superb Gem is boldly struck and well preserved. Although it seems brilliant at first glance, ice-blue and chestnut toning graces the fields. This New Orleans issue, though plentiful in lesser grades, is scarce as a Superb Gem and extremely rare any finer.

Ex: The Jack Lee Estate, Inventory (Heritage, 10/2008), lot 1260. NGC ID# 254N, PCGS# 7154

- 4151 1884-S AU58 NGC.** Although relatively common in Almost Uncirculated grades, a seemingly endless demand exists from collectors waiting for attractive AU examples. This example has reflective, semiprooflike obverse fields and a clean cheek on Liberty. The silvery-white surfaces display ample luster and well-defined devices, including nice detail in the hair over Liberty's ear and the eagle's breast feathers. Friction from circulation appears in the obverse fields along with a curving abrasion near the M of UNUM. NGC ID# 254P, PCGS# 7156
- 4152 1884-S AU58 NGC.** Semireflective fields, particularly on the obverse, with glimmers of gold and blue. Modest rub appears on the softly struck high points.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 254P, PCGS# 7156
- 4153 1884-S AU58 PCGS.** At first glance this lustrous, near-Mint Morgan appears Uncirculated, but close examination reveals friction in the left obverse field and some scattered abrasions that account for the grade. The coin is sharply struck and untuned with nearly full mint luster. Nice eye appeal for this issue in an affordable grade. NGC ID# 254P, PCGS# 7156
- 4154 1885-CC MS65 PCGS.** Pale and frosty silver with a great "cartwheel" to the luster. This well-defined Carson City dollar would fit well in a range of sets. NGC ID# 254S, PCGS# 7160
- 4155 1885-CC MS65 PCGS.** Rich olive-green and plum-mauve embrace this lustrous and refreshingly unabraded Gem. The strike shows minor inexactness at the centers. A low mintage Carson City issue. Encapsulated in an old green label holder.
Ex: Baltimore Signature (Heritage, 7/2003), lot 8618. NGC ID# 254S, PCGS# 7160
- 4156 1885-CC MS65 PCGS.** The obverse has streaks of dusky lavender color, while the reverse has dynamic bands of powder-blue, olive, violet, and gold patina. A nicely struck Gem with a nearly immaculate reverse and a well preserved obverse. A popular low-mintage Carson City issue. NGC ID# 254S, PCGS# 7160
- 4157 1885-CC MS64 Deep Mirror Prooflike PCGS.** Frosty motifs provide favorable contrast with the glassy fields. This low mintage Carson City Morgan is brilliant and well struck. The left obverse displays small marks. Encased in a green label holder. NGC ID# 254S, PCGS# 97161

1885-CC Dollar, Well-Struck MS65 Deep Mirror Prooflike

- 4158 1885-CC MS65 Deep Mirror Prooflike PCGS.** The deeply mirrored fields of this Gem highlight the frosty design elements. These are well-impressed, including the hair above Liberty's ear and the eagle's breast feathers. Untoned surfaces exhibit a few scattered light grazes that likely prevent an even finer numerical grade. NGC ID# 254S, PCGS# 97161
- 4159 1885-O MS67 PCGS.** A virtually pristine Superb Gem that boasts potent luster, a crisp strike, and medium walnut-brown and lilac toning. Outstanding quality for the New Orleans issue, which is commonplace in bagmarked Mint State but rarely seen so nice. Encapsulated in an old green label holder.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 254T, PCGS# 7162

- 4160 1885-O MS67 PCGS. CAC.** The mostly brilliant surfaces of this impressive Superb Gem show hints of pale pink toning and no mentionable distractions. The design elements are sharply detailed and vibrant mint luster adds to the outstanding eye appeal. PCGS has graded no numerically finer examples (12/13). NGC ID# 254T, PCGS# 7162
- 4161 1885-O MS67 PCGS. CAC.** Whispers of light gold color gravitate to the margins of this Superb Gem, and a solid strike delivers strong definition to the design features. Well preserved throughout. NGC ID# 254T, PCGS# 7162
- 4162 1885-S MS65 PCGS.** Whispers of gold color gravitate to the margins of this highly lustrous Gem. Well-struck except for the usual weakness in the centers. Very difficult to locate any finer. NGC ID# 254U, PCGS# 7164

1886 Dollar, MS67 Toned Obverse

- 4163 1886 MS67 PCGS. CAC.** A melange of low-intensity yellow-gold, lavender, cobalt-blue, and orange toning covers the obverse, leaving the reverse color free. Radiantly lustrous, nicely preserved surfaces with sharply struck design elements enhance the coin's pleasing eye appeal. NGC ID# 254V, PCGS# 7166
- 4164 1886 MS67 PCGS. CAC.** Deeply iridescent navy-blue, golden-tan, and violet-red toning alternates across the obverse. The reverse displays various shades of lemon-gold. Booming luster sweeps exceptionally smooth surfaces. NGC ID# 254V, PCGS# 7166
- 4165 1886 MS67 PCGS. CAC. VAM-1A.** A Top 100 Variety. Undesignated as such on the insert, but this is the "Line in 6" variety. Thoroughly lustrous, boldly struck, and essentially brilliant. The surfaces are remarkably close to pristine, even for the lofty MS67 level. NGC ID# 254V, PCGS# 7166
- 4166 1886 MS67 PCGS. CAC. VAM-11.** Golden-brown dominates the reverse and the central obverse, but the left obverse exhibits ocean-blue and cherry-red. Fully struck and thoroughly lustrous with exceptionally smooth surfaces. NGC ID# 254V, PCGS# 7166
- 4167 1886 3+2 Clashed Reverse MS67 PCGS. CAC. VAM-1C.** A Hot 50 Variety. Per VAMworld.com, VAM-1C features an "unusual offset of reverse sideways vee clash marks next to top of right wreath. Top set of sideways vee shows three closely grouped clash marks while lower group shows two with a fairly wide separation." This virtually immaculate Superb Gem is brilliant aside from a peach-gold obverse margin. PCGS# 134001
- 4168 1886-O MS62 NGC.** Perhaps as many as 6,000 bags (6 million coins) of this New Orleans issue were melted from Treasury reserves under terms of the 1918 Pittman Act, making the date much scarcer than its 10+ million-piece mintage would suggest. This example has the strike and eye appeal of a higher grade, but a series of small abrasions dot the left obverse field and Liberty's cheek, resulting in the assigned Mint State level. The coin is an attractive, brilliant-white example with cartwheel luster and pleasing mint frost on the devices. NGC ID# 254W, PCGS# 7168
- 4169 1886-O MS60 Prooflike NGC.** Distinctly reflective with no trace of wear. Generous gold and blue toning covers surfaces with shallow reed marks and a number of scuffs in the fields.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 254W, PCGS# 7169

4170 1886-S MS65 NGC. A few hints of greenish-gold and amber toning highlight the well-preserved surfaces of this attractive Gem. The design elements are well-detailed and frosty mint luster radiates from both sides. NGC has graded 14 numerically finer examples (1/14). NGC ID# 254X, PCGS# 7170

4171 1886-S/S MS62 Deep Mirror Prooflike NGC. VAM-2. The serifs of the mintmark are repunched on this better date Morgan dollar. Impressive cameo contrast is demonstrated between the icy motifs and the prominently mirrored fields. Scattered small marks correspond to the grade.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 254X, PCGS# 97171

4172 1887/6 MS62 NGC. VAM-2. A Top 100 Variety. The curve of the base of the underdigit 6 is present on both sides of the bottom of the 7. Brightly lustrous and well struck. Scattered light marks, especially on the obverse, determine the grade. NGC ID# 254Z, PCGS# 7174

4173 1887/6 MS64 NGC. VAM-2. A Top 100 Variety. A lightly toned and lustrous Choice representative. Nicely struck and carefully preserved. The bottom curve of a 6 straddles the base of the 7. A similar New Orleans variety is also known.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 254Z, PCGS# 7174

4174 1887/6 MS64 Prooflike PCGS. VAM-2. A Top 100 Variety. A curve from the base of an underdigit 2 bookends the bottom of the 7 in the date. Brilliant and lustrous with exemplary preservation for the MS64 level. Certified in a green label holder.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 254Z, PCGS# 7175

4175 1887/6-O MS62 PCGS. VAM-3. A Top 100 Variety. The curve of the bottom of the underdigit 6 is evident to the left and right of the base of the 7. Bright luster issues from essentially untuned surfaces. Several light scuffs, especially on the obverse, determines the grade. NGC ID# 2553, PCGS# 7178

4176 1887-S MS65 PCGS. Only a trace of gold patina visits the obverse but the reverse remains brilliant. Lustrous and precisely struck with a smooth reverse and minor portrait grazes. Housed in an old green label holder. NGC ID# 2554, PCGS# 7180

4177 1887-S MS65 NGC. Semiprooflike fields and a full strike make this an unusually appealing 1887-S dollar. The centers are brilliant-white and untuned. Circular purple-bronze toning appears on the margins amid strong cartwheel luster. Abrasions are limited to a few wispy lines and some tiny abrasions, none being significant. A beautiful Gem dollar. NGC ID# 2554, PCGS# 7180

4178 1887-S MS63 Deep Mirror Prooflike PCGS. The design elements of this impressive Select Morgan dollar are sharply detailed and richly frosted, while the brilliant fields are deeply reflective on both sides. A scattering of minor contact marks in the obverse fields explains the grade. Population: 25 in 63 Deep Mirror Prooflike, 22 finer (12/13). NGC ID# 2554, PCGS# 97181

4179 1888 MS66+ PCGS. CAC. VAM-1A. The N from IN is clashed in front of Liberty's neck. This lustrous high grade type coin is close to brilliant but displays faint tan-gray toning. Sharply struck and uncommonly free from marks. NGC ID# 2555, PCGS# 7182

4180 1888 MS66+ PCGS. CAC. Essentially untuned radiantly lustrous surfaces exhibit well-struck devices. A few minute grazes prevent an even finer grade. Population: 71 in 66+, 28 finer (12/13). NGC ID# 2555, PCGS# 7182

4181 1888 MS66 Prooflike PCGS. CAC. VAM-1A. The N from IN is clashed in front of Liberty's neck. This lightly toned and well struck silver dollar has pleasing field reflectivity and uncommonly smooth surfaces. Though a high mintage date, nonetheless rare in present quality. Population: 8 in 66 Prooflike, 0 finer (12/13). NGC ID# 2555, PCGS# 7183

1888-O Dollar, MS66+ Above-Average Strike

4182 1888-O MS66+ PCGS. This splendid high-end Premium Gem Morgan displays ebullient luster issuing from nearly color-free surfaces. The design features exhibit better definition than ordinarily encountered on this date, including partial definition in the hair at Liberty's ear. Both sides are very nicely preserved. Population: 11 in 66+, 0 finer (12/13). NGC ID# 2556, PCGS# 7184

1888-O Dollar, MS65 Deep Mirror Prooflike Conditionally Scarce

4183 1888-O MS65 Deep Mirror Prooflike PCGS. The 1888-O Morgan dollar is an available date in lower Mint State grades, but sharply struck Deep Mirror Prooflike Gems like the present coin are definitely scarce. Both sides are essentially untuned, and each reveals a few light grade-consistent ticks. Population: 60 in 65 Deep Mirror Prooflike, 4 finer (12/13). NGC ID# 2556, PCGS# 97185

4184 1888-O Doubled Die Obverse, Hot Lips AU55 ANACS. VAM-4. A Top 100 Variety. Liberty's profile is strongly die doubled. Long enshrined in the *Guide Book* and virtually unobtainable in Mint State. Light to medium golden-gray toning visits smooth and partially lustrous surfaces.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 7308

4185 1888-S MS65 PCGS. A notorious hoard date, the 1888-S had releases of stored bags primarily in 1942, 1956, and from the Redfield hoard in 1976. Even so, it remains scarce in high grades of Mint State. This brilliant-white Gem shows a hint of gold at the rims and smooth, lustrous surfaces. Only a few abrasions exist and the strike is sharp for the date. NGC ID# 2557, PCGS# 7186

4186 1888-S MS65 PCGS. An eye-catching, brightly frosted dollar. The surfaces are nearly flawless and display pleasing cartwheel luster on each side. This piece is entirely brilliant and sharply struck. A faint die crack runs from star 1 to the date. A relatively low mintage of 657,000 pieces was recorded, and the 1888-S is seldom seen in Gem Uncirculated condition. PCGS has certified only 25 coins finer (1/14). NGC ID# 2557, PCGS# 7186

4187 1889-CC VF20 PCGS. CAC. The 1889-CC is the rarest Carson City Morgan dollar. This attractive VF specimen retains much original design detail including about 70% of Liberty's hair lines. The pleasing gray surfaces are lightly abraded for the grade. NGC ID# 2559, PCGS# 7190

- 4188 1889-CC VF30 PCGS.** The feathers on the eagle's breast are worn, but many hairlines remain intact and Liberty's ear is well-formed on this pleasing VF30 example. The surfaces are lightly abraded for the grade. NGC ID# 2559, PCGS# 7190
- 4189 1889-CC VF35 PCGS.** A Choice VF example of this Carson City key, with lightly abraded lavender-gray surfaces that show highlights of greenish-gold. Much interior design detail remains intact, including Liberty's ear and most of the hair strands. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Minimally Marked XF40

- 4190 1889-CC XF40 PCGS.** Dusky silver-gray toning laced with traces of light gold is slightly deeper on the reverse of this XF CC-mint Morgan. Appropriately defined design elements are seen on both sides, each of which is minimally marked for a large silver coin that has seen some circulation. NGC ID# 2559, PCGS# 7190
- 4191 1889-CC — Improperly Cleaned — NGC Details. XF.** Dusky tan-brown and steel-gray toning drapes this hairlined and moderately granular key date Carson City dollar. Liberty's cheek and neck display a number of small marks, and a rim ding is noted at 6 o'clock. NGC ID# 2559, PCGS# 7190
- 4192 1889-CC — Reverse Scratched — NGC Details. XF.** Medium-intensity gray toning runs over both sides of this XF Details dollar. Fine scratches in the left field confirm the NGC disclaimer. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Well-Defined XF45

- 4193 1889-CC XF45 NGC.** The light to medium-gray surfaces of this Choice XF Morgan offer a few traces of luster in the protected areas, and the design features are well-defined despite high-point wear. This is an excellent choice for the Carson City collector desiring a nice circulated example. NGC ID# 2559, PCGS# 7190
- 4194 1889-O MS64+ PCGS.** Lustrous, silvery surfaces exhibit a better strike than typically encountered on a New Orleans issue. A few light grazes preclude Gem status. NGC ID# 255A, PCGS# 7192
- 4195 1889-O MS64+ PCGS.** Many examples of this issue have a mediocre strike and dull or indifferent luster. This coin, however, is only a bit soft over the ear and is alive with vibrant, frosted luster — much more than normally seen on this issue. The surfaces are brilliant-white with a touch of gold toning at the rims, and the coin displays exceptional eye appeal as confirmed by the PCGS Plus designation. A single, minor abrasion is hidden on the neck by Liberty's hair and there are no other marks of any significance. Scarce this fine. NGC ID# 255A, PCGS# 7192

- 4196 1889-O MS64 Prooflike PCGS.** This spectacular Choice example exhibits sharply detailed design elements with frosty texture that contrasts dramatically with the deeply reflective surfaces. The fields show the expected number of minor contact marks and hairlines for the grade. Population: 25 in 64 Prooflike, 11 finer (12/13). NGC ID# 255A, PCGS# 7193

- 4197 1889-S MS65 PCGS.** Flashy luster invigorates this Gem S-mint piece that shows just a wisp of light gold-tan color. The few minute marks are within the confines of the designated grade. NGC ID# 255B, PCGS# 7194

- 4198 1889-S MS65 PCGS.** The silver-gray surfaces of this Gem possess nice luster and exhibit well defined design motifs; the hair above Liberty's ear shows partial definition. Neither side reveals significant marks. The '89-S is difficult to locate any finer; PCGS has graded 65 coins better, a number of which are likely resubmissions (12/13). NGC ID# 255B, PCGS# 7194

- 4199 1889-S MS65 PCGS.** Brilliant, snow-white surfaces and nice mint frost on the portrait give this Gem Morgan dollar excellent eye appeal. Strong cartwheel luster radiates from smooth, reflective silver fields. Just 700,000 pieces were minted of this popular San Francisco date. NGC ID# 255B, PCGS# 7194

- 4200 1889-S MS65 PCGS. VAM-7.** The mintmark is repunched, most clearly inside the upper loop. This lower mintage Gem displays narrow peripheral bands of autumn-gold and blue-green toning, though the fields and motifs are snow-white. NGC ID# 255B, PCGS# 7194

- 4201 1890 MS65 PCGS.** This sharply detailed Gem displays brilliant surfaces with vibrant mint luster and just a few signs of contact. PCGS has certified only a single coin in a higher numeric grade (12/13). NGC ID# 255C, PCGS# 7196

- 4202 1890 MS65 PCGS.** Despite a large mintage of nearly 17 million business strikes, Gem examples of this issue are quite scarce and it is extremely rare any finer. This example has soft, sea-green toning surrounding pearl-gray centers, with lustrous, orange-gold margins and central accents. The strike is bold, with a few minor surface abrasions disguised by the prevalent toning. PCGS and NGC have combined to certify just 6 pieces in a higher numeric grade (1/14). NGC ID# 255C, PCGS# 7196

- 4203 1890-CC MS64 PCGS.** Brightly lustrous and sharply detailed with no singularly mentionable marks and outstanding eye appeal. A truly high-end specimen of this popular Carson City issue. Ex: *Dallas Signature* (Heritage, 12/2004), lot 7589. NGC ID# 255D, PCGS# 7198

1890-CC Gem Dollar Rare Any Finer

- 4204 1890-CC MS65 PCGS.** Dusky golden-gray patination blushed with whispers of yellow-green and red crosses both sides of this Gem, each of which displays soft mint luster. This well-struck piece shows partial delineation in the hair over Liberty's ear. Close examination reveals no significant marks. Very rare any finer. NGC ID# 255D, PCGS# 7198

**1890-CC Dollar, MS65
Rare Any Finer**

4205 1890-CC MS65 PCGS. Gem condition is likely the finest most collectors can hope to obtain of the 1890-CC dollar; PCGS and NGC combined have seen only 13 specimens grading higher (1/14). Silver-gray surfaces display pleasing luster and exhibit relatively well-defined design elements. A few light obverse grazes are consistent with the grade. NGC ID# 255D, PCGS# 7198

4206 1890-CC MS62 Deep Mirror Prooflike PCGS. A sharply struck example with deep mirrors and not too much field chatter (as normally encountered at this grade level). A tiny bit of gold toning at the rims frames the lightly frosted devices. NGC ID# 255D, PCGS# 97199

4207 1890-CC MS63 Deep Mirror Prooflike PCGS. VAM-3. The 90 in the date is repunched. A brilliant, well struck, and impressively mirrored representative of this better Carson City emission. Occasional small abrasions correspond to the designated grade. NGC ID# 255D, PCGS# 97199

4208 1890-CC MS64 Deep Mirror Prooflike PCGS. Although prooflike coins make up about 20% of the Mint State survivors of this date, relatively few have been certified as Deep Mirror Prooflike in near-Gem or finer condition. Deeply reflective fields of this example surround well-frosted devices for strong contrast. A sharp strike resides on lightly abraded, mirrored fields. The coin is untuned except for a touch of gold at the rims. Just 31 pieces are certified in a higher numeric grade by PCGS and NGC combined (1/14). NGC ID# 255D, PCGS# 97199

4209 1890-O MS65 PCGS. Out of more than 10 million business strikes, this is an exceptional example with a bold strike — only the slightest softness appears over Liberty's ear and the eagle is sharp. The luster is frosty and attractive over brilliant, untuned surfaces. Only minimal abrasions are seen on the clean fields and devices. This coin's eye appeal is suggestive of an even higher grade. PCGS has certified a mere 20 pieces numerically finer (1/14). NGC ID# 255E, PCGS# 7200

4210 1891 MS64+ PCGS. Both sides display vibrant luster and well-struck devices. Just a few marks short of Gem classification. NGC ID# 255G, PCGS# 7204

4211 1891 MS64+ PCGS. The 1891 Morgan dollar is a plentiful issue in MS64, but it becomes somewhat scarce at the Gem level, making this high-end Choice specimen a good balance of value and quality. The design elements are well-detailed and the surfaces are brightly lustrous. NGC ID# 255G, PCGS# 7204

4212 1891-CC MS64 PCGS. VAM-3. A Top 100 Variety. A lustrous example of the "Spitting Eagle" variety. Wisps of golden toning deny absolute brilliance. A well struck and carefully preserved near-Gem Carson City dollar. NGC ID# 255H, PCGS# 7206

4213 1891-CC MS64 PCGS. One of the more common Carson City issues, with more than 1.6 million pieces produced and several Treasury hoard releases in the 1940s and 1950s. This example is boldly struck, as opposed to some that have a rather flat strike for the issue. Intensely frosted, brilliant-white surfaces exhibit strong cartwheel luster. A few scattered abrasions — most noticeable on the neck truncation — account for the near-Gem grade of this attractive, frost-white dollar. NGC ID# 255H, PCGS# 7206

4214 1891-CC MS64 PCGS. VAM-3, Top 100 Variety. The "Spitting Eagle" variety. Silver-gray lustrous surfaces exhibit a few grade-defining marks on Liberty's cheek and neck and in the left (facing) obverse field. Nicely struck on the design features, except that the hair over Liberty's ear is weak. Diagonal roller marks are noted on the eagle's breast.

Ex: Long Beach Signature (Heritage, 9/2005), lot 5928. NGC ID# 255H, PCGS# 7206

4215 1891-CC MS64 NGC. VAM-3. A Top 100 Variety. This "Spitting Eagle" Carson City dollar has pleasing luster and uncommonly smooth surfaces for the MS64 grade. Mostly brilliant, though a dab of golden-brown and jade-green is on the obverse margin at 4 o'clock. NGC ID# 255H, PCGS# 7206

4216 1891-CC MS64+ PCGS. Lustrous surfaces show just a hint of soft reddish-gold at the upper-obverse margin. Scattered minute marks are within the parameters of the grade designation. NGC ID# 255H, PCGS# 7206

4217 1891-CC MS64+ PCGS. This all-brilliant dollar is fully struck throughout and remarkably clean for a Carson City issue. The fields display a semiprooflikeness that adds even more to the overall attractiveness of this piece. NGC ID# 255H, PCGS# 7206

**1891-CC Dollar, MS64 Deep Mirror Prooflike
Extremely Rare Any Finer**

4218 1891-CC MS64 Deep Mirror Prooflike PCGS. Satiny devices stand out against the deeply mirrored fields of this near-Gem. Both sides are nearly untuned save for a touch or two of faint tan color. Typically struck, in that the centers are a tad weak. A few scattered contacts and grazes determine the grade. The 1891-CC is seldom encountered in high grade with this finish. Population: 49 in 64 Deep Mirror Prooflike, 1 finer (12/13). NGC ID# 255H, PCGS# 97207

4219 1891-O MS64+ PCGS. Pale silver-blue over most of each side with green-gold peripheral elements that are far more obvious on the reverse. Softly struck on the obverse, as usually seen, but appealing nonetheless. NGC ID# 255J, PCGS# 7208

4220 1891-S MS65 PCGS. The obverse of this Gem is essentially brilliant while a few blushes of brownish-lavender visit the reverse. The design elements are well-struck, including partial definition in the hair above Liberty's ear. Lustrous surfaces are minimally marked. NGC ID# 255K, PCGS# 7210

4221 1891-S MS65 PCGS. Shades of lavender-gray, sea-green, and violet toning blanket the surfaces of this well-detailed Gem, with vibrant mint luster under the patina. A prize for toning aficionados. NGC ID# 255K, PCGS# 7210

4222 1892 MS64 PCGS. The design elements of this attractive Choice example are well-detailed, with just a touch of softness on the hair above the ear. The creamy surfaces show vibrant mint luster, with only minor signs of contact. NGC ID# 255L, PCGS# 7212

4223 1892 MS64 PCGS. Just a hint of light gold color adheres to the lustrous surfaces of this near-Gem. Well-struck save for the usual softness in the centers.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255L, PCGS# 7212

4224 1892 MS64+ PCGS. A highly lustrous and virtually stone-white near-Gem of this lower mintage and better Philadelphia issue. The strike shows only minor incompleteness over Liberty's ear, a trait that seemingly a constant on this issue. The cheek of Liberty displays only faint abrasions. NGC ID# 255L, PCGS# 7212

1892 Dollar, Lustrous MS65 Extremely Rare Any Finer

4225 1892 MS65 PCGS. The 1892 Morgan dollar is somewhat scarce in Gem and a major condition rarity any finer. Indeed, PCGS and NGC have graded a mere five pieces finer than MS65 (1/14). Intense luster cascades over both sides, unimpeded by splashes of deep cobalt-blue, orange, and lavender toning. The design elements are well-struck save for the weakness in the centers. NGC ID# 255L, PCGS# 7212

1892 Silver Dollar, MS65

4226 1892 MS65 ANACS. A frosty Gem, this 1892 Morgan dollar has brilliant silver surfaces with exceptional luster, showing splendid peripheral gold, blue, and lilac toning on both sides. Plentiful at this grade level, but nearly impossible to find in finer grades.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255L, PCGS# 7212

4227 1892-CC MS63 PCGS. VAM-8. The Far Date VAM with die fill on the 89 in the date. This well struck and lustrous scarcer date Carson City dollar has exemplary fields and is high end for the grade. Encapsulated in a green label holder. NGC ID# 255M, PCGS# 7214

4228 1892-CC MS63 NGC. A blush of plum-mauve toning graces the upper left obverse border of this otherwise brilliant Carson City dollar. A lustrous piece with clean fields and a few small facial marks.
Ex: Central States Signature (Heritage, 4/2007), lot 4865. NGC ID# 255M, PCGS# 7214

1892-CC Morgan Dollar, MS64 Lightly Represented in Treasury Releases

4229 1892-CC MS64 PCGS. Unlike many dates in the series, this popular Carson City issue did not surface in enormous quantities during the Treasury releases and GSA sales. This sharply detailed Choice specimen displays vibrant mint luster and mostly brilliant surfaces, with a dramatic spot of dark color on the central obverse. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS64 Prooflike Green Label Holder

4230 1892-CC MS64 Prooflike PCGS. VAM-2. The "CC Tilted Left" variety, also interesting for its numerous peripheral die cracks. A flashy Choice silver dollar with a good strike and scattered minor marks. Virtually absent from the GSA holdings, the 1892-CC is a semikey Carson City issue. Housed in a green label holder. NGC ID# 255M, PCGS# 7215

4231 1892-O MS64 NGC. Although weakly struck at the centers as are almost all 1892-O Morgans, this beautifully toned example makes up for it with nearly abrasion-free surfaces and impressive cartwheel luster. The two-sided toning displays crescents of electric-blue merging with violet and orange-gold, before subsiding into pleasing, pearly gold. A nicely balanced, near-Gem dollar for those who love multicolor toning. NGC ID# 255N, PCGS# 7216

4232 1892-O MS64 PCGS. Brilliant throughout with the usual soft mint luster. The all-important strike is weak in the centers, as almost always. Roller marks on the reverse and a single abrasion across the eyebrow of Liberty explain the grade. NGC ID# 255N, PCGS# 7216

4233 1892-S AU53 PCGS. Slivers of orange, electric-blue, and crimson cling to the rims of this AU53 Morgan that exhibits well-defined devices save for minor softness in the centers. Luminous surfaces are minimally abraded for a coin having seen some circulation. NGC ID# 255P, PCGS# 7218

4234 1893 MS64 PCGS. Only 378,000 Morgan dollars were struck at the Philadelphia Mint in 1893. This well-detailed Choice example displays vibrant mint luster over creamy surfaces that show minimal signs of contact. NGC ID# 255R, PCGS# 7220

4235 1893 MS60 Prooflike NGC. Splendid golden-brown, ocean-blue, and cherry-red toning endows the borders of this flashy low mintage silver dollar. Abrasions are minor for the grade despite a slender vertical mark on the cheek. Decidedly rare in prooflike format. Encased in a former generation holder.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255R, PCGS# 7221

- 4236 1893-CC — Improperly Cleaned — NGC Details. XF.** Glossy from a wipe and partly retoned caramel-gold. This semikey Carson City dollar is well defined and has only one noticeable mark, located on the second S in STATES. NGC ID# 255S, PCGS# 7222
- 4237 1893-CC XF45 NGC.** A Choice XF example of this important key, which is usually seen in VF grades. The ear is well-defined and most of Liberty's hair detail remains intact. The pleasing surfaces are toned in shades of champagne-gold and lavender-gray. NGC ID# 255S, PCGS# 7222
- 4238 1893-O AU55 PCGS.** Whispers of golden-tan adhere to the minimally marked surfaces of this Choice AU. Well-struck except for the usual weakness in the centers. NGC ID# 255T, PCGS# 7224
- 4239 1893-S Good 4 ANACS.** A cream-gray representative of the business strike series key. Smooth except for a few small marks on the portrait and a moderate obverse rim knock at 1 o'clock. Certified in an ANA cache holder.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255U, PCGS# 7226
- 4240 1893-S Good 4 PCGS.** Extensively worn but with intact (if wavy) rims. Gold-gray, pearl, and steel shadings appear in various places on surfaces that show a few old pin scratches but no genuinely worrying abrasions. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, Very Fine
ANA Cache Holder**

- 4241 1893-S VF20 ANACS.** Rich golden-brown, cream-gray, and gunmetal toning encompass this key date silver dollar. Marks are relatively minor, and the eye appeal is pleasing since many Very Fine examples have been dipped or cleaned. The diagnostic die line is visible at the top center of the T in LIBERTY. Certified in an ANA cache holder. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, AU Details
Rarest Business Issue**

- 4242 1893-S — Improperly Cleaned — NGC Details. AU.** The dove-gray surfaces are moderately hairlined. The fields are free from bagmarks though the cheek displays light abrasions. A slight rim nick is noted near 9 o'clock. The typical key date '93-S dollar grades VF to XF, but the present piece shows minimal wear and noticeable luster.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255U, PCGS# 7226
- 4243 1894 XF45 PCGS.** A Choice XF specimen of this low-mintage date, with much interior detail intact, including most of Liberty's hairlines and ear. The surfaces are lightly abraded and show pleasing pink and silver-gray toning. NGC ID# 255V, PCGS# 7228

- 4244 1894 XF45 NGC.** Glimmers of luster remain in the fields on this 1894 dollar, one of just 110,000 business strikes produced. Gold-accented silver-blue surfaces have scattered light abrasions and modest wear.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255V, PCGS# 7228
- 4245 1894 AU50 ANACS.** This better-date P-mint dollar shows light friction over each side, yet retains a remarkable amount of reflectivity in the fields. Pale rose-gray toning is seen on both obverse and reverse, but only faintly. A few light field marks are present, as expected for a coin with 10 points of circulation.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255V, PCGS# 7228
- 4246 1894 AU58 PCGS.** Nice remaining mint luster enhances the appeal of this near-Mint, semikey date. A few abrasions on the portrait and several minor rim marks limit the assigned grade. A small area of almond-brown toning appears on the reverse of this otherwise brilliant example. NGC ID# 255V, PCGS# 7228
- 4247 1894-O MS61 NGC.** A snowy-white, untoned example with pleasing luster over surprisingly unabraded surfaces. The strike is quite a bit above average for this issue, with only a touch of weakness at the centers. High-end for the conservative grade. NGC ID# 255W, PCGS# 7230
- 4248 1894-S MS63 PCGS.** Tobacco-brown toning enriches the margins of this lustrous better date silver dollar. The fields are smooth though the cheek and neck exhibit marks consistent with the grade. Encapsulated in a green label holder.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255X, PCGS# 7232
- 4249 1894-S MS63 PCGS.** A brilliant Select Mint State dollar, this 1894-S has bright silver surfaces with satin surfaces, and excellent eye appeal that results from the combination of reflective fields and lustrous devices. NGC ID# 255X, PCGS# 7232
- 4250 1894-S MS63 NGC.** Hints of golden-tan color visit highly lustrous surfaces on this Select S-mint. A well-executed strike imparts good detail on the design features. Minute obverse marks limit the grade.
Ex: Central States Signature (Heritage, 4/2007), lot 4922. NGC ID# 255X, PCGS# 7232
- 4251 1894-S MS63+ NGC.** A high-end Select example, with lustrous surfaces that show only minor signs of contact. The design elements are sharply detailed, with fine definition on the hair above the ear and the eagle's breast. NGC ID# 255X, PCGS# 7232
- 4252 1895-O AU50 ANACS.** The 1895-O is a highly respected, scarce O-mint dollar and is virtually unobtainable in the better grades of Uncirculated. This piece shows light, even friction over the devices and fields. The interior of each side is brilliant with a light accent of golden patina around the margins.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255Y, PCGS# 7236
- 4253 1895-O AU53 PCGS.** A lightly circulated Morgan dollar from a low mintage of 450,000 pieces, this coin shows just a trace of wear on the design elements and the lightly abraded surfaces are blanketed in attractive shades of greenish-gold toning. NGC ID# 255Y, PCGS# 7236
- 4254 1895-O AU53 ANACS.** Nearly color-free surfaces display slight traces of peripheral gold color. Traces of luster reside in the recessed areas. NGC ID# 255Y, PCGS# 7236
- 4255 1895-O AU53 PCGS.** Hints of light gray appear on the silver surfaces of this attractive dollar. Considerable luster remains on both sides with only a few scattered surface marks. A highly attractive example for the grade. NGC ID# 255Y, PCGS# 7236
- 4256 1895-O AU53 PCGS. CAC.** An evenly toned, light silver-gray example of this semikey issue with much peripheral mint luster still evident. The eye appeal is above average for the date, which displays a strong strike along with the expected abrasions from transport and circulation. Any silver dollar dated 1895 is eagerly sought, especially when it is an attractive and more affordable example such as this piece. NGC ID# 255Y, PCGS# 7236

- 4257 1895-O AU55 PCGS.** The 1895-O is infrequently offered in problem-free Uncirculated condition, which make nice, Choice AU pieces such as this one all the more attractive to collectors. The surfaces are untoned and noticeable traces of mint luster are seen on each side. Remarkably unabraded. NGC ID# 255Y, PCGS# 7236

**1895-O Dollar, AU58
Difficult to Obtain Any Finer**

- 4258 1895-O AU58 ANACS.** Considerable luster remains on both sides of this near-Mint New Orleans representative that displays a splash of soft gold color on the upper-right obverse. Generally well-defined, including some detail on the eagle's breast feathers. Very difficult to obtain in Mint State.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255Y, PCGS# 7236

- 4259 1895-S AU58 PCGS.** An attractive near-Mint specimen from a low mintage of 400,000 pieces, this coin shows just a trace of wear on the high points of the design. The pleasing surfaces show a blend of gold, gray, lavender, and amber toning, with most of the color on the obverse. NGC ID# 255Z, PCGS# 7238

1895-S Dollar, Sharply Struck MS61

- 4260 1895-S MS61 NGC.** Silver-gray surfaces display a degree of field-motif contrast, especially when the coin is tilted slightly beneath a light source. The design elements are well brought up, including the hair over Liberty's ear and the eagle's breast feathers.
From The Teich Family Collection. NGC ID# 255Z, PCGS# 7238

**1896 Morgan Dollar, MS67
Two Numerically Finer at PCGS**

- 4261 1896 MS67 PCGS.** The 1896 Morgan dollar is a scarce issue in MS67 condition, and finer coins are virtually unobtainable. This delightful Superb Gem displays well-preserved surfaces that radiate vibrant mint luster on both sides and display crescents of iridescent greenish-gold and cerulean-blue toning at the obverse border. PCGS has graded only two numerically finer examples (12/13). NGC ID# 2562, PCGS# 7240

- 4262 1896-O MS61 PCGS.** A whisper or two of gold color visits each side of this lustrous O-mint specimen. The centers are weak as usually seen. Scattered marks limit the grade. NGC ID# 2563, PCGS# 7242

- 4263 1896-O MS61 NGC.** Subtle gold-gray and pink tints enliven the surfaces of this modestly abraded O-mint dollar, a remarkable conditional rarity in higher Mint State grades. This Mint State piece is well-struck with solid eye appeal and good cartwheel luster.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2563, PCGS# 7242

- 4264 1897 MS66 PCGS.** A sensational Premium Gem with frosty silver surfaces that are virtually untuned. Exceptional preservation leads to grand eye appeal. NGC ID# 2565, PCGS# 7246

- 4265 1897-O MS61 PCGS.** Nearly full luster flows across the essentially untuned surfaces of this O-mint Morgan. Typically struck, including weakness in the centers. NGC ID# 2566, PCGS# 7248

- 4266 1897-O MS61 NGC.** Light peach accents visit otherwise silver surfaces. Great luster, though the portrait has a number of choppy and grade-defining marks.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2566, PCGS# 7248

- 4267 1897-O MS62 PCGS.** Dusky shades of golden-tan and lavender-gray toning blanket the surfaces of this MS62 Morgan dollar. The design elements are well-detailed and the lustrous surfaces show the expected number of minor contact marks for the grade. NGC ID# 2566, PCGS# 7248

**1897-O Morgan, MS63 PCGS
Former Registry Set Member**

- 4268 1897-O MS63 PCGS.** The luster is somewhat subdued (especially on the obverse) as often seen on this issue, but the strike is well executed. Mentionable abrasions are few. There are hints of smoke-gray and amber toning on both sides of this mostly untuned coin. Wispy die cracks connect many of the reverse letter tops. This coin is much superior to the "typical" 1897-O encountered in the marketplace, and is high-end for the grade. PCGS has graded 39 examples finer (1/06).

Ex: Leslie E. Lunsford Collection, #7 Current Finest Registry Morgan Dollars Basic Set, Circulation Strikes / Long Beach Signature (Heritage, 2/2006), lot 2284. NGC ID# 2566, PCGS# 7248

- 4269 1897-S MS66 PCGS.** The untuned surfaces of this Premium Gem yield booming luster and sharply struck devices, including the hair over Liberty's ear. A few minute ticks are within the confines of the grade designation. NGC ID# 2567, PCGS# 7250

- 4270 1897-S MS66+ PCGS. CAC.** Splashes of vibrant gold toning appear on both sides of this frosty and highly lustrous S-Mint dollar. Although Premium Gems are readily available, few possess the eye appeal of this one. PCGS has only certified 23 finer examples (12/13). NGC ID# 2567, PCGS# 7250

- 4271 1898-S MS65 PCGS.** Thought of as a common date during Treasury releases of the 1940s, 1950s, and early 1960s, collectors now know the 1898-S date is scarce in Gem condition and rare any finer. This example shows a layer of clear, orange-gold toning on the obverse with golden rims on the reverse over frosted silver surfaces. The strike is soft over Liberty's ear but sharp elsewhere. A pair of light reeding marks are seen on the obverse, but the remaining surfaces are nearly free of abrasions. NGC ID# 256A, PCGS# 7256

- 4272 1899 MS65 PCGS. CAC.** A semiprooflike Gem of this low mintage Philly issue. Boldly struck and virtually brilliant. Smooth save for a small abrasion beneath the first T in TRUST. Encased in a green label holder. NGC ID# 256B, PCGS# 7258
- 4273 1899 MS65 Deep Mirror Prooflike PCGS. CAC.** The rare coin that combines toning and deep mirrors, this Gem is fully reflective through blue and green-gold toning of varying intensity. Great eye appeal. Population: 50 in 65 Deep Mirror Prooflike, 11 finer (12/13). NGC ID# 256B, PCGS# 97259
- 4274 1899-O MS66+ PCGS. CAC.** Occasional gold-orange overtones are visible on the reverse of this otherwise pale silver-gray O-mint dollar. Peripheral die cracks around the eagle add interest. NGC ID# 256C, PCGS# 7260
- 4275 1900-O/CC MS64 NGC. VAM-11.** A Top 100 Variety. The diagonal die crack to the right of the date identifies the specific VAM. Original forest-green, golden-brown, and rose-red toning adorns the borders. High end for the grade despite a faint vertical mark on the eagle's belly. Certified in a prior generation holder. NGC ID# 256G, PCGS# 7268
- 4276 1900-O/CC MS65 PCGS. VAM-11.** A Top 100 Variety. Light tan toning adorns this lustrous and crisply struck Gem. The fields are smooth and the portrait shows only wispy marks. Certified in an old green label holder. NGC ID# 256G, PCGS# 7268
- 4277 1900-S MS65 NGC.** This frosty-white dollar displays brilliant, cartwheel luster and a strong strike. A few tiny abrasions exist, but no marks of consequence are seen on the coin. Liberty's cheek is clean and the eagle is well-defined. NGC ID# 256H, PCGS# 7270
- 4278 1900-S MS65 PCGS.** Pale silver luster cartwheels across each side of this turn-of-the-century San Francisco Gem. Just a touch of striking softness affects the hair over Liberty's ear. NGC ID# 256H, PCGS# 7270
- 4279 1900-S MS64 Prooflike PCGS.** Light gold toning visits the central obverse of this otherwise brilliant better date dollar. Nicely struck and lustrous with a few moderate reverse marks. Certified in a green label holder.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 256H, PCGS# 7271
- 4280 1901 AU58 PCGS.** Both sides of this near-Mint specimen retain considerable luster. Nearly color-free surfaces reveal a few minor circulation marks. NGC ID# 256J, PCGS# 7272
- 4281 1901 AU58 PCGS.** A small mark appears behind Liberty's mouth on this lightly worn Philadelphia Mint key silver dollar. Both sides have brilliant luster with untuned silver surfaces. NGC ID# 256J, PCGS# 7272
- 4282 1901 AU58 NGC.** The 1901 is notoriously elusive in Uncirculated grades. This lustrous example has light autumn-gold and apple-green toning at the margins. The left obverse is moderately marked. Encapsulated in a former generation holder. NGC ID# 256J, PCGS# 7272
- 4283 1901 AU58 PCGS.** The slightest trace of wear shows on the high points of this attractive Morgan dollar and the lustrous surfaces show a few minor abrasions, under attractive shades of pale gold toning. NGC ID# 256J, PCGS# 7272

**1901 Morgan Dollar, MS62
Well-Known Condition Scarcity**

- 4284 1901 MS62 NGC.** According to Bowers (1993): "Of all Philadelphia Mint business strike dollars, excepting the spectral 1895, the 1901 is the rarest in Mint State." This is a lovely, satiny example with russet-red and cobalt peripheral toning, and surfaces that are only lightly abraded on both sides.
Ex: Long Beach Signature (Heritage, 9/2008), lot 2966. NGC ID# 256J, PCGS# 7272

1901 Silver Dollar, MS62

- 4285 1901 MS62 ANACS.** Splashes of gold and iridescent toning appear on each side of this attractive Mint State 1901 silver dollar. A condition rarity in the series, this piece has satin luster with faintly reflective fields.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 256J, PCGS# 7272
- 4286 1901 Doubled Die Reverse AU50 NGC. VAM-3.** A Top 100 Variety. Designated as "14TF" on the NGC insert due to the double set of tailfeathers, but this *Guide Book* doubled die variety is better known in the hobby as the "Shifted Eagle." An untuned and unblemished example with substantial peripheral luster.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 7302

1901-O Dollar, Lustrous MS66+

- 4287 1901-O MS66+ PCGS. CAC.** The 1901-O Morgan can be located without too much difficulty in Premium Gem, but the certified population drops significantly after that. Pleasing luster emanates from the essentially untuned surfaces of this MS66+ specimen, and both sides are relatively well-struck with some definition apparent in the centers. Strong eye appeal is affirmed by the CAC sticker. NGC ID# 256K, PCGS# 7274
-

4288 1901-S MS64 PCGS. CAC. An appealing example of a popular issue. This attractive, Choice 1901-S Morgan dollar features vibrant mint luster and well-detailed devices. The surfaces show remarkably few contact marks for the grade, with the most noticeable mark being a short abrasion on Liberty's cheek. Struck on a well-prepared planchet without the parallel die striations that sometimes occur with this San Francisco date. NGC ID# 256L, PCGS# 7276

4289 1902-O MS65 Deep Mirror Prooflike ANACS. While common in MS65 with no contrast, the 1902-O is exceptionally challenging as a Deep Mirror Prooflike. Probably only a couple of dozen examples are known in Gem condition, and only one piece has been certified finer (1/14). The fields seen here are notably deep in their reflectivity and the devices are slightly but noticeably contrasted. The brilliant interior portions of each side are surrounded by multicolored toning at the rims.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 256N, PCGS# 97281

4290 1902-S MS64+ PCGS. A touch of violet toning appears near the rim of this otherwise blazing white and lustrous, near-Gem Morgan dollar. The obverse displays a clean cheek and unabraded fields. Only a small cluster of marks above the motto keep this attractive dollar from an even higher grade. NGC ID# 256P, PCGS# 7282

4291 1902-S MS64+ PCGS. CAC. Bold examples of this issue are highly valued since the typical 1902-S dollar is often lightly struck. This near-Gem example is sharp everywhere but the highest points of Liberty's hair. Untoned and brilliant, Liberty has a clean cheek with only a few minor abrasions in the left obverse field. The coin was struck on a striated blank, with diagonal die lines visible under magnification across the portrait and adjoining fields. A fully white, lustrous near-Gem. NGC ID# 256P, PCGS# 7282

1903 Morgan Dollar, MS67 Tied for Finest PCGS-Certified

4292 1903 MS67 PCGS. The 1903 Morgan dollar was a well-produced issue. Potent luster, virtually untoned surfaces, minimal abrasions, and a pleasing strike are among the attributes this Superb Gem representative possesses. This piece is tied as among the finest PCGS has graded, with none having earned a Plus designation (12/13). NGC ID# 256R, PCGS# 7284

4293 1903-O MS66 PCGS. A sharply detailed Premium Gem example of this erstwhile rarity, with vibrant mint luster and vivid shades of crimson and greenish-gold toning. Until it surfaced in large numbers in the Treasury releases of the 1960s, the 1903-O was one of the rarest dates in the Morgan dollar series. NGC ID# 256S, PCGS# 7286

4294 1903-O MS66 PCGS. The 1903-O was considered very rare prior to a 1962 Treasury release of sealed Mint bags. An outstanding example of this late New Orleans issue. Boldly struck, lustrous, and nearly immaculate. There is only a wisp of yellow-gold toning. NGC ID# 256S, PCGS# 7286

4295 1903-O MS66 NGC. A highly lustrous and solidly struck example that displays quality in every aspect. Only a handful of small marks affect the slightly hazy fields.
Ex: Long Beach Signature (Heritage, 2/2007), lot 5791. NGC ID# 256S, PCGS# 7286

4296 1903-S AU50 ANACS. Scarce in XF, AU, and Uncirculated grades, this 1903-S dollar has slight, even signs of friction over each side with noticeable areas of luster remaining around the devices. Rim toning is seen on both sides.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 256T, PCGS# 7288

4297 1903-S AU55 PCGS. This Choice AU Morgan dollar features lightly abraded lustrous surfaces under attractive shades of champagne-gold and lavender-gray toning. The design elements show just a touch of wear on the high points. NGC ID# 256T, PCGS# 7288

4298 1903-S AU55 ANACS. Substantial luster illuminates design elements of this better date silver dollar. Open areas are stone-gray though the borders display wheat-gold and navy-blue. Two small marks noted on the eagle's breast.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 256T, PCGS# 7288

1903-S Dollar, Lustrous AU58

4299 1903-S AU58 PCGS. The untoned surfaces of this near-Mint State Morgan display considerable luster. Strike weakness is apparent in the centers, the usual characteristic of this issue. The only mentionable abrasions are a couple of shallow, thin linear marks on Liberty's cheek. NGC ID# 256T, PCGS# 7288

1903-S Micro S Dollar, Choice XF VAM-2, Top 100

4300 1903-S Micro S XF45 PCGS. VAM-2. A Top 100 Variety. The Top 100 reference calls it a Small S, while PCGS and VAMworld.com refer to the same mintmark size as a Micro S. The undersized mintmark was likely from a punch intended for use on Barber quarters. Only a single reverse has the incorrect mintmark size, though any 1903-S is scarce. Almond-gold and slate-gray visit this moderately circulated and inoffensively abraded example. PCGS# 7306

- 4301 1904 MS65 ANACS.** The expected satiny mint luster is bright and mostly untuned with only a slight accent of golden patina around the margins. As expected, the centers are a bit softly defined. This Gem shows no large or mentionable abrasions. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 256U, PCGS# 7290

1904-S Dollar, Lustrous MS63

- 4302 1904-S MS63 ANACS.** Soft orange-gold color is slightly more extensive and deeper on the reverse of this Select Morgan. Pleasing luster envelops both sides, each of which exhibits fairly well-defined design features except for the usual weakness in the centers. The reverse is remarkably devoid of marks, while scattered light abrasions on the obverse prevent a higher grade. NGC ID# 256W, PCGS# 7294

- 4303 1921 MS66+ PCGS. CAC.** A high-end Premium Gem from the last year of the Morgan design, this sharply detailed specimen displays well-preserved surfaces that radiate vibrant mint luster and show highlights of pale gold toning. PCGS has graded eight numerically finer examples (12/13). NGC ID# 256X, PCGS# 7296

- 4304 1921 MS65 Prooflike PCGS.** Undeniably prooflike with highly reflective fields on both sides of the coin, this Morgan dollar is fully struck and attractive. A couple of small, milky toning spots are seen on the obverse, but the coin is remarkably unabraded for the grade. Liberty's cheek is unmarked and smooth with mint frost providing nice contrast. Population: 13 in 65 Prooflike, 2 finer (12/13). NGC ID# 256X, PCGS# 7297

- 4305 1921-D MS66 PCGS.** The 1921-D Morgan dollar is slightly scarce at the MS66 level, but finer examples are conditionally very rare. This impressive Premium Gem features well-detailed design elements and vibrant mint luster throughout. PCGS has graded seven numerically finer examples (12/13). NGC ID# 256Y, PCGS# 7298

- 4306 1921-D MS66+ PCGS.** The 1921-D Morgan dollar is a prime condition rarity in grades above the MS66 level, making this high-end Premium Gem an especially good balance of value and quality. This coin is sharply detailed and lustrous, with pleasing shades of pale gold toning. PCGS has graded seven numerically finer examples (12/13). NGC ID# 256Y, PCGS# 7298

PROOF MORGAN DOLLARS

- 4307 1879 PR61 PCGS.** Ex: Teich Family Collection. A sharply detailed proof, with deeply reflective brilliant fields that show fewer contact marks than expected for the grade. A few hints of golden-
tan toning visit the pleasing surfaces.
From The Teich Family Collection. NGC ID# 27Z2, PCGS# 7314

**1880 Morgan Dollar, PR63 Cameo
Borderline Deep Cameo Contrast**

- 4308 1880 PR63 Cameo PCGS. CAC.** Ex: Teich Family Collection. Delicate rose toning appears on each side of this stunning Cameo proof. The contrast on this Select example is bold, and it is a borderline Deep Cameo example. Population: 12 in 63 Cameo, 82 finer (12/13).
From The Teich Family Collection. PCGS# 87315

**1880 Morgan Dollar, PR64 Cameo
Popular Early Date in Proof Format**

- 4309 1880 PR64 Cameo PCGS.** Struck from the VAM-13 dies, a relatively large percentage of proof 1880 dollars show cameo contrast. This piece displays sparkling deeply reflective mirrors with even mint frost over the devices. At first glance this fully struck near-Gem appears brilliant, but closer examination shows just a hint of pale patina. Population: 36 in 64 Cameo, 46 finer (12/13). PCGS# 87315

- 4310 1881 PR61 PCGS. CAC.** Ex: Teich Family Collection. Deeply reflective fields with slightly contrasted devices. The strike is absolutely full in the centers. The interior of each side has just a hint of pale reddish patina that deepens around the margins.
From The Teich Family Collection. NGC ID# 27Z5, PCGS# 7316

1881 Morgan Dollar, PR64 Cameo
Medium-Patinated Obverse

- 4311** 1881 PR64 Cameo PCGS. Splashes of medium-intensity cobalt-blue and lavender drape the obverse of this near-Gem but do not significantly impede the strong field-motif contrast, especially when the coin is tilted just slightly beneath a light source. Sharp definition characterizes the design elements, and just a few minor grazes prevent Gem status. Population: 28 in 64 (2 in 64+) Cameo, 22 finer (12/13). PCGS# 87316

1882 Morgan Dollar, PR63 Cameo

- 4312** 1882 PR63 Cameo PCGS. CAC. Ex: Teich Family Collection. A fully brilliant Select Cameo proof, this piece has wonderful field-to-device contrast. Both sides show moderate, grade-limiting hairlines with minuscule contact marks. Population: 21 in 63 Cameo, 59 finer (12/13).
From The Teich Family Collection. PCGS# 87317

1883 Morgan Dollar, PR63

- 4313** 1883 PR63 PCGS. CAC. Ex: Teich Family Collection. Although there is no designation, this lovely Select proof 1883 Morgan dollar has noticeable field-to-device contrast on both sides, with bold design definition and excellent eye appeal. Both sides are brilliant and untoned.
From The Teich Family Collection. NGC ID# 2727, PCGS# 7318

1883 Dollar, PR64
Mild Field-Device Contrast

- 4314** 1883 PR64 PCGS. Whispers of cobalt-blue, lavender, and orange cling to the margins of this near-Gem Proof, leaving the central areas essentially untoned. Mirrored fields display mild contrast with the sharply struck devices. Some wispy hairlines that show up in the fields under magnification preclude Gem status. Population: 65 in 64 (1 in 64+), 41 finer (12/13). NGC ID# 2727, PCGS# 7318

1884 Morgan Dollar, PR63
Lightly Toned and Brightly Reflective

- 4315** 1884 PR63 PCGS. CAC. Ex: Teich Family Collection. The 1884 proof Morgan dollar boasts a nominal mintage of 875 pieces. This impressive Select specimen displays sharply detailed design elements and deeply mirrored fields with hints of lavender and pale gold toning. Population: 49 in 63, 82 finer (12/13).
From The Teich Family Collection. NGC ID# 272B, PCGS# 7319

1884 Morgan Dollar, PR66
Rich Multicolor Toning

- 4316** 1884 PR66 NGC. From a nominal mintage of 875 pieces, the 1884 proof Morgan dollar is seldom encountered at the Premium Gem level. This delightful specimen features sharply detailed design elements and deeply reflective fields under vivid shades of cerulean-blue and lavender-gray toning. Eye appeal is outstanding. Census: 19 in 66 (1 in 66 ★), 3 finer (1/14). NGC ID# 272B, PCGS# 7319

4317 1885 PR61 PCGS. Ex: Teich Family Collection. Accents of golden-tan, gray, and turquoise toning visit the lightly marked surfaces of this attractive proof, with sharply detailed design elements and deeply reflective fields.
From The Teich Family Collection. NGC ID# 27ZE, PCGS# 7320

4318 1887 PR62 PCGS. Ex: Teich Family Collection. Silver interiors with kaleidoscopic gold-orange and blue toning near the rims. The reverse has appreciable contrast, though not to the Cameo level.
From The Teich Family Collection. NGC ID# 27ZG, PCGS# 7322

4319 1887 PR62 PCGS. Ex: Teich Family Collection. Needle-sharp definition is evident on all design elements of this attractive proof and the deeply mirrored fields show hints of greenish-gold and cerulean-blue toning.
From The Teich Family Collection. NGC ID# 27ZG, PCGS# 7322

4320 1888 PR60 ANACS. Still clearly recognizable as a proof striking, the deeply mirrored fields still flash brightly through the hazy reddish-gray patina that is seen over each side. The strike is just a bit soft over the ear of Liberty.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 27ZH, PCGS# 7323

4321 1888 PR60 PCGS. Ex: Teich Family Collection. Mostly silver on the interiors with golden rim toning and a few dabs of deeper claret and violet. Extensive hairlines affect the obverse fields.
From The Teich Family Collection. NGC ID# 27ZH, PCGS# 7323

4322 1890 PR62 PCGS. Ex: Teich Family Collection. Appreciably contrasted, though not to Cameo levels. Light gold-gray interiors yield to deep violet and crimson at the rims. Hairlines through the obverse fields are visible to the unaided eye.
From The Teich Family Collection. NGC ID# 27ZK, PCGS# 7325

4323 1891 PR62 PCGS. CAC. Ex: Teich Family Collection. The obverse is beautiful and displays orange-gold toning at the periphery. The reverse has peach border toning along with a broad gray granular diagonal streak between 5 and 11 o'clock. The strike shows minor blending at the centers.
Ex: Consignment R.L. Wilson, Chicago (Stack's, 10/1959), lot 263.
From The Teich Family Collection. NGC ID# 27ZL, PCGS# 7326

4324 1892 PCGS Genuine. Proof. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a proof specimen with Uncirculated details that has been repaired and smoothed. Liberty's cheek and upper neck have been smoothed and nearby design elements are glossy. The left obverse field is hairlined.
From The Teich Family Collection. NGC ID# 27ZM, PCGS# 7327

4325 1893 PR62+ Cameo PCGS. CAC. This attractive proof Morgan dollar exhibits well-detailed design elements with a rich coat of mint frost that provides bold cameo contrast with the deeply reflective fields. The surfaces show a few minor hairlines and hints of pale gold toning. Population: 7 in 62 (1 in 62+) Cameo, 41 finer (12/13).
From The Teich Family Collection. PCGS# 87328

4326 1894 — Impaired Proof — PR55 ANACS. Housed in an ANA cache holder, this proof silver dollar was presumably spent by an heir but did not remain in circulation long before its proof finish was noticed. Crisply struck and still flashy despite minor wear at the centers. Traces of ocean-blue luster dominate the borders.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2577, PCGS# 7329

1894 Morgan Dollar, Boldly Struck PR62

4327 1894 PR62 PCGS. Ex: Teich Family Collection. Brilliant surfaces display just an occasional touch of gold color at the obverse margin of this PR62 specimen. The design elements are boldly impressed throughout. Some wispy hairlines in the fields prevent a finer grade.
From The Teich Family Collection. NGC ID# 2577, PCGS# 7329

1896 Morgan Dollar, PR63 Cameo

4328 1896 PR63 Cameo PCGS. Ex: Teich Family Collection. This impressive Cameo proof Morgan dollar has exquisite field-to-device contrast with brilliant, untoned silver surfaces. Faint lines in the fields on both sides are expected for the grade. Population: 9 in 63 Cameo, 38 finer (12/13).
From The Teich Family Collection. PCGS# 87331

1897 Silver Dollar, PR63 Cameo

4329 1897 PR63 Cameo NGC. An impressive Cameo proof, this Select specimen is fully brilliant with no evidence of toning on either side. The surfaces are clear and pleasing, showing faint grade-limiting lines. The strike is bold as expected. This is the only PR63 Cameo example that NGC has certified, although they have graded a number of finer pieces.
From The Teich Family Collection. PCGS# 87332

4330 1898 PCGS Genuine. Proof. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a proof specimen with Uncirculated details that has been lacquered. Mostly brilliant though the lacquer has toned light tan-brown near the chin. A sharply struck proof Morgan with cameo contrast. The fields display wispy hairlines.
From The Teich Family Collection. NGC ID# 27ZW, PCGS# 7333

- 4331 1899 Genuine ANACS. Proof.** Fully struck and luminous devices contrast with mirrored fields. Glimpses of pumpkin-gold and jade-green adorn the margins. Rotation beneath a light reveals parallel hairlines across both sides.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 27ZX, PCGS# 7334

**1899 Morgan Dollar, PR62
Only 846 Pieces Struck**

- 4332 1899 PR62 PCGS. CAC.** Ex: Teich Family Collection. Only 846 proof Morgan dollars were struck in 1899. This impressive proof displays deeply mirrored fields and razor-sharp definition on all design elements. The surfaces show a few minor hairlines and contact marks and hints of greenish-gold toning.
From The Teich Family Collection. NGC ID# 27ZX, PCGS# 7334

- 4333 1900 PR63 PCGS.** Ex: Teich Family Collection. A fully struck specimen with noticeable cameo contrast despite pastel apricot-gold, lilac, and jade-green patina.
*Ex: Public Auction Sale (Stack's, 5/1957), lot 602.
From The Teich Family Collection. NGC ID# 27ZY, PCGS# 7335*

- 4334 1901 PR60 NGC.** Both sides have a chromelike gleam with only minor toning in caramel and gold at the margins. The fields show extensive hairlines.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 27ZZ, PCGS# 7336

- 4335 1902 PR62 PCGS.** Ex: Teich Family Collection. This attractive PR62 Morgan dollar displays the all-brilliant finish used on proof coins, beginning in 1902. The fields are deeply reflective and the design elements are sharply detailed throughout. A few minor hairlines and contact marks define the grade.
From The Teich Family Collection. NGC ID# 2822, PCGS# 7337

- 4336 1903 PR62 PCGS.** Ex: Teich Family Collection. Both sides have a chromelike gleam and light golden patina. Horizontal slide marks on Liberty's portrait account for the grade.
From The Teich Family Collection. NGC ID# 2823, PCGS# 7338

1903 Dollar, Toned PR64

- 4337 1903 PR64 PCGS.** Medium cobalt-blue, lavender, and orange-gold patination bathes this near-Gem but does not hinder the brightness reaching out from the proof surfaces. Razor-sharp detail shows on the devices. This piece yields pleasing technical quality and aesthetic appeal. Population: 67 in 64, 70 finer (12/13). NGC ID# 2823, PCGS# 7338

**1904 Morgan Dollar, PR63
Low Proof Mintage of 650 Pieces**

- 4338 1904 PR63 PCGS.** Ex: Teich Family Collection. Only 650 proof Morgan dollars were struck in 1904. This charming Select example displays sharply detailed design elements and deeply reflective fields with dappled gray and golden-tan toning on the reverse and hints of pale gold on the obverse.
From The Teich Family Collection. NGC ID# 2824, PCGS# 7339

**1904 Morgan Dollar, PR64
Near Cameo Quality**

- 4339 1904 PR64 PCGS. CAC.** Ex: Teich Family Collection. Although there is no designation, this Choice proof 1904 dollar has about as much contrast as can be found on the issue, struck at a time when Mint officials discouraged the contrasting proof appearance. Both sides are brilliant with pristine surfaces that show minuscule contact marks, preventing a higher grade.
From The Teich Family Collection. NGC ID# 2824, PCGS# 7339

**1921 Morgan Dollar, PR62
'Zerbe' Proof, VAM-1AG**

- 4340 1921 Zerbe PR62 NGC. VAM-1AG.** Ash Harrison conducted research in 2009 on 1921 Morgans. Per VAMworld.com, "he determined that the same variety [VAM-1AG] tended to occupy PCGS and NGC holders labeled as Zerbe proofs." The variety is attributed by specific and distinctive die polish lines through the US in PLURIBUS. Reflective fields, a virtually full strike, and an absence of bagmarks all suggest specimen status. Untoned except for light tan-brown and powder-blue near the rims. In 1921, former ANA President Farran Zerbe lived in San Francisco, across the country from the Philadelphia Mint.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 257A, PCGS# 7341

PEACE DOLLARS

- 4341 1921 MS64 NGC.** Considerable detail shows on Liberty's central hair and the eagle is sharp, indicating an above-normal impression from the coining press. This near-Gem example is untoned and lustrous, with brilliant-silver surfaces and frostlike luster. A short abrasion on Liberty's cheek and a few other minor field abrasions define the grade of this appealing, high-relief Peace dollar. NGC ID# 2U4E, PCGS# 7356
- 4342 1921 MS65 NGC.** Essentially a one-year type with a mintage of just over 1 million pieces, few 1921 Peace dollars have survived in Gem or better grades due to a difficult strike and exposed, high-relief devices. This dollar is better struck than most Gem examples, showing only slight weakness at the centers. Few abrasions are seen on the clean, smooth fields and no distracting marks appear on the devices. Lustrous, frost-white surfaces tinged with a whisper of golden-gray toning deliver outstanding eye appeal. NGC ID# 2U4E, PCGS# 7356
- 4343 1922-D MS66 NGC.** This brilliant, untuned Gem is richly frosted with an especially sharp strike. The silver surfaces are bright and highly lustrous, while the few abrasions on either side of this example do not distract. Only 18 pieces are certified in a higher numeric grade by PCGS and NGC combined (12/13). NGC ID# 257D, PCGS# 7358
- 4344 1922-S MS65 PCGS.** Touched with golden color, this Gem's most significant flaws are minor luster grazes that hardly detract from the appeal. A nearly impossible coin to locate in finer grades. *Ex: Dallas Signature (Heritage, 11/2005), lot 3722.* NGC ID# 257E, PCGS# 7359
- 4345 1923 MS66+ PCGS. CAC.** Frosty silver with faint blushes of canary-gold at parts of the interiors. The obverse alone is of Superb Gem quality, though the reverse has a single substantial mark on the right (facing) wing. NGC ID# 257F, PCGS# 7360
- 4346 1923-D MS65 NGC.** Nearly 7 million Peace dollars were coined by the Denver Mint in 1923. Most promptly went into storage vaults, to be parceled out later during the late 1930s through the 1950s. This attractively toned, lustrous example displays lime-green and golden-rose toning over sharply struck surfaces. A single, thin abrasion travels from between the L and I of LIBERTY downward to the rim. Otherwise, the surfaces appear virtually unabraded. NGC ID# 257G, PCGS# 7361

1923-S Peace Dollar, MS65 Generous Eye Appeal

- 4347 1923-S MS65 PCGS.** Known for a strike with the dies spaced too far apart, the issue is scarce in Gem condition, and nearly impossible to find any finer. This example presents a decent obverse strike with above-average hair detail, but the reverse is soft and the eagle is bald in all the wrong places. The eye appeal, however, is great. Bright silver luster mingles with attractive orange, gold, and aqua toning. The fields display only a few minor abrasions. A visually impressive Peace dollar, PCGS and NGC combined have certified just 4 examples with a higher numeric grade (1/14). NGC ID# 257H, PCGS# 7362

- 4348 1924 MS66+ PCGS. CAC.** This high-end Premium Gem possesses highly lustrous surfaces and well-struck design elements. A few minor grazes might prevent an even finer grade. Population: (35 in 66+, 26 finer (12/13)). NGC ID# 257J, PCGS# 7363

1924 Silver Dollar, MS67 Outstanding Type Coin

- 4349 1924 MS67 NGC.** In typical Mint State the 1924 is plentiful. But Superb Gems are rare. The present silver dollar is pristine aside from faint grazes on the front wing. The lustrous surfaces are lightly toned powder-blue and almond-gold aside from a blush of forest-green and russet-brown near the eagle's rock. Encased in a former generation holder. NGC ID# 257J, PCGS# 7363
- 4350 1924-S MS64 PCGS.** An important condition rarity that is elusive in finer grades. This Choice Mint State dollar has frosty silver luster with wispy champagne patina and a crescent of rich gold toning at the upper obverse. *From The Teich Family Collection.* NGC ID# 257K, PCGS# 7364
- 4351 1925 MS66+ PCGS. CAC.** Snowy-white surfaces and nice, brilliant silver luster complement an exceptionally crisp strike on this glowing Peace dollar. Virtually no significant abrasions or contacts are seen on the pristine devices or fields. The eagle is sharp and frosty, as is Liberty's hair. This remarkable Premium Gem received the PCGS Plus designation for quality. NGC ID# 257L, PCGS# 7365
- 4352 1925-S MS64 PCGS.** Flashy luster invigorates this near-Gem, and a solid strike leaves strong detail on the design elements. A few minute marks on the nearly untuned surfaces preclude Gem classification. Higher-grade examples are very difficult to locate. NGC ID# 257M, PCGS# 7366
- 4353 1926 MS66 PCGS.** Wisps of freckled color dot the reverse of this radiantly lustrous Premium Gem and an impressive strike imparts sharp detail to the design features. Pleasing overall eye appeal. NGC ID# 257N, PCGS# 7367
- 4354 1926 MS66 NGC. VAM-3A.** The 6 in the date, the monogram, the ribbon ends, and the TR in TRVST are die doubled. A dull die gouge beneath the V in TRVST is also of interest. Light caramel-gold toning graces lustrous and uncommonly smooth surfaces. Census: 47 in 66, 1 finer (12/13). NGC ID# 257N, PCGS# 7367
- 4355 1926-D MS65 PCGS.** A lustrous lemon-gold Gem of this conditionally rare Denver emission. A lens reveals scattered tiny dark gray freckles. Certified in a first generation holder. NGC ID# 257P, PCGS# 7368
- 4356 1927 MS65 PCGS.** A splendid Gem with exceptional eye appeal, exhibiting dusky gold toning on its frosty silver surfaces. PCGS has only certified eight finer examples (12/13). *From The Teich Family Collection.* NGC ID# 257S, PCGS# 7370
- 4357 1927-D MS64 NGC.** Pale golden overtones grace parts of this otherwise silver-frost 1927-D dollar. A few shallow scrapes appear on each side, but an abrasion between two rays on the left reverse is the only mark of any depth. NGC ID# 257T, PCGS# 7371

- 4358 1927-D MS64 PCGS.** Lightly toned gold and blue with a silver base. The portrait is better-defined than usually seen and the all-around eye appeal is good.
From The Teich Family Collection. NGC ID# 257T, PCGS# 7371
- 4359 1927-D MS64 PCGS. CAC.** Charcoal-gray freckles pepper the lustrous surfaces of this D-mint Peace dollar, especially on the obverse. This is a nicely struck piece that is devoid of mentionable contacts. NGC ID# 257T, PCGS# 7371
- 4360 1927-S MS64 PCGS.** Softly frosted luster is silver on the interiors with gold and blue-violet notes at the margins. A few shallow scrapes on the portrait account for the grade.
From The Teich Family Collection. NGC ID# 257U, PCGS# 7372
- 4361 1927-S MS64 PCGS.** A brilliant and lustrous Choice example that has a good strike and refreshingly smooth surfaces. The lowest mintage San Francisco issue of the series. Housed in a green label holder. NGC ID# 257U, PCGS# 7372
- 4362 1928 MS64 PCGS. CAC.** The 1928 Peace dollar is a low-mintage key and this impressive Choice example displays vibrant mint luster under shades of pale gold toning. The design elements are sharply defined in most areas, with just a touch of softness on Liberty's hair. NGC ID# 257V, PCGS# 7373
- 4363 1928 MS64+ PCGS. CAC.** The only hint of color on this high-end near-Gem dollar is a minute splash of gold in the left obverse field. Intensely lustrous surfaces are sharply struck and minimally marked. NGC ID# 257V, PCGS# 7373
- 4364 1928-S MS64 PCGS.** Light almond-gold patina visits this lustrous Choice example. Unimportant abrasions are distributed. The lower obverse is clearly die doubled, a feature seen on most better grade 1928-S dollars.
From The Teich Family Collection. NGC ID# 257W, PCGS# 7374
- 4365 1934 MS65 PCGS.** Remarkable orange and fire-red dominate both sides of this late date Peace dollar. The centers are pearl-gray and the fields display glimpses of jade-green and violet. Minor contact on Liberty's jaw and the eagle's tail determines the grade. NGC ID# 257X, PCGS# 7375

1934 Dollar, Lustrous MS66

- 4366 1934 MS66 PCGS.** From a relatively low mintage of 954,057 pieces, the 1934 Peace dollar is a key date in the series. This issue is not too difficult to locate in lower Mint State grades but MS66 examples are scarce, and finer specimens are very rare. Radiant luster emanates from the well-cared for, untuned surfaces of this sharply struck piece. PCGS has seen a mere three coins finer (1/14). NGC ID# 257X, PCGS# 7375

1934 Peace Dollar, Solidly Struck MS66

- 4367 1934 MS66 PCGS.** A solidly struck example of this key date Premium Gem, which includes impressive detail in the hair at Liberty's ear. Close inspection reveals no significant marks on either side. Radiant luster exudes from untuned surfaces. NGC ID# 257X, PCGS# 7375

1934 Dollar, Bright and Satiny MS66

- 4368 1934 MS66 PCGS.** The surfaces are exceptionally clean on each side. So much so that it makes the viewer wonder how there can be four grades higher than this one. As expected, each side is satiny, and brightly so, with brilliance that is only interrupted by the faintest specks of pale golden (get out a loupe to see them). Just a wonderful example of this scarcer, late-date dollar. NGC ID# 257X, PCGS# 7375

- 4369 1934-S AU58 PCGS.** Attractive peripheral gold toning accompanies pale champagne patina on both sides of this attractive key-date representative.
From The Teich Family Collection. NGC ID# 257Z, PCGS# 7377

- 4370 1934-S MS61 PCGS.** Upon cursory inspection, this lustrous and lightly toned key date Peace dollar appears to be high grade. Closer evaluation reveals a pinscratch on the portrait. Certified in a green label holder. NGC ID# 257Z, PCGS# 7377

1934-S Dollar, Toned MS63

- 4371 1934-S MS63 PCGS Secure. CAC.** The 1934-S remains the Peace dollar with the greatest visibility and desirability for collectors, in spite of greater value placed now on strike rarities in high grades. This is a smooth MS63 that is covered with hazy gray-golden patina. The strike is sharp on the obverse and just a bit less-than-complete on the reverse. NGC ID# 257Z, PCGS# 7377

- 4372 1935-S MS65 PCGS.** Three rays beneath ONE. Booming luster and a good strike affirm the quality of this lightly toned and carefully preserved tan-gray Gem.
Ex: *Long Beach Signature* (Heritage, 6/2005), lot 7035. NGC ID# 2583, PCGS# 7379
- 4373 1935-S MS65 PCGS.** Three rays below ONE. Splashes of peach toning endow the margins of this otherwise cream-gray Gem. Nicely struck and lustrous with pleasing preservation.
From *The Teich Family Collection*. NGC ID# 2583, PCGS# 7379
- 4374 1935-S MS65 PCGS.** Both sides of this Gem are awash in bright luster, and each exhibits sharply struck design elements. Minimally marked and showing pleasing overall appearance. NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLAR

- 4375 1976-D Type One MS66+ PCGS. CAC.** Thick reverse letters identify the Type One Bicentennial dollar. Light golden patina visits lustrous and pristine surfaces. Traces of planchet texture, as made, are all that preclude an even finer grade. NGC ID# 258J, PCGS# 7420

COMMEMORATIVE SILVER

- 4376 1893 Isabella Quarter MS65 PCGS.** A melange of crimson, cobalt-blue, and silver-gray toning bathes the lustrous surfaces of this sharply struck Gem. Minimally abraded. NGC ID# 28HR, PCGS# 9220
- 4377 1900 Lafayette Dollar MS63 PCGS. DuVall 2-C.** Lovely powder-blue, lime-green, and golden-brown toning embraces this lustrous and sharply struck example. Moderate reverse field marks correspond to the designated grade. NGC ID# 28N8, PCGS# 9222
- 4378 1900 Lafayette Dollar MS63 PCGS. CAC. DuVall 1-B.** Apple-green, walnut-brown, and cherry-red fill the borders but the fields and motifs remain brilliant. Marks are inconsequential, and the coin is high end despite a faint fingerprint on the lower obverse.
From *The Teich Family Collection*. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, MS64 Exceptionally Smooth Surfaces

- 4379 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C.** Autumn-brown, plum-red, and forest-green enrich the peripheries of this lustrous and precisely struck Choice commemorative. The centers are stone-gray. Refreshingly free from abrasions. All Lafayette dollars were struck on a single day: December 14, 1899, the exact 100th anniversary of Washington's death. NGC ID# 28N8, PCGS# 9222
- 4380 1921 Alabama 2x2 MS65 PCGS. CAC.** Light chestnut patina endows this thoroughly lustrous and low mintage half dollar. The fields and smooth and Kilby's portrait displays only faint marks. Encapsulated in a green label holder. NGC ID# 28HS, PCGS# 9225

- 4381 1921 Alabama 2x2 MS66 NGC.** A Premium Gem representative of this variety with "2x2" in the right obverse field, a cash-grab in its day. Green-gold and light silver hues mingle on each side. Census: 90 in 66 (5 in 66+, 9 in 66 ★), 3 finer (12/13). NGC ID# 28HS, PCGS# 9225
- 4382 1921 Alabama 2x2 MS66 PCGS.** Hints of subtle light blue and champagne-gold color become visible only under magnification on the highly lustrous surfaces of this Premium Gem. Both sides are sharply struck and well preserved. Population: 87 in 66 (2 in 66+), 7 finer (12/13). NGC ID# 28HS, PCGS# 9225
- 4383 1936 Albany MS67 PCGS. CAC.** Splashes of golden-brown and tan are scattered throughout the obverse of this Superb Gem representative, while a few hints of the colors appear on portions of the reverse periphery. Pleasing luster and the absence of all but a few minuscule marks add to the appeal of this lovely piece. PCGS has awarded a higher numeric grade to a single example (12/13). NGC ID# 28HU, PCGS# 9227

1937 Antietam Half Dollar, Lustrous MS67+

- 4384 1937 Antietam MS67+ PCGS. CAC.** Lime-green and yellow-gold surfaces are visited by freckles of violet on the obverse of this radiantly lustrous high-end Superb Gem. The design elements are sharply impressed throughout, and neither side reveals significant abrasions. These attributes add up to great overall eye appeal. NGC ID# 28HV, PCGS# 9229
- 4385 1936 Arkansas MS66+ PCGS. CAC.** Gold-orange toning at the margins yields to silver at the centers. The strike is a trifle soft but the preservation is excellent. Good eye appeal for this issue with a four-figure mintage. NGC ID# 28HZ, PCGS# 9237
- 4386 1936-D Arkansas MS67 PCGS.** The highly lustrous surfaces reveal just a hint of faint tan color and are impeccably well preserved. The design features are well impressed. The Arkansas is an important condition rarity in the commemorative series. Population: 28 in 67 (1 in 67+), 1 finer (12/13). NGC ID# 28J2, PCGS# 9238
- 4387 1935-S Boone MS67 PCGS. CAC.** Ex: JFS-Young. Light blue central overtones yield to green-gold and yellow-orange near the rims. Well-defined for the issue and immensely appealing. Population: 25 in 67 (1 in 67+), 1 finer (12/13). NGC ID# 28JH, PCGS# 9260
- 4388 1936-D Boone MS67 PCGS.** The 1936-D Boone commemorative half dollar claims a small distribution of 5,005 pieces and this well-detailed Superb Gem is one of the finest survivors. This coin offers unmarked surfaces with satiny mint luster and light golden-tan toning. Population: 30 in 67 (4 in 67+), 0 finer (12/13). NGC ID# 28JN, PCGS# 9267
- 4389 1937 Boone MS67 PCGS.** Just 9,810 examples of the 1937 Daniel Boone half dollar were distributed. This representative retains much of the frosty mint luster seen on earlier issues of the series, with attractive silver-gray surfaces and a hint of orange-gold toning at the rims. Boldly struck and without abrasions, this Superb Gem is rare any finer. Population: 92 in 67 (8 in 67+), 3 finer (12/13). NGC ID# 28JR, PCGS# 9270

- 4390 1925-S California MS67 NGC.** Dappled gold-orange and blue overtones have a stronger contrast on the reverse. Both sides are broadly lustrous and beautiful. NGC ID# 28JY, PCGS# 9281
- 4391 1936-D Cincinnati MS67 PCGS.** Faintly silver-blue overall with a few speckles of gold-to-brown. A great Superb Gem from one of the most scandalous issues of the classic commemorative series. NGC ID# 28K2, PCGS# 9284

1936-D Cincinnati Half Dollar, Lightly Toned MS67

- 4392 1936-D Cincinnati MS67 PCGS Secure. CAC.** Splashes soft blue, lavender, and yellow-gold toning reside on the highly lustrous surfaces of this gorgeous Superb Gem. All of the design elements are well brought up. A few minute reverse marks are within the parameters of the grade designation. Population: 41 in 67 (2 in 67+), 1 finer (12/13). NGC ID# 28K2, PCGS# 9284
- 4393 1936-S Cincinnati MS66 NGC.** The obverse tends to the medium-gray and gold-orange, while the reverse has lighter pearl and canary shades. An uncommonly smooth example of this low-mintage classic commemorative issue. Census: 18 in 66 (1 in 66 ★), 4 finer (1/14). NGC ID# 28K3, PCGS# 9285

1936-D Columbia Half, MS68 Beautifully Toned

- 4394 1936-D Columbia MS68 NGC.** Rich olive-ruby and russet patina drifts mostly to the margins, though the center of the reverse displays a few wayward specks as well. Satiny luster shines beneath. The figure on the obverse actually represents Justice, though the statutory inscription near her reads LIBERTY. One of just 8,009 pieces coined, and numerically unsurpassed at both services, as of (1/14). NGC ID# 28K6, PCGS# 9292
- 4395 1893 Columbian MS66 PCGS. CAC.** A beautifully toned Premium Gem with autumn-gold, rose-red, and apple-green patination. The satiny surfaces are immaculate except for a wispy field line near the nose. Certified in a green label holder. NGC ID# 26H6, PCGS# 9297
- 4396 1893 Columbian MS66+ NGC. CAC.** An authorized mintage of 5 million pieces resulted in a net distribution of approximately 2.5 million half dollars (950,000 dated 1892, and 1,550,405 dated 1893). This 1893 survivor is wonderfully toned in multicolor hues of aqua, peach-gold, and pearl-gray with abundant luster over abrasion-free surfaces. A bold strike includes well-detailed centers. NGC ID# 26H6, PCGS# 9297
- 4397 1936 Gettysburg MS66 PCGS.** Attractive reddish-gold toning is slightly deeper in hue on the obverse of this intensely lustrous Premium Gem commemorative. Minimally marked, including the broad open shields on the reverse. NGC ID# 28KB, PCGS# 9305

- 4398 1936 Gettysburg MS66 PCGS.** Gold-to-orange overtones enrich much of each side, while other parts of this Premium Gem remain pale pearl-gray. A smooth and pleasing piece. NGC ID# 28KB, PCGS# 9305

- 4399 1936 Gettysburg MS67 PCGS Secure. CAC.** A medley of reddish-gold, lavender, ice-blue, and orange-gold toning cascades over the lustrous surfaces of this gorgeous Superb Gem. All design elements are sharply struck. NGC ID# 28KB, PCGS# 9305

- 4400 1922 Grant With Star MS64 PCGS.** A Choice example of the rare With Star variety. A net distribution of just 4,256 coins makes this a premier rarity in the classic commemorative series. Ignored by skeptical collectors when issued, a near-Gem Grant With Star half is always in demand today. This lustrous half dollar is only slightly soft at the centers with attractive blue toning on the reverse and silver-blue accents on the obverse. NGC ID# 28KC, PCGS# 9307

- 4401 1922 Grant With Star MS65 NGC.** The surfaces are bright and beautiful, snow-white on this brilliant Gem, a great-looking specimen for those who prefer untuned coins. A loupe reveals the extensive, swirling die polish lines the issue often displays, but no mentionable signs of contact appear on either side. The next grade level is far more elusive and pricey, making this a tempting potential acquisition. NGC ID# 28KC, PCGS# 9307

- 4402 1928 Hawaiian — Improperly Cleaned — NGC Details. Unc.** A moderately bright representative of the challenging Hawaiian type. Light chestnut-gold toning visits the borders and encompasses brilliant centers. Boldly struck and free from visible marks. NGC ID# 28KE, PCGS# 9309

- 4403 1928 Hawaiian MS61 NGC.** Luminous beneath deep blue, violet, and steel patina. Surprisingly few marks for an MS61 coin, though the high points are a touch soft. NGC ID# 28KE, PCGS# 9309

- 4404 1928 Hawaiian MS63 NGC.** Among the lowest mintages of the classic commemorative series, just 10,008 Hawaiian half dollars were produced. It is considered the scarcest and most prized issue of the series by many collectors. This example is virtually untuned, with only a whisper of lilac color at the perimeters. A few tiny obverse abrasions account for the Select Uncirculated grade. Otherwise, it is boldly struck and attractive. NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Half Dollar, MS64 Sharp, Lightly Toned

- 4405 1928 Hawaiian MS64 NGC.** Perhaps the most challenging commemorative to find in appealing Uncirculated grades, the Hawaiian Sesquicentennial half dollar is elusive in near-Gem condition such as this coin. Just 9,950 pieces were distributed for circulation. Many went into the hands of individuals (rather than dealers) and were tucked away as mementos or were spent. This example is sharply struck and essentially white, with hints of light-lilac patination. Many Hawaiian halves are pastel toned and colorful from their original packaging, but this one isn't. An unabraded example, softly lustrous and Choice. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half Dollar, MS64
Low-Distribution Commemorative Key**

- 4406 1928 Hawaiian MS64 PCGS. CAC.** The 1928 Hawaiian half dollar boasts a low distribution figure of 9,958 pieces and many of the coins were acquired by the general public at the time of issue, rather than numismatists. This sharply detailed Choice example displays well-preserved lustrous surfaces with hints of pale gold toning. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half Dollar, MS65
Olive-Green Patina**

- 4407 1928 Hawaiian MS65 PCGS. CAC.** An olive-green Gem representative of the rarest silver commemorative type. Precisely struck and coruscating with pristine fields and only minor contact on the motifs. Housed in an old green label holder. The (12/13) CAC MS65 Population is just 90 pieces. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Sesquicentennial Half, MS65
Lustrous, Lavender Accents**

- 4408 1928 Hawaiian MS65 PCGS. CAC.** An aesthetically pleasing Gem, with luminous silver-gray surfaces accented by pleasing tones of gold and lavender. The strike is sharp except for a touch of softness on Captain Cook's most prominent curls. The warrior chief is bold with well-detailed regalia and unabraded legs. The entire production process of the Hawaiian halves was a model of success — free of the shenanigans and boondoggles that characterized many commemorative issues. Not many pieces were minted (under 10,000 for distribution) but they were all sold and most were purchased by an appreciative audience of local residents and collectors. NGC ID# 28KE, PCGS# 9309

- 4409 1935 Hudson MS64 PCGS.** A low-mintage commemorative issue with just 10,008 pieces distributed, this near-Gem example is brilliant-white and lustrous, with a glint of gold at the rims. A few tiny abrasions on the obverse account for the grade, but Henry Hudson's *Half Moon* ship is sharply struck and in full sail without any blemishes. NGC ID# 28KE, PCGS# 9312

- 4410 1935 Hudson MS64 PCGS.** Autumn-brown and gunmetal-gray embrace this lustrous and unmarked near-Gem. Remnants of the planchet texture are noted on Neptune. Among the lowest mintage silver types. Encased in an old green label holder. NGC ID# 28KE, PCGS# 9312

- 4411 1935 Hudson MS65 NGC. CAC.** One of 10,008 pieces minted, many of which are of indifferent quality or appeal. This example is one of the relatively few survivors with charisma. Gold, orange, peach, and lavender-gray hues cover each side of this softly struck but luminous Gem. Solid overall eye appeal for a challenging design. NGC ID# 28KE, PCGS# 9312

- 4412 1935 Hudson MS66 PCGS.** Lustrous surfaces display light orange-gold and lavender patination. Sharply struck throughout and nicely preserved. NGC ID# 28KE, PCGS# 9312

- 4413 1935 Hudson MS66 NGC.** Pastel yellow and blue overtones visit each side of this brightly lustrous Premium Gem. Great eye appeal for the issue, though the strike is soft as always. NGC ID# 28KE, PCGS# 9312

- 4414 1935 Hudson MS66 PCGS. CAC.** Whispers of yellow-gold, lavender, and lime-green gravitate to the margins of this highly lustrous Premium Gem. Sharply struck and devoid of mentionable marks. Housed in a prior generation holder. NGC ID# 28KE, PCGS# 9312

**1921 Missouri Half Dollar, MS65
Superior Eye Appeal**

- 4415 1921 Missouri MS65 PCGS. CAC.** Golden-brown fields and dove-gray high points confirm the originality of this highly lustrous and magnificently preserved Missouri half dollar. The upper shoulder strap is indistinct but the remainder of the strike is crisp. Encapsulated in an old green label holder. NGC ID# 28KS, PCGS# 9330

- 4416 1921 Missouri 2x4 MS64 PCGS.** A sharply defined Choice Mint State example, this Missouri 2x4 half dollar exhibits iridescent splashes over brilliant silver luster on both sides. *From The Teich Family Collection.* NGC ID# 28KR, PCGS# 9331

- 4417 1921 Missouri 2x4 MS65 NGC.** A pleasingly toned Gem example of this Missouri variant meant to extract more money from the coin collectors of 1921. Toning is powder-blue at the margins with a quick fade toward gold-orange. NGC ID# 28KR, PCGS# 9331

- 4418 1923-S Monroe MS65 PCGS.** A nicely struck and highly lustrous cream-gray, chestnut-gold, and powder-blue example of this conditionally rare commemorative type. The Monroe Doctrine posed a handy centennial theme for promoting the American Historical Revue and Motion Picture Historical Exposition, held in Los Angeles in June 1923. NGC ID# 28KT, PCGS# 9333

- 4419 1936 Norfolk MS67+ NGC. CAC.** The 1936 Norfolk half dollar claims a nominal distribution of 16,936 pieces. This high-end Superb Gem is sharply detailed and brightly lustrous, under shades of pleasing pale gold toning. NGC ID# 28KV, PCGS# 9337
- 4420 1926-S Oregon MS67 PCGS Secure. CAC.** The Oregon Trail half dollar is one of the most appealing and popular issues in the silver commemorative series. This magnificent Superb Gem displays sharply detailed design elements and vibrant mint luster under shades of lavender-gray, amber, and golden-brown toning. PCGS has graded only five numerically finer examples (12/13). NGC ID# 28KX, PCGS# 9341
- 4421 1937-D Oregon MS68 PCGS.** An ivory and gold toned Superb Gem with additional iridescent toning. An extraordinary display. While studying the surfaces of this remarkable example, we hesitate only for a moment to consider what the single finer MS69 example must look like. Population: 48 in 68 (2 in 68+), 1 finer (12/13). NGC ID# 28L5, PCGS# 9347
- 4422 1938 Oregon MS67+ PCGS.** Ex: Gutttag Family. Attractively preserved with just a hint of golden color over bright silver surfaces. Excellent detail. Population: 97 in 67 (9 in 67+), 2 finer (12/13). NGC ID# 28L6, PCGS# 9348

**1938-D Oregon Trail Half, MS68
Stunning Preservation**

- 4423 1938-D Oregon MS68 PCGS.** The lightly toned, satiny surfaces show glints of cinnamon and gold more prominently at the rims on the stunningly well-preserved 1938-D Oregon Trail, one of the finest survivors from the original issue of about 6,000 pieces. A couple of finer coins are theoretically available, but the search will be long. Population: 40 in 68 (5 in 68+), 2 finer (12/13). NGC ID# 28L7, PCGS# 9349

**1938-D Oregon Trail Half Dollar, MS68
Superb Strike and Appeal**

- 4424 1938-D Oregon MS68 PCGS.** The 1938 Oregon Trail half dollars were the first to be issued as a set, with coins from all three mints: Philadelphia, Denver, and San Francisco. This example is the Denver issue, and apparently it is an early strike with extremely bold devices including full details on the Indian's hands and the high points of the Conestoga wagon. The rims are complete and well-struck. Although the 1938 issues have a reputation for grainy surfaces, this coin is extremely smooth and lustrous. The intensely silver surfaces are tinged by blue and gold toning, with hints of lilac near the rims. An exceptional Superb Gem and certainly one of the finest for its date and type. Population: 40 in 68 (5 in 68+), 2 finer (12/13). NGC ID# 28L7, PCGS# 9349

- 4425 1939 Oregon MS67 PCGS. CAC.** The tab-toned reverse displays peripheral sea-green and peach-red. This precisely struck and coruscating Superb Gem is mark-free and desirable. Encapsulated in a green label holder. Population: 94 in 67 (4 in 67+), 4 finer (12/13).
Ex: *Denver Signature (Heritage, 8/2006)*, lot 3902. NGC ID# 28L9, PCGS# 9352
- 4426 1915-S Panama-Pacific MS64 NGC. CAC. FS-502.** The mintmark is lightly but widely repunched north. Tan-gold and lime-green toning visits the margins of this satiny Choice commemorative. A lens fails to locate any visible marks. NGC ID# 26H7, PCGS# 9357
- 4427 1915-S Panama-Pacific MS65 PCGS. CAC.** A lovely Gem example of the 1915 Panama-Pacific half dollar with satiny mint luster under mingled shades of lavender-gray and champagne-gold toning. The design elements are well-detailed and the pleasing surfaces show few signs of contact. NGC ID# 26H7, PCGS# 9357
- 4428 1936 Rhode Island MS67 PCGS.** From a distribution of 20,013 pieces, this spectacular Superb Gem is one of the finest surviving Rhode Island half dollars. The well-detailed design elements and satiny mint luster are accompanied by pristine surfaces that show hints of lavender and greenish-gold toning. Population: 34 in 67, 0 finer (12/13). NGC ID# 28LE, PCGS# 9363
- 4429 1936 Robinson MS67 PCGS.** A glowing, frosted-white example of the Arkansas Centennial variant with Senator Joseph T. Robinson in portrait. A whisper of magenta and gold overtones cover the luminous silver surfaces of this Superb Gem example. Often carelessly handled by the Mint, this example is virtually without abrasions or weakness of strike. Extremely rare any finer. Population: 68 in 67 (1 in 67+), 2 finer (12/13). NGC ID# 28LJ, PCGS# 9369
- 4430 1935-S San Diego MS67 PCGS. CAC.** The obverse has gold-orange outer toning around a silver-blue interior, while the reverse's color pattern is near-opposite. Smooth, if a trifle softly struck. NGC ID# 28LK, PCGS# 9371
- 4431 1935-S San Diego MS67 PCGS. CAC.** Plum, crimson, and gold-orange arcs appear at the top and bottom of the obverse and reverse, leaving silver elsewhere. Only a small cut in the field to the left of the reverse tower precludes an even finer grade. NGC ID# 28LK, PCGS# 9371
- 4432 1926 Sesquicentennial MS65 PCGS. CAC.** A lustrous Gem displaying a light caramel-gold patina overall, closer examination of Washington's hair reveals tiny splashes of ice-gray, cherry-red, and lime-green color. As on all Sesquicentennial halves, the cheek of Washington displays the texture of the planchet. Only 8 examples have received higher numeric grades from PCGS (12/13). NGC ID# 28LM, PCGS# 9374
- 4433 1935 Spanish Trail MS65 PCGS.** Gold and blue overtones grace the broadly lustrous surfaces of this Spanish Trail Gem. A pleasing example of an issue that used a rebus of a cow's head to represent its subject, one Alvar Cabeza de Vaca. NGC ID# 28LN, PCGS# 9376

1935 Spanish Trail, Toned MS67

- 4434 1935 Spanish Trail MS67 PCGS.** One of the scarcest silver commemorative types, the Spanish Trail is also conditionally rare. The fields are extensive, particularly on the obverse, and examples tend to readily accumulate abrasions. However, this well-struck, lustrous Superb Gem is virtually pristine. The centers have milky-lavender patina, while the peripheries have hints of russet color. Ex: *New York Bullet Sale (Heritage, 7/2002), lot 1881*. NGC ID# 28LN, PCGS# 9376

1935 Texas Half, MS68 Tied for Finest Graded

- 4435 1935 Texas MS68 NGC.** The 1934-38 Texas Centennial halves make a delightful collecting specialty within the commemorative series, although the actual centennial of Texas' winning its independence from Mexico was in 1936. This Superb Gem NGC 1935 Texas half boasts frosty silver surfaces with no visible contact and just a hint of rose patina on each side. Census: 14 in 68, 0 finer (1/14). NGC ID# 28LR, PCGS# 9382
- 4436 1938 Texas MS67 PCGS. CAC.** The 1938 Texas half dollar boasts a small distribution of 3,780 pieces. This delightful Superb Gem is sharply detailed and brightly lustrous, with no mentionable surface flaws. Population: 52 in 67 (3 in 67+), 1 finer (12/13). NGC ID# 28M2, PCGS# 9394
- 4437 1938-S Texas MS67 NGC. CAC.** Faintly gold-gray overall with deeper orange and golden-brown elements at parts of the margins. This Superb Gem offers smooth eye appeal. Census: 85 in 67 (2 in 67+, 1 in 67 ★), 13 finer (1/14). NGC ID# 28M4, PCGS# 9396
- 4438 1946-D Booker T. Washington MS67 NGC. CAC.** Variegated golden-brown and stone-gray toning endow this shimmering and sharply struck Superb Gem. Pristine aside from the usual traces of planchet surface on Washington's cheek. Census: 65 in 67 (1 in 67+, 20 in 67 ★, 2 in 67+★), 5 finer (1/14). NGC ID# 28M8, PCGS# 9405

1947-S Booker T. Washington Half, MS67 Refreshingly Smooth Surfaces

- 4439 1947-S Booker T. Washington MS67 PCGS. CAC.** Ex: WPE-Young. Often found with untoned and somewhat abraded surfaces — even in high Mint State grades — this attractive Booker T. half is a departure. The surfaces have a pleasing mix of silver-gray luster and golden toning, with sky-blue and rose accents near the rims. It is especially well-struck for the issue with bold details on the portrait and a minimum of roughness at the chin and neck as always seen. One small mark exists on the forehead, but the surfaces are otherwise smooth and appealing. Population: 15 in 67, 0 finer (12/13). NGC ID# 28MC, PCGS# 9410
- 4440 1948-S Booker T. Washington MS67 PCGS.** One of an estimated 8,005 pieces distributed from a mintage of 20,005 pieces for this San Francisco issue. Light golden accents grace bright silver surfaces on this Superb Gem. Strong detail throughout, although a touch of the usual planchet roughness affects Washington's jaw. Population: 20 in 67 (2 in 67+), 0 finer (12/13). NGC ID# 28MF, PCGS# 9414
- 4441 1948-S Booker T. Washington MS67 PCGS. CAC.** Silver centers are pale with gold and blue-violet toning at the margins, more visibly on the reverse. A well-preserved example of an issue with a mintage of just 8,000 coins plus assay pieces. Population: 20 in 67 (2 in 67+), 0 finer (12/13). NGC ID# 28MF, PCGS# 9414
- 4442 1949 Booker T. Washington MS67 PCGS. CAC.** Ex: Heller, Young. The right borders display golden-brown, rose-red, and jade-green toning although a majority of the present lustrous Superb Gem is nearly brilliant. The surfaces are pristine but, as usual for the Booker T. Washington type, the portrait high points retain traces of the planchet texture. From a low mintage of 6,004 pieces. Population: 19 in 67, 0 finer (12/13). NGC ID# 28MG, PCGS# 9416
- 4443 1949 Booker T. Washington MS67 PCGS. CAC.** The Booker T. Washington commemorative half dollar is one of the poorest produced commemorative coins, displaying imperfect strikes, planchet defects, and bagmarks. Superb Gems such as the present coin are thus refreshing to see. Vibrant luster issues from impeccably preserved sharply struck surfaces. Just a touch of champagne-gold color is evident. Population: 19 in 67, 0 finer (12/13). NGC ID# 28MG, PCGS# 9416
- 4444 1949-D Booker T. Washington MS67 PCGS.** A lustrous, Superb Gem example of the 1949 Denver Mint issue with attractive, pearl-white surfaces and well-struck devices. Tied for the finest certified by either PCGS or NGC (12/13). NGC ID# 28MH, PCGS# 9417
- 4445 1949-S Booker T. Washington MS67 PCGS.** A brilliant-white Superb Gem with lustrous, untuned silver surfaces. This Booker T. Washington half is well-struck with virtually no abrasions on the smooth surfaces — unusual for an issue that often shows signs of careless handling by the Mint. No examples are certified numerically finer by either major service (12/13). NGC ID# 28MJ, PCGS# 9418

- 4446** 1949-S Booker T. Washington MS67 PCGS. CAC. A hint of champagne toning appears on the brilliant silver surfaces with impressive frosty mint luster and only a few scattered marks on each side, mostly remaining from the planchet before this piece was struck. This Superb Gem is tied for the finest certified at PCGS or NGC. Population: 35 in 67, 0 finer (12/13). NGC ID# 28MJ, PCGS# 9418

**1951 Booker T. Washington Half Dollar
MS67, Ex: Heller, Young**

- 4447** 1951 Booker T. Washington MS67 PCGS. CAC. Ex: Heller, Young. Beautifully toned high grade silver commemoratives bearing the Heller Collection pedigree first appeared in Heritage auctions in January 2004. The collection was apparently privately sold to a dealer in late 2003. The present lustrous Superb Gem displays richly dappled autumn-brown patina throughout both sides. As always for the issue, the portrait retains traces of the planchet surface. Population: 12 in 67 (2 in 67+), 0 finer (12/13). NGC ID# 28MN, PCGS# 9424

- 4448** 1951-D Booker T. Washington MS67 PCGS. CAC. The 1951-D Booker T. Washington half dollar claims a low distribution of just 7,004 pieces. This sharply detailed Superb Gem displays especially vibrant mint luster and pleasing shades of pale gold toning. Population: 22 in 67 (1 in 67+), 0 finer (12/13). NGC ID# 28MP, PCGS# 9425

- 4449** 1951 Washington-Carver MS66 PCGS. CAC. Dappled powder-blue, violet, emerald, and gold-orange hues enrich each side of this Washington-Carver half. Minor striking softness is of little concern to the overall eye appeal. Population: 69 in 66 (8 in 66+), 2 finer (12/13). NGC ID# 28MS, PCGS# 9430

COMMEMORATIVE GOLD

**1904 Lewis and Clark Dollar, MS65
Only Double-Headed Type**

- 4450** 1904 Lewis and Clark MS65 PCGS. An orange-gold Gem with hints of sea-green near the borders and profiles. Lustrous and nicely struck with exceptional preservation for the designated grade. Though dated 1904, the issue celebrates the 1905 Portland exposition instead of the 1904 St. Louis expo. Certified in a green label holder. NGC ID# 26HC, PCGS# 7447

**1904 Lewis and Clark Gold Dollar, MS65
Vibrant Luster, Bright Color**

- 4451** 1904 Lewis and Clark MS65 NGC. The 1904 Lewis and Clark gold dollar was not popular with numismatists at the time of issue, and many of the 10,025 pieces distributed went to the general public, rather than collectors. This attractive Gem displays well-detailed design elements and vibrant mint luster with well-preserved yellow and greenish-gold surfaces. NGC ID# 26HC, PCGS# 7447

1904 Lewis and Clark Gold Dollar, MS65

- 4452** 1904 Lewis and Clark MS65 NGC. The obverse of this example has cracks through some letters of PORTLAND. There are no readily apparent die defects on the reverse. Hints of rose color appear on the brilliant and highly lustrous yellow-gold surfaces of this Gem gold dollar. NGC ID# 26HC, PCGS# 7447

**1904 Commemorative Gold Dollar, MS65
Lewis and Clark**

- 4453** 1904 Lewis and Clark MS65 NGC. This extraordinary Gem represents the popular and elusive design with hints of rose and pale green coloration on its rich yellow-gold surfaces. Both sides have reflective fields that provide a nice backdrop for the satiny devices. Fully lustrous and highly attractive. The obverse has a short die crack from the top of the L in PORTLAND to the rim. The reverse has minuscule doubling on the top of the I in AMERICA. NGC ID# 26HC, PCGS# 7447

**1904 Commemorative Gold Dollar, MS65
First Year of the Lewis and Clark Type**

4454 1904 Lewis and Clark MS65 NGC. The obverse of this Gem has die cracks through the tops of some letters in PORTLAND. The reverse has faint cracks through UNITED. Hints of green coloration appear on the brilliant yellow surfaces of this highly lustrous gold dollar, with slightly reflective fields to enhance its eye appeal. NGC ID# 26HC, PCGS# 7447

4455 1915-S Panama-Pacific Gold Dollar MS66 PCGS. Authorized production of this commemorative gold dollar was 25,000 pieces, which were produced along with 34 assay coins. Of these, 15,000 were distributed and the rest melted. This Premium Gem example survived with abrasion-free surfaces and exceptionally lustrous, orange-gold surfaces. A few areas of brilliant, sky-blue toning highlight the reverse. It is a radiant gold dollar — fully struck and intensely beautiful. NGC ID# 26HE, PCGS# 7449

**1915-S Gold Dollar, MS67
Panama-Pacific Issue**

4456 1915-S Panama-Pacific Gold Dollar MS67 PCGS. This entry in the extensive series of gold and silver commemoratives issued for the Panama-Pacific International Exposition exhibits a canal worker on the obverse. That design has caused great confusion over the years as some have said the gentleman is a miner, and others have said he was a baseball player. Call it what you will, but this Superb Gem is a brilliant and lustrous yellow-gold beauty. Population: 53 in 67, 0 finer (12/13). NGC ID# 26HE, PCGS# 7449

4457 1915-S Panama-Pacific Quarter Eagle AU58 PCGS. Yellow-gold surfaces display considerable luster and are sharply struck. The few light circulation marks are not detracting. NGC ID# 26HK, PCGS# 7450

4458 1916 McKinley MS65 PCGS. The 1916 McKinley gold dollar claims a small distribution of 9,977 pieces. This well-detailed Gem offers well-preserved yellow and rose-gold surfaces with vibrant mint luster on both sides. NGC ID# 26HF, PCGS# 7454

4459 1916 McKinley MS65 PCGS. The 1916 McKinley gold dollar was the second commemorative to feature the revered president who was assassinated in 1901. This well-detailed Gem displays well-preserved orange-gold surfaces with vibrant mint luster on both sides. NGC ID# 26HF, PCGS# 7454

4460 1916 McKinley MS65 NGC. The design elements of this delightful Gem are well-detailed, with just a touch of softness on the hair. The unmarked orange-gold surfaces radiate vibrant mint luster on both sides, with outstanding eye appeal. NGC ID# 26HF, PCGS# 7454

4461 1916 McKinley MS65 NGC. The 1916 McKinley gold dollar was intended to fund a memorial to the slain president in his home of Niles Ohio. This spectacular Gem displays sharply detailed design elements and lustrous greenish-gold surfaces that show no mentionable distractions. NGC ID# 26HF, PCGS# 7454

4462 1917 McKinley MS64 NGC. Rich pumpkin-gold luster bathes this splendidly preserved Choice gold commemorative. Well struck aside from several peripheral letters. Housed in a prior generation holder. NGC ID# 26HG, PCGS# 7455

4463 1917 McKinley MS65 PCGS. Peach-red and olive-green toning endows this coruscating and pristine Gem. Nicely struck though the borders show selected incompleteness. Encased in a green label holder. NGC ID# 26HG, PCGS# 7455

4464 1922 Grant No Star MS64 NGC. This peach-gold near-Gem is close to pristine. The strike is sharp aside from customary incompleteness on the second tree trunk. Housed in a former generation holder. NGC ID# 26HJ, PCGS# 7458

**1922 Grant Gold Dollar, MS67
No Star Variant**

4465 1922 Grant No Star MS67 NGC. A Superb Gem example of this popular Laura Gardin Fraser design without the star above Grant's name. Unusually well-defined for the issue, particularly on the upper left part of the general-president's hair and the trees on the reverse. Rich butter-yellow color with glimpses of rose. NGC has graded five numerically finer examples (1/14). NGC ID# 26HJ, PCGS# 7458

4466 1922 Grant With Star MS64 NGC. An orange-gold near-Gem whose lustrous and unmarked surfaces ensure exemplary eye appeal. The strike is bold save for the tree trunk near the frame house window. Encased in a former generation holder. NGC ID# 26HH, PCGS# 7459

**1922 Grant Gold Dollar, MS67
With Star in Field**

4467 1922 Grant With Star MS67 PCGS. Lemon-gold toning is predominant but cedes to olive-green across portions of the portrait. Lustrous and virtually void of marks. Laura Gardin Fraser designed the type, along with its half dollar counterpart. Both have equal mintages of 5,016 pieces. Housed in a green label holder. NGC ID# 26HH, PCGS# 7459

4468 1926 Sesquicentennial MS65 PCGS. Celebrating the sesquicentennial of the signing of the Declaration of Independence, this issue was the last gold dollar commemorative of the classic era. This spectacular Gem exhibits sharply defined design elements and particularly vibrant mint luster with terrific eye appeal. NGC ID# 26HL, PCGS# 7466

- 4469 1926 Sesquicentennial MS65 PCGS.** The 1926 Sesquicentennial quarter eagle enjoyed a respectable distribution of more than 46,000 pieces. This well-detailed Gem offers vibrant mint luster and lightly marked orange-gold surfaces. NGC ID# 26HL, PCGS# 7466
- 4470 1926 Sesquicentennial MS65 NGC.** This well-detailed Gem example of the 1926 American Sesquicentennial quarter eagle shows just a touch of softness on the centers. The brightly lustrous yellow-gold surfaces show no significant flaws. NGC ID# 26HL, PCGS# 7466
- 4471 1926 Sesquicentennial MS65 NGC.** The 1926 Sesquicentennial quarter eagle is scarce in grades above the MS65 level. This sharply detailed Gem displays vibrant mint luster on both sides and the pleasing yellow-gold surfaces show no mentionable distractions. Overall eye appeal is terrific. NGC ID# 26HL, PCGS# 7466

MODERN ISSUES

- 4472 2000-W Library of Congress Bimetallic Ten Dollars MS70 PCGS.** The 2000-W Library of Congress ten dollar commemorative is the first gold/platinum bimetallic coin ever issued by the United States, with a mintage of just 6,683 pieces. This specimen is a technically perfect coin, with sharply detailed design elements, satiny mint luster, and virtually flawless surfaces. NGC ID# 28V5, PCGS# 9784
- 4473 2006-S Old San Francisco Mint Gold Five Dollar PR70 Ultra Cameo NGC.** A technically perfect example of this popular issue that portrays the old San Francisco Mint that survived the famous earthquake in 1906. The design elements are fully struck and the fields are deeply reflective, with no visible flaws. NGC ID# 28WB, PCGS# 21013

MODERN BULLION COINS

- 4474 1987 Silver Eagle MS70 NGC.** NGC rates this second-year silver American Eagle as technically faultless. A few tiny depressions in the fields are as-struck. NGC ID# 26J6, PCGS# 9808
- 4475 1993-P Silver Eagle PR70 Deep Cameo PCGS.** A technically perfect example of this popular issue, with fully struck frosty design elements that contrast profoundly with the deeply mirrored brilliant fields. The black-on-white cameo flash is spectacular when this coin is tilted in the light. NGC ID# 26JK, PCGS# 9867
- 4476 1999-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC.** A flawless and fully struck example from a mintage of 12,363 pieces, with darkly reflective mirrors and snow-white devices. The 1999-W platinum proof eagles are part of the Vistas of Liberty subset (1998 through 2002) and the only U.S. types that depict an alligator as the eagle soars above the Southeastern wetlands. NGC ID# 293P, PCGS# 99776
- 4477 2003-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS.** A technically perfect specimen of this one-ounce platinum proof American Eagle, with the new eagle and American flag reverse. This coin offers fully struck frosty design elements and deeply mirrored fields that produce startling cameo contrast. NGC ID# 26U7, PCGS# 921103
- 4478 2004-W Half-Ounce Platinum Eagle PR69 Ultra Cameo NGC.** One of only 5,063 proofs for this half-ounce platinum issue, and a virtually flawless Superb Gem. The surfaces appear without fault except for perhaps an extremely minor disturbance in the left reverse field. The devices are pristine with an extra heavy coat of thick mint frost. NGC ID# 293J, PCGS# 921106
- 4479 2006-W One-Ounce Silver Eagle, 20th Anniversary, First Strike MS70 PCGS.** Flawless surfaces are untuned on this 20th Anniversary Eagle. Unbelievable technical quality and aesthetic appeal. PCGS# 89991

COINS OF HAWAII

- 4480 1883 Hawaii Dollar AU53 PCGS. CAC.** Traces of luster are evident on both sides of this light grayish-silver Hawaii dollar. The usual strong strike is evident for this piece, produced on a standard silver dollar blank at the San Francisco Mint. PCGS# 10995

1959 Hawaii Statehood Medal, MS68 Only 36 Pieces Struck in Gold Medcalf 2MS-6

- 4481 1959 Hawaii Statehood Heraldic Art Gold Medal MS68 NGC. Medcalf 2MS-6.** Robert T. McNamara was the owner of Heraldic Art Co. and the issuer of various commemorative medals between 1959 and 1981. Per Medcalf, 36 pieces were struck in gold. Medcalf omits the fineness but it is presumably 18 karat, same as the companion Alaskan statehood medal. Satiny and immaculate with a full strike and apricot-gold toning.

GSA DOLLARS

- 4482 1878-CC MS62 NGC.** A brilliant and semiprooflike CC-mint GSA Morgan. The cheek and left obverse field display the expected number of small marks. Included with the lot is the box and certificate of issue, and also the outer mailed box, postmarked Oct. 19, 1973.
From The Teich Family Collection. PCGS# 407080
- 4483 1878-CC MS64 Prooflike PCGS.** This flashy Carson City GSA silver dollar is sharply struck and minimally abraded. Nearly stone-white, but the centers display slight tan toning. No box or certificate accompanies the lot. PCGS# 407080
- 4484 1880-CC MS65 PCGS. CAC. VAM-3.** Light golden-brown toning is chiefly confined to the borders. Lustrous and splendidly preserved. The eye appeal is exceptional despite moderate inexactness of strike at the centers. No box or certificate is included. PCGS# 407100
- 4485 1880-CC 8 Over Low 7 MS65 NGC. VAM-6.** A Top 100 Variety. Booming luster, smooth surfaces, and a hint of chestnut toning endow this overdated Carson City dollar. Minor blending of impression is noted at the centers. The box of issue is included but no certificate is present. PCGS# 407102
- 4486 1885-CC MS65 Deep Mirror Prooflike NGC.** This stone-white Gem has pleasing field reflectivity and an intricate strike. Moderate cameo contrast is evident. The fields are beautifully preserved. A popular low mintage Carson City issue. No box or certificate is included.
From The Teich Family Collection. PCGS# 497161

BETTS MEDALS

- 4487** 1702 Expedition to Vigo Bay AU55 NGC. **Betts-97**. Silver, 37 mm. A left-facing portrait of Queen Anna appears on the obverse of this medal. The reverse legend translates as, "The French and Spanish fleets taken and burnt," with "At Vigo, Oct. 12, 1702" appearing in the exergue. A view of Vigo harbor, including vessels burning within the harbor and ships before the entrance near a fort, is depicted on the reverse. Toned dove-gray with plentiful glimpses of sea-green luster. The fields display minor haymarks.
- 4488** 1758 Louisbourg Taken MS63 Brown NGC. **Betts-413**. Copper, 40 mm. This satiny medium brown representative is fully struck and exhibits only minor field imperfections. The fall of the Louisbourg fortress in modern-day Nova Scotia enabled the 1759 English conquest of Quebec.
- 4489** 1758 Louisbourg Taken MS64 Brown NGC. **Betts-413**. Copper, 40 mm. The French-held Fortress of Louisbourg, in present-day Nova Scotia, was captured by the British following a siege of less than two months. This commemorative medal displays ample orange-gold within the legends though the open fields and high relief motifs are mostly sea-green. The strike is precise. The cheek displays a small depression and minor contact.

**John Eager Howard Cowpens Medal
MS64 Brown, Betts-595
Paris Mint Restrike, Original Dies**

- 4490** Lt. Col. John Eager Howard at Cowpens MS64 Brown NGC. **Betts-595**. Struck from the original dies at the Paris Mint. Part of the Comitia Americana series. The edge is plain and concave. Incorrectly certified by NGC as an 1861 U.S. Mint striking. The chocolate-brown surfaces are fully struck and virtually void of contact. The fields have occasional faint fingerprint fragments.

SO-CALLED DOLLARS

- 4491** 1920 Wilson Dollar, Silver MS64 PCGS. **HK-449**. This popular variety commemorates the opening of the Manila Mint in the Philippines, at the time a territory of the United States. The obverse depicts a robust Wilson despite the recent stroke that kept him from public view. A beautifully preserved and lustrous example with dappled golden-brown, plum-red, and blue-green toning. *From The Teich Family Collection.*

**1901 HK-796A Leshar Dollar, MS61
Boyd Park, No Serial Number**

- 4492** 1901 Leshar Dollar, Boyd Park, No Serial Number MS61 NGC. **Z-10, HK-796A**. Boyd Park was a Denver, Colorado jeweler. HK-796, with an obverse serial number, is Rarity-6 while HK-796A, without a serial number, is Rarity-7 per the 2nd edition of Hibler-Kappen. All varieties of Leshar Referendum silver souvenir "dollars" are widely collected and vary from scarce to extremely rare. A mildly glossy almond-gold example with light horizontal hairlines and a small retained lamination on the mining scene.

MILITARY MEDAL

**(1889) Restrike General Anthony Wayne Military Medal
MS65 Brown, Julian MI-3**

- 4493** (1889) Restrike General Anthony Wayne MS65 Brown NGC. **Julian-MI-3**. Bronzed-Copper. 55 mm. A restrike from copy dies made by the U.S. Mint in 1887. The original dies -- which were used to strike the gold medal presented to honor General Wayne by President Washington in March, 1790 -- were lost during the 1800s until 1886, when Charles Barber wrote to Superintendent Daniel Fox that the dies were in hand. They were reported as being reproduced in the 1887 director's report. The U.S. Mint restrikes were struck in bronzed-copper between 1888 and 1904. Mint records show 47 Wayne medals were produced, and today the restrikes rarely offered. This Gem restrike is one of the 47 struck and displays attractive, chestnut-brown surfaces with a hint of red at the rims. The fields are smooth and reflective with prooflike qualities. The medal is fully struck and sharply detailed.

20TH CENTURY TOKENS AND MEDALS

1959 Alaska Statehood Medal, MS69
Only 24 Struck in 18 Karat Gold

- 4494** 1959 Alaska Statehood Heraldic Art Medal MS69 NGC. Gould-Bressett 107. This 18 karat gold medal from the Heraldic Art Co. features Secretary of State William H. Seward and has the diameter of a silver half dollar. Only 24 pieces were struck in gold, though an additional 5,000 silver examples were issued. A pristine and intricately struck canary-gold representative.

ERRORS

1906 Cent, MS65 Red and Brown
Struck 10% Off Center

- 4495** 1906 Indian Cent — Struck 10% Off Center — MS65 Red and Brown NGC. Cherry-red and cobalt-blue enrich this lustrous and pristine Gem. Struck off center toward 2:30 but the design is intact aside from the right-side dentils. A broad arc of unstruck surface is widest at 8:30. A high grade obsolete type example of the popular error category.

1957 Lincoln Cent, MS63
Struck on a Silver Dime Planchet

- 4496** 1957 Lincoln Cent — Struck on a Silver Dime Planchet — MS63 PCGS. This off-metal error is brilliant save for occasional blushes of peach patina. The strike shows expected incompleteness at the borders and on the O in ONE and the AM in AMERICA. A few minute flecks are scattered and each side has one brief thin mark.

1998 Cent, MS65 Red
Struck on Bonded Planchets

- 4497** 1998 Lincoln Cent — Struck on Bonded Planchets — MS65 Red NGC. 5.5 gm. Two cent planchets were fed together between a die pair. The force of the strike bonded both coins together and squeezed metal out where the various die collars allowed (the press likely had multiple sets of die pairs). A spectacular error that presumably needed some help to escape the Mint.

CERTIFIED MODERN PROOF SETS

- 4498** Five-Piece 1937 Proof Set PCGS. The coins are separately housed in PCGS holders with consecutive certification numbers. The set includes: **cent PR65 Red**, a magnificent orange-red Gem; **nickel PR66**, delicate olive-gold and ice-blue tints grace well struck surfaces; **dime PR65**, an undisturbed razor-sharp Gem with lightly variegated chestnut and stone-gray toning; **quarter PR65**, light to medium lilac and lime toning adorns this satiny Gem; and a **half dollar PR65**, fully struck and devoid of hairlines with smooth and milky butter-gold surfaces.

From The Teich Family Collection. (Total: 5 coins)

- 4499** Five-Piece 1940 Proof Set PCGS. The coins are housed in separate PCGS holders with consecutive certification numbers. The set includes: **cent PR64 Red and Brown**, beautiful honey-gold centers with cherry-red and orange near the rims; **nickel PR65**, straight steps reverse, attractively toned canary-gold, olive-green, and powder-blue; **dime PR65**, fully struck, toned wheat-gold and gunmetal-blue; **quarter PR65**, flashy and fully struck with dappled straw-gold patina; and a **half dollar PR66**, pastel lemon and sky-blue toning drapes this satiny and undisturbed Premium Gem.

From The Teich Family Collection. (Total: 5 coins)

- 4500** Five-Piece 1941 Proof Set PCGS. The coins are housed in separate PCGS holders. The set includes: **cent PR64 Red and Brown**, a radiant peach near-Gem with an exemplary strike and scattered minute flecks; **nickel PR64**, a fully struck olive-green Choice nickel with distributed russet specks; **dime PR65**, sharply struck, medium straw-gold, stone-gray, and aquamarine toning; **quarter PR65**, a flawless and milky olive-green specimen; and a **half dollar PR65**, No AW monogram, radiant and needle-sharp with minimal toning aside from rose-red on the left obverse margin.

From The Teich Family Collection. (Total: 5 coins)

- 4501** Six-Piece 1942 Proof Set PCGS. The coins are housed in separate PCGS holders with consecutive certification numbers. The set includes: **cent PR64 Red**, a pumpkin-gold obverse is paired with a peach and olive reverse; **Type One nickel PR66**, wheat-gold and powder-blue shades grace immaculate surfaces; **Type Two nickel PR65**, richly toned jade-green, orange-gold, and lilac-red; **dime PR66**, fully struck and flashy with glimpses of charcoal toning; **quarter PR65**, smooth and sharply struck with pastel golden toning and peripheral ebony freckles; and a **half dollar PR65**, steel-blue and almond-gold alternate across this satiny Gem.

From The Teich Family Collection. (Total: 6 coins)

PROOF SETS

- 4502 Four Unopened and Uncertified 1952 to 1955 Proof Sets.** The lot includes one proof set each for the years 1952, 1953, 1954, and 1955. The sets are still sealed in their cardboard holders as originally issued. No returns will be accepted for this lot.
From The Teich Family Collection. (Total: 4 coins)
- 4503 Four Unopened and Uncertified 1952 to 1955 Proof Sets.** The lot includes one proof set each for the years 1952, 1953, 1954, and 1955. The sets are still sealed in their cardboard holders as originally issued. No returns will be accepted for this lot.
From The Teich Family Collection. (Total: 4 sets)
- 4504 Eight Unopened and Uncertified 1954 to 1955 Proof Sets.** The lot includes (3) 1954 and (5) 1955 proof sets, still sealed in their cardboard holders as originally issued. No returns will be accepted for this lot.
From The Teich Family Collection. (Total: 8 sets)

MINT SETS

- 4505 Uncertified 1949 Double Mint Set.** The coins individually grade between MS63 and MS65. A moderately toned and attractive set, still housed within its cardboard holders of mint issue. The outer envelope is postmarked April 6, 1950 and exhibits cancelled Rutherford Hayes and Theodore Roosevelt stamps. (Total: 28 coins)
- 4506 10 Uncertified Double Mint Sets.** The lot includes (1) 1954, (4) 1956, (3) 1957, and (2) 1958 double mint sets, housed in their mint-issued cardboard holders. The outer mailing envelope is still present for each of the sets. One of the 1958 sets has not been opened (its outer envelope remains sealed). The sets have been held by the Teich Family since their issue. No returns will be accepted for this lot.
From The Teich Family Collection. (Total: 10 sets)

MISCELLANEOUS

- 4507 Auction Catalog and Envelope Ephemera (Stack's, 1962).** Auction catalog for The Metropolitan New York Numismatic Convention Public Auction sale, April 26-28, 1962, condition Very Good overall with 1-inch tear at top of back cover. Also, 42 lot envelopes from the same auction, which was a watershed event in building the Teich Family Collection.
From The Teich Family Collection. (Total: 43 items)

End of Session Two

SESSION THREE

PATTERNS

1858 Judd-206 Cent Pattern, PR62
Paquet's Small Flying Eagle

- 4508** 1858 Flying Eagle Cent, Judd-206, Pollock-242, R.5, PR62 NGC. Paquet's Small Eagle pattern obverse is paired with the regular issue Low Leaves reverse. Struck in copper-nickel with a plain edge. Dusky mahogany-gold, lime-green, and lavender toning adorns this fully struck and unabraded specimen. The upper reverse exhibits a few tiny flecks. Portions of the borders exhibit a wire rim. PCGS# 11877

1859 Indian Cent Trial, Unc Details
Judd-230, Pollock-274

- 4509** 1859 Indian Cent, Judd-230, Pollock-274, High R.7 — Questionable Color — PCGS Genuine. Unc. Details. A regular dies trial piece, the reverse with groups of five and six leaves in the wreath, struck in copper or bronze with a plain edge. Mahogany and light blue surfaces exhibit iridescent tones, with a sharp strike. Labeled as Unc Details, this pattern variety typically exists as a proof, and this piece has characteristics of a proof strike. PCGS# 11944

1863 Copper With Motto Half Dollar
Judd-343, PR64 Red and Brown

- 4510** 1863 Half Dollar, Judd-343, Pollock-415, R.7, PR64 Red and Brown PCGS. The obverse die is the design used on regular-issue half dollars in 1863. The reverse features the normal perched eagle design, with the addition of the scroll and motto IN GOD WE TRUST above the eagle's head. Struck in copper, with a reeded edge. According to USPatterns.com, Judd-343 was a restrike issue, created for sale to collectors in the 1870s. The coins were typically offered with other denominations as year sets. An early auction appearance of such a set was in the Woodside Collection (New York Coin & Stamp, 4/1892), lot 131. The Woodside sale also included complete sets in silver and aluminum. The issue is rare, with an estimated population of about one dozen survivors. Sharply struck overall, the features are intricately detailed. Lovely, bright orange-red luster shows just a bit of spotty darkening on the reverse. Deeply reflective fields and thickly frosted devices. The only factors limiting the grade are some carbon spots and handling marks (possibly fingerprints) in the obverse fields. An attractive example of a rare and popular pattern.

Ex: DEA and Marshal's Services Sale (Heritage, 12/1988), lot 1881; Lemus Collection / Queller Family Collection Part Two / FUN Signature (Heritage, 1/2009), lot 1611. PCGS# 70505

- 4511** 1869 Three Cent Nickel, Judd-676, Pollock-753, R.4 — Improperly Cleaned — NGC Details. Proof, AU Details. Similar to the contemporary three cent nickel, except the date is larger and the denomination pillars are smooth. The Pollock variant with a long left ribbon end. Struck in nickel with a plain edge. A bit glossy from a wipe, and the upper left obverse displays mint-caused laminations.

1873 Judd-1281 Trade Dollar, PR62
J.A. Bailly Liberty Portrait

- 4512** 1873 Trade Dollar, Judd-1281, Pollock-1423, R.4, PR62 PCGS. The obverse, designed by J. A. Bailly, features a coiled hair bust of Liberty facing left. The reverse mimics the 'Amazonian' pattern silver dollar save for a reduction in the size of the eagle and the addition of the motto E PLURIBUS UNUM above and the weight and fineness below. Struck in silver with a reeded edge. Delicate golden toning graces this well struck and faintly hairlined specimen. Among the more collectible silver Trade dollar patterns but nonetheless scarce. Population: 12 in 62, 17 finer (12/13). PCGS# 61566

- 4513 (circa 1967) General Motors Cent, Pollock-4060, R.5, MS65 Red and Brown NGC. Control Code 10-M.** An experimental striking on the General Motors roller press with the head of Liberty facing left on the obverse, a wreath on the reverse, and nonsensical legends on each side. Control code 10-M. Struck in copper with a plain edge. The reverse is nearly full Red while the obverse displays fire-red, violet, and navy-blue.

GOLD DOLLARS

- 4514 1849 No L MS62 NGC.** Lustrous yellow-gold surfaces exhibit sharply struck motifs. The few minute marks and grazes are less than what might be expected for an MS62. NGC ID# 25B7, PCGS# 7501
- 4515 1849 Open Wreath MS63 PCGS. Breen-6004.** A honey-gold Select single-year type coin with an unmarked appearance and a good strike. A small spot is noted on the uppermost star. The Es in STATES and AMERICA are boldly repunched. NGC ID# 25B9, PCGS# 7502
- 4516 1851 MS64 NGC.** A flaxen-gold, near-Gem gold dollar, exceptionally well-preserved for this workhorse date. Only a couple of tiny, inconspicuous abrasions keep this lustrous Type One dollar from an even higher grade. NGC ID# 25BK, PCGS# 7513
- 4517 1851 MS64 NGC.** Medium greenish-gold toning adorns both sides of this near-Gem, each of which displays soft luster. A couple of small copper-spots are seen near the left obverse rim. NGC ID# 25BK, PCGS# 7513
- 4518 1851 MS64 NGC.** The reverse of this Choice Mint State gold dollar is rotated a few degrees counterclockwise. Both sides exhibit frosty mint luster with full brilliance. Hints of green accent the brilliant yellow luster of this near-Gem. NGC ID# 25BK, PCGS# 7513

1851 Gold Dollar, Sharply Struck MS65

- 4519 1851 MS65 NGC.** The lustrous surfaces of this Gem display yellow-gold coloration imbued with traces of light green. Sharply struck design elements include strong detail in Liberty's hair and the star centrals. A few grade-consistent marks on the reverse do not disturb. Census: 98 in 65, 26 finer (1/14). NGC ID# 25BK, PCGS# 7513
- 4520 1851-C AU53 PCGS. Variety 1.** A luminous honey-gold Charlotte type coin with pleasing sharpness and ample traces of remaining luster. Mentionable marks are confined to faint lines beneath the hairbun and the second L in DOLLAR. NGC ID# 25BL, PCGS# 7514
- 4521 1851-C — Improperly Cleaned — NGC Details. Unc. Variety 1.** The die crack between the F in OF and the AM in AMERICA identifies the die variety. A well struck Charlotte gold dollar with butter-gold borders and straw-gold centers. The reverse is faintly hairlined. The obverse has a few wispy field marks near the profile and a tiny bright dig near the 8 o'clock star. NGC ID# 25BL, PCGS# 7514
- 4522 1852 MS64 NGC.** Vibrant luster invigorates this near-Gem gold dollar, and nicely complements the sharply struck design features, including strong detail on Liberty's hair strands. A few minor grazes preclude Gem classification. NGC ID# 25BP, PCGS# 7517

- 4523 1852-O AU58 NGC. Variety 1.** An early die state example without clash marks. This near-Mint wheat-gold New Orleans dollar is smooth aside from a subtle obverse rim depression at 2:30. Luster illuminates the peripheries. NGC ID# 25BT, PCGS# 7520
- 4524 1853 MS64 NGC.** This frosty Choice Mint State gold dollar has exquisite surfaces with brilliant yellow-gold luster and excellent eye appeal. NGC ID# 25BU, PCGS# 7521
- 4525 1854 Type One MS64 NGC.** Frosty yellow-gold surfaces display nice luster and reveal just a few grade-determining marks. This is an impressively struck near-Gem. Higher-grade coins are quite scarce. NGC ID# 25BY, PCGS# 7525

1854 Gold Dollar, MS62 First Type Two Issue

- 4526 1854 Type Two MS62 NGC. CAC.** The short-lived Type Two gold dollar, minted only from 1854 to 1856, had significant individual mintages, but a small combined mintage. As a result, choices for type collectors are limited and the design enjoys great demand. Despite faint grade-limiting hairlines, this frosty Mint State piece is an attractive example with brilliant luster. NGC ID# 25C3, PCGS# 7531
- 4527 1855 AU53 NGC.** Bright yellow-gold surfaces display luster in the protected areas. Well struck save for the typical weakness in Liberty's hair. NGC ID# 25C4, PCGS# 7532

1855 Type Two Gold Dollar, MS62 Light Clash Marks

- 4528 1855 MS62 NGC. CAC.** A frosty and fully lustrous yellow-gold example, this brilliant Type Two gold dollar has a solid strike, and exhibits light clash marks on the reverse. Both sides display the usual grade-limiting surface marks and faint hairlines. The usually encountered Type Two date. NGC ID# 25C4, PCGS# 7532
- 4529 1855-O AU55 NGC. Variety 2.** The date and mintmark positions differ only marginally from Variety 1. Any '55-O gold dollar is desirable due to a low mintage and its status as the sole Type Two issue from that facility. The caramel-gold surfaces display pockets of luster and bold design detail. NGC ID# 25C7, PCGS# 7535
- 4530 1856-S Type Two — Improperly Cleaned — NGC Details. XF. FS-501.** The mintmark is lightly but widely repunched northeast. The straw-gold surfaces are hairlined and the forehead curls are worn. The sole S-mint issue of the short-lived type.
- 4531 1857-C XF45 PCGS. Variety 1.** A well defined walnut-brown Charlotte gold dollar with a hint of mint-made obverse granularity. Each side has a couple of shallow strike-throughs, but post-strike marks are refreshingly absent. NGC ID# 25CE, PCGS# 7545

4532 1862 MS64 PCGS. Radiant luster emanates from the yellow-gold surfaces of this near-Gem, and the design elements are sharply struck throughout. A few minute grazes preclude Gem status. NGC ID# 25CW, PCGS# 7560

4533 1874 MS66 PCGS. A delightful Premium Gem gold dollar, with well-detailed design elements and brightly lustrous yellow and rose-gold surfaces. No mentionable distractions are evident and eye appeal is outstanding. Population: 60 in 66 (4 in 66+), 33 finer (12/13). NGC ID# 25DC, PCGS# 7575

1879 Gold Dollar, Conditionally Scarce MS66

4534 1879 MS66 PCGS. Despite the low mintage of 3,000 pieces, a considerable number of Mint State 1879 gold dollars are known today as significant quantities were saved at time of issue. Premium Gems such as the present offering are scarce and finer examples are quite rare. Rich apricot-gold patina is imbued with blushes of lime-green, and the design elements are well-struck except for weakness in some of the letters of LIBERTY. Radiantly lustrous surfaces are nicely preserved. Population: 46 in 66 (2 in 66+), 6 finer (12/13). NGC ID# 25DH, PCGS# 7580

4535 1880 MS65 PCGS. CAC. Rich yellow-gold color and gleaming, lustrous surfaces provide this Gem with a strong degree of visual appeal. Very few marks are present and they are extremely tiny. As-made lint marks appear on the obverse to the left of the nose and at the second T in STATES. A lint mark is also present on the reverse near 11 o'clock. PCGS included a few threads within the encapsulation, as seen near 3 o'clock on the reverse. NGC ID# 25DJ, PCGS# 7581

4536 1881 MS64 PCGS. Well struck on the obverse and fully detailed on the reverse. The lustrous surfaces display reddish-gold and lemon-gold coloration on this near-Gem of this popular low-mintage issue. The 8s in the date are repunched within the loops, and the obverse border is lightly die doubled between 10 and 12 o'clock. A scant 7,620 pieces were struck.
Ex: *Dallas Signature* (Heritage, 12/2004), lot 6474. NGC ID# 25DK, PCGS# 7582

1881 Gold Dollar, Brightly Lustrous MS67

4537 1881 MS67 PCGS. The 1881 gold dollar is best known for the quality of known specimens. This Superb Gem displays bright luster on its yellow-gold surfaces and the design elements are boldly defined. Both sides are impeccably preserved. A minute planchet flake on the lower-left reverse rim does not distract. Population: 88 in 67 (4 in 67+), 42 finer (12/13). NGC ID# 25DK, PCGS# 7582

1888 Gold Dollar, Lustrous MS67 Rare Any Finer

4538 1888 MS67 PCGS. Rich orange-gold patination is imbued with traces of light green, and a solid strike delivers strong definition to the design elements. Close examination reveals no marks worthy of special note on the highly surfaces. Very Scarce in this grade and extremely rare any finer. Population: 43 in 67 (1 in 67+), 5 finer (12/13). NGC ID# 25DT, PCGS# 7589

4539 1889 MS66+ PCGS. CAC. Boldly struck, this gold dollar has frosted devices that stand out from the highly lustrous, satin-smooth fields. Vivid orange color accents rich, honey-gold surfaces. There are no discernible contact marks or abrasions to mention for this final-year Premium Gem, which offers outstanding quality. NGC ID# 25DU, PCGS# 7590

1889 Gold Dollar, MS67+ Only Two Finer Coins at PCGS

4540 1889 MS67+ PCGS. CAC. From a mintage of 29,000 pieces, the 1889 gold dollar is only scarce in MS67 condition, but finer coins are predictably very rare. This high-end Superb Gem displays vibrant mint luster and virtually pristine peach-gold surfaces. The design elements are sharply detailed and eye appeal is extraordinary. PCGS has graded only two numerically finer example (12/13). NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

4541 1835 AU58 NGC. Breen-6141, Variety 6, R.2. An unblemished Borderline Uncirculated piece that has a good strike despite the characteristic blending of detail at the centers. The stars, dentils, and plumage are intricate. A pair of tiny obverse rim defects near 9 o'clock appear to be of mint origin.
Ex: *Orlando FUN Signature* (Heritage, 1/2008), lot 3728. NGC ID# 25FT, PCGS# 7693

4542 1836 Script 8 — Improperly Cleaned — NGC Details. Unc. Breen-6143, Variety 11, R.2. An attractively toned example whose light lemon-gold centers are bounded by deeper cherry-red and violet margins. The centers display minor incompleteness of strike. Careful rotation beneath a light reveals delicate hairlines. From the *Collection of Donald E. Bently*, sold for the benefit of the Bently Foundation. NGC ID# 25FU, PCGS# 7694

4543 1837 AU53 PCGS. CAC. Breen-6145, Variety 16, R.2. A green-gold example of this lower mintage Philadelphia Classic issue. The surfaces are only lightly abraded and have never been brightened, unlike many survivors. The centers show moderate inexactness of strike. NGC ID# 25FX, PCGS# 7695

- 4544 1838 AU50 PCGS. Breen-6146, Variety 19, R.2.** The only dies for this lower mintage Philadelphia issue. Original peach-gold toning visits this lightly circulated example. No abrasions are noticeable aside from brief marks near star 11. NGC ID# 25FY, PCGS# 7696

**1838 Two and a Half, MS61
No Detrimental Marks**

- 4545 1838 MS61 NGC. Breen-6146, Variety 19, R.2.** Only a single die marriage is known for this lower mintage Philly emission. Perhaps commerce was still saturated with the exceptionally voluminous 1836 production. The present quarter eagle is a lovely example of the Classic type. The strike is generally sharp, and the honey-gold surfaces are impressively free from visible marks. Census: 19 in 61, 39 finer (1/14). NGC ID# 25FY, PCGS# 7696

**1839-O Quarter Eagle, AU53
Close Fraction, Medallion Alignment**

- 4546 1839-O — Medallion Alignment — AU53 NGC. Breen-6153, Variety 28, R.4.** The Close Fraction variety, the rarer of the two known die marriages for this low mintage issue. The only New Orleans issue of the Classic design. A fairly early die state since the horizontal crack behind the eagle's neck is indistinct. The dies were rotated 180 degrees from proper coin alignment, an error perhaps attributable to growing pains at the fledgling branch mint. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25G7, PCGS# 7701

LIBERTY QUARTER EAGLES

- 4547 1840-D — Mount Removed, Scratches — NGC Details. AU. Variety 1-A.** A very late die state with five bold radial cracks on the reverse and another crack to the bridge of the nose. This softly struck example is bright from cleaning and has many noticeable scratches. No solder or repair is readily evident. The 1840-D is rare, even by Dahlonga standards. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*
- 4548 1843-D Small D — Obverse Damage — NGC Details. XF. Variety 4-H (formerly 4-D).** The mintmark is placed low and is centered above the fraction denominator. Three Small D and two Large D varieties are known despite a small mintage of 36,209 pieces. This pumpkin-gold two and a half is cleaned and has several individually minor marks on the portrait. NGC ID# 25GP, PCGS# 7730

**1843-D Two and a Half, Near-Mint
Small D, High Mintmark**

- 4549 1843-D Small D AU58 NGC. Variety 4-F.** Five die varieties are known despite a mintage of just 36,209 pieces. The present butter-gold example has pleasing luster extent and is without any noticeable marks. Nicely struck for a Dahlonga product, especially on the eagle and stars. The forehead curls show moderate incompleteness. NGC ID# 25GP, PCGS# 7730
- 4550 1843-O Large Date, Plain 4 AU53 PCGS. Variety 1.** The mintmark is repunched south. Much scarcer than its Small Date counterpart. This honey-gold New Orleans representative displays luster in all protected areas. Marks are relatively few though we note slight reverse rim nicks at 8 and 12 o'clock. NGC ID# 25GS, PCGS# 7732
- 4551 1846-O AU55 NGC. CAC. Variety 1.** The most prevalent die variety, though two others are known. CAC seals are very scarce on New Orleans gold coins, and the present piece was likely favored due to its rich original orange-red toning. In addition, there are no relevant marks. NGC ID# 25H4, PCGS# 7743
- 4552 1847-C — Mount Removed — PCGS Genuine. AU Details. Variety 1.** No evidence of solder or a repair can be found on this rare date Charlotte quarter eagle. The green-gold surfaces are moderately glossy but no abrasions are consequential. LIBERTY and the fletchings are lightly brought up. NGC ID# 25H6, PCGS# 7745
- 4553 1848-C — Improperly Cleaned — NGC Details. XF. Variety 1.** The present yellow-gold Charlotte two and a half is a bit too bright but traces of lilac-tinged luster emerge from protected areas. A loupe reveals only minor abrasions. The curls are lightly brought up, usual for the Southern facility. NGC ID# 25HB, PCGS# 7750
- 4554 1848-C — Improperly Cleaned — NGC Details. AU. Variety 1.** Liberty's eyebrow and curls show only slight wear, but the wheat-gold surfaces exhibit wispy parallel hairlines. The strike is typical on LIBERTY and the upper stars. A challenging Charlotte issue with a meager mintage of 16,788 pieces. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25HB, PCGS# 7750
- 4555 1849 MS61 NGC.** A luminous quarter eagle from the year immortalized by the California Gold Rush. Striking softness is noted on the eagle's left (facing) leg on the dusky reverse. Census: 10 in 61, 8 finer (12/13). NGC ID# 25HD, PCGS# 7752
- 4556 1849-C VF30 PCGS. Variety 1.** Only one die pairing was used to strike the 10,200 quarter eagles from this branch mint in 1849. Deep greenish-gold patina bathes this minimally marked VF30 example. Well-defined except for strike-weakness on the eagle. Population: 4 in 30, 76 finer (12/13). NGC ID# 25HE, PCGS# 7753
- 4557 1849-D XF40 PCGS. Variety 11-N (formerly 11-M).** Olive-green and orange blend throughout this nearly unabraded Dahlonga quarter eagle. Well defined on the curls between the coronet and hairbun. A mostly retained and mint-made lamination extends from the arrowheads to the ES in STATES. NGC ID# 25HF, PCGS# 7754

4558 1850 AU58 NGC. The yellow-gold surfaces of this near-Mint specimen display considerable luster and exhibit well-struck devices, save for the usual weakness on the eagle's neck feathers and those on the left (facing) leg. Light abrasions are visible over each side. This date becomes challenging in Mint State. NGC ID# 25HG, PCGS# 7755

4559 1852-O AU55 NGC. Variety 2. The Large O variety with the donut-shaped mintmark positioned left. This sun-gold Choice AU New Orleans example is minimally abraded aside from minor field marks near the coronet tip. The central strike is typical though peripheral elements are sharp.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25HU, PCGS# 7766

4560 1852-O AU58 NGC. Variety 2. Reminiscent of the "Huge O" 1854-O quarter, the present die variety has a broad high relief mintmark that may have been entered by hand on the reverse die after it reached New Orleans. The strike is somewhat soft at the centers but the wheat-gold surfaces show only inconsequential contact. NGC ID# 25HU, PCGS# 7766

4561 1853 MS63 PCGS. CAC. The 1853 Liberty quarter eagle is surprisingly scarce in high-grade, considering its substantial mintage of 1.4 million pieces. This impressive Select example is sharply detailed in most areas, but the eagle's leg reveals a touch of softness. The pleasing surfaces are extremely lustrous and show only minor signs of contact. NGC ID# 25HV, PCGS# 7767

4562 1857-D — Obverse Scratched — NGC Details. XF. Just a single die variety is known for this challenging Dahlonega issue, as might be expected from the meager mintage of 2,364 pieces. Faded pinscratches are noted near the right-side stars, the STAT in STATES, and beneath the right (facing) wing. NGC ID# 25JD, PCGS# 7783

4563 1857-O AU53 NGC. Variety 1. The late die state with a slender vertical crack east of the mintmark. This butter-gold representative has a good strike and no obtrusive abrasions. The final New Orleans issue of the denomination, and scarce since only 34,000 pieces were struck. NGC ID# 25JE, PCGS# 7784

4564 1857-S AU58 NGC. Ex: Suwanee River Collection. The vivid orange-gold surfaces of this attractive near-Mint specimen retain much original mint luster and the sharply detailed design elements show just a trace of wear. Census: 69 in 58, 20 finer (1/14). NGC ID# 25JE, PCGS# 7785

4565 1862 AU58 NGC. A lightly circulated example of this popular Civil War issue, with lustrous yellow-gold surfaces that show only minor abrasions and sharply detailed design elements that reveal the slightest trace of wear. Census: 55 in 58, 54 finer (1/14). NGC ID# 25JZ, PCGS# 7796

1868-S Quarter Eagle, MS61 Only Four Finer at NGC

4566 1868-S MS61 NGC. This 1868-S quarter eagle combines a solid strike with subdued luster and myriad contact marks in the fields. Two similarly graded pieces in the present sale have widely differing appearances, providing collectors with the unusual opportunity to pick their favorite. Census: 8 in 61, 4 finer (1/14). NGC ID# 25KC, PCGS# 7808

1868-S Quarter Eagle, MS61 Few Survive in Mint State

4567 1868-S MS61 NGC. With a mintage of 34,000 coins, the 1868-S is slightly more plentiful than other S-Mint quarter eagles from the 1860s and early 1870s. However, Mint State coins are rare, with only about 20 to 25 known. Despite weakness in places, this piece retains full luster with brilliant yellow surfaces and excellent eye appeal. Census: 8 in 61, 4 finer (1/14). NGC ID# 25KC, PCGS# 7808

4568 1869-S AU58 NGC. CAC. The San Francisco Mint struck double eagles nearly to the exclusion of the other gold denominations, and in 1869, that mint struck just 29,500 quarter eagles. This luminous orange-gold piece has pleasing detail overall and just a trace of high point friction. Census: 59 in 58, 16 finer (1/14). NGC ID# 25KE, PCGS# 7810

1873 Open 3 Quarter Eagle, MS65 Rich Satiny Luster

4569 1873 Open 3 MS65 NGC. Satiny with rich orange-gold luster and traces of delicate apricot-pink. The intricate details of stars, eagle, and portrait are all well brought up. While the 1873 quarter eagle with an Open 3 in the date is available in lesser grades, as a Gem it is conditionally rare and commands respect. Census: 10 in 65, 1 finer (1/14). NGC ID# 25KN, PCGS# 7817

4570 1874 AU58 NGC. The vivid orange-gold surfaces of this impressive near-Mint specimen show a mix of vibrant mint luster and prooflike reflectivity in sheltered areas, with only minor signs of contact. Census: 41 in 58, 29 finer (1/14). NGC ID# 25KR, PCGS# 7821

4571 1877-S MS62 PCGS. The 1877-S is a scarce quarter eagle issue that had a mintage of only 35,400 coins. Survivors are seldom encountered in any grade. This piece has vibrant light green and pale rose toning over reflective fields and bold design motifs. Population: 35 in 62, 33 finer (12/13). NGC ID# 25KX, PCGS# 7827

4572 1877-S MS62 NGC. A number of shades of orange, gold, and peach are present on both sides of this piece, along with a few hints of red. The coin is well struck. Although abrasions are present, few, if any, pose a distraction. Census: 61 in 62, 22 finer (1/14). NGC ID# 25KX, PCGS# 7827

- 4573 1878 MS64 PCGS. CAC.** Bright, even satiny luster is complemented by medium orange-gold color and a strong strike throughout. Only the slightest marks prevent an even higher grade — as confirmed by the CAC endorsement. For type purposes, this is an early date but one that is easily obtainable, which should add considerable interest. NGC ID# 25KY, PCGS# 7828
- 4574 1879 MS63 PCGS.** A scarce date that had a mintage of only 88,960 coins, the 1879 is typically found around the MS60 level. This Select specimen is outstanding with sharp design motifs and frosty yellow-gold luster, showing faint traces of light green toning. NGC ID# 25L2, PCGS# 7830
- 4575 1879-S AU58 NGC.** A splendid near-Mint specimen, this brilliant yellow-gold quarter eagle has sharp details and reflective fields that exhibit inconsequential marks. Census: 65 in 58, 16 finer (1/14). NGC ID# 25L3, PCGS# 7831
- 4576 1879-S AU58 NGC.** A trace of wear appears on the light yellow-gold surfaces of this lustrous quarter eagle. The fields are reflective in the protected areas, with considerable mint frost remaining on the high points. Census: 65 in 58, 16 finer (1/14). NGC ID# 25L3, PCGS# 7831
- 4577 1880 MS61 NGC.** From a minuscule mintage of 2,996 pieces, this pleasing MS61 quarter eagle displays partially prooflike yellow-gold surfaces and sharply detailed design elements throughout. Census: 25 in 61, 27 finer (1/14).
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25L4, PCGS# 7832

**1891 Two and a Half
MS61 Deep Prooflike
Sole NGC DPL Example**

- 4578 1891 MS61 Deep Prooflike NGC.** As of (12/13), this is the only 1891 quarter eagle certified by NGC as Deep Prooflike. Likely among the first examples struck, given the cameo contrast between the radiant motifs and the glassy fields. AMERICA is strongly die doubled, as seen on all business strike examples of this low mintage (10,960 pieces) date. By 1891, the quarter eagle was principally used for Christmas and birthday gifts, since paper money was preferred in commerce, and the denomination was too small for efficient export payments. PCGS# 77843
- 4579 1892 MS61 NGC.** Only 2,440 Liberty quarter eagles were struck in 1892. This attractive MS61 example displays lustrous yellow-gold surfaces and sharply detailed design elements throughout. Census: 27 in 61, 68 finer (1/14).
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25LG, PCGS# 7844
- 4580 1895 MS63 NGC.** Vibrant luster issuing from sharply-struck yellow-gold surfaces invigorates this lovely Select quarter eagle. A few small marks limit the grade. From a low-mintage of just 6,000 pieces. Census: 50 in 63 (2 in 63+), 64 finer (1/14). NGC ID# 25LK, PCGS# 7847

- 4581 1897 MS64 NGC. CAC.** Bright yellow-gold luster envelops this sharply struck near-Gem. A few minuscule marks preclude Gem status. NGC ID# 25LM, PCGS# 7849
- 4582 1897 MS65 NGC. CAC.** Smooth peach-gold surfaces display pleasing luster and are minimally marked. Sharply struck throughout. Census: 77 in 65 (1 in 65+), 71 finer (1/14). NGC ID# 25LM, PCGS# 7849
- 4583 1900 MS65 PCGS.** From a turn-of-the-century mintage of 67,000 pieces, this delightful Gem exhibits sharply detailed design elements and pleasing orange-gold surfaces with vibrant mint luster on both sides. NGC ID# 25LR, PCGS# 7852
- 4584 1902 MS66 PCGS.** Liberty quarter eagles from the early 20th century are usually available without difficulty, although typical examples are in lower Mint State grades, perhaps MS63 or MS64. Premium Gem specimens such as the present piece are rarely encountered. This lovely quarter eagle has fully lustrous and brilliant yellow surfaces with hints of rose and green color. NGC ID# 25LT, PCGS# 7854
- 4585 1902 MS66 NGC.** Smooth surfaces show vibrant luster and sharply struck devices. Impeccably preserved throughout. NGC ID# 25LT, PCGS# 7854

**1902 Quarter Eagle, MS67
Tied for the Finest at PCGS**

- 4586 1902 MS67 PCGS.** A splendid type coin, this Superb Gem exhibits a bold strike, frosty yellow-gold mint luster, and importantly, a complete absence of unsightly copper spots. This is an amazing Liberty quarter eagle that is tied for the finest that PCGS has examined. Population: 42 in 67, 0 finer (12/13). NGC ID# 25LT, PCGS# 7854
- 4587 1904 MS66 NGC.** Rich apricot color is imbued with traces of light green. Highly lustrous, sharply struck, and nicely preserved. An excellent type example. NGC ID# 25LV, PCGS# 7856

**1904 Liberty Quarter Eagle, MS67
Only One Numerically Finer Coin at PCGS**

- 4588 1904 MS67 PCGS.** From a mintage of 160,700 pieces, the 1904 Liberty quarter eagle is very scarce in MS67 condition, and finer coins are very rare. This spectacular Superb Gem displays vivid peach-gold surfaces with vibrant mint luster and no visible distractions. The design elements are sharply detailed and eye appeal is terrific. Population: 43 in 67 (1 in 67+), 1 finer (12/13). NGC ID# 25LV, PCGS# 7856

**1905 Liberty Quarter Eagle, MS67
Sharply Detailed and Lustrous**

4589 1905 MS67 PCGS. According to Mint records, the 1905 Liberty quarter eagle has a nominal mintage of 217,800 pieces. The date is scarce in MS67 condition and virtually unobtainable any finer. This delightful Superb Gem is sharply detailed and brightly lustrous, with well-preserved peach-gold surfaces and outstanding eye appeal. Population: 60 in 67, 1 finer (12/13). NGC ID# 25LW, PCGS# 7857

4590 1907 MS64 PCGS. CAC. A Choice Mint State example, this lovely quarter eagle has lovely lemon-yellow gold luster with a few splashes of darker patina. NGC ID# 25LY, PCGS# 7859

PROOF LIBERTY QUARTER EAGLES

4591 1892 — Scratch — PCGS Genuine. Proof, Unc. Details. Just 105 proofs were struck. The present lemon-gold specimen is lightly hairlined and has a pinscratch that extends from the cheek into the hair. An opportunity to obtain a low mintage rarity in affordable condition. NGC ID# 288F, PCGS# 7918

1898 Quarter Eagle, PR61 Cameo

4592 1898 PR61 Cameo NGC. Although the fields are a trifle busy with contact marks, this lovely proof quarter eagle has solidly mirrored fields and satin devices, providing obvious contrast. This piece would make a wonderful addition to a gold type set. Census: 7 in 61 Cameo, 50 finer (1/14). NGC ID# 288M, PCGS# 87924

INDIAN QUARTER EAGLES

4593 1908 MS64 PCGS. CAC. Light yellow-gold at its base with splashes of sun-yellow and pale orange. An amply lustrous near-Gem from the first year of the design. *From The Teich Family Collection.* NGC ID# 288Y, PCGS# 7939

4594 1909 MS64 PCGS. The sunken design of the Indian Head series resulted in the fields being the highest area of the coin, therefore the area most subjected to abrasions or wear. This example has smooth, pleasing fields and a particularly sharp strike. Orange-gold surfaces are softly lustrous and appealing. Nice for type. NGC ID# 288Z, PCGS# 7940

4595 1909 MS64 NGC. The peach-gold surfaces of this near-Gem exhibit sharply struck design elements, including the headdress feathers and the eagle's plumage. Some minute marks are consistent with the grade. NGC ID# 288Z, PCGS# 7940

4596 1910 MS63 NGC. Peach-gold coloration runs over the softly lustrous surfaces of this Select quarter eagle. Well-struck, including the eagle's shoulder feathers. NGC ID# 2892, PCGS# 7941

4597 1910 MS63 NGC. Yellow-gold and apricot shadings prevail on this lustrous Select example. Modestly marked. Die wear on both sides has created a "ring" effect at the margins. NGC ID# 2892, PCGS# 7941

4598 1910 MS64 NGC. Orange-gold surfaces display soft luster and sharply struck design elements, including the feathers on the eagle's shoulder. Some minute marks are visible on the reverse. NGC ID# 2892, PCGS# 7941

4599 1910 MS64 NGC. Rich orange-gold luster drapes both sides of this sharply struck near-Gem quarter eagle. A few minute marks in the raised, open fields of the upper reverse determine the grade. NGC ID# 2892, PCGS# 7941

1910 Indian Quarter Eagle, MS65

4600 1910 MS65 NGC. The 1910 quarter eagle has a mintage of 492,682 coins, and survivors are plentiful in lower Mint State grades. However, Gem examples are scarce, and their high-grade rarity falls in the top half of the series, ranking seventh out of 15 issues for NGC certification in MS65 and finer grades. This frosty honey-gold example has brilliant luster with trivial marks that prevent an even higher grade. There are no copper spots evident on either side. NGC ID# 2892, PCGS# 7941

Elusive Gem 1910 Quarter Eagle

4601 1910 MS65 NGC. Jeff Garrett and Ron Guth report an average certified grade of 60.5 and an average auction grade of 63.8. The average certified grade is tied for sixth out of 15 issues, and the average auction grade is tied for fifth. This brilliant yellow-gold example has frosty mint luster with the usual minuscule marks expected for the grade. NGC has only certified 13 finer examples (1/14). NGC ID# 2892, PCGS# 7941

1910 Indian Quarter Eagle, MS65
Elusive Date in Higher Grades

- 4602 1910 MS65 PCGS.** The 1910 Indian quarter eagle claims a nominal mintage of 492,000 pieces, but the date is scarce at the MS65 level, and finer coins are very rare. This delightful Gem exhibits well-detailed design elements and vivid orange-gold surfaces with vibrant mint luster. PCGS has graded nine numerically finer examples (12/13). NGC ID# 2892, PCGS# 7941

- 4603 1911 MS63 NGC.** Yellow luster overall with areas of sun-gold and orange. This attractive Select example is well-defined and its abrasions generally are light. NGC ID# 2893, PCGS# 7942

- 4604 1911-D Weak D — Cleaning — PCGS Genuine. XF Details.** A moderately bright and glossy almond-gold example of the low mintage series key. The mintmark is faintly evident when viewed beneath a loupe, particularly its small interior. PCGS# 7954

1911-D Quarter Eagle, AU50
Popular Series Key

- 4605 1911-D AU50 PCGS.** The 1911-D is the clear key to the Indian quarter eagle series and enjoys great popularity in all grades. This lightly worn but still-luminous wheat-gold example has ample apricot overtones and few major marks, though a couple of scrapes are visible in the portrait area. This coin would fit well in an otherwise AU-MS set. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, AU Details

- 4606 1911-D Strong D — Cleaning — PCGS Genuine. AU Details.** Olive-green and pumpkin-orange toning embraces this moderately circulated key date example. The surfaces are subdued and faintly hairlined. The mintmark is low relief but its full outline is evident, along with its shaded interior. The Indian quarter eagle series can be readily completed by date and mintmark, unlike other classic gold types. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, AU50
Strong Mintmark

- 4607 1911-D Strong D AU50 PCGS.** Ex: Teich Family Collection. This is the Strong Mintmark variety, showing a bold D on the reverse, with the interior space and the outline both complete and strong. A trace of wear is noted on the high points with considerable luster remaining. This lovely yellow-gold example has pale blue accents. From The Teich Family Collection. NGC ID# 2894, PCGS# 7943

- 4608 1912 MS63+ PCGS Secure.** A boldly defined Indian quarter eagle, this Select Mint State piece is an excellent type collection candidate. Both sides have satiny yellow-gold luster and trivial marks that limit the grade. NGC ID# 2896, PCGS# 7944

- 4609 1914 MS62 PCGS.** Ex: Teich Family Collection. The 1914 Indian quarter eagle is a challenging series key, especially in high grade. This well-detailed MS62 specimen displays lustrous greenish-gold surfaces with a scattering of minor contact marks. From The Teich Family Collection. NGC ID# 2898, PCGS# 7946

- 4610 1914 MS62 PCGS Secure. CAC.** Rich apricot-gold color resides on the lustrous surfaces of this nicely impressed quarter eagle. A few light marks determine the grade. NGC ID# 2898, PCGS# 7946

1914-D Indian Quarter Eagle, MS64+
Challenging Issue in Higher Grades

- 4611 1914-D MS64+ NGC. CAC.** The 1914-D Indian quarter eagle is a very scarce issue at the MS65 grade level and the most challenging date of the series in higher grades, making this high-end Choice specimen a particularly good blend of quality and value. The design elements are well-detailed and the lustrous reddish-gold surfaces show only minor signs of contact. NGC ID# 2899, PCGS# 7947

- 4612 1915 MS63 NGC.** The surfaces are extremely reflective, bright, and clean. Extremely appealing, with an overall look that belies its mere Select grade. NGC ID# 289A, PCGS# 7948

- 4613 1915 MS64 PCGS. CAC.** This Choice 1915 Indian quarter eagle exhibits well-detailed design elements and lightly marked orange and greenish-gold surfaces. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 289A, PCGS# 7948

**1915 Indian Quarter Eagle, MS65+
Conditionally Very Rare in Finer Grades**

4614 1915 MS65+ NGC. From a mintage of 606,000 pieces, the 1915 Indian quarter eagle is reasonably available in grades up to the Gem level, but it is a prime condition rarity in finer grades. This high-end Gem is sharply detailed and brightly lustrous, with well-preserved orange-gold surfaces. NGC has graded eight numerically finer examples (1/14). NGC ID# 289A, PCGS# 7948

4615 1925-D MS65 PCGS. A stunning Gem with a bold strike, this Denver Mint quarter eagle has frosty yellow-gold luster with vivid rose, blue, and green toning. The eye appeal is first-rate. PCGS has only certified 33 finer examples (12/13). NGC ID# 289B, PCGS# 7949

4616 1925-D MS65 NGC. CAC. A satiny Gem with delicate honey-gold toning and well preserved surfaces that are not quite pristine. A faint, partial inner rim is detected on the obverse, and a partial wire rim is seen on the lower left reverse between 6 and 9 o'clock, increasing the interest level of the piece. The 1925-D was the first Indian quarter eagle issue since 1915. NGC ID# 289B, PCGS# 7949

4617 1926 MS64 PCGS. This near-gem offering displays yellow-gold, lustrous surfaces that are minimally marked. Sharply struck throughout, including the feathers on the eagle's shoulders. A light copper spot is visible on the eagle's neck. NGC ID# 289C, PCGS# 7950

4618 1927 MS64 PCGS. CAC. The apricot-gold surfaces exhibit sharply struck devices, including the eagle's shoulder feathers. Some light marks preclude gem status. NGC ID# 289D, PCGS# 7951

4619 1927 MS64 PCGS. CAC. Ex: Teich Family Collection. Yellow-gold with occasional orange variations. An intensely lustrous near-Gem example of this popular type issue.
From The Teich Family Collection. NGC ID# 289D, PCGS# 7951

4620 1928 — Improperly Cleaned — NGC Details. Unc. This nicely struck honey-gold Indian type coin displays faint hairlines when rotated at obscure angles. A collectible example that will nonetheless fit within an Uncirculated date set of the series.

4621 1928 MS64 PCGS. Peach-gold surfaces are laced with traces of light green and yield pleasing luster. The design features are nicely impressed, and occasional ticks determine the grade. NGC ID# 289E, PCGS# 7952

**1929 Indian Quarter Eagle, MS65
Final Indian Two and a Half**

4622 1929 MS65 NGC. The 1929 Indian quarter eagle is the final date of the denomination and the issue is very rare in grades above the MS65 level. This spectacular Gem exhibits sharply detailed design elements and vibrant mint luster, with well-preserved yellow and rose-gold surfaces. NGC has graded only three numerically finer examples (1/14). NGC ID# 289F, PCGS# 7953

**1929 Quarter Eagle, MS65
Rare in Finer Grades**

4623 1929 MS65 PCGS. This final-year quarter eagle Gem has delicate detail and eye appeal in spades. Primarily wheat-gold surfaces show a handful of coppery accents and a subtly frosty swirl to the luster. The later dates of the series are popular with type collectors and this coin should find a home in such a set. PCGS has graded only three examples as MS66 or finer (1/14). NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

4624 1854 AU53 PCGS. Remnants of prooflike fields and attractive, orange-gold color make this three dollar gold an appealing specimen. No major marks exist on the smooth surfaces, which show expected wear on the high points but no important distractions. Far above-average for the grade. NGC ID# 25M3, PCGS# 7969

4625 1854 AU53 PCGS. The first year of issue and a one-year type coin with small letters on the reverse. This three dollar gold piece exhibits considerable luster on its light yellow surfaces, with minimal marks that prevent a finer grade. NGC ID# 25M3, PCGS# 7969

4626 1854-O XF40 PCGS. Variety 2. The usual lapped die state of this scarce New Orleans issue. The sun-gold surfaces are mildly bright and exhibit a few mint-made strike-throughs on the obverse margin. No abrasions are consequential. NGC ID# 25M5, PCGS# 7971

4627 1854-O — Improperly Cleaned — NGC Details. AU. Variety 2. The lapped die state of Variety 1, most evident in the incomplete ribbon above the bow knot. Yellow-gold surfaces are lightly hairlined. Generally well-struck and minimally abraded.

4628 1855 AU55 PCGS. Good remaining luster surrounds smoothly worn devices of this yellow-gold example. There are no individual distractions to mention from the coin's short time in circulation or from the minting process. A solid AU specimen — pleasing and desirable. NGC ID# 25M6, PCGS# 7972

**1855-S Three Dollar Gold, XF45
Only 6,000 Pieces Minted**

4629 1855-S XF45 PCGS. Only 6,000 three dollar gold pieces were struck at the San Francisco mint in 1855, and survivors are even more difficult to locate than that small figure suggests. This Choice XF specimen retains much of its original design detail and significant amounts of mint luster remain over the antique-gold surfaces. Population: 36 in 45, 34 finer (12/13). NGC ID# 25M7, PCGS# 7973

4630 1856 AU53 PCGS. Smooth surfaces and evenly distributed olive-gold toning show only light wear on nicely detailed devices. A tiny glimpse of mint luster remains near the rims, but overall the coin is a bit subdued in appearance. NGC ID# 25M8, PCGS# 7974

1856 Three Dollar, Bright MS61

4631 1856 MS61 PCGS. Bright yellow-gold surfaces display occasional traces of soft red and retain a fair amount of luster. The design elements are well-struck except for the usually seen weakness on the U of UNITED, the O in DOLLARS, and the bow knot. A few faint pinscratches are visible on the obverse. NGC ID# 25M8, PCGS# 7974

4632 1859 AU55 PCGS. The bright yellow-gold surfaces of this Choice AU exhibit strong design definition and considerable luster. A few minute marks do not disturb. NGC ID# 25MD, PCGS# 7979

4633 1860 AU53 PCGS. From a tiny mintage of 7,036 pieces, this AU53 example displays vivid orange-gold surfaces with vibrant mint luster and just a touch of wear on the design elements. Eye appeal is quite strong for the grade. NGC ID# 25ME, PCGS# 7980

4634 1866 AU53 PCGS. A lightly circulated representative of this lower-mintage post-Civil War three dollar gold issue, which has a production of only 4,000 business strikes. Despite modest rub on the high points and in the straw-gold fields, the coin's luster continues to shine. Population: 12 in 53, 82 finer (12/13). NGC ID# 25MM, PCGS# 7987

4635 1868 AU50 NGC. Lavender field overtones enhance the eye appeal of this still-luminous yellow-gold post-Civil War three dollar piece. Scattered small abrasions on each side contribute to the grade. NGC ID# 25MP, PCGS# 7989

1871 Three Dollar, Well-Struck AU55

4636 1871 AU55 NGC. CAC. The bright yellow-gold surfaces of this Choice AU three dollar retain ample luster in the recessed areas. Most of all of the design elements are well impressed. A few light ticks are scattered about but are not bothersome. Deserving of CAC approval. From a low mintage of 1,300 pieces. NGC ID# 25MU, PCGS# 7993

4637 1874 VF20 ANACS. A nice example for those seeking a circulated three dollar gold coin. Moderate wear defines the VF grade, with warm gold surfaces and a bit of prooflike flash remaining among the letters and devices. NGC ID# 25MX, PCGS# 7998

4638 1874 AU55 NGC. The yellow-gold surfaces of this Choice AU display traces of luster in the recessed areas. Well-struck except for the typical weakness on the bow knot. NGC ID# 25MX, PCGS# 7998

4639 1878 — Obverse Scratched — NGC Details. AU. The light marks on the left obverse do not appear to merit the NGC designation. The partly lustrous yellow-gold surfaces have good eye appeal. Minor die doubling is evident on the right border of the right side of the wreath.

4640 1878 AU58 NGC. Traces of mint luster reside in the protected areas of this yellow-gold near-Mint three dollar piece that displays hints of reddish-gold at the peripheries. The design elements are sharply impressed. NGC ID# 25MZ, PCGS# 8000

4641 1878 AU58 NGC. Bright surfaces display a good amount of luster and are minimally marked for having seen brief circulation. Good detail is seen on the devices save for strike weakness in portions of Liberty's hair and on the bow knot. The upper right portion of the wreath is die doubled. NGC ID# 25MZ, PCGS# 8000

4642 1878 AU58 NGC. Luster brightens design elements of this wheat-gold example. The curls show slight wear. A loupe reveals faint and minor obverse pinscratches. Minor die doubling is apparent on the outer edges of the upper right foliage of the wreath. NGC ID# 25MZ, PCGS# 8000

4643 1886 XF45 NGC. Yellow-gold surfaces display traces of luster in the recesses of this Choice XF three dollar. Well defined despite some strike weakness and high-point wear. Minimally marked for a coin having seen some circulation. NGC ID# 25N9, PCGS# 8008

**1886 Three Dollar, AU55
A Prooflike Appearance**

- 4644 1886 AU55 PCGS.** Only 1,000 business-strike three dollar gold pieces were struck at the Philadelphia Mint in 1886. Bright peach-gold surfaces show faint hints of light green, and a solid strike results in strong detail on the design elements. Both sides reveal strong prooflike tendencies. Wispy hairlines are visible in the fields. NGC ID# 25N9, PCGS# 8008

CLASSIC HALF EAGLES

- 4645 1834 Plain 4 XF45 NGC. Breen-6502, McCloskey 2-B, R.3.** The 4 in the date is triple-punched. This caramel-gold Choice XF first-year Classic five displays wear on the forehead curls but glimmers of luster remain. Marks are minor overall though we note a vertical hairline on the cheek. NGC ID# 25RR, PCGS# 8171
- 4646 1834 Plain 4 AU55 NGC. Breen-6501, McCloskey 3-B, R.1.** A luminous canary-gold Choice AU first-year Classic type coin with moderate high point wear and no obtrusive abrasions. Rose-red toning lingers in protected areas. NGC ID# 25RR, PCGS# 8171

**1834 Classic Five, XF40
Rare Crosslet 4 Variety**

- 4647 1834 Crosslet 4 XF40 NGC. Breen-6503, McCloskey 5-D, R.4.** The Plain 4 1834 Classic five is fairly common, but the elusive Crosslet 4 is the key Philadelphia variety of the type. A tan-gold half eagle with a minimally marked appearance and rich definition on the eagle's plumage. The curls show wear consistent with the XF level. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* PCGS# 8172
- 4648 1836 AU55 NGC. Breen-6509, McCloskey 4-D, R.2. Second Head. Large Date.** The bright antique-gold surfaces of this attractive Choice AU specimen are minimally abraded and display luster in the recesses. The well-detailed design elements show only a trace of wear. NGC ID# 25RY, PCGS# 8174
- 4649 1837 XF45 NGC. CAC. Breen-6512, McCloskey 2-B, R.2. The Large Date, Large 5 variety and the most prevalent for the 1837 issue.** The well defined and original pumpkin-gold surfaces are smooth except for small field marks below the beak. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25RZ, PCGS# 8175

LIBERTY HALF EAGLES

- 4650 1839 XF45 PCGS.** The first year of the Liberty Head design is always popular for type, as well as being sought by collectors of early gold. This orange-gold representative is well-detailed for the assigned grade. With most surface abrasions softened by wear, the coin is bright with traces of luster around the stars and lettering, plus a glimpse of original prooflike flash surrounding the eagle. Population: 25 in 45, 75 finer (12/13). NGC ID# 25S7, PCGS# 8191
- 4651 1839 AU53 NGC. CAC.** 1839-dated half eagles are a little-known design subtype. Among other minor changes, the pronounced curve of the bust truncation and Liberty's sleepy expression were modified the following year. The present straw-gold example is richly detailed. The reverse is smooth and the obverse displays a few faded thin marks near the portrait. NGC ID# 25S7, PCGS# 8191

**1839-C Five Dollar, AU Details
Sole Liberty Type With Obverse Mintmark**

- 4652 1839-C — Repaired — NGC Details. AU. Variety 1.** The 1839 issues were the first year of the long-lived Liberty type that was produced until 1908. The 1839 is the sole Charlotte issue and the only one with an obverse mintmark. The 1839-C has a mintage of just 17,205 pieces. This coin has impressive sharpness, but it has been polished and the field near Liberty's chin is sunken and pinscratched from a repair.
- 4653 1842-D Small Date — Improperly Cleaned — NGC Details. AU. Variety 7-E.** A moderately glossy example of this early and scarce but collectible Dahlonega issue. Abrasions are scattered but none merit individual description. The high points of the portrait reveal a typical strike. NGC ID# 25SX, PCGS# 8210

**1842-D Half Eagle, AU53
Small Date, Small Letters**

- 4654 1842-D Small Date AU53 NGC. Variety 7-E.** A well-defined, straw-gold representative of the antebellum Dahlonega Mint. The surfaces are moderately subdued and devoid of singularly relevant abrasions. The Large Letters subtype was adopted in 1842 making it a transitional year for the denomination except at New Orleans, which continued to use obsolete reverses until mid-1843. NGC ID# 25SX, PCGS# 8210

**1842-O Five, AU Sharpness
Just 16,400 Pieces Issued**

- 4655 1842-O — Improperly Cleaned — NGC Details. AU. Variety 1.** A minimally circulated but hairlined yellow-gold example of this challenging New Orleans issue. Bagmarks are absent save for a slender abrasion near the chin. The strike shows blending on the curls and the eagle's neck. A scant 16,400 pieces were struck. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25SZ, PCGS# 8212*

- 4656 1843-D Medium D — Damaged — NCS. VF Details. Variety 10-G (formerly 10-H).** An abrasion on the reverse field beneath OF is the source of the NCS designation. Peach-tinged luster at the reverse border suggests that the soft definition on the portrait is primarily due to the strike instead of wear. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25T4, PCGS# 8215*

**1843-O Half Eagle, AU53
Scarce Small Letters Reverse**

- 4657 1843-O Small Letters AU53 NGC. Variety 2.** This almond-gold representative has well struck stars and wings though the eagle's neck and fletchings are incompletely brought up. The fields display the expected number of minor abrasions but none are singularly distracting. The Small Letters is the scarcer of the two major 1843-O varieties. NGC ID# 25T5, PCGS# 8217

- 4658 1845-O — Improperly Cleaned — NCS. AU Details. Variety 1.** A nicely struck lemon-gold No Motto New Orleans five that exhibits surprisingly few visible marks. Thorough evaluation reveals faint parallel hairlines. Very scarce due to a mintage of 41,000 pieces. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25TD, PCGS# 8225*

- 4659 1846-D/D — Improperly Cleaned — NCS. AU Details. Variety 16-J (previously 15-L).** Undesignated as 1846-D/D but the mintmark is obviously repunched widely northeast. The present yellow-gold Dahlonega representative is bright and glossy from cleaning and has an abrasion on the lower portion of the eagle's right (facing) wing. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 8229*

- 4660 1847-D XF45 PCGS. Variety 19-I (formerly 17-I).** An originally toned lemon-gold Dahlonega half eagle. Luster is especially plentiful on the reverse periphery. A mark is noted on the UN in UNITED and lesser abrasions are present on the cheek and above the ear. NGC ID# 25TP, PCGS# 8234

**1848 Half Eagle, MS62
Conditionally Rare No Motto Issue**

- 4661 1848 MS62 NGC.** The base of the 1 is widely repunched north. This sun-gold half eagle has good luster and is smooth aside from a single faded pinscratch above star 12. The strike is good although the centers show minor blending. The reverse die is slightly misaligned, causing a wire rim on the reverse between 9 and 3 o'clock and a narrow rim near 6 o'clock. Census: 8 in 62, 9 finer (12/13). *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25TS, PCGS# 8236*

- 4662 1848-C — Cleaned — ANACS. XF40 Details. Variety 1.** A honey-gold and lime-green example. Pockets of luster remain, though the surfaces are somewhat bright and glossy. The reverse border displays faint pinscratches, as does the field above the 18 in the date. Liberty's hair and the eagle's claws and fletchings show weakness customary for the Charlotte facility. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25TT, PCGS# 8237*

- 4663 1851-C — Improperly Cleaned — NCS. XF Details. Variety 1.** Glimpses of lemon-gold toning reside in design recesses of this Charlotte Mint half eagle. The fields and high points are straw-gold. Hairlined and somewhat glossy but nonetheless collectible. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25U6, PCGS# 8247*

- 4664 1852-D XF45 NGC. Variety 32-V.** This charming apricot-gold Choice XF example is lightly abraded aside from a couple of slender vertical marks on the cheek. The curls show softness of strike usual for the remote Dahlonega facility. The reverse legends exhibit bright luster. NGC ID# 25UC, PCGS# 8252

- 4665 1853-C — Improperly Cleaned — NGC Details. XF. Variety 1.** Yellow-gold surfaces display whispers of gold and are lightly cleaned. Distributed marks are scattered over both sides.

1853-C Half Eagle, AU58

- 4666 1853-C AU58 NGC. Variety 1.** A sun-gold Borderline Uncirculated Charlotte Mint type coin. Well struck for the Southern facility, and though minor marks are scattered, none are individually of consequence. Flashy luster is especially prevalent at the borders. Census: 28 in 58, 25 finer (1/14). NGC ID# 25UE, PCGS# 8254

**1854-D Five Dollar, AU53
Large D Mintmark**

4667 1854-D Large D AU53 NGC. Variety 36-AA. This apricot-gold half eagle is only lightly abraded aside from a faded thin mark on the cheekbone. The glossy motifs are well defined for the Dahlonega facility though the right-side dentils are softly impressed. The mintmark is high relief and touches both the feather and branch. NGC ID# 25UK, PCGS# 8258

4668 1855-S — Improperly Cleaned — NCS. AU Details. An orange-gold representative of the first collectible San Francisco issue. Moderately bright and typically abraded. The strike exhibits blending on the curls and fletchings.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25UU, PCGS# 8265

4669 1858-C AU50 NGC. Variety 2. The rarer of the two die varieties, with the mintmark mostly over the E (instead of the V) in FIVE. An apricot-gold Charlotte type coin with minimally marked and luminous surfaces. A fairly deep strike-through (as made) is noted near the eagle's neck. NGC ID# 25V8, PCGS# 8277

**1859 Half Eagle, AU58
A Lovely Mint State Alternative**

4670 1859 AU58 PCGS. This low-mintage issue is rarely encountered in any grade, and collectors can abandon hopes of obtaining a full Mint State example, as only eight have been certified by PCGS and NGC, combined. The alternative is a near-Mint specimen such as the coin offered here. Although a trace of wear is present, along with scattered marks of little consequence, both sides have virtually full luster with lovely greenish-gold surfaces. Population: 11 in 58, 2 finer (12/13). NGC ID# 25VB, PCGS# 8280

4671 1861 AU58 PCGS. CAC. Good remaining mint luster and bright, yellow-gold color characterize this near-Mint 1861 half eagle. A great choice for type, well-struck and very close to fully Uncirculated. NGC ID# 25VK, PCGS# 8288

**1867 Half Eagle, AU53
Rare in All Grades**

4672 1867 AU53 NGC. The 1867 half eagle, from a mintage approaching 7,000 pieces, is rare in all grades. The yellow-gold surfaces of this AU53 example display some partially prooflike fields and sharply struck design elements. Distributed marks are visible over both sides. Census: 12 in 53, 14 finer (12/13). NGC ID# 25W3, PCGS# 8313

4673 1871-CC — Cleaned — ANACS. XF Details, Net VF30. Variety 1-A. This rare date Carson City half eagle is bright from a wipe but the sole visible mark is a small reverse rim nick at 8:30. Substantial luster is apparent though the curls and the eagle's neck are lightly brought up.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25WD, PCGS# 8323

**1872-CC Half Eagle, XF Details
Challenging Carson City Issue**

4674 1872-CC — Rim Damage, Improperly Cleaned — NCS. XF Details. Variety 1-B. Though designated as "Rim Damage," the only noticeable peripheral abrasion is a relatively minor scratch at 3 o'clock on the reverse. The obverse has several moderate abrasions, and both sides are luminous from a past wipe.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25WG, PCGS# 8326

4675 1875-S — Improperly Cleaned — NCS. AU Details. Like other pre-1878 San Francisco issues, the 1875-S is rare. Just 9,000 pieces were struck and none were set aside by collectors. An apricot-gold example with moderate hairlines and a band of luster throughout the reverse periphery.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25WV, PCGS# 8338

4676 1877 — Improperly Cleaned — NCS. AU Details. A tiny business mintage of 1,132 pieces ensures the rarity of the 1877 half eagle. The few gold collectors of the day instead acquired one of the 20 proofs. The present sun-gold example is bright from a thorough wipe and has a textured appearance from numerous tiny abrasions. A pinscratch is noted on the cheek.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25WZ, PCGS# 8342

4677 1877-S AU55 NGC. Only 26,700 half eagles were struck at the San Francisco Mint in 1877. The relatively few survivors are mostly in Very Fine and Extremely Fine grades; Mint State pieces are nearly unobtainable. This yellow-gold Choice AU displays luster in the protected areas and is sharply struck, save for the usual softness in the eagle's neck. Census: 21 in 55, 9 finer (1/14). NGC ID# 25X3, PCGS# 8344

**1879 Half Eagle, MS64
Only Three Numerically Finer**

4678 1879 MS64 NGC. Lower level Mint State 1879 half eagles, while hardly common, are available with enough frequency that collectors have reasonable hopes of obtaining one. That is certainly true for grades from AU58 to MS62, for nearly 80% of NGC submissions fall in that grade range. However MS63 and MS64 examples are rare, and MS65 pieces are nearly impossible. This lovely near-Gem has hints of pinkish-rose toning over its brilliant yellow-gold surfaces with full luster and trivial marks. Census: 25 in 64 (2 in 64+, 1 in 64 ★), 3 finer (1/14). NGC ID# 25X7, PCGS# 8348

**1880 Liberty Half Eagle, MS65
A High-Grade Rarity**

4679 1880 MS65 PCGS. Following decades of low to moderate half eagle production, the Philadelphia Mint coined more than 3 million in 1880. The previous high for any annual half eagle production was 915,981 pieces in 1847. In fact, for the entire production of half eagles from 1795 to 1929, the 1880 had the fifth highest mintage. One would expect examples to be commonplace, but the combined PCGS and NGC certification totals just 46 in MS65, and only two finer. This Gem has brilliant yellow-gold luster with pristine surfaces and full mint frost, showing delicate blue peripheral toning. Population: 15 in 65, 1 finer (12/13). NGC ID# 25XA, PCGS# 8351

4680 1881 MS64+ PCGS. CAC. Intense luster radiates from peach-gold surfaces imbued with splashes of apricot on the obverse. Sharply struck design elements and minimal marks corroborate the CAC approval. Very difficult to locate in Gem or finer condition. NGC ID# 25XD, PCGS# 8354

**1881-S Liberty Half Eagle, MS64
Conditionally Very Rare in Finer Grades**

4681 1881-S MS64 PCGS. CAC. Despite the substantial mintage of 969,000 pieces, the 1881-S Liberty half eagle is rare in Gem condition, with PCGS having assigned MS65 grades to five examples, with none finer (12/13), leaving near-Gems as a more affordable alternative. This lovely MS64 specimen displays a pleasing strike and lovely yellow-gold color. NGC ID# 25XF, PCGS# 8357

**1882 Half Eagle, MS65
Condition Rarity**

4682 1882 MS65 NGC. An attentively struck Philadelphia half eagle that also is among the best-preserved for its date. Despite a mintage of more than 2.5 million pieces, Gem 1882 fives are condition rarities. Yellow-orange color over a wheat-gold base enhances the considerable eye appeal. Census: 34 in 65 (1 in 65+), 3 finer (1/14). NGC ID# 25XG, PCGS# 8358

**1882 Liberty Half Eagle, MS65
Extremely Rare Any Finer**

4683 1882 MS65 NGC. Although the 1882 Liberty half eagle claims a large mintage of 2.5 million pieces, the issue is rare in MS65 condition, and finer examples are virtually unobtainable. This delightful Gem exhibits sharply detailed design elements and well-preserved yellow and rose-gold surfaces that radiate vibrant mint luster. Census: 34 in 65 (1 in 65+), 3 finer (1/14). NGC ID# 25XG, PCGS# 8358

**1882-CC Half Eagle, Near-Mint
Ideal Carson City Slider**

4684 1882-CC AU58 PCGS. Variety 1-A. Slight wear on the eagle's neck feathers confirms a brief stint in Nevada commerce long ago. However, the margins teem with luster and the wheat-gold surfaces are unmarked. 82,817 pieces were struck. The 1882 Philadelphia mintage was more than 30 times greater. Population: 66 in 58, 14 finer (12/13). NGC ID# 25XH, PCGS# 8359

4685 1883-S MS63 NGC. This lustrous Select specimen displays uniformly well-defined design elements. Distributed light marks on the peach-gold surfaces are in accordance with the designated grade. Census: 28 in 63, 1 finer (1/14). NGC ID# 25XM, PCGS# 8363

4686 1884-S MS63 PCGS. Uncirculated examples of the 1884-S half eagle are in relatively short supply as most entered the channels of commerce. Variegated orange-gold and lime-green toning resides on the lustrous surfaces of this well-struck Select example. The few minute grade-determining marks are not serious. Population: 49 in 63 (1 in 63+), 13 finer (12/13). NGC ID# 25XR, PCGS# 8366

4687 1885 MS64 NGC. This attractive Choice specimen displays sharply detailed design elements and vibrant mint luster with lightly marked yellow and rose-gold surfaces. NGC has graded 13 numerically finer examples (1/14). NGC ID# 25XS, PCGS# 8367

4688 1886-S MS64 NGC. Rich orange-gold patination resides on the lustrous surfaces of this near-Gem half eagle, complemented by sharply struck design elements. Light marks preclude Gem status, examples of which are difficult to locate. NGC ID# 25XV, PCGS# 8370

**1886-S Half Eagle, MS65
Only One Finer**

4689 1886-S MS65 NGC. The fourth highest half eagle mintage of the denomination occurred at San Francisco in 1886. However, Gem and finer examples are extremely rare, with a combined population of 65 in MS65, and only one finer piece. This beautiful Gem has brilliant yellow luster with pinkish-rose and pale green accents. Census: 51 in 65 (1 in 65+, 1 in 65 ★), 1 finer (1/14). NGC ID# 25XV, PCGS# 8370

**1890-CC Half Eagle, MS62
Great Color**

4690 1890-CC MS62 PCGS. CAC. Olive-green and apricot-gold alternate across this boldly struck Carson City five. Marks are minor for the grade despite a slender line beneath the hairbun. Luster dominates the legends and stars. More elusive than its 1891-CC successor, which has nearly four times the mintage. NGC ID# 25Y3, PCGS# 8376

4691 1891-CC MS61 NGC. Variety 1-A. A delicate die line (as made) on Liberty's cheek is a diagnostic to distinguish the two obverse varieties of this Carson City type issue. The present honey-gold half eagle is only moderately marked and possesses a crisp strike. NGC ID# 25Y5, PCGS# 8378

4692 1892 MS64 PCGS. CAC. Splashes of deep magenta toning appear on each side of this Choice Mint State half eagle, with frosty orange-gold luster and exceptional eye appeal. PCGS has certified just 51 finer examples (12/13). NGC ID# 25Y6, PCGS# 8379

4693 1892-CC AU55 NGC. Variety 1-A. This apricot-gold Carson City five has a good strike and shows only unimportant marks. Luster dominates the peripheries. Scarcer than its 1891-CC predecessor. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25Y7, PCGS# 8380

1893 Half Eagle, MS65+

4694 1893 MS65+ NGC. Only 17 half eagle issues had seven-figure mintages in the entire history of the denomination from 1795 to 1929. One of those is the 1893, and the date is common in most grades, with more than 7,000 certified at NGC. However, only 73 of those submissions achieves a grade of MS65 or finer. The present Gem is one of that small subset, exhibiting a bold strike, impressive surfaces, and frosty yellow luster with delicate rose overtones. Census: 63 in 65 (4 in 65+), 10 finer (1/14). NGC ID# 25YA, PCGS# 8383

4695 1893-CC AU55 PCGS. CAC. Variety 2-A. The last Carson City five dollar issue is scarcer than the immediately preceding emissions from the facility, as it is limited to 60,000 pieces. This orange-gold representative is mildly bright and devoid of relevant marks. The margins teem with luster. NGC ID# 25YB, PCGS# 8384

4696 1893-CC AU58 NGC. CAC. Variety 1-A. Always in demand as the final date of the Carson City series. Ample luster exudes from the peach-gold surfaces that show well-struck design elements. A few minuscule ticks do not detract from the pleasing eye appeal. NGC ID# 25YB, PCGS# 8384

- 4697 1893-O MS61 PCGS. Variety 1.** The usual die pair for this conditionally challenging New Orleans issue, although a scarce variety is known with a different date location. This honey-gold example has a suitable strike and no singularly obtrusive marks. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25YC, PCGS# 8385
- 4698 1895 MS65 NGC.** Gold-orange margins yield to lighter yellow through the satiny, mellowed centers. A well-defined and minimally marked Gem that will appeal to type and date collectors alike. Census: 73 in 65 (2 in 65+), 9 finer (12/13). NGC ID# 25YH, PCGS# 8390
- 4699 1895 MS65 NGC.** Creamy apricot-gold luster gives this Gem a great appearance. Well-defined devices are smooth and beautiful. Census: 73 in 65 (2 in 65+), 9 finer (12/13). NGC ID# 25YH, PCGS# 8390

1897 Liberty Half Eagle, MS65

- 4700 1897 MS65 NGC.** The 1897 is another Liberty half eagle issue that is considered a common grade, but it is rare in Gem grades and impossible at finer levels. NGC and PCGS have certified a combined total of 99 pieces in MS65 and only 10 finer examples. This frosty rose-gold Gem has brilliant luster and sharp design motifs with trivial grade-consistent marks. A lovely piece for the advanced collector. Census: 72 in 65 (1 in 65 ★), 8 finer (1/14). NGC ID# 25YM, PCGS# 8394

1897 Liberty Five, MS65 Only Two Numerically Finer Coins at PCGS

- 4701 1897 MS65 PCGS. CAC.** The 1897 Liberty half eagle was produced in large numbers, but the issue is quite rare in MS65 condition. This impressive Gem exhibits razor-sharp definition on all design elements and the well-preserved peach-gold surfaces radiate vibrant mint luster. Population: 27 in 65 (3 in 65+), 2 finer (12/13). NGC ID# 25YM, PCGS# 8394
- 4702 1898 MS64 PCGS. CAC.** Vibrant luster runs over both sides of this sharply struck near-Gem, and its yellow-gold surfaces reveal just a few grade-consistent marks. The 1898 is an important condition rarity any finer. Population: 51 in 64, 8 finer (12/13). NGC ID# 25YP, PCGS# 8396
- 4703 1898-S MS64 PCGS.** The vivid orange and greenish-gold surfaces of this well-preserved Choice example display vibrant mint luster on both sides with only minor signs of contact. Population: 39 in 64, 8 finer (12/13). NGC ID# 25YR, PCGS# 8397

- 4704 1899-S MS63 NGC. CAC.** This yellow-gold half eagle is remarkably free of abrasions for the grade. The coin displays abundant mint luster and a bold strike, with an uncommonly smooth appearance. Scarce this nice. NGC ID# 25YT, PCGS# 8399
- 4705 1901 MS64 NGC. CAC.** Intense luster exudes from the peach-gold surfaces of this near-Gem, and an impressive strike delivers sharp detail to the devices. Some minor marks prevent Gem status. NGC ID# 25YW, PCGS# 8402
- 4706 1901-S MS64+ PCGS. CAC.** Despite a mintage of more than 3.5 million coins, survivors are typically in lower grades, with an average certified grade of less than MS62. This Choice Mint State piece has brilliant lemon-yellow luster with satin surfaces. A highly appealing example. NGC ID# 25YX, PCGS# 8404

1901-S Five Dollar, MS66 The Obvious 20th Century Choice for Type

- 4707 1901-S MS66 PCGS.** While the 1901-S is readily available in most grades, it is scarce in Premium Gem condition and rarely seen any finer. Magnificent frosted mint luster glimmers throughout the deep reddish-gold surfaces. The strike is needle-sharp, and there are only a few nearly imperceptible abrasions. Population: 51 in 66 (2 in 66+), 3 finer (12/13). *Ex: West Palm Beach Signature (Heritage, 7/2009), lot 1649.* NGC ID# 25YX, PCGS# 8404
- 4708 1902-S MS64 NGC.** A lovely orange-gold near-Gem, this 1902-S half eagle has bold design motifs with only a few scattered marks on each side. Hints of pale blue toning add to its eye appeal. NGC ID# 25YZ, PCGS# 8406
- 4709 1902-S MS65 NGC.** This well-defined Gem is predominantly orange-gold with frosty touches on the highest design elements. A great coin for the type collection. NGC ID# 25YZ, PCGS# 8406

1903 Half Eagle, MS65 Elusive in Finer Grades

- 4710 1903 MS65 PCGS.** Although the marketplace values the 1903 Liberty half eagle as a type coin, the low mintage and similarly low population suggests it should be valued higher. This sharply defined and satiny Gem has brilliant yellow luster with excellent eye appeal. The obverse has a thin planchet lamination from the eye to the nose and the left field. Population: 20 in 65, 12 finer (12/13). NGC ID# 25Z2, PCGS# 8407

1903 Half Eagle, MS65
Scarce in High Grade

4711 1903 MS65 PCGS. In high grade, the 1903 Liberty half eagle is more difficult to locate than its mintage of 226,800 pieces would suggest. This delightful Gem displays sharply detailed design elements and vibrant mint luster, with outstanding eye appeal. Like many examples of the date, this coin exhibits a few faint alloy spots in the obverse field. Population: 20 in 65, 12 finer (12/13). NGC ID# 25Z2, PCGS# 8407

4712 1903-S MS64 PCGS. A lustrous lemon-gold and apple-green Choice representative. Marks are insignificant except for moderate contact beneath the branch stem. Housed in a green label holder. NGC ID# 25Z3, PCGS# 8408

4713 1908 MS64 NGC. A lustrous lemon-gold Choice type coin. The strike is sharp and no marks are of singular relevance. In a prior generation holder. The 1908 was the final date of the Gobrecht design, struck 64 years after his 1844 death. NGC ID# 25ZE, PCGS# 8418

1908 Liberty Half Eagle, MS65
Important Transitional Issue

4714 1908 MS65 PCGS. CAC. The modernization of coinage designs occurred in 1907 for eagles and double eagles, and in 1908 for quarter eagles and half eagles. Among the two smaller denominations, the half eagle utilized the Liberty design early in the year, with a mintage of 421,874 coins. This gorgeous example has brilliant yellow-gold luster with lovely rose and light blue toning. NGC ID# 25ZE, PCGS# 8418

INDIAN HALF EAGLES

1908 Half Eagle, MS64
Transitional Indian Design

4715 1908 MS64 PCGS. The first year of the Indian design, with a mintage of 577,845 coins. This distinctive design, popular today, had less popularity at the time of their first issue. It was said that the recessed design capture dirt and germs, spreading disease. The popular TV show, Mythbusters, could have done an episode. This Choice Mint State piece has brilliant, satiny yellow luster with trivial marks. An excellent candidate for first-year type collectors. NGC ID# 28DE, PCGS# 8510

1908 Half Eagle, MS64
A Popular Type Coin

4716 1908 MS64 NGC. CAC. The 1908 Indian half eagle is an available date in high grade and a favorite of type collectors. Intense luster exudes from the yellow-gold surfaces of this near-Gem, and a solid strike imparts sharp detail to the design elements, including the feathers on the eagle's shoulder and legs. Light marks on the Indian's forehead and cheek determine the grade. NGC ID# 28DE, PCGS# 8510

1909-O Half Eagle, AU Details
Only New Orleans Indian Gold Issue

4717 1909-O — Cleaning — PCGS Genuine. AU Details. The swan-song of the New Orleans Mint was the 1909-O gold half eagle, having a production of 34,200 coins. The issue ranks among the rarest of all Indian half eagles. This piece has been cleaned, but exhibits attractive honey-gold and pale blue surfaces with myriad inconsequential marks. NGC ID# 25ZK, PCGS# 8515

4718 1910 MS63+ PCGS. The 1910 Indian half eagle is about in the middle of the series in terms of absolute and high grade rarity. This high-end Select example displays lightly marked yellow-gold surfaces with vibrant mint luster and highlights of green. NGC ID# 28DK, PCGS# 8517

4719 1910-S MS61 NGC. Elusive in Uncirculated grades, this is an attractive MS61 example with minimal abrasions, a strong shoulder on the eagle, and rich, yellow-gold color. Some weakness on the lower headdress accounts for the assigned grade. NGC ID# 28DM, PCGS# 8519

4720 1911-D AU53 NGC. An attractive AU53 example of this challenging series key, with lightly abraded yellow-gold surfaces and bright mint luster on both sides. From a mintage of 72,500 pieces. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 28DR, PCGS# 8521

4721 1911-D AU55 PCGS. Yellow-gold surfaces retain luster in the recesses of the relatively well-defined design elements. A few minute marks are undisturbing. NGC ID# 28DR, PCGS# 8521

4722 1911-D AU55 PCGS. Ex: Teich Family Collection. A surprisingly bright and glossy example of this challenging issue. Modest wear and abrasions affect the well-defined devices and surrounding fields. *From The Teich Family Collection.* NGC ID# 28DR, PCGS# 8521

4723 1911-S MS62 PCGS. The 1911-S Indian half eagle is much more elusive in high grade than its mintage of 1.4 million pieces would suggest. This impressive MS62 example exhibits well-defined design elements and lightly marked orange and rose-gold surfaces that radiate vibrant mint luster on both sides. NGC ID# 25ZM, PCGS# 8522

4724 1911-S MS62 PCGS. The mintmark is distinct on this peach-gold Indian five. The radiant surfaces display small field marks, most noticeable near the profile and the I in LIBERTY. Scarcer than its Philly counterpart despite a higher mintage. Encapsulated in a green label holder. NGC ID# 25ZM, PCGS# 8522

4725 1912-S XF45 NGC. Bright yellow-gold surfaces exhibit well impressed design elements. A few minute marks do not disturb. NGC ID# 25ZN, PCGS# 8524

4726 1912-S AU58 PCGS. CAC. The 1912-S Indian half eagle is more difficult to locate than its mintage of 392,000 pieces suggests. This well-detailed near-Mint example displays lightly marked yellow-gold surfaces with bright mint luster. NGC ID# 25ZN, PCGS# 8524

1913 Indian Five, MS64 Vivid Colorful Surfaces

4727 1913 MS64 PCGS. CAC. The vivid orange-gold surfaces of this delightful Choice example radiate vibrant mint luster and show only minor signs of contact. The design elements are sharply detailed and eye appeal is outstanding. The 1913 is one of the more available dates in the series, and always a popular choice with type collectors. NGC ID# 28DT, PCGS# 8525

1913 Indian Five, MS64+ Vivid Color, Vibrant Luster

4728 1913 MS64+ PCGS. CAC. The 1913 Indian half eagle is a popular type representative for the series, from a mintage of 915,900 pieces. This high-end Choice example displays sharply detailed design elements and vibrant mint luster to complement the well-preserved orange-gold surfaces. Population: 23 in 64+, 52 finer (12/13). NGC ID# 28DT, PCGS# 8525

4729 1915-S AU58 NGC. Yellow-orange overall with copper-green elements along parts of the margins. Just a touch of rub affects the still-lustrous surfaces and the overall eye appeal is solid. *From Christopher Bently's Nob Hill Collection.* NGC ID# 25ZR, PCGS# 8531

EARLY EAGLE

1801 BD-2 Eagle, XF Details

4730 1801 — Mount Removed — NCS. XF Details. BD-2, R.2. The obverse was formerly affixed to jewelry at 3 and 9 o'clock, with solder remnants and scratches evident at those two locations. The peach-gold surfaces are mildly luminous from cleaning. The familiar but interesting die variety with several raised vertical lines within Liberty's cap. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 2627, PCGS# 8564

LIBERTY EAGLES

4731 1842 Small Date AU50 PCGS. The Small Date has a Plain 4, and has a much lower mintage and is rarer than its Large Date cousin. Traces of luster reside in the protected areas of its yellow-gold surfaces. Strong definition is apparent on the design elements except for weakness in some of the star centers. Population: 10 in 50, 16 finer (12/13). NGC ID# 262L, PCGS# 8585

4732 1843 XF40 NGC. A nominal mintage of 75,462 Liberty eagles was accomplished in 1843 and the date is scarce-to-rare in all grades today. This XF40 specimen displays light wear on the design elements and lightly marked orange-gold surfaces.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 262P, PCGS# 8588

1845-O Eagle, Choice AU Better New Orleans Issue

4733 1845-O AU55 NGC. Variety 1. The 84 in the date is clearly repunched south and the neck curls are partially lapped. The sun-gold surfaces display peripheral luster and show only a single mentionable mark, located near star 5. Evenly struck. A scarcer New Orleans issue from a mintage of just 47,500 pieces. Census: 41 in 55, 31 finer (1/14). NGC ID# 262V, PCGS# 8593

1846 Eagle, AU50 Tough Date

4734 1846 AU50 NGC. A scarce date in the early Liberty eagle series, rarely seen in grades above AU55. The mintage was only 20,095 coins, and only a slender percentage of that production has survived. Although the surfaces are a bit abraded, this AU example is nicely defined and displays hints of its original luster. Census: 15 in 50, 33 finer (1/14). NGC ID# 262W, PCGS# 8594

1846 Ten Dollar, AU55 Conditionally Elusive

4735 1846 AU55 NGC. Pre-1848 coinage on the whole is elusive and collectors trying to find a nice 1846 eagle must acknowledge that truth. This Choice AU coin, moderately abraded on the lemon-gold obverse but flashy with pools of reflectivity in the reverse fields, is attractive and conditionally rare. Census: 13 in 55, 8 finer (1/14). NGC ID# 262W, PCGS# 8594

4736 1848-O XF40 NGC. Variety 1. The sole variety with a ring atop the second vertical shield stripe. Bright yellow-gold surfaces display traces of luster in the recessed areas. The design elements are well brought up except for the usual softness in the star centers and the eagle's left (facing) leg. NGC ID# 2634, PCGS# 8600

4737 1849 XF45 PCGS. A moderately circulated, yellow-gold example of the date with no major marks or distractions. A little softly struck on the eagle, as typically seen on the 1849 Philadelphia issue. A nice, early representative of the No Motto type. NGC ID# 2635, PCGS# 8601

4738 1850-O XF45 NGC. Variety 1. The green-gold surfaces display faint hairlines and are free from noticeable abrasions aside from a narrow mark on the lower left shield border. Scarce, since the 1850-O has about one-tenth the mintage of the 1847-O. NGC ID# 2639, PCGS# 8605

4739 1853 AU58 NGC. A lightly circulated, apricot-gold ten dollar with a touch of peripheral mint luster. This orange-gold example has numerous surface marks as often encountered in this grade. Scarce any finer. NGC ID# 263E, PCGS# 8610

4740 1854-O Large Date — Damaged — NGC Details. AU. Variety 2. Both sides display bold radial die cracks at 2:30. This New Orleans No Motto ten is bright from a wipe and has a small reverse rim nick at 12 o'clock. The strike is somewhat soft at the centers.

4741 1854-S XF45 PCGS. Though the 1854-S half eagle is a legendary rarity, its first-year eagle counterpart is collectible. The present sun-gold example has AU sharpness but a few faded abrasions are noted on the left field near the portrait. Housed in a green label holder.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 263K, PCGS# 8615

4742 1856 AU58 NGC. From a mintage of 60,490 pieces, the 1856 Liberty eagle is a very scarce issue in high grade. This pleasing near-Mint specimen shows just a trace of wear on the well-detailed design elements and the lustrous surfaces are lightly abraded. Census: 83 in 58, 27 finer (1/14).
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 263P, PCGS# 8619

4743 1857 AU55 NGC. Honey-gold luster fills the peripheries of this better-date eagle, struck in the meager amount of 16,606 coins. The strike is sharp except for the deeply hubbed obverse stars. A handling mark appears in the upper reverse field, although the surfaces are otherwise attractive. Census: 19 in 55, 24 finer (12/13).
Ex: FUN Signature (Heritage, 1/2004), lot 7781.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 263T, PCGS# 8622

4744 1860 XF45 ANACS. Six-fold or “bulging” bun subtype. A moderately bright and typically abraded yellow gold representative of this low mintage Philadelphia issue. A mere 15,055 pieces were struck, since double eagles were preferred by bankers and exporters. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 2644, PCGS# 8631

4745 1868 AU50 PCGS. The lightly abraded yellow-gold surfaces of this pleasing AU specimen show prooflike reflectivity in sheltered areas and the sharply detailed design elements are lightly worn. Population: 17 in 50, 37 finer (12/13). *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 264N, PCGS# 8653

1876-CC Eagle, AU Details Rare Carson City Variety

4746 1876-CC — Obverse Damage, Whizzed — NCS. AU Details. Variety 1-A. This honey-gold Centennial Carson City issue has a mintage of just 4,696 pieces. Liberty’s cheek is smoothed, the shield lines appear strengthened, and both sides are glossy and hairlined. AU examples typically command a five-figure price, but the present coin should prove more obtainable. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 265D, PCGS# 8675

1877-S Liberty Eagle, AU55 Seldom Seen Any Finer

4747 1877-S AU55 NGC. The 1877-S Liberty eagle is a scarce issue in high grade, from a mintage of just 17,000 pieces. This attractive Choice AU specimen displays lightly abraded orange-gold surfaces that retain traces of original mint luster. The well-detailed design elements show just a touch of wear on the high points. Census: 29 in 55, 13 finer (1/14). NGC ID# 265H, PCGS# 8679

4748 1882 MS63 PCGS. A condition rarity in higher Mint State grades, the 1882 had an average certified grade of just MS61. This frosty Select Mint State piece has brilliant light yellow luster with scattered, grade-limiting marks, none of consequence. PCGS has only certified 39 finer examples (12/13). NGC ID# 2662, PCGS# 8695

4749 1885 MS63 PCGS. The 1885 Liberty eagle claims a substantial mintage of 253,400 pieces, but the date is scarce in MS63 condition. This impressive Select specimen offers peach-gold surfaces with frosty mint luster and only minor signs of contact. Population: 45 in 63, 13 finer (12/13). NGC ID# 266D, PCGS# 8706

4750 1885-S MS63 PCGS. A beautifully but unusually toned coin, with orange-gold at the obverse center competing with tinges of mint and hazel nearer the rims. The reverse shows some darker charcoal shades near the rim, which may be some struck-in die grease, as made. Satiny luster complements a bold strike. Population: 91 in 63 (4 in 63+), 3 finer (12/13). NGC ID# 266E, PCGS# 8707

4751 1885-S MS63 PCGS. The 1885-S ten dollar is scarce in the Select level of preservation and extremely rare any finer. Lustrous peach-gold surfaces display hints of subtle light green and lavender and are sharply struck. Scattered minute marks determine the grade. Population: 91 in 63 (4 in 63+), 3 finer (12/13). NGC ID# 266E, PCGS# 8707

4752 1887 MS62 PCGS. This eagle displays luster concentrated in the recessed areas of the well-struck design elements. Wheat-gold surfaces reveal distributed marks. The 1887 is a better date, due to a relatively low mintage of 53,600 pieces and an absence of sizeable overseas bank vault hoards. Population: 26 in 62, 5 finer (12/13). NGC ID# 266H, PCGS# 8710

4753 1888 MS62 NGC. Pale golden surfaces have small pools of semireflectivity. Well-defined with no trace of wear, though significant abrasions affect each side. Census: 49 in 62, 3 finer (12/13). NGC ID# 266K, PCGS# 8712

4754 1888-O MS62 NGC. CAC. Variety 1. A yellow-gold eagle with good luster, a bold strike, and distributed small obverse abrasions. A low mintage and conditionally scarce New Orleans issue. NGC ID# 266L, PCGS# 8713

4755 1888-S MS63 PCGS. The mintage was just 648,700 coins, and survivors typically hover around the MS60 level. This example has delicate light green and pale rose toning over its brilliant yellow surfaces. Only three examples are graded finer at PCGS (12/13). NGC ID# 266M, PCGS# 8714

1889 Liberty Eagle, MS61 Overlooked Low-Mintage Date

4756 1889 MS61 PCGS. The 1889 Liberty eagle is an overlooked rarity in the series, from a mintage of just 4,440 pieces. This impressive Mint State example displays sharply detailed design elements and vibrant mint luster, with vivid yellow-gold surfaces that show a scattering of minor contact marks. Population: 19 in 61, 6 finer (12/13). NGC ID# 266N, PCGS# 8715

4757 1890 MS61 NGC. The 1890 Liberty eagle claims a low mintage of 57,980 pieces but the survival rate is fairly high for this issue. This well-detailed MS61 specimen displays lustrous orange-gold surfaces with the expected number of contact marks for the grade. NGC ID# 266R, PCGS# 8717

4758 1890 MS62 PCGS. This well-detailed MS62 Liberty eagle displays vivid orange-gold surfaces that retain much of their original mint luster and show a scattering of grade-consistent contact marks on both sides. Population: 89 in 62, 18 finer (12/13). NGC ID# 266R, PCGS# 8717

4759 1891-CC AU55 PCGS. Variety 3-C, FS-501. The mintmark is obviously repunched, evident within the loops of both Cs although the curve to the right of the second C is definitive. This pumpkin-gold Choice AU ten displays substantial luster along with its share of marks. Housed in an old green label holder.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 266U, PCGS# 8720

4760 1891-CC AU58 NGC. Variety 2-B. A smooth apricot-gold and lime-green Carson City type coin. The absence of noticeable marks gives the present piece eye appeal superior to many examples certified as Mint State.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 266U, PCGS# 8720

4761 1891-CC MS61 NGC. Variety 2-B. A pumpkin-gold CC-mint type coin with dynamic luster and a bold strike. The fields exhibit surprisingly few marks. We note a patch of wispy vertical marks west of Liberty's ear. NGC ID# 266U, PCGS# 8720

4762 1891-CC MS61 PCGS. Variety 3-C, FS-501. Both Cs in the mintmark are nicely repunched. A well struck lemon-gold example of this collectible Carson City emission. The open fields are mildly subdued and display the expected number of abrasions. NGC ID# 266U, PCGS# 8720

4763 1892-O MS61 PCGS. Variety 1. A sharply struck lemon-gold representative of this low mintage New Orleans issue. As is the case with all Mint State '92-O tens, both sides display a smattering of small abrasions.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 266X, PCGS# 8723

4764 1893-O MS60 PCGS. Variety 1. This radiant honey-gold New Orleans ten has good luster and a bold strike. Small marks are scattered, customary for the low mintage issue. Just 17,000 pieces were issued. Housed in a green label holder.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2673, PCGS# 8727

4765 1893-O MS61 NGC. Variety 1. A radiant yellow-gold representative of this low mintage New Orleans issue. The reverse is only lightly abraded. The obverse has a number of medium marks and a nick on the rim at 12 o'clock. NGC ID# 2673, PCGS# 8727

4766 1895-O MS62 PCGS. Variety 2. Three die varieties are known despite a mintage of less than 100,000 pieces. The present well struck peach-gold example has good luster and a smooth reverse. Field grazes are noted near stars 2 and 12. NGC ID# 2679, PCGS# 8733

4767 1898-S MS63 NGC. Rich orange-gold margins pale to yellow at the warmly lustrous centers. Though lightly abraded overall, this later 19th century S-mint eagle retains considerable arm's-length charm thanks to boldly impressed devices that stand out from a distance. Census: 20 in 63, 3 finer (1/14). NGC ID# 267H, PCGS# 8741

4768 1899-S MS63 NGC. From a substantial mintage of 841,000 pieces, the 1899-S is still quite scarce in MS 63 condition. This sharply detailed Select example displays lustrous yellow and rose-gold surfaces with a scattering of minor contact marks on both sides. Census: 68 in 63 (1 in 63+), 13 finer (1/14). NGC ID# 267L, PCGS# 8744

4769 1899-S MS63 NGC. This sharply struck Select eagle displays yellow-gold color over each side. Scattered marks cause minor disturbances in the luster flow. Scarce in MS63 and rare any finer. Census: 68 in 63 (1 in 63+), 13 finer (1/14). NGC ID# 267L, PCGS# 8744

1899-S Liberty Ten, MS64 A Condition Rarity

4770 1899-S MS64 PCGS. Having a mintage of 841,000 coins, the 1899-S is thought by most to be a common date. However, at the present grade level and in finer grades, this issue is an important rarity. The combined PCGS and NGC population figures show just 21 examples are graded MS64, and only eight are finer (1/14). This stunning Choice Mint State example has brilliant, satiny luster, light yellow on the obverse, and deeper yellow on the reverse. The surfaces are exceptional, with only a few scattered marks. NGC ID# 267L, PCGS# 8744

4771 1900 MS64 PCGS. Satiny luster issues from the peach-gold surfaces of this sharply struck near-Gem. Just a few minute marks short of Gem. PCGS has seen fewer than 20 coins finer (1/14). NGC ID# 267M, PCGS# 8745

1900-S Liberty Ten, MS63 Only Three Finer Coins at PCGS

4772 1900-S MS63 PCGS. From a mintage of 81,000 pieces, the 1900-S Liberty eagle is a scarce and underrated issue in the series. This attractive Select specimen is sharply detailed throughout and the lightly marked yellow and rose-gold surfaces radiate frosty mint luster. Population: 19 in 63, 3 finer (12/13). NGC ID# 267N, PCGS# 8746

4773 1901 MS63 PCGS. A splendid type piece, this Select Mint State 1901 Liberty eagle has satin surfaces with brilliant yellow luster and hints of magenta toning. NGC ID# 267P, PCGS# 8747

4774 1901-S MS64 PCGS. A remarkably colorful turn-of-the-century coin with a mix of pale canary-yellow, deep sun-orange, and hints of mint-green. Generally well-defined. Faint roller marks on Liberty's cheek are as-made. NGC ID# 267S, PCGS# 8749

**1903-S Eagle, MS65
Impressive Colors**

4775 1903-S MS65 PCGS Secure. The 1903-S ranks among the most easily obtained Liberty eagles in Gem or finer grades, behind only the 1901 and 1901-S eagles. This boldly defined Gem has brilliant and satiny yellow-gold luster with lovely rose and blue-green toning on each side. Population: 58 in 65 (3 in 65+), 21 finer (12/13). NGC ID# 267X, PCGS# 8754

4776 1906 MS63 NGC. A well-defined Select piece, yellow-orange with a few coppery areas including one at the back of Liberty's hair bun. Scattered wispy abrasions account for the grade. NGC ID# 2684, PCGS# 8759

4777 1906-D MS64 NGC. First year of operations in Denver, and this well-made Choice Mint State example is a lovely representative of that coinage. Trivial marks appear on the brilliant lemon-yellow surfaces of this frosty and well-struck specimen. NGC ID# 2685, PCGS# 8760

4778 1906-S MS62 PCGS. Intermingled peach-gold and lime-green patination cascades over the lustrous surfaces of this S-mint ten dollar piece. The design features are sharply struck throughout. Distributed ticks preclude a higher grade. Nevertheless, this is a nice coin for an MS62. Population: 67 in 62, 37 finer (12/13). NGC ID# 2687, PCGS# 8762

4779 1907 MS64+ NGC. CAC. Wheat-gold and copper-orange hues mingle on this late-date Liberty ten with satiny swirling luster. Excellent detail with a small spot near star 1. NGC ID# 2688, PCGS# 8763

INDIAN EAGLES

**1907 Indian Eagle, MS63
Popular No Periods Variant**

4780 1907 No Periods MS63 NGC. The 1907 No Periods Indian eagle represents the first year of the short-lived No Motto design, an important consideration for type purposes. This well-detailed Select example displays lightly marked yellow-gold surfaces with unusually vibrant mint luster. *From Christopher Bently's Nob Hill Collection.* NGC ID# 28GE, PCGS# 8852

4781 1908 No Motto AU58 PCGS. A pleasing near-Mint example of the first Saint-Gaudens design, without the motto IN GOD WE TRUST. This well-detailed AU58 specimen is brightly lustrous and lightly abraded, with strong eye appeal for the grade. NGC ID# 28GG, PCGS# 8853

4782 1908 No Motto AU58 NGC. Glossy with largely pale yellow-gold surfaces and a few traces of deeper orange at the margins. Minor central wear blends with a naturally soft strike. One of 33,500 pieces struck. *From Christopher Bently's Nob Hill Collection.* NGC ID# 28GG, PCGS# 8853

4783 1908-D No Motto AU55 PCGS. Rich orange toning endows this lustrous representative. Liberty's forehead curl shows slight wear, and a few marks are noted near the profile. Housed in a green label holder. *From Christopher Bently's Nob Hill Collection.* NGC ID# 28GH, PCGS# 8854

4784 1908 Motto MS63 NGC. The design elements on this Select specimen are well-struck. Lustrous, peach-gold surfaces reveal some light grade-consistent marks. NGC ID# 28GJ, PCGS# 8859

4785 1908 Motto MS63 NGC. The 1908 Motto Indian eagle is an important date for type purposes. This attractive Select specimen displays lightly marked orange and rose-gold surfaces with well-detailed design elements and strong eye appeal. NGC ID# 28GJ, PCGS# 8859

4786 1908 Motto MS63 NGC. An attractive Select specimen from the first year to include the motto IN GOD WE TRUST. This coin displays well-detailed design elements and lustrous reddish-gold surfaces. NGC ID# 28GJ, PCGS# 8859

4787 1908 Motto MS63 NGC. This impressive Select example exhibits well-detailed design elements with just a touch of softness on Liberty's hair. The bright orange-gold surfaces are lightly marked and lustrous. NGC ID# 28GJ, PCGS# 8859

4788 1908-D Motto MS62 ANACS. Primarily wheat-gold with a small copper spot to the left of the bridge of Liberty's nose. Wispy obverse abrasions, most notably to the left of the neck, define the grade. *From Christopher Bently's Nob Hill Collection.* NGC ID# 28GK, PCGS# 8860

4789 1909-D AU58 NGC. The well-detailed design elements of this pleasing near-Mint example show just a trace of actual wear on the high points and the lustrous yellow and rose-gold surfaces are lightly abraded for the grade. NGC ID# 28GN, PCGS# 8863

4790 1909-D MS61 NGC. Sun-gold and wheat-yellow hues mingle on this Denver ten dollar. Lustrous surfaces have good arm's-length eye appeal, though the portrait shows accumulated ticks and a significant abrasion crosses from the eagle's right (facing) leg into the nearby wing. *From Christopher Bently's Nob Hill Collection.* NGC ID# 28GN, PCGS# 8863

4791 1910-D MS64 NGC. With the second-largest mintage of the Indian Head series, more than 2.3 million pieces were produced, although many were melted during the 1930s. This example is lustrous with satiny surfaces. Pleasing yellow-gold color is consistent on both sides of the coin. A few scattered abrasions and a nick on the lower reverse rim limit the grade of this near-Gem eagle. NGC ID# 28GS, PCGS# 8866

4792 1910-D MS64 NGC. Soft luster is seen overall with clean surfaces, and subtle, olive-gold toning is also present on this original ten dollar gold. Always a popular date in the Indian Head eagle series, this date is a wise choice for type. NGC ID# 28GS, PCGS# 8866

4793 1910-S AU53 PCGS. The mintmark is lightly repunched, evident northwest of its upper curve and serif. This apricot-gold San Francisco example has ample luster and the expected number of unobtrusive abrasions. NGC ID# 268D, PCGS# 8867

- 4794 1910-S AU58 NGC.** Lightly but distinctly worn across the high points. Antique-gold surfaces are satiny with a handful of sizable coppery areas on each side. NGC ID# 268D, PCGS# 8867
- 4795 1910-S AU58 PCGS.** A good amount of luster is retained on the peach-gold surfaces of this near-Mint ten dollar. A few minute marks, more so on the reverse, are in concert with a lightly circulated coin. NGC ID# 268D, PCGS# 8867
- 4796 1910-S/AU58 ANACS. Breen-7114.** The mintmark is repunched northeast. Breen called the variety "extremely rare" but he may have simply relied upon the diligence of 1980s auction catalogers. The present apricot-gold near-Mint ten displays substantial luster. The single consequential mark is on the right reverse field.
From Christopher Bently's Nob Hill Collection. NGC ID# 268D, PCGS# 8867
- 4797 1911 MS64 NGC.** This well-struck near-Gem ten dollar displays pleasing luster. Minuscule obverse marks and grazes prevent Gem classification. NGC ID# 28GT, PCGS# 8868
- 4798 1911-D XF45 NGC.** A touch of wear shows on the eagle's wing and Liberty's hair, but the yellow-gold surfaces are lightly abraded and brightly lustrous.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 28GU, PCGS# 8869
- 4799 1911-D AU53 PCGS.** A pleasing lemon-gold example of this much better Denver issue. Luster is extensive and marks are of little import. The base of the neck has a small spot. A mere 30,100 pieces were struck. Housed in a green label holder.
From Christopher Bently's Nob Hill Collection. NGC ID# 28GU, PCGS# 8869
- 4800 1914-D MS63 NGC.** Rich gold-orange luster overall with hints of violet. Though both sides have scattered abrasions the all-around visual appeal is solid for the Select grade. NGC ID# 28H3, PCGS# 8876
- 4801 1914-S AU58 NGC.** A sharply detailed near-Mint example from a mintage of 208,000 pieces, this coin is lightly abraded and shows bright mint luster on both sides. Eye appeal is quite strong for the grade. NGC ID# 28H4, PCGS# 8877
- 4802 1914-S AU58 NGC.** Glossy yellow-gold with light but distinct wear over the high points. Obverse abrasions generally are modest, though the reverse has a couple of scrapes.
From Christopher Bently's Nob Hill Collection. NGC ID# 28H4, PCGS# 8877
- 4803 1915-S AU55 PCGS.** An orange-gold Choice AU eagle with good luster and only incidental marks. The 1915-S has a mintage of just 59,000 pieces, and a majority of certified examples are in circulated grades. Housed in a green label holder.
From Christopher Bently's Nob Hill Collection. NGC ID# 28H6, PCGS# 8879
- 4804 1916-S AU58 PCGS.** A faintly worn example of the last ten dollar issue struck before the three-year hiatus from 1917 to 1919. Color is wheat-gold save for a prominent patch of peach and violet at the upper left reverse.
From Christopher Bently's Nob Hill Collection. NGC ID# 28H7, PCGS# 8880
- 4805 1932 MS64 NGC.** Nice luster emanates from the yellow-gold surfaces of this near-Gem. Relatively well-struck, and showing a few small marks, including an obverse rim ding at 9:00. NGC ID# 28HB, PCGS# 8884
- 4806 1932 MS64 NGC.** Deep apricot-gold patina runs over the highly lustrous surfaces of this near-Gem ten dollar. This is a well-struck specimen with grade-consistent marks. NGC ID# 28HB, PCGS# 8884

1932 Eagle, MS65 ★
Scarce With Star Designation

- 4807 1932 MS65 ★ NGC.** Rich peach and lime-green toning encompasses this lustrous and crisply struck Gem. Minor obverse grazes correspond to the grade. Thousands of 1932 tens have returned from European banks but most are bagmarked. Census: 31 in 65 ★, 6 finer with a Star designation (1/14). NGC ID# 28HB, PCGS# 8884
-

LIBERTY DOUBLE EAGLES

1850-O Twenty, XF Details

- 4808 1850-O — Improperly Cleaned — NGC Details. XF. Variety 3.** This yellow-gold double eagle is somewhat bright and displays faint hairlines. The shield and stars on the reverse are glossy. Ample luster outlines design elements. Though more prevalent than their successors, the 1850-O to 1853-O twenties are widely collected as New Orleans examples of the denomination. NGC ID# 268G, PCGS# 8903
-

1851 Double Eagle, Choice AU

- 4809 1851 AU55 NGC. CAC.** The U.S. Assay Office of Gold opened in San Francisco in 1851, yet enough bullion was sent East via Panama to make the 1851 the highest mintage of the 1850s. 2,087,155 pieces were struck but most were exported and melted. Choice AU examples are fairly scarce. The present butter-gold twenty is moderately abraded overall though marks are noted at the base of Liberty's neck and above obverse star 10. NGC ID# 268H, PCGS# 8904
-

1851-O Twenty, AU Details
New Orleans Type Coin

- 4810 1851-O — Improperly Cleaned — NGC Details. AU. Variety 3. This die pair is known for a peripherally soft strike, though the centers are well brought up. The apricot-gold surfaces are only mildly glossy and display pockets of luster. No marks are noticeable aside from a subtle obverse rim ding at 2:30. A strike-through beneath obverse star 5 is of mint origin. NGC ID# 268J, PCGS# 8905

1852 Double Eagle, AU53
Partial Wire Rim

- 4811 1852 AU53 NGC. Significant orange overtones grace this still-lustrous double eagle with light but distinct wear across the high points. A long abrasion is noted at Liberty's jawline. This coin's most unusual feature is a partial wire rim at the left obverse. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 268K, PCGS# 8906

1852 Double Eagle, Choice AU
Repunched Date, FS-301

- 4812 1852/1852 AU55 NGC. FS-301. All four date digits are clearly repunched north. Given the 1852 mintage of 2,053,026 pieces, it is safe to state that only a minority of survivors are the present variety, although a number undoubtedly lurk in undesignated third party holders. This canary-gold representative has pleasing luster and a few moderate marks near Liberty's jaw. NGC ID# 268K, PCGS# 8906

1852-O Double Eagle, XF40
New Orleans Type Coin

- 4813 1852-O XF40 PCGS. Variety 1. Glimmers of luster fill the legends and other design crevices of this scarce New Orleans double eagle. The mildly bright surfaces are lightly abraded for the XF40 level, though we note a minor scrape left of obverse star 12. Certified in a green label holder. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 268L, PCGS# 8907

1853 Twenty Dollar, Choice AU
Surprisingly Few Bagmarks

- 4814 1853 AU55 NGC. A precisely struck Choice AU apricot-gold double eagle with minimally marked and minutely granular surfaces. Liberty's curls display slight wear but luster shimmers across the motifs and margins. Possibly from a shipwreck such as the S.S. Republic, from which 50 or so normal date 1853 examples emerged. NGC ID# 268M, PCGS# 8908

- 4815 1854 Small Date VF35 PCGS. A moderately worn example of the Small Date variant, which is substantially more common than its Large Date counterpart. Smooth, even wear covers this bright, mellow-gold example. While a few scattered marks are seen, all are softened by the lengthy time in circulation. NGC ID# 268P, PCGS# 8911

- 4816 1854 Small Date — Improperly Cleaned — NGC Details. XF. Breen-7167. The date was initially entered with an upward slant, then repunched in the correct position. Evidence of the prior logotype can be found above the 54 and below the flag and base of the 1. The peach-gold surfaces are glossy and moderately bagmarked.

1854 Liberty Head Double Eagle, AU53
Small Date Variety

- 4817 1854 Small Date AU53 NGC.** Identifiable as the Small Date by the distance of the 1 from the neck truncation, the variety is more common than its Large Date counterpart by a wide margin. This yellow-gold example is moderately circulated with a small amount of mint luster among the stars and legends. The expected abrasions are seen including a thin scrape in the obverse field opposite Liberty's face. NGC ID# 268P, PCGS# 8911

1855 Double Eagle, AU53
Underappreciated Type One Issue

- 4818 1855 AU53 PCGS.** Coinage from the Assay Office of Gold and the San Francisco Mint likely explain the steady reduction of double eagle mintages at Philadelphia between 1852 and 1855. The 1855 is scarce in AU and Uncirculated examples are decidedly rare. This butter gold representative has ample luster for the grade. Scattered moderate marks include a slight reverse rim ding at 6:30. NGC ID# 268V, PCGS# 8914

1856-S Double Eagle, AU50
Ample Remaining Luster

- 4819 1856-S AU50 PCGS.** Yellow-orange luster remains surprisingly strong on this lightly rubbed S-mint double eagle from the third year of official coinage at San Francisco. The reverse is only mildly abraded, though the obverse has a long and substantial scrape in the field to the left of Liberty's face. NGC ID# 2692, PCGS# 8919

1856-S Twenty, AU53
Nice Remaining Luster

- 4820 1856-S AU53 NGC.** Antique-gold patination and considerable remaining luster among the devices suggest this mellowed, moderately circulated double eagle may have been in collector's hands prior to salvage of coins from the S.S. *Central America* and other shipwrecks. More than 1,000 examples of the issue were reclaimed from the S.S. *Central America* alone, many in high grades. This attractive double eagle shows several small abrasions but none individually more significant than the others. The devices are softened only by honest wear. An appealing Almost Uncirculated example and an desirable Type One representative. NGC ID# 2692, PCGS# 8919

1857-S Twenty Dollar, AU53

- 4821 1857-S AU53 NGC. CAC.** Caramel-gold overall with steel-gray high points. Small abrasions are scattered but none merit individual discussion. An original Type One twenty. From a different reverse die than any recovered from the S.S. *Central America*. The mintmark is positioned far right and leans left. NGC ID# 2696, PCGS# 8922

1858-S Double Eagle, AU53
Early S-Mint Twenty

- 4822 1858-S AU53 PCGS. CAC.** After its opening finally in 1854, the San Francisco Mint struck hundreds of thousands of double eagles nearly every year for decades to come. The 1858-S was struck to the extent of 846,710 pieces, but most survivors are well-circulated. This AU53 piece shows a bold strike over lovely orange-gold surfaces that show the expected light wear and scattered, grade-consistent abrasions, none particularly blatant. This early Type One S-mint double eagle is certified in an old green-label holder. NGC ID# 2699, PCGS# 8925

- 4823 1859-S XF45 NGC.** The design elements of this Choice XF specimen show light wear on the high points but most original detail remains intact. The pleasing greenish-gold surfaces show few noticeable marks and retain traces of original mint luster. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 269C, PCGS# 8928*

1859-S Double Eagle, AU55
From the S.S. Republic

- 4824 1859-S Doubled 9 AU55 NGC.** Ex: *S.S. Republic*. A die line inside the loop of the 9 in the date suggests possible repunching. The *S.S. Republic* sank shortly after the Civil War. Its treasure was recovered in recent decades and was more diverse than seen in the *S.S. Central America* or *S.S. Brother Jonathan* shipwrecks. This is a pleasing butter-gold example with unblemished surfaces and bright luster throughout the legends. NGC ID# 269C, PCGS# 8928

1860 Type One Double Eagle
Lustrous and Nearly Uncirculated

- 4825 1860 AU58 NGC.** A lightly circulated example of this P-mint issue, one that generally averages only AU or so. There are a few moderate abrasions on each side, with bright orange-gold patina and splendid mint luster. The *S.S. Republic* recovery yielded quite a few hoard coins, including some spectacular Mint State pieces. This near-Mint example represents good value for the collector. Ex: *Long Beach Signature (Heritage, 9/2008), lot 4064. NGC ID# 269D, PCGS# 8929*

- 4826 1860-S VF35 PCGS.** A smoothly worn survivor of many years in circulation, this 1860-S twenty undoubtedly changed hands time and again in old West commerce. Pleasing apricot-gold color resides on timeworn surfaces with no significant marks to mention. NGC ID# 269F, PCGS# 8931

1861 Liberty Head Twenty, AU55
Pleasing Type One

- 4827 1861 AU55 NGC.** An original and pleasing example of the Type One design. This Almost Uncirculated example retains a surprising amount of mint luster and is only moderately abraded, making it an ideal candidate for a circulated type set or date collection. Yellow-gold patina displays some olive-gold toning among the devices. Nice for the grade. NGC ID# 269G, PCGS# 8932

1861 Type One Twenty, AU55
Workhorse Date

- 4828 1861 AU55 NGC.** Nearly 3 million coins were produced for this high-mintage double eagle, many of which entered commerce and provided much-needed hard money during the turbulent times. This example saw a relatively brief time in circulation before being set aside, perhaps in the personal hoard of a nervous citizen. Traces of prooflike surface remain around the stars and eagle. Abrasions on the yellow-gold surfaces are somewhat muted by wear and are less numerous than expected for the grade. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, Choice AU
Popular, High-Mintage Date

- 4829 1861 AU55 ANACS.** The base of the first 1 in the date is repunched south. This apricot-gold double eagle is nicely struck and has only a single mentionable mark, seen on Liberty's jaw. Careful rotation beneath a lens reveals wispy hairlines, but luster illuminates design elements. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 269G, PCGS# 8932*

1861-S Twenty Dollar, AU53

- 4830 1861-S AU53 NGC.** The outbreak of the Civil War had little impact on the West Coast, where gold coins continued to circulate while greenbacks were heavily discounted. But the present moderately abraded double eagle did not remain in commerce that long, since the portrait, eagle, and legends display luster. A few specks of struck-in grease are noted. NGC ID# 269K, PCGS# 8935

- 4831 1862-S VF20 NGC. Breen-7214.** The date is lightly repunched. This date was produced in large numbers but most coins show the results of heavy circulation. The present VF offering displays yellow-gold surfaces that reveal no more marks than what might be expected for a large gold coin having seen moderate circulation. Relatively well-defined despite high-point wear. NGC ID# 269N, PCGS# 8938

- 4832 1864 — Improperly Cleaned — NCS. XF Details.** A wheat-gold Civil War double eagle with plentiful glimmers of luster though the wingtips and curls show wear. The fields and portrait exhibit scattered moderate abrasions. Mildly glossy but a significant souvenir from the year of Lincoln's reelection. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 269S, PCGS# 8941

- 4833 1864-S XF45 NGC.** The yellow and rose-gold surfaces of this Choice XF specimen show a scattering of minor contact marks on both sides. The design elements are lightly worn and traces of original mint luster are evident throughout. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 269T, PCGS# 8942

- 4834 1865 XF45 NGC.** Except for a small cluster of marks in the left obverse field, the surfaces of this Choice XF piece are pleasing and lightly abraded and retain much original mint luster. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 269U, PCGS# 8943

1865 Liberty Head Double Eagle, AU55 Formerly a Type One Rarity

- 4835 1865 AU55 NGC.** Mellowed by age and brief circulation, this antique-gold twenty is lightly abraded and retains glimpses here and there of original mint luster. A number of small abrasions mark Liberty's portrait, but evidence of a strong strike remains. Before the discovery of the S.S. *Republic*, this date was considered very rare in AU. The shipwreck yielded 320 pieces of the issue ranging in grade from AU to MS65, changing the rarity picture. NGC ID# 269U, PCGS# 8943

- 4836 1867 AU55 NGC.** A modestly worn yellow-orange Type Two twenty with considerable luster remaining in the fields. A shallow cut on Liberty's cheek and scattered abrasions elsewhere account for the grade. NGC ID# 269Z, PCGS# 8951

- 4837 1867-S XF45 NGC.** Small squat S. The bright pockets of luster are extensive for the designated grade, particularly on the reverse. The sun-gold surfaces are mildly bright and exhibit the expected number of moderate abrasions. NGC ID# 26A2, PCGS# 8952

- 4838 1867-S AU53 NGC.** Small Squat S. A yellow-gold representative with ample glimpses of luster and only light wear on the eagle's wings. Small abrasions are scattered throughout but none merit further description. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26A2, PCGS# 8952

- 4839 1870-S AU50 NGC.** Semibright peach-gold surfaces display traces of reddish-gold and scattered minute circulation marks. Well-struck design elements are lightly worn. NGC ID# 26A9, PCGS# 8959

- 4840 1870-S AU55 PCGS.** a splendid honey-gold example, this important Type Two double eagle has a trace of wear on the high points, yet retains excellent eye appeal. NGC ID# 26A9, PCGS# 8959

- 4841 1872-S AU50 NGC.** Small Narrow S, scarcer than the Small Squat S for this Type Two issue. The butter-gold surfaces show light wear on the curls and wingtips. Abrasions are distributed but only those near the eagle's beak merit mention. NGC ID# 26AF, PCGS# 8965

- 4842 1872-S AU55 NGC.** Small Squat S. This apricot-gold Type Two twenty displays its share of luster. Abrasions are prevalent but none merit singular mention. Obverse stars 5 and 6 are lapped, as made and perhaps worthy of specialist attention. NGC ID# 26AF, PCGS# 8965

- 4843 1873 Open 3 AU55 NGC.** Ample luster resides on the yellow-gold surfaces of this Choice AU double eagle. This well-struck piece reveals scattered, minor abrasions associated with brief circulation. NGC ID# 26AH, PCGS# 8967

- 4844 1873 Open 3 MS61 NGC. CAC.** Some prooflike surface remains over each side of this lustrous, apricot-gold twenty. The reverse is particularly reflective in the center. Numerous small abrasions dot the obverse and define the assigned grade, but this double eagle retains nice eye appeal. NGC ID# 26AH, PCGS# 8967

1873 Open 3 Double Eagle, MS62 An Ideal Type Coin

- 4845 1873 Open 3 MS62 PCGS. CAC.** A favorite Type Two issue for collectors. This is a common issue, but it is worth a strong bid when the appearance is Mint-fresh and boldly struck such as this example. Vivid yellow-gold with a few red-gold highlights cover attractive surfaces amid spinning cartwheels of bright luster. A trace of prooflikeness shows around the central devices. Fewer abrasions exist than sometimes seen at this grade level, none overly significant. NGC ID# 26AH, PCGS# 8967

- 4846 1873-S Closed 3 AU58 PCGS.** Small S. The 1873-S Liberty double eagle with a Closed 3 in the date is somewhat more available than its Open 3 cousin. Ample luster resides on the peach-gold surfaces that show well-struck design elements. Distributed marks are consistent with those on a large gold coin that has seen brief circulation. NGC ID# 26AL, PCGS# 8969

- 4847 1874 AU53 NGC.** Traces of luster show in the protected areas of the wheat-gold surfaces imbued with hints of light green. Distributed light marks are in concert with relatively brief circulation. NGC ID# 26AN, PCGS# 8970

4848 1874-CC AU50 NGC. Variety 4-A. Only one reverse die is known for the 1874-CC but at least five obverse dies were used to strike the issue. Variety 4-A is distinctive for a fairly large lump on the center of Liberty's neck. This green-gold Carson City type coin has abrasions near Liberty's cheek and shoulder curl. NGC ID# 26AP, PCGS# 8971

4849 1874-S AU55 NGC. Broad S. A caramel-gold representative without any singularly consequential marks. Luster individually outlines obverse stars. The reverse displays partial cartwheel luster. Interesting clash marks are noted near Liberty's ear. NGC ID# 26AR, PCGS# 8972

1875-CC Twenty, XF45 Generous Mint Luster

4850 1875-CC XF45 NGC. The 1875-CC double eagle had a generous mintage of more than 111,000 pieces during the heyday of the Comstock Lode and the Carson City Mint. Generous mint luster clings to protected areas of this piece, but moderate high point rub, a diagonal pinscratch above the arrowheads, and a couple of stray contact marks affirm the Choice XF designation.

Ex: Long Beach Signature (Heritage, 5/2003), lot 6863.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AT, PCGS# 8974

4851 1875-CC — Cleaned — ANACS. AU55 Details. Variety 4-A. The majority of this Carson City type coin is original, but the obverse field between stars 7 and 11 is thickly hairlined and lightly tooled from an attempt to efface a small area of struck-in grease.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AT, PCGS# 8974

4852 1875-S XF45 NGC. Wheat-gold surfaces are imbued with hints of reddish-gold, especially on the reverse. Relatively well-defined and showing distributed marks, more so on the obverse. NGC ID# 26AU, PCGS# 8975

4853 1875-S AU58 NGC. The yellow-gold surfaces of this near-Mint specimen retain a good amount of luster and exhibit well-defined motifs, save for high-point wear. Distributed marks are what would be expected for a briefly circulated coin. NGC ID# 26AU, PCGS# 8975

4854 1876 AU55 NGC. Light Motto, a subtype found only on certain 1876 Philadelphia twenties. The Light Motto constitutes a majority of the issue. Though lightly circulated, plenty of flashy luster persists, especially on the reverse. The obverse is typically abraded. NGC ID# 26AV, PCGS# 8976

4855 1876 MS61 NGC. Heavy Motto. Sweeping luster illuminates this lightly marked and attractive final year Type Two twenty. Hints of lime-green and rose-red are also evident. Well struck despite minor blending on the shoulder curl and other high points. NGC ID# 26AV, PCGS# 8976

4856 1876-CC — Improperly Cleaned — NGC Details. XF. Variety 4-A. The yellow-gold surfaces are a bit bright and minutely granular, but neither side exhibits any consequential abrasions. A popular Carson City issue from the nation's centennial year. NGC ID# 26AW, PCGS# 8977

4857 1876-CC — Improperly Cleaned — NGC Details. AU. Variety 4-A. This butter-gold Carson City type coin is well defined and displays noticeable luster. Bagmarked and inoffensively hairlined but nonetheless a collectible Wild West souvenir. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, AU50 Type Two Carson City Issue

4858 1876-CC AU50 PCGS. Variety 3-A. Bright luster individually outlines the obverse stars and dominates the eagle, rays, and reverse periphery. The orange-gold surfaces are moderately to typically abraded. The obverse field is somewhat bright northeast of the first star. Housed in a green label holder.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU55

4859 1876-CC AU55 NGC. Variety 1-A. A wheat-gold representative of the legendary Carson City Mint. Luster illuminates the margins and motifs. Marks are minor for the grade except for a faded abrasion near the left-side obverse stars and a few scuffs beneath the left (facing) wingtip. The 1876-CC mintage is less than one-tenth its San Francisco counterpart. NGC ID# 26AW, PCGS# 8977

4860 1876-S AU58 NGC. The peach-gold surfaces of this near-Mint double eagle hold ample luster over both sides, each of which is generally well-struck. More abrasions are visible on the reverse than on the obverse. NGC ID# 26AX, PCGS# 8978

1876-S Double Eagle, MS62 Scarce This Nice

4861 1876-S MS62 NGC. CAC. This issue is a high-mintage, Type Two double eagle, one that was heavily exported with many examples going to South America and Europe. Select Mint State pieces are rare. This glowing twenty is in borderline Select condition with lustrous, honey-gold surfaces. Abrasions are non-intrusive and fewer in number than expected for the grade. A high-end example, CAC-Approved. NGC ID# 26AX, PCGS# 8978

1877-CC Double Eagle, VF35

- 4862 1877-CC VF35 PCGS. Variety 1-A.** Five die marriages are confirmed despite a low mintage of 42,565 pieces. The second C in the mintmark is higher than the first C, and a diagonal die line connects obverse star 10 to the rim. The present Carson City twenty shows wear on the curls and wings but the legends are lustrous. The butter-gold fields are only lightly marked though the portrait displays a few thin abrasions. In a green label holder.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AZ, PCGS# 8983

1879-S Type Three Double Eagle, MS61
Scarce in Mint State

- 4863 1879-S MS61 NGC.** Scarce in any Mint State grade, the issue is rare in Select Uncirculated or finer condition. This MS61 example has prooflike fields but is heavily abraded and bagmarked from transport and storage. Perhaps it went to an overseas destination and back again. The coin displays a strong strike and nice mint luster over pleasing, yellow-gold surfaces. One can only imagine how impressive this lustrous, prooflike coin may have been when fresh off the coining press. NGC ID# 26B9, PCGS# 8991

1879-S Twenty Dollar, MS61
Lustrous Appeal

- 4864 1879-S MS61 PCGS. CAC.** A full strike and nice, orange-gold color complement reflective surfaces on this moderately abraded double eagle. Usually found in low Mint State grades such as this coin, it is attractive for an MS61 despite the expected bagmarks and surface abrasions. The coin exhibits prooflike tendencies and pleasing, in-hand appeal. NGC ID# 26B9, PCGS# 8991

1882-CC Double Eagle, AU50

- 4865 1882-CC AU50 NGC. Variety 1-A.** The rarer of the two known die pairings. The second C in the mintmark is placed lower than the first C. Luster illuminates the legends and devices though the cheek and curls display moderate wear. A canary-gold Carson City twenty with surprisingly unblemished surfaces given its brief stint in Western commerce.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BF, PCGS# 8997

- 4866 1883-CC XF40 NGC. Variety 1-B.** The rarer die variety with the mintmark left-centered below the tail. Any 1883-CC is desirable, however, since fewer than 60,000 pieces were struck. This original orange-gold example has wear on the curls but displays bright luster on the stars and legends.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, AU
Scarce Carson City Issue

- 4867 1883-CC AU50 NGC. Variety 2-A.** Rich peach toning ensures the originality of this lightly circulated Carson City double eagle. A few specks of dark patina are near Liberty's mouth and ear, and both sides display occasional moderate marks. Fewer than 60,000 twenties were minted, about 5% of the 1883 Philadelphia and San Francisco productions.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle
Uncirculated Details

- 4868 1883-CC — Obverse Improperly Cleaned — NCS. Unc. Details. Variety 2-A.** This sun-gold Carson City double eagle has a pleasing strike and no obvious marks. The reverse displays full cartwheel luster while the obverse appears prooflike due to a thorough wipe. A majority of survivors are in XF or AU grades.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BH, PCGS# 8999

4869 1883-S MS62 NGC. Small squat S, about equally scarce as its Tall S counterpart. This sun-gold double eagle possesses vibrant luster and a bold strike. Small abrasions are scattered, characteristic of the grade. NGC ID# 26BJ, PCGS# 9000

4870 1883-S MS62 NGC. Tall S. A well struck double eagle with dynamic luster and good eye appeal. The olive-green and apricot surfaces are lightly abraded for the MS62 level. NGC ID# 26BJ, PCGS# 9000

4871 1883-S MS62 PCGS. Small Squat S. The obverse displays cartwheel luster while the reverse is decidedly prooflike. This crisply struck Liberty twenty has moderate marks near the profile. The reverse is smooth aside from an abrasion near the RIC in AMERICA. The MS62 grade provides the best value for the issue, since MS63 examples are priced more than three times higher. NGC ID# 26BJ, PCGS# 9000

1884-CC Double Eagle, Choice XF

4872 1884-CC XF45 NGC. Variety 1-A. A moderately circulated but attractive canary-gold Carson City twenty. Luster outlines individual obverse stars, and also fills Liberty's hair. The reverse displays luster except across the open field. One small obverse rim nick is noted at 4:30, and a reeding impression on the cheekbone provides the only other mentionable mark.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, AU53

4873 1884-CC AU53 PCGS. Variety 1-A. A lovely caramel-gold example from the popular Carson City Mint. Minor struck-in grease is noted on the dentils near the date but post-strike detractors are absent. Refreshingly free from the abrasions usually seen on large denomination gold coins. The strike is consistent though Liberty's tresses display minor wear.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BK, PCGS# 9001

4874 1888-S MS62 PCGS. Relatively few abrasions appear on this boldly struck twenty, with none requiring special mention. Attractive orange and lime-green highlights enhance the yellow-gold surfaces. Not many MS62 double eagles have strong eye appeal and nice surfaces, but this one does. NGC ID# 26BU, PCGS# 9009

4875 1888-S MS62 NGC. Peach-gold surfaces possess sharply struck devices, including the strands of Liberty's hair and the star centrls on both sides. Scattered minute marks present just a few interruptions in the luster flow. NGC ID# 26BU, PCGS# 9009

1889 Double Eagle, MS62 Beautifully Toned

4876 1889 MS62 PCGS. Double eagle production at the Philadelphia Mint was extremely limited throughout the 1880s. The total business strike mintage for that decade in Philadelphia was only 326,172 coins, and 226,161 of those were coined the previous year in 1888. The average mintage for the other nine years was just over 11,000 coins per year, including three years with no business strike production. This frosty Mint State example has hints of green patina on the high points, with brilliant yellow mint frosty and pale rose overtones on each side. PCGS has only certified 25 finer examples (1/14). NGC ID# 2695, PCGS# 9010

1889-CC Twenty, Choice XF

4877 1889-CC XF45 NGC. Variety 1-A. The wings, claws, and portrait high points reveal moderate wear, yet substantial luster fills the legends, rays, and eagle. The wheat-gold surfaces lack consequential contact. All 1889-CC twenties show minor die doubling on the base of the ear, a feature also seen on a number of 1889 silver dollar VAMs.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BV, PCGS# 9011

1889-CC Twenty Dollar, AU53 Lightly Abraded

4878 1889-CC AU53 NGC. Variety 1-A. Republican Benjamin Harrison assumed the Presidency on March 4, 1889. He soon authorized coinage at the Carson City Mint, which had been relegated to assay office duties during the Cleveland Administration. The partial production year doubtlessly contributed to a low double eagle mintage of 30,945 pieces. The present butter-gold example is smooth and pleasing despite a slender mark above the chin.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BV, PCGS# 9011

4879 1889-S MS62 PCGS. The peach center is bounded by broad sea-green margins. Sharply struck with booming luster and a slender abrasion on Liberty's cheekbone. Certified in a green label holder. NGC ID# 26BW, PCGS# 9012

- 4880 1889-S MS62 PCGS.** Pumpkin-gold motifs are framed by apple-green margins. This well struck double eagle has vibrant luster and relatively smooth surfaces for its MS62 grade. Certified in a green label holder. NGC ID# 26BW, PCGS# 9012

1890-CC Twenty Dollar, XF45

- 4881 1890-CC XF45 PCGS. Variety 1-A.** The usual late die state with partially lapped tail feathers. The lapping has diminished evidence of die doubling except on the PLUR in PLURIBUS. The present lemon-gold Carson City representative has extensive luster for the Choice XF level, particularly on the reverse. Scattered abrasions are moderate for the grade and denomination.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU50

- 4882 1890-CC AU50 PCGS. Variety 1-A.** The lapped die state with fragmentary feathers on the right end of the eagle's tail. This boldly struck Carson City type coin has plentiful luster, especially on the reverse. Abrasions are fewer than expected given its brief Old West circulation, though we note a single horizontal line beneath Liberty's eye. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle
Uncirculated Details
Rare Variety 2-B**

- 4883 1890-CC — Cleaned — ANACS. Unc Details, Net AU58. Variety 2-B.** The rare Wide CC variety with the second C partly over the D in DOLLARS. This highly lustrous butter-gold example displays minor hairlines, but the eye appeal is nonetheless superior to many Carson City twenties in MS62 holders. The strike is somewhat soft on the obverse stars.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BY, PCGS# 9014

**1895 Twenty, MS64
Few Certified Finer**

- 4884 1895 MS64 NGC.** More than a million pieces were minted of this Philadelphia date, with most promptly shipped to Europe and other destinations overseas. Many have since returned. The issue is scarce and desirable in near-Gem condition such as this coin. The wait may be long and expensive to find one any finer. This Choice Uncirculated example is lustrous with rich, apricot-gold surfaces. A full strike displays full mint luster. The few scattered abrasions do not distract from the pleasing look of fine gold. PCGS and NGC have certified just 11 pieces of higher numeric grade (1/14). NGC ID# 26CD, PCGS# 9027
- 4885 1898-S MS64 PCGS.** The large mintage (more than 2.575 million pieces) 1898-S double eagle is plentiful in most grades. The lustrous surfaces of this near-Gem example display sharply struck design elements, along with peach-gold patina imbued with hints of light green. A small, shallow scratch is noted above the 98 of the date.
Ex: Dallas Signature (Heritage, 11/2007), lot 2414. NGC ID# 26CL, PCGS# 9034
- 4886 1902 AU58 PCGS.** The 1902 Liberty double eagle is always popular because of its low mintage of 31,140 pieces and the date is scarce-to-rare in all grades. This near-Mint specimen shows lightly abraded yellow and rose-gold surfaces that retain much of their original mint luster. NGC ID# 26CU, PCGS# 9041
- 4887 1903 MS65 NGC.** The 1903 double eagle is available to most collectors up to Gem condition thanks to several large hoards released over the last few decades. This nearly unabraded, yellow-gold Gem displays lustrous surfaces and a uniformly bold strike. Rare any finer. NGC ID# 26CW, PCGS# 9043
- 4888 1903 MS65 NGC.** This well-preserved, apricot-gold Gem boasts strong mint luster and a full strike. The reverse is virtually pristine while the obverse shows only inconsequential contact. This date is collectible in the present grade, although it becomes a costly acquisition any finer as evidenced by only 12 pieces certified in a higher numeric grade by PCGS and NGC combined (12/13). NGC ID# 26CW, PCGS# 9043
- 4889 1903 MS65 NGC.** This shimmering, well-struck example displays several shades of gold and yellow and has nice eye appeal. NGC has assigned higher numeric grades to only nine examples (12/13). NGC ID# 26CW, PCGS# 9043
- 4890 1903 MS65 PCGS.** The 1903 double eagle had a modest mintage of just under 300,000 coins, and survivors are elusive in higher grades. For example PCGS has only certified three coins finer than this piece (12/13). Both sides have a bold strike and frosty light yellow luster with excellent eye appeal. NGC ID# 26CW, PCGS# 9043
- 4891 1904 MS64 PCGS.** The vivid orange and peach-gold surfaces of this Choice example radiate vibrant mint luster and show only minor signs of contact. The design elements are sharply detailed and the overall presentation is quite attractive. Housed in a green label holder. NGC ID# 26CY, PCGS# 9045
- 4892 1904 MS64+ NGC.** Vibrant luster invigorates the peach-gold surfaces of this high-end near-Gem. Additionally, a solid strike emboldens the design elements. The only abrasion worthy of note is a milling mark near the rim between stars 4 and 5. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65+
Quality Type Coin**

4893 1904 MS65+ PCGS. The 1904 has a deservedly common reputation, but in the MS65+ grade it becomes scarce. The present high-end lemon-gold Gem has exceptionally smooth fields and only minor contact on the portrait. Those in need of a single quality type example need look no further. NGC ID# 26CY, PCGS# 9045

**1904 Twenty Dollar, MS65+
Perfect for Type**

4894 1904 MS65+ PCGS. Silk-smooth surfaces display a full strike and outstanding mint luster for this Gem twenty. A Treasury-busting mintage of more than 6.2 million double eagles proved the Mint was capable of more than the meager double eagle output from preceding years. Mintages receded in the following two years, however, while the Treasury digested the glut. This is a pristine example with only the two or three tiny surface abrasions and fantastic eye appeal. It earned the PCGS Plus designation for high quality. NGC ID# 26CY, PCGS# 9045

1904 Liberty Twenty, MS65+

4895 1904 MS65+ NGC. CAC. More than 11 million double eagles were coined in 1904, including 6.2 million at Philadelphia and 5.1 million at San Francisco. Today, those issues account for the majority of Liberty 20s encountered. They are wonderful coins for type sets. This lovely Gem has a bold strike, excellent surfaces, and brilliant yellow luster. NGC ID# 26CY, PCGS# 9045

**1904 Twenty Dollar, MS66
Nearly Pristine Fields**

4896 1904 MS66 PCGS. A beautiful orange-gold and olive-green type representative. Lustrous and well struck. The fields are remarkably devoid of contact, and only unobtrusive marks on AMERICA deny an even finer grade. Nearly unobtainable above the MS66 level despite a bountiful mintage. NGC ID# 26CY, PCGS# 9045

**1906 Twenty Dollar, MS62
Popular Low Mintage Issue**

4897 1906 MS62 PCGS. The unprecedented 1904 mintage of 6,256,699 pieces presumably lingered in Treasury vaults the next two years, since the 1905 and 1906 mintages were each approximately 1% of the 1904 production. The 1906 is nonetheless collectible at the MS62 level though higher graded examples are costly. This lustrous green-gold example is boldly struck and has a smooth reverse. The obverse has a number of faint field and portrait grazes. NGC ID# 26D4, PCGS# 9049

**1906 Twenty Dollar, MS62
Low-Mintage Philadelphia Date**

4898 1906 MS62 NGC. This is one of a series of low-mintage Philadelphia double eagles, interrupted by a massive 1904 mintage of more than 6.2 million pieces. The 1906 production of 69,596 pieces seems meager by comparison, and perhaps this date is undervalued based on its low mintage. Pleasing yellow-gold color and swirling mint luster reside on attractive surfaces. As expected, several minor abrasions account for the grade, but overall this is a well-struck and appealing representative of the date. NGC ID# 26D4, PCGS# 9049

4899 1906-D MS62 NGC. This pleasing MS62 example displays well-detailed design elements with a touch of softness on Liberty's hair and lustrous peach-gold surfaces that show a scattering of minor contact marks on both sides. NGC ID# 26D5, PCGS# 9050

**1907-S Liberty Head Twenty, MS63
Final Issue of the Liberty Head Series**

- 4900 1907-S MS63 PCGS.** With frosted surfaces and abundant mint luster, this Select double eagle is an appealing, final-year example of the long-lived Liberty Head design. Jeff Garrett and Ron Guth note "the majority of 1907-S double eagles seen are low-end Mint State examples with heavily abraded surfaces." This coin, however, has only minimal abrasions and a sharp strike. It is attractive with excellent eye appeal. NGC ID# 26D9, PCGS# 9054

SAINT-GAUDENS DOUBLE EAGLES

**1907 Double Eagle, MS65
Arabic Numerals, Saint-Gaudens**

- 4901 1907 Arabic Numerals MS65 NGC.** An apricot-gold Gem with dynamic luster and a good strike. Minor marks on the left obverse field and above the sun deny a higher grade. Sculptor Augustus Saint-Gaudens died in August 1907 before his new design was struck for circulation. Encased in a prior generation holder. NGC ID# 26F5, PCGS# 9141

**1908 Double Eagle, MS65+
No Motto Type**

- 4902 1908 No Motto MS65+ PCGS. CAC.** This brilliant Gem exhibits frosty yellow luster with scattered marks on each side. The eye appeal is impressive, garnering both a Plus designation from PCGS and a CAC approval seal. Due to the Wells Fargo Hoard, the 1908 No Motto ranks among the extremely common dates, and it is an ideal issue for a gold type set. NGC ID# 26F6, PCGS# 9142
- 4903 1908 No Motto MS66 PCGS.** Long Rays obverse. Rich orange toning drapes lustrous and splendidly smooth surfaces. The strike is crisp save for customary minor blending on the eagle's leg plumage. NGC ID# 26F6, PCGS# 9142

- 4904 1908 Motto MS63 PCGS.** Peach and sea-green toning dominates lustrous and nicely struck surfaces. Small marks are distributed but none are of singular significance. Housed in a green label holder. NGC ID# 26F8, PCGS# 9147

**1908 Double Eagle, MS64
With Motto Reverse**

- 4905 1908 Motto MS64 PCGS.** Although the 1908 With Motto double eagle is easily obtained in grades below MS65, this MS64 represents the finest quality that can be easily located, as PCGS has only certified 74 finer pieces (1/14). This example has rich yellow-gold surfaces with brilliant mint frost and excellent eye appeal. NGC ID# 26F8, PCGS# 9147

**1908 Double Eagle, MS64
With IN GOD WE TRUST**

- 4906 1908 Motto MS64 NGC.** A gorgeous example of the debut-issue with the motto, IN GOD WE TRUST, on the reverse, this brilliant near-Gem has highly lustrous yellow-gold surfaces, showing minuscule blemishes, including a tiny rim nick at 9:30 on the obverse. NGC has only certified 30 finer examples (1/14). NGC ID# 26F8, PCGS# 9147
- 4907 1908-D Motto MS64 PCGS.** Despite a significant mintage, the 1908-D With Motto double eagle is elusive in top grades, and the average certified grade is a little less than MS63. This Choice Mint State piece has frosty yellow luster with sharp design motifs and trivial marks. NGC ID# 26F9, PCGS# 9148
- 4908 1908-D Motto MS64 NGC.** Bold peach-gold colors catch the eye first, though this near-Gem also offers considerable yellow in its luster. A medium-depth abrasion affects the trailing wing feathers on the reverse and accounts for the grade. NGC ID# 26F9, PCGS# 9148
- 4909 1909 MS63 NGC.** The obverse has a primarily apricot hue, while the lustrous reverse is lighter yellow. An abrasion at the top of Liberty's legs accounts for the grade, though the all-around eye appeal is good for a Select coin. NGC ID# 26FB, PCGS# 9150
- 4910 1909 MS63 NGC.** Lustrous surfaces display pleasing luster and sharply struck design elements. A few minute marks are not detracting. NGC ID# 26FB, PCGS# 9150
- 4911 1909/8 MS62 PCGS. FS-301.** A green-gold representative that exhibits dynamic luster and a crisp strike. Small marks are scattered but none are of any individual importance. An obvious hubbed overdate.
Ex: Kingswood XII (Bowers & Merena, 2/2000), lot 927. NGC ID# 26FC, PCGS# 9151

**1909/8 Double Eagle, MS63
Sharply Struck and Lustrous**

4912 1909/8 MS63 PCGS. FS-301. The 1909/8 Saint-Gaudens is widely collected as the only known overdate of the series. Light surface abrasions account for the grade, but the piece also offers sharp design definition, good luster with splendid yellow color, and excellent eye appeal. The overdate features are boldly defined, even without a magnifier.
Ex: Long Beach Signature (Heritage, 9/2004), lot 8032. NGC ID# 26FC, PCGS# 9151

4913 1909-S MS63 NGC. The mintmark is repunched and has a double set of serifs. The variety is not to be confused with the more dramatic FS-501. This lustrous apricot-gold Select twenty exhibits scattered small marks but only those on the back wing are of any account. NGC ID# 26FE, PCGS# 9153

4914 1909-S MS64 PCGS. The mintmark is lightly repunched, evident on the serifs. An original peach-gold near-Gem that has a bold strike and vibrant luster. A few small marks near the tail deny a higher grade. Housed in a green label holder. NGC ID# 26FE, PCGS# 9153

4915 1910 MS64 PCGS. An appealing near-Gem twenty, with lustrous, apricot-gold surfaces and a sharp strike as normally seen for a 1910 Saint. Although 482,000 pieces were minted of this popular Philadelphia issue, it is known to be a moderately scarce date, and often commands a slight premium over the common issues. Rare any finer. NGC ID# 26FF, PCGS# 9154

4916 1910 MS64 NGC. CAC. Surfaces appear yellow-orange or straw-gold depending on the angle to the light. Generous luster is a highlight, though the surfaces are lightly abraded and a coppery streak affects the sun disk. NGC ID# 26FF, PCGS# 9154

4917 1910-D MS65 PCGS. The 1910-D Saint-Gaudens can be found at the Gem level, but higher-graded pieces seldom appear; the PCGS certified population at the next numeric grade level is about one-tenth as much. This Gem offers satin luster over pinkish-golden surfaces that show a sharp strike and no mentionable contact. NGC ID# 26FG, PCGS# 9155

4918 1910-S MS64 PCGS. An impressive example, this Choice Mint State 1910-S Saint has lovely rose toning over its frosty yellow-gold surfaces, with minuscule marks to limit the grade. Hints of pale blue toning appear on the devices. NGC ID# 26FH, PCGS# 9156

4919 1910-S MS64 NGC. This offering displays bright luster issuing from peach-gold surfaces. All devices are impressively struck. Light marks prevent Gem status. NGC ID# 26FH, PCGS# 9156

4920 1910-S MS64+ NGC. This high-end near-Gem displays impressively struck motifs, including Liberty's facial features and fingers, the panes on the Capitol building, and the eagle's plumage. A few minute grade-determining marks are visible on the lustrous, apricot-gold surfaces. NGC ID# 26FH, PCGS# 9156

**1911 Double Eagle, MS64
Scarce Philadelphia Issue**

4921 1911 MS64 PCGS. The Philadelphia Mint produced less than 200,000 double eagles in each year from 1911 to 1915, then they discontinued production altogether from 1916 through 1919. Traces of greenish color are noted on both sides of this brilliant yellow-gold example with frosty mint luster and bold design elements. PCGS has only certified 50 finer examples (1/14). NGC ID# 26FJ, PCGS# 9157

4922 1911-D MS64 NGC. Soft luster issues from the peach-gold surfaces of this near-Gem and an impressive strike leaves strong definition on the devices. Distributed light marks determine the grade. NGC ID# 26FK, PCGS# 9158

4923 1911-D MS65 NGC. Pale yellow and canary tones define the eye appeal of this broadly lustrous D-mint Gem. The coin's few flaws are isolated, such as a small scrape on the reverse sun disk. NGC ID# 26FK, PCGS# 9158

4924 1911-D MS66 NGC. The 1911-D Saint-Gaudens double eagle is an available date in high grade and remains popular with mintmark type collectors. This delightful Premium Gem displays well-preserved yellow and rose-gold surfaces, with vibrant mint luster and sharply detailed design elements. NGC ID# 26FK, PCGS# 9158

4925 1911-D MS66 PCGS. An outstanding Premium Gem, this piece exhibits frosty yellow-gold luster and outstanding eye appeal, with delicate orange-gold peripheries. PCGS has only certified seven 1911-D double eagles in finer grades (12/13). NGC ID# 26FK, PCGS# 9158

**1911-S Saint Gaudens Twenty, MS65
Sharp and Lustrous**

4926 1911-S MS65 NGC. A sharp and brilliant Saint with cartwheel luster. Lightly textured fields display pleasing mint frost. Although available in this Gem condition, the issue gets much more challenging any finer with fewer than 60 pieces certified finer by NGC and PCGS combined (1/14). The few abrasions seen on this attractive piece are widely scattered and insignificant for the grade. NGC ID# 26FL, PCGS# 9159

1911-S Twenty, MS65
Strong Luster, Popular S-Mint Issue

- 4927 1911-S MS65 PCGS.** Always a favorite mintmarked Saint for its color, luster, and frequently strong strike, the 1911 San Francisco date is a good choice for type. This example displays smooth fields and a bold strike with excellent definition on Liberty's face, hands, and gown folds. The panes of the Capitol building are defined. Lustrous orange-gold surfaces display an attractive tinge of red. Rare any finer. NGC ID# 26FL, PCGS# 9159

1911-S Double Eagle, MS65
Gorgeous Rose Toning

- 4928 1911-S MS65 PCGS.** This lovely Gem double eagle has a bold strike with frosty mint brilliance, and exceptional eye appeal that stems from its combination of yellow luster, vivid rose toning, and delicate steel toning on the high points. Scattered surface marks are consistent with the grade. PCGS has only certified 29 finer examples (1/14). NGC ID# 26FL, PCGS# 9159

1911-S Double Eagle, MS65
Rare in Finer Grades

- 4929 1911-S MS65 NGC.** The common dates in the Saint-Gaudens double eagle series can generally be categorized as the branch-Mint issues in the teens, and the Philadelphia Mint issues in the twenties. While the 1911-S is plentiful in the present grade, it is hard to locate in higher grades. This lovely piece has brilliant yellow luster with bold design features and trivial, grade-consistent marks. NGC ID# 26FL, PCGS# 9159

- 4930 1913 MS63 NGC.** Luminous yellow-orange with a wheat base and a satin swirl. The top of the torch is strongly struck. Diagonal abrasions on Liberty's form account for the grade. NGC ID# 26FN, PCGS# 9161

- 4931 1913 MS63 PCGS.** A brilliant Select Mint State representative that survives from a low mintage of 168,700 coins, this example exhibits brilliant lemon-yellow surfaces with frosty mint luster and trivial surface marks that prevent a higher grade. NGC ID# 26FN, PCGS# 9161

- 4932 1913-D MS64 PCGS.** A thoroughly lustrous honey-gold near-Gem that displays minimal contact. The strike is precise aside from bluntness on Liberty's raised foot. Certified in a green label holder. NGC ID# 26FP, PCGS# 9162

- 4933 1913-D MS64 NGC.** A lovely peach-gold near-Gem. Crisply struck with booming luster and only a single relevant mark, relegated to the field above the eagle's head. Housed in a former generation holder. NGC ID# 26FP, PCGS# 9162

- 4934 1913-D MS64 PCGS.** A delightful Choice Mint State example of this popular date, with well-detailed design elements and lustrous orange and rose-gold surfaces that show few signs of contact. NGC ID# 26FP, PCGS# 9162

1913-S Double Eagle, MS62
Low Mintage Collector Favorite

- 4935 1913-S MS62 PCGS.** A minimal mintage of 34,000 pieces has long made the 1913-S a favorite among double eagle collectors. A couple of bags were apparently shipped to Europe and eventually returned to America once the requisite Roosevelt melts had waned. On the present nicely struck example, dynamic luster sweeps the moderately abraded sea-green and apricot-gold surfaces. Housed in a green label holder. NGC ID# 26FR, PCGS# 9163

1914 Double Eagle, MS63
Low Philadelphia Production

- 4936 1914 MS63 NGC.** The mintage of 95,250 coins was the lowest Philadelphia Mint production for the entire series of low-relief Saint-Gaudens double eagles. This important issue is elusive in all grades. The present Select Mint State piece has frosty yellow-gold luster and sharp design motifs with grade-consistent marks of little consequence. NGC ID# 26FS, PCGS# 9164

- 4937 1914-DMS65 PCGS.** There is much to recommend this Gem double eagle to high-grade date collectors. The color is an original reddish-gold, and the luster is full and vibrant. Both sides are free of all but a few scattered traces of coin-to-coin contact. An attractive example in all regards, and much more elusive at the next grade level. Ex: *Long Beach Signature* (Heritage, 6/2004), lot 9462. NGC ID# 26FT, PCGS# 9165

4938 1914-S MS65 NGC. Rich pumpkin-orange color radiates from the boldly struck, highly lustrous surfaces. The obverse shows a few trivial contact marks, most of them on the figure of Liberty, while the reverse is seemingly pristine. An eye-appealing Gem example of this midseries mintmarked issue.

Ex: *Charlotte ANA Signature (Heritage, 3/2003)*, lot 6516. NGC ID# 26FU, PCGS# 9166

4939 1914-S MS65 PCGS. The 1914-S Saint-Gaudens twenty is an available date and a popular mintmark type coin from a mintage of nearly 1.5 million pieces. This attractive orange-gold Gem displays sharply detailed design elements and vibrant mint luster throughout. NGC ID# 26FU, PCGS# 9166

4940 1915 MS63 PCGS. This Select Mint State 1915 Saint-Gaudens double eagle is an above-average example with frosty yellow-gold luster and trivial marks. Wisps of delicate green toning adds to the excellent eye appeal. NGC ID# 26FV, PCGS# 9167

4941 1915-S MS65 NGC. The 1915-S is plentiful through Gem condition but becomes scarce any finer. Highly lustrous surfaces display rich peach-gold patina and well-struck design elements. A few grade-consistent marks do not disturb. NGC ID# 26FW, PCGS# 9168

**1916-S Twenty Dollar, MS65
Flashy and Eye-Appealing**

4942 1916-S MS65 NGC. The 1915-S and 1916-S Saint-Gaudens double eagle issues are the last S-mints in the series that can be found at the Gem level, and occasionally finer; their luster is often superior, but bagmarks are usually the problem. This bright, flashy yellow-gold Gem is a pleasing exception, exhibiting minimal marks and exceptional eye appeal.

Ex: *Irving Goodman Collection (Superior, 5/1996)*, lot 1951; *Sal Westernman Collection / FUN Signature (Heritage, 1/2001)*, lot 8465. NGC ID# 26FX, PCGS# 9169

**Gem 1916-S Double Eagle
Last Issue of the Decade**

4943 1916-S MS65 PCGS. Aside from a few commemorative gold dollars, gold coinage was halted from 1917 to 1919 due to the uncertainties of World War I. Most of the pieces on the market today are from a hoard of 4,000 coins discovered in South America three decades ago. This Gem has a sharp strike with lovely yellow—gold luster, showing delicate pinkish-rose overtones. NGC ID# 26FX, PCGS# 9169

**Condition Rarity 1920 Double Eagle, MS64
Only One Coin Numerically Finer at PCGS**

4944 1920 MS64 PCGS. The 1920 Saint-Gaudens issue is far more elusive in the higher Mint State grades than some of the Philadelphia issues of the mid- and late 1920s. PCGS has seen only a single example at the MS65 level, the ex: *Eliasberg-Duckor* coin that brought \$86,250 in our *FUN Signature (Heritage, 1/2012)*, lot 4628. This radiant near-Gem coin displays lustrous golden color and a crisp strike. Certified in a green-label holder.

Ex: *Otto Clement Collection / Long Beach Signature (Heritage, 9/2004)*, lot 8097. NGC ID# 26FY, PCGS# 9170

1920 Double Eagle, MS64

4945 1920 MS64 NGC. Although quite a number of 1920 double eagles have achieved the Choice MS64 grade, only one at PCGS and seven at NGC are certified as MS65 (1/14). This impressive near-Gem exhibits frosty yellow luster with delicate lemon peripheries. A stunning representative. NGC ID# 26FY, PCGS# 9170

4946 1922 MS64 PCGS. Peach-gold luster cascades over both sides of this near-Gem, each of which is sharply struck. Nicely preserved for the grade. NGC ID# 26G3, PCGS# 9173

4947 1922 MS64+ NGC. CAC. Both sides of this high-end near-Gem are awash with vibrant luster, and each exhibits well-struck devices throughout. Minimally abraded, and well-deserving of CAC approval. NGC ID# 26G3, PCGS# 9173

**1922 Saint-Gaudens Twenty, MS65
Conditionally Rare in Higher Grades**

4948 1922 MS65 PCGS. The 1922 Saint-Gaudens double eagle is an available issue in grades up to the MS65 level, but finer examples are very rare. This attractive Gem exhibits well-detailed design elements and vibrant mint luster with well-preserved yellow and rose-gold surfaces. Eye appeal is outstanding. PCGS has graded eight numerically finer examples (12/13). NGC ID# 26G3, PCGS# 9173

Gem 1922 Saint-Gaudens Twenty

- 4949 1922 MS65 PCGS.** World War I created political and economic uncertainties leading to the halt in gold coinage production. This impressive Gem double eagle has frosty yellow-gold luster with delicate pink tendencies, exhibiting bold design definition and exceptional eye appeal. NGC ID# 26G3, PCGS# 9173

1922 Saint-Gaudens Double Eagle, MS65

- 4950 1922 MS65 NGC.** Production of gold coinage resumed in 1920 at Philadelphia and San Francisco, and in 1923 at Denver, although mintage quantities were sparse in 1920 and 1921. This boldly defined Gem has wonderful eye appeal that results from the combination of pristine surfaces and lovely gold mint luster. NGC ID# 26G3, PCGS# 9173

Lovely 1922 Twenty, MS65

- 4951 1922 MS65 NGC.** More than 1.3 million double eagles were coined at Philadelphia in 1922, and nearly double that amount in San Francisco. This atypical Gem 1922 Saint-Gaudens double eagle has satin luster with a few scattered marks that are primarily located in the fields. NGC ID# 26G3, PCGS# 9173

Impressive Gem 1922 Double Eagle

- 4952 1922 MS65 NGC.** Examples of the 1922 double eagle coinage are plentiful today, as many pieces survived in various hoards in Europe, South and Central America, and in the U.S. as well. This lovely Gem 1922 double eagle is fully brilliant with frosty mint luster that shines through the delicate pinkish-rose toning. NGC ID# 26G3, PCGS# 9173

Popular 1922 Saint, MS65

- 4953 1922 MS65 NGC.** Although 1922 double eagles are readily available in MS65, examples are rare in finer grades. NGC and PCGS have each graded exactly eight pieces in higher numerical grade levels. A lovely Gem specimen, this 1922 double eagle exhibits frosty yellow-gold luster, and trivial, scattered marks. NGC ID# 26G3, PCGS# 9173

1922 Double Eagle, MS65 Lustrous and Nearly Mark-Free

- 4954 1922 MS65 NGC.** The 1922 double eagle, fortunately for collectors, can be found up to the Gem level for a price, but numerically finer examples appear seldom. The present Gem exhibits deeply lustrous, nearly mark-free surfaces. Although the 1922 is available in MS65, NGC and PCGS have each seen only eight submissions in higher grades (12/13).
Ex: Charlotte ANA Signature (Heritage, 3/2003), lot 6521. NGC ID# 26G3, PCGS# 9173

1922 Double Eagle, MS65

4955 1922 MS65 PCGS. The Philadelphia Mint discontinued gold coinage production following the 1915 issues, and the San Francisco Mint discontinued production following the 1916-S issues. The sole exception was the 1916 and 1917 McKinley commemorative gold dollars. This sharply defined Mint State 1922 double eagle has brilliant yellow-gold luster with trivial, grade-consistent surface marks. NGC ID# 26G3, PCGS# 9173

4956 1922-S MS61 NGC. The pale orange-gold surfaces of this attractive Mint State double eagle show a scattering of grade-consistent contact marks and frosty mint luster on both sides. The design elements are well-detailed and eye appeal is strong for the grade. NGC ID# 26G4, PCGS# 9174

4957 1923 MS64+ ★ NGC. As of (12/13), NGC has certified 28,602 1923 double eagles. However, just two coins have received a Star designation. This coruscating and crisply struck near-Gem is olive-green and orange-gold with the latter shade dominant on the reverse. The reverse has a rim nick at 6:30. NGC ID# 26G5, PCGS# 9175

4958 1923 MS64+ NGC. CAC. Pale straw-gold and richer coppery elements mingle on this MS64+ piece. Overall eye appeal is solid, though there are a few too many marks in the fields around Liberty for full Gem status. NGC ID# 26G5, PCGS# 9175

1923 Double Eagle, MS65 Only Three Certified Finer

4959 1923 MS65 PCGS. A lovely Gem example, and a condition rarity that is impossible to locate any finer. PCGS has only certified three examples in higher grades, and NGC has never certified a finer piece (1/14). This Gem has brilliant yellow and orange-gold luster with a single flaw in the left obverse field and a few trivial copper spots. NGC ID# 26G5, PCGS# 9175

4960 1923-D MS65 PCGS. Rich orange-gold and jade-green toning endows this lustrous and crisply struck Gem. Marks are trivial save for contact on the forehead and nose. The most prevalent postwar branch mint issue. Certified in an old green label holder. NGC ID# 26G6, PCGS# 9176

4961 1923-D MS66 PCGS. a stunning Premium Gem, and rarely encountered finer with only 66 better grade pieces certified by PCGS (12/13). This brilliant, sharply struck double eagle has frosty yellow luster and accompanying rose and rich green toning. NGC ID# 26G6, PCGS# 9176

4962 1923-D MS66 PCGS. The 1923-D Saint-Gaudens double eagle is doubly popular with collectors, given its high-quality production values and its resulting status as one of the latest mintmarked series issues that is widely available in the higher Mint State grades. This Premium Gem, certified in a green-label holder, displays rich satin luster with an appreciable cartwheel effect. Reddish-gold coloration and only one or two well-concealed bagmarks complete the broad appeal. Certified in a green-label holder.
Ex: Orlando FUN Signature (Heritage, 1/2002), lot 8572. NGC ID# 26G6, PCGS# 9176

4963 1924 MS66 NGC. Softly lustrous surfaces range from pale straw-gold to rich peach with a few small copper spots. Impressively preserved for this popular type issue. NGC ID# 26G7, PCGS# 9177

4964 1924 MS66 NGC. Breathtaking luster exudes from both sides of this gorgeous Premium Gem, and a solid strike imparts sharp detail to the devices. Orange-gold surfaces display hints of lavender and have been very well cared for. NGC ID# 26G7, PCGS# 9177

4965 1924 MS66 PCGS. This Premium Gem 1924 double eagle displays full mint luster and uncommonly well-preserved features, a coin that would make a lovely addition to a high-quality type set. Golden-rose and medium-intensity orange-gold patina are well-blended over sharply impressed features.

Ex: Charlotte ANA Signature (Heritage, 3/2003), lot 6525. NGC ID# 26G7, PCGS# 9177

4966 1924 MS66 PCGS. This well-detailed Premium Gem shows just a touch of softness on the lower obverse. The rich yellow-gold surfaces are free of large or distracting marks and both sides radiate vibrant mint luster. NGC ID# 26G7, PCGS# 9177

4967 1924 MS66 NGC. Wheat and sun-gold shadings define the palette of this lustrous Premium Gem. Detail is above-average and only a few small marks affect the eagle. A great type coin. NGC ID# 26G7, PCGS# 9177

4968 1925 MS66 NGC. Broadly lustrous with an array of yellow hues. This Premium Gem commands a slight premium over type but would fit in well as part of a collection of similar grade. NGC ID# 26GA, PCGS# 9180

4969 1925 MS66 PCGS. The 1925 Saint-Gaudens twenty is a plentiful issue in MS66, but it is conditionally rare in finer grades. This spectacular Premium Gem is sharply detailed and brightly lustrous throughout. PCGS has graded five numerically finer examples (12/13). NGC ID# 26GA, PCGS# 9180

1925-S Twenty, AU Sharpness Mass-Melted Branch Issue

4970 1925-S — Improperly Cleaned — NCS. AU Details. The mintage of 3,776,500 pieces was generous, but only a minute percentage of the coinage ever left Treasury vaults. As with other postwar San Francisco issues, most examples were melted. The present lightly marked example displays slight wear on the eagle's breast and has mildly glossy caramel-gold surfaces.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26GC, PCGS# 9182

4971 1926 MS65 PCGS. An extraordinary Gem, this 1926 twenty has satiny yellow-gold luster with lovely rose and light green highlights. The strike is bold and the surfaces are pristine. NGC ID# 26GD, PCGS# 9183

4972 1926 MS66 PCGS. The virtually pristine surfaces of this delightful Premium Gem display vibrant mint luster and delicate rose-gold patina, with well-detailed design elements. PCGS has graded four numerically finer examples (12/13). NGC ID# 26GD, PCGS# 9183

4973 1926 Tripled Die Obverse MS64 PCGS, FS-101. Die tripling is prominent on the rays near the date. Other design elements in the area exhibit clear doubling. Beautifully toned orange-gold and olive-green. Crisply struck and lustrous with refreshingly few marks. PCGS# 145744

1926-S Double Eagle Uncirculated Details

4974 1926-S — Improperly Cleaned — NGC Details. Unc. The 1926-S has a high mintage but most of the issue was used to back gold certificates and later melted. The present lemon-gold example has fewer bagmarks than many double eagles certified as Gem. However, a careful wipe from a jeweler's cloth has left slightly glossy surfaces. NGC ID# 26GF, PCGS# 9185

4975 1927 MS65 NGC. Light yellow and apricot hues prevail on this type-coin Gem. Both sides have a generally clean appearance, though a few abrasions hide among the eagle's feathers. NGC ID# 26GG, PCGS# 9186

4976 1927 MS66 PCGS. Although the 1927 Saint-Gaudens double eagle is an available date in MS66 condition, finer examples are quite elusive. This spectacular Premium Gem features well-preserved orange-gold surfaces with vibrant mint luster on both sides. PCGS has graded 14 numerically finer examples (12/13). NGC ID# 26GG, PCGS# 9186

4977 1928 MS66 PCGS. Broad lime-green borders surround the sun-gold centers. Lustrous and precisely struck with a remarkably smooth obverse and only minor contact on the reverse field near the beak. Encased in a green label holder. NGC ID# 26GK, PCGS# 9189

1928 Twenty Dollar, MS66+ Exceptional Quality

4978 1928 MS66+ NGC. A fully struck Premium Gem, with radiant luster and highly appealing rich, orange-gold surfaces. Lilac accents appear at the centers. An excellent choice for type or for seekers of high-end gold. 1928 was not only the highest-mintage double eagle date, but it is also the highest mintage for any United States gold issue of any denomination produced for circulation. NGC ID# 26GK, PCGS# 9189

1928 Double Eagle, MS66+ Remarkably Clean Surfaces

4979 1928 MS66+ PCGS. The 1928 Saint-Gaudens double eagle boasts the largest mintage of the series, at 8.8 million pieces, making it an available date and a popular type issue. This high-end Premium Gem displays well-preserved yellow and rose-gold surfaces that radiate vibrant mint luster and outstanding eye appeal. NGC ID# 26GK, PCGS# 9189

1928 Saint-Gaudens Twenty, MS66+ Ideal Type Coin

4980 1928 MS66+ PCGS. The 1928 Saint-Gaudens double eagle is readily available in most grades and the date is prized by series specialists and type collectors alike. This high-end Premium Gem exhibits well-detailed design elements and vibrant mint luster, with virtually pristine yellow and rose-gold surfaces. Eye appeal is terrific. NGC ID# 26GK, PCGS# 9189

CALIFORNIA FRACTIONAL GOLD

4981 1853 Liberty Octagonal 1 Dollar, BG-530, R.2, MS61 NGC. Unlike their Period Two successors, Period One pieces were not made strictly as souvenirs. Many were used in commerce due to a shortage of small coin. PCGS has certified 333 examples of BG-530, but just 92 of those as Mint State. This lime-green and straw-gold example is subdued but has a good strike and smooth surfaces. PCGS# 10507

4982 1853 Liberty Octagonal 1 Dollar, BG-530, R.2, MS62 NGC. The N initial on the reverse exergue represents Antoine Louis Nouzillet, one of several San Francisco jewelers responsible for Gold Rush California small denomination gold. A satiny and well struck green-gold example without any evident abrasions. PCGS# 10507

4983 1869 Liberty Octagonal 25 Cents, BG-712, High R.4, MS66 PCGS. A pristine tan-gold representative of this fairly crude Period Three variety. Liberty has a flat profile and a thick neck. She is surrounded by an undercount of nine stars. The reverse legend has several double-punched letters and the A punch is defective. Population: 6 in 66, 0 finer (12/13). PCGS# 10539

4984 1871 Liberty Octagonal 25 Cents, BG-771, Low R.6, MS64 PCGS. A high grade lemon-gold example that has smooth fields and a typical strike on the wreath. A much better die variety featuring a low and wide CAL. The fraction bar is fragmented from lapping, as made. Population: 1 in 64, 1 finer (12/13). PCGS# 10598

- 4985 1881 Indian Octagonal 25 Cents, BG-799M, Low R.5, MS66 Prooflike NGC.** This butter-gold representative displays mirrored fields and evenly struck motifs. Pristine, since the tiny central reverse strike-throughs are as made. Census: 2 in 66 Prooflike, none finer (1/14). PCGS# 710639
- 4986 1859 Liberty Round 25 Cents, BG-801, R.3, MS66 NGC.** The sole 1859 round quarter variety, BG-801 is a crude production. Liberty has a frightened expression and the legend is placed too high within the wreath. The R is repunched. This sun-gold Premium Gem is pristine aside from minor mint-made obverse strike-throughs. PCGS# 10662
- 4987 1876 Indian Octagonal 50 Cents, BG-950, R.7, MS61 NGC.** The 7 in the date nearly touches the curl, diagnostic for this very rare Breen-Gillio pairing. DOLLAR shows softness but to a lesser degree than the Jay Roe plate coin. The pumpkin-gold surfaces are nicer than the designated grade implies. PCGS# 10808

**1871 BG-1030 Round Liberty Half
Finest Certified, MS64+**

- 4988 1871 Liberty Round 50 Cents, BG-1030, R.6, MS64+ PCGS.** Period Two varieties did not circulate, since the West Coast scarcity of small change had ended by the late 1850s. However, among the 15 examples of BG-1030 that PCGS has certified, eight are in circulated grades, and one each is graded MS60 and MS61. In fact, the present lot is the only BG-1030 half dollar certified above MS63 by either service (12/13). The lemon-gold surfaces are smooth and moderately reflective. The strike is somewhat soft, yet well above average for the variety, as can be seen by comparison with the Jay Roe plate coin in Breen-Gillio. PCGS# 10859
- 4989 1876 Indian Round 50 Cents, BG-1065, R.5, MS64 PCGS.** A lemon-gold near-Gem whose flashy fields display clash marks but lack any indication of abrasions. The centers show minor incompleteness. The obverse field is wavy near the Indian's nose. Population: 12 in 64, 5 finer (12/13). PCGS# 10894
- 4990 1874 Indian Octagonal 1 Dollar, BG-1124, High R.4, MS62 NGC.** The only 1874 Octagonal dollar Indian variety. A rose-tinged obverse is paired with a straw-gold reverse. Well struck and brightly mirrored. Minor hairlines limit the numerical grade. PCGS# 10935

End of Session Three

PREMIER SESSION FOUR

COLONIALS

1724 Hibernia Farthing, MS63 Brown
Rare Martin 3.7-E.1 Variety

- 4991** 1724 Hibernia Farthing MS63 Brown PCGS. M. 3.7-E.1, W-12610, R.6. No Stop after Date. A rare die variety distinguished by obverse peripheral cracks and clashed dentils over the ERN in HIBERNIA. Crisply struck and unabraded with rich walnut-brown toning. Listed on page 45 of the 2014 *Guide Book*. As of (12/13), the single finest among just 17 pieces certified by PCGS. PCGS# 187

1820 North West Company Token
Fine 12, W-9250

- 4992** 1820 North West Company, Brass — Holed — Fine 12 PCGS. Breen-1083, W-9250. Holed at 12 o'clock, as are all but two known. The 1820 North West tokens, which come in brass or copper varieties, were the only tokens proven to circulate in the Oregon area before it was acquired by the United States from Canada. A small hoard found in the Umpqua River Valley comprises most survivors. A granular dark brown example with brassy green-gold high points. Listed on page 78 of the 2014 *Guide Book*. PCGS# 662

1792 Washington Born Virginia Cent
Inscribed Reverse, Baker-60, MS62 Brown

- 4993** 1792 Washington Born Virginia Cent, Inscribed Reverse MS62 Brown NGC. Baker-60, W-10730, R.5. Although John Gregory Hancock's 1791 Small Eagle and Large Eagle cents are relatively common, his "Born Virginia" Washington pieces were apparently coined in much smaller quantities. When encountered, survivors tend to be circulated and exhibit weakness on the central reverse legends. NGC has certified just three pieces as of (12/13), and two are in VF grades. The present piece is easily the finest in an NGC holder. It boasts a sharp, even strike and consistent dark walnut-brown toning. A tiny obverse rim nick at 3 o'clock and a faded mark in front of the nose are consistent with the grade. Listed on page 82 of the 2014 *Guide Book*.
Ex: *Liberty Collection, Part Three* (Heritage, 5/2008), lot 2046, which realized \$27,600. PCGS# 723

HALF CENTS

1793 Half Cent, Fine 12
C-4, B-4

4994 1793 Fine 12 PCGS. C-4, B-4, Low R.3. This die marriage was the last of four varieties produced in 1793, and it is also the most plentiful of the four by a narrow margin. Although a few small scratches and other handling marks are noted on each side, this first-year half cent has smooth mahogany and chocolate-brown surfaces with a few splashes of lighter tan, as well as a trivial splash of ebony patina in the left obverse field. Our EAC grade VG7. NGC ID# 2222, PCGS# 1000

1793 Half Cent, C-4, B-4, AU55
Sharp Definition

4995 1793 AU55 NGC. CAC. C-4, B-4, Low R.3. Manley Die State 2.0. This impressively defined Choice AU example displays shimmering luster across the devices and legends. The surfaces display deep golden-brown prevailing hues with additional ice-blue tints on the reverse. Minor incompleteness of strike appears on the right-side borders, most noticeable on the AM in AMERICA. This piece is surprisingly smooth overall, aside from inconspicuous mark above the 7 in the date and on the shoulder curl. A brief lintmark near the final A in AMERICA is of Mint origin. An important representative of this first-year, single-year type. Our EAC grade XF40.

Ex: FUN Signature (Heritage, 1/2009), lot 3565. NGC ID# 2222, PCGS# 1000

1802/0 C-1, B-1 Half Cent, Fair 2
Very Rare Reverse of 1800

4996 1802/0 Reverse of 1800 Fair 2 NGC. C-1, B-1, R.6. Among the stoppers to a *Guide Book* collection of half cents. The reverse is heavily worn but key diagnostics are visible, such as the slender horizontal break on the central left portion of the wreath, and the berry east of the right ribbon loop. This darkly toned example is evenly granular and couple of relatively minor marks on the right reverse. Our EAC grade Fair 2. NGC ID# 222C, PCGS# 1054

PROOF CLASSIC HEAD HALF CENT

1836 Half Cent, PR66 Brown
Second Restrike, B-2

4997 1836 Second Restrike PR66 Brown NGC. B-2, Low R.6. According to Breen, these elusive restrikes were produced from the original dies and can be differentiated from the originals by stronger detail at the rims and by a slight bulging from the obverse die. About 20 specimens are believed to exist, although several of these are permanently impounded in museums. While receiving a Brown color designation, this beautifully preserved, well-mirrored specimen maintains a generous amount of cherry-red color in the protected areas of the obverse. Our EAC grade PR62. Census: 3 in 66 Brown, 0 finer (12/13).
Ex: Long Beach Signature (Heritage, 9/2004), lot 5044.
From The Greensboro Collection, Part VI. PCGS# 1210

PROOF BRAIDED HAIR HALF CENTS

1841 Original Half Cent, B-1, PR64 Red

- 4998** 1841 Original PR64 Red NGC. B-1, R.6. Breen Die State III, with a lengthy slender crack that connects stars 3 to 6 and approaches stars 2 and 7. The large berries differentiate the Original proofs from the First and Second Restrikes. A well-struck and radiant salmon-pink and yellow-gold near-Gem with deeply reflective fields on each side. A small spot within the hair above RT and a few nearly imperceptible hairlines on the upper obverse field decide the grade. Census: 2 in 64 Red, 0 finer (12/13). Our EAC grade PR64.
Ex: Long Beach Signature (Heritage, 2/2007), lot 2091.
From The Greensboro Collection, Part VI. PCGS# 1256

1844 Second Restrike Half Cent
 B-3, PR63 Brown

- 4999** 1844 Restrike PR63 Brown PCGS. B-3, R.6. Die file marks at the border above RICA identify this as a Second Restrike half cent. With the sole exception of the 1849 Large Date business strikes, all half cents dated in the 1840s are proof-only issues, and they are known by the terms Original, First Restrike, and Second Restrike. This desirable proof is sharply detailed with olive and pale orange surfaces. The fields are moderately mirrored. Our EAC grade PR63. Population: 2 in 63 Brown, 6 finer (12/13).
Ex: Dallas Signature (Heritage, 10/2009), lot 69.
From The Greensboro Collection, Part VI. NGC ID# 26ZB, PCGS# 1275

**1845 B-3 Half Cent, PR67 Brown
Second Restrike
The Finest Certified 1845 Half Cent**

5000 1845 Second Restrike PR67 Brown NGC. B-3, Low R.6. The 1845 Second Restrike half cent is seen with more frequency than the Original of First Restrike proofs of its date. Close to 30 examples of this Second Restrike survive, although few are the equal of this specimen. In fact, this is the only PR67-certified 1845 half cent at NGC or PCGS, regardless of variety or color designation (12/13).

Certified as a Superb Gem proof, this piece is designated as a Brown example but retains considerable faded mint red, especially on the reverse, with fully mirrored fields and a pinpoint strike. Our EAC grade PR63.

Ex: Oliver Collection (Heritage, 8/2011), lot 7008, which realized \$17,250.

From The Greensboro Collection, Part VI. NGC ID# 26ZD, PCGS# 1281

1855 Half Cent, B-1, Lovely PR65 Red and Brown

5001 1855 PR65 Red and Brown NGC. B-1, C-1, the only known dies, R.5. This splendid proof has mostly light orange surfaces with some blue-brown patina on the devices and rims. Both sides are well-preserved with only a few tiny spots. The obverse has a couple noticeable lint marks. Our EAC grade PR63.

Ex: Houston Signature (Heritage, 12/2008), lot 34.

From The Greensboro Collection, Part VI. PCGS# 1327

**1856 Half Cent, PR65 Brown
Better Breen-1 Variety**

5002 1856 PR65 Brown PCGS. B-1, R.7 as a proof. Large rust pit on the I of UNITED. Most proof 1856 half cents are from a different reverse die (B-3) with doubling on CENT and the ribbon. This fully struck Gem offers reflective fields displaying deep ruby-red, orange-gold, olive, and navy-blue tints when rotated beneath a light. Carbon is minimal. Four pinpoint aqua flecks occur on the reverse. Encapsulated in a green label holder. Our EAC grade PR60. Population: 4 in 65 Brown, 0 finer (12/13).

From The Greensboro Collection, Part VI. NGC ID# 26ZX, PCGS# 1329

PROOF LARGE CENT

1855 Slanted 55 N-10 Cent, PR64 Red
Extremely Rare as Full Red

- 5003 1855 Slanted 55 PR64 Red PCGS. N-10, R.5 as a proof.** Ex: Teich Family Collection. Grellman Die State a. A point from the left coronet border attributes the Newcomb marriage. Full red proof 1855 large cents are extremely rare. PCGS and NGC have each certified just one such specimen, both as PR64 Red. Long off the market, the present needle-sharp near-Gem will be of considerable importance to the late date specialist. The orange-gold surfaces retain full mint bloom save for moderate mellowing on the obverse periphery. Devoid of contact marks or flan imperfections. A small spot at the obverse center provides an identifier. Our EAC grade PR60.
From The Teich Family Collection. PCGS# 1996

FLYING EAGLE CENT

1857 Flying Eagle Cent, MS65
Vivid Patina

- 5004 1857 MS65 PCGS.** The 1857 Flying Eagle cent is a popular choice of type collectors seeking a high-grade example of this iconic design. The well-preserved surfaces of this attractive Gem display a mix of original red, lilac, and amber patina, with strong mint luster underneath. The design elements are sharply detailed and eye appeal is outstanding. PCGS has graded 14 numerically finer examples (12/13). NGC ID# 2276, PCGS# 2016

PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, PR63
Snow-3, Reverse Lamination

5005 1856 — Reverse Lamination — PR63 NGC. Snow-3. The Snow-3 variety was principally struck in 1856 for distribution to Washington officials. Most examples were coined as business strikes since they were intended to demonstrate the proposed small cent denomination. The present golden-brown specimen, however, has reflective fields and is fully struck. The die scratch below the 1 in the date is unusually clear. Snow writes, “it is entirely possible that a small pre-production run of proofs were struck prior to the non-proof press run.”

The reverse has a retained lamination near the left ribbon end and a flake nearly out above the upright of the E in CENT. A larger retained lamination affects the upper right portion of the wreath, and the lower left border of the lamination is accompanied by a few faint and closely spaced pinscratches.

From The Teich Family Collection. NGC ID# 227A, PCGS# 2037

1856 Flying Eagle Cent
Choice Proof, Snow-9

5006 1856 PR64 PCGS Secure. Snow-9. The small spur from the left wreath end and the die line through the I in UNITED confirm the die variety. Snow-9 was a well made proof issue unofficially struck during the late 1850s to take advantage of growing collector demand for what remains the rarest date of the small cent denomination. The present specimen is fully struck and is free from spots or contact marks. A few minuscule flecks are noted on the left obverse border. A textured strike-through between the EN in CENT is of mint issue and is seen on a number of other Snow-9 examples, such as lot 3155 in our 2012 Houston Signature. NGC ID# 227A, PCGS# 2037

1858 Small Letters Cent, Boldly Struck PR64

- 5007 1858 Small Letters PR64 PCGS. CAC. Snow-PR2.** Low Leaves, Open E in ONE. A bold diagonal die line in the dentils beneath the right ribbon end identifies the Snow-PR2 variety, which Snow believes was included (as Snow-PT9) in the 12-piece pattern sets of 1858 cents.

The central devices are a light golden-tan that are highlighted by the lighter yellow-gold fields when the coin is rotated under a light source, especially on the obverse. The design elements are crisply struck, including the eagle's tail feathers and the ribbing of the reverse leaves. Well-preserved surfaces reveal no significant contacts or spots. A faint linear mark below the right stand of the M in AMERICA and a horizontal one under the right serif of E in CENT are mentioned solely as identifiers. Population: 42 in 64 (2 in 64+), 8 finer (12/13). NGC ID# 227D, PCGS# 2043

INDIAN CENTS

1860 Indian Cent, MS66 Scarcer Pointed Bust Type

- 5008 1860 Pointed Bust MS66 PCGS. CAC.** The 1860 Pointed Bust Indian cent combines the portrait motif of 1859 with the reverse of 1860 and the issue is more elusive than its Rounded Bust successor. This impressive Premium Gem offers well-detailed design elements and lustrous copper-red surfaces that show a few microscopic specks of carbon. Population: 6 in 66, 2 finer (12/13). PCGS# 2056
-

1864 Bronze Cent, MS65 Red L on Ribbon

- 5009 1864 L On Ribbon MS65 Red PCGS.** The 1864 cent mintage exceeded 50 million pieces, but most of the production was either on copper-nickel planchets or lacked Longacre's initial on the ribbon. Full Red With L Gems are highly elusive. This lustrous peach-gold cent is nicely struck and essentially unabraded. Housed in a green label holder. Population: 33 in 65 (1 in 65+) Red, 3 finer (12/13). NGC ID# 227M, PCGS# 2081
-

1898 Indian Cent, MS67 Red
Among the Finest Certified

5010 1898 MS67 Red PCGS. CAC. The 1898 Indian cent claims a large mintage of 49.8 million pieces, but few survivors can equal the quality of this delightful Superb Gem, and none exceed it. This coin is a close match for the spectacular MS67 Red PCGS coin offered in lot 3129 of our October 2011 Pittsburgh Signature that realized \$26,450. It is certain to inspire spirited competition from date and Registry Set collectors alike. This piece displays well-preserved original red surfaces with vibrant mint luster and terrific eye appeal. The design elements are sharply detailed throughout. Population: 9 in 67 Red, 0 finer (12/13). NGC ID# 228T, PCGS# 2201

PROOF INDIAN CENTS

1864 Bronze Cent, PR64 Red and Brown Very Rare L on Ribbon Variety Snow-PR2

5011 1864 L On Ribbon PR64 Red and Brown NGC. Snow-PR2.

The proof 1864 L on Ribbon ranks as the most important *Guide Book* rarity of the Indian cent series, rarer overall than either the Snow-1 1888/7 or 1873 Doubled LIBERTY. The traditional proof mintage is just 20 pieces, though the *Guide Book* places a plus sign after that figure, as it does with all bronze proof issues prior to 1874. NGC has certified just six examples in all grades. For many years, just a single die variety (Snow-PR2) was associated with proofs, identified by a “long raised die line on neck ... just below the jaw” as described by Snow. Breen was the first to describe the diagnostic spine, in his 1977 Proof Encyclopedia.

The present coin is housed in an older generation “fatty” holder that dates to the early to mid-1990s. Despite the age of the holder, the pedigree of the present cent is unknown. Rick Snow lists ten PR2 specimens in his attribution guide to the 1859-1869 cents. Of the three examples listed as PR64 Red and Brown NGC (the same number listed in the 1/2013 NGC Census Report), this does not appear to be either the Auction ‘88 or Auction ‘90 pieces. It may be Snow’s #6, “said to have been acquired in the 1950’s” and held by private owner in an East Coast collection.

This is a sharply struck near-Gem with pleasing field reflectivity and no remotely mentionable detractions. The color is variegated and equally divided between orange-gold and plum-mauve. Missing from most advanced collections of the series, the 1864 With L would be the standout piece in any proof small cent holding. NGC ID# 229G, PCGS# 2280

1866 Cent, PR66+ Red and Brown Cameo
Sharply Struck

- 5012** 1866 PR66+ Red and Brown Cameo NGC. CAC. Eagle Eye Photo Seal, card included. Whispers of soft purple interfere very little with the orange-gold surfaces of this high-end Premium Gem. The sharpness of strike extends to the feather tips and the four diamonds. Devoid of mentionable marks or spots. Census: 1 in 66+ Red and Brown Cameo, 1 finer (12/13). PCGS# 82286
-

1877 Indian Cent, PR66 Red
Most Popular Proof of the Series

- 5013** 1877 PR66 Red PCGS. Despite a mintage in the neighborhood of 900 pieces that is consistent with the production of previous proof Indian cent issues, the 1877 is one of the most popular and costly dates for the series. Its association with the elusive and coveted business strikes of 1877, the premier key date for the design, has ensured the proof coins' enduring popularity. Their generally high state of preservation and superlative visual appearance also contribute to their appeal, since attractive proofs are more readily available than similarly preserved business strikes.

The obverse and much of the reverse are copper-orange, while deeper peach-rose shadings visit the right branch of the wreath and the adjacent fields. Fully struck and carefully preserved, an amazing specimen for the discerning collector. Population: 11 in 66 Red, 2 finer (12/13). NGC ID# 229W, PCGS# 2320

1897 Indian Cent, Conditionally Rare PR67 Cameo

- 5014 1897 PR67 Cameo PCGS. CAC.** The 1897 Indian cent, from a mintage of fewer than 2,000 proofs, is difficult to locate in fully Red Gem. Examples with Cameo finish make it an even more challenging date. Proof 67 Cameos such as the present offering are extremely rare; PCGS has seen a mere two such coins and one finer, and NGC has seen none in this level of preservation.

Copper-gold surfaces display noticeable field-motif contrast, and a solid strike imparts crisp definition to the design elements, including the feather tips. Close inspection reveals no mentionable contact marks or spots. Wonderful overall eye appeal. PCGS# 82380

LINCOLN CENTS

1909-S VDB Cent, Well-Struck MS66 Red and Brown

- 5015 1909-S VDB MS66 Red and Brown PCGS. CAC.** Considerable orange-gold luster shows on both sides of this Premium Gem, each of which is visited by whispers of reddish-gold and lime-green, especially on the reverse. The design elements are well-struck, including Lincoln's hair and the lines and grains on the wheat stalks. Well-preserved surfaces are devoid of mentionable contacts or spots. Population: 32 in 66 Red and Brown, 0 finer (12/13). NGC ID# 22B2, PCGS# 2427
-

1909-S VDB Cent, MS65 Red A Registry Set Candidate

- 5016 1909-S VDB MS65 Red PCGS.** All of the design motifs, including the V.D.B. initials, are sharply detailed on this gorgeous Gem. Both sides are frosty with brilliant orange luster showing minimal spots and trivial surface marks. The design elements are sharply struck throughout. An excellent candidate for the advanced Registry collector. NGC ID# 22B2, PCGS# 2428
-

1909-S VDB Cent, MS65 Red Strong Eye Appeal

- 5017 1909-S VDB MS65 Red PCGS. CAC.** Bright golden-orange luster invigorates this key-date representative. Boldly struck design elements further enhance the coin's eye appeal, as do the impeccably preserved surfaces that are devoid of mentionable marks or unsightly spots. The date, initials, and lines of the wheat stalks are crisp. Fully Red Gems such as this are a collector favorite, as higher-grade pieces are difficult to come by. NGC ID# 22B2, PCGS# 2428
-

1909-S VDB Cent, MS66 Red
Excellent Eye Appeal, Pristine Preservation

- 5018 1909-S VDB MS66 Red PCGS.** This desirable Premium Gem Red 1909-S VDB offers excellent eye appeal and pristine preservation. Streaks of pale golden color bisect both sides, while the balance of the features are awash in golden-orange luster. The frosty-textured features are sharply defined and free of mentionable distractions. Given the price of the few Superb Gems graded, we believe the Premium Gem level is an excellent plateau for most advanced collectors.
Ex: Santa Clara Signature (Heritage, 11/2001), lot 5228. NGC ID# 22B2, PCGS# 2428

1914-D Lincoln Cent, MS64+
Pleasing Red and Brown Surfaces

- 5019 1914-D MS64+ Red and Brown PCGS.** The 1914-D Lincoln cent is a low-mintage branch mint issue that was not heavily saved by contemporary collectors, resulting in a small supply of high-grade specimens in the market today. This Choice AU example displays a mix of original red and light brown patina over pleasing surfaces that show few signs of contact.
From The Teich Family Collection. NGC ID# 22BH, PCGS# 2472

1914-D Cent, MS65 Red
An Important Condition Rarity

- 5020 1914-D MS65 Red NGC. CAC.** A key date among early Lincoln cents, the 1914-D is widely recognized as an important 20th century rarity. It is a rare and expensive issue in all grades, and in the better Mint State levels it is a highly coveted condition rarity.
Orange-gold luster emanates from both sides of this Red Gem, and an impressive strike delivers strong definition to the design features, including Lincoln's hair details and all the lettering, elements that sometimes show weakness. Small toning spots just right of the nose and left of the E in CENT do not unduly detract and may serve to identify the coin. Census: 20 in 65 Red, 5 finer (12/13). NGC ID# 22BH, PCGS# 2473

1915-D Cent, MS66 Red
Among the Finest Certified

- 5021 1915-D MS66 Red PCGS.** Generous orange-gold luster coats each side of this well-struck semikey Premium Gem example in the early Lincoln series, one of the top-graded pieces at either PCGS or NGC. Close examination reveals no mentionable abrasions or spots. Population: 26 in 66 (1 in 66+) Red, 0 finer (12/13). NGC ID# 22BL, PCGS# 2482

**1915-S Lincoln Cent, MS64+
Original Red Surfaces**

5022 1915-S MS64+ Red PCGS. CAC. The original red surfaces of this high-end Choice example radiate vibrant mint luster on both sides and show minimal signs of contact. The design elements exhibit razor-sharp definition throughout and eye appeal is outstanding. Population: 57 in 64 (3 in 64+) Red, 31 finer (12/13). NGC ID# 22BM, PCGS# 2485

**1936-S Cent, MS67 Red
Registry Set Prize, Tied for Finest**

5023 1936-S MS67 Red PCGS. CAC. A Registry Set prize, this Superb Gem Red 1936-S cent is tied with only a few dozen such at PCGS, a minuscule fraction of the mintage of nearly 30 million coins. The medium orange-red surfaces show a bold strike and only the most minor signs of contact, as expected at this ultimate grade level. Population: 40 in 67 Red, 0 finer (12/13). NGC ID# 22DG, PCGS# 2656

**1944 Steel Cent, AU53
Famous Transitional Alloy Error**

5024 1944 — Struck on a Zinc-Coated Steel Planchet — AU53 PCGS. The rare 1944 steel cent was struck on planchets intended for 1943 cents or 1944 Belgium two francs. The mint error is nearly as famous as the 1943 copper cent, also caused by a transition in alloy that year. A satiny and mostly untuned example with a few small dark spots on the reverse and delicate hairlines on Lincoln's coat.

Included with the present lot is ANACS certificate E-8870-B, dated December 22, 1978, which bears a photograph of the present cent and confirms it as both genuine and struck on a zinc-coated steel planchet.

1948 Cent, MS67 Red
Registry Set Prize

5025 1948 MS67 Red PCGS. The post-World War II era of Lincoln cent mintages was characterized by high-speed production of hundreds millions of coins in Philadelphia, Denver and San Francisco less so but still typically striking tens of millions of pieces each. But the emphasis was on quantity, and quality was sacrificed for speed. The 1948 Philadelphia cent saw a mintage of 317,570,000 pieces, but only 13 pieces have achieved PCGS' ultimate (so far) Superb Gem Red grade. The medium orange-red surfaces on this piece are well but not fully struck and show only the most minor ticks. The eye appeal is excellent on this Registry Set prize. NGC ID# 22ES, PCGS# 2761

1955 Doubled Die Cent, MS64 Red
Very Scarce With Full Red Color

5026 1955 Doubled Die Obverse MS64 Red PCGS. CAC. FS-101. The 1955 Doubled Die cents helped spur the collecting of varieties in the various U.S. coin series. But they also helped ignite a furor for BU roll trading, collecting, and (sometimes) searching—one begun by the low-mintage 1950-D nickels, continued by the 1955 Doubled Dies, and augmented by the 1960-P and D Small Date Lincoln cents. The hope of discovering one of the rare 1955 Doubled Die cents in a BU roll drove some collectors to search many rolls, or even bag quantities. The frenzy for BU rolls, most of which went unopened from hand to hand as they passed from one dealer or collector to another, lasted from roughly 1951, when the low mintage of the 1950-D nickels was first publicized, until 1964, when the absurd prices from the Dutch tulip bulb-like mania simply collapsed under their own weight. However, the popularity of the 1955 Doubled Die grew and eventually became an accepted variant in the Lincoln cent series. Very few pieces survived with intact mint red luster. This is one of the few. Rich, deep, even red color blankets both sides. Only a few small marks are scattered about, none of which are significant. NGC ID# 22FG, PCGS# 2827

PROOF LINCOLN CENTS

1909 VDB Lincoln Cent, PR64 Red and Brown Early Die State Diagnostics

5027 1909 VDB PR64 Red and Brown PCGS. CAC. Today, the accepted mintage of 1909 VDB Matte Proof cents is set at 1,194 pieces produced, with a footnote that an estimated 400 and 600 proofs of the type were actually distributed according to the 2014 *Guide Book*. Other resources are generally in agreement that not all proofs were issued, although there is some discussion about the exact number.

This near-Gem example displays the characteristics of an early die state Matte Proof. Diagnostic die scratches appear in front of Lincoln's nose, with a single die scratch from the jacket to below the T of LIBERTY. Later die states show a die crack through the dot and then through the B of V.D.B., but the crack does not appear on this coin, confirming an early die state. Flat, wide rims encircle both sides of this near-Gem proof. The strike is bold throughout, with strong detail on Lincoln's hair and beard, and also on the jacket details beneath the date.

The red-brown surfaces are suggestive of tissue-wrapped proofs issued by the Mint. The obverse displays purple-brown toning, nicely blended over deeply lustrous, orange-red surfaces. The reverse is more fully Red. A series of pinpoint carbon flecks are visible under magnification above the VDB, with a slightly larger fleck above the T in CENT. There are no significant post-mint contact marks to mention. Matte proofs are seldom available in this near-Gem condition with generous eye appeal. Population: 32 in 64 Red and Brown, 36 finer (12/13).

From The Teich Family Collection. NGC ID# 22KR, PCGS# 3301

1909 Lincoln Cent, PR66 Red Ideal First-Year Type Coin

5028 1909 PR66 Red PCGS. CAC. A delightful Premium Gem from the first year of the Lincoln design, without the designer's initials. The original red surfaces radiate vibrant mint luster and show few signs of contact. The design elements are sharply detailed and eye appeal is outstanding. Population: 42 in 66 (1 in 66+) Red, 6 finer (12/13). NGC ID# 22KS, PCGS# 3305

1942 Lincoln Cent, PR67 Red Cameo None Certified Finer at NGC

5029 1942 PR67 Red Cameo NGC. The Philadelphia Mint discontinued proof offerings after 1942 because of the stresses and distractions of the Second World War. This spectacular Superb Gem offers deeply mirrored original red surfaces that contrast boldly with the unusually frosty design elements. Eye appeal is terrific. Census: 2 in 67 Red Cameo, 0 finer (12/13). NGC ID# 22L9, PCGS# 83353

TWO CENT PIECE

1864 Two Cent Piece, MS65 Red Scarcer Small Motto Variant

5030 1864 Small Motto MS65 Red PCGS. This delightful Gem represents the scarcer Small Motto type from the first year of the denomination, an extremely important issue for date and type collectors. This coin displays original red surfaces that have mellowed to show a few hints of light brown. The design elements are sharply detailed and the well-preserved surfaces radiate vibrant mint luster. Population: 20 in 65 Red, 3 finer (12/13). NGC ID# 22N8, PCGS# 3581

PROOF TWO CENT PIECES

1865 Two Cent, PR65 Red Cameo
Strong Eye Appeal and Perceptible Contrast

- 5031 1865 PR65 Red Cameo PCGS.** Plain 5. Blond, light orange, and deeper cherry hues compete for territory on this Gem Red Cameo proof 1865 two cent piece, one of the nicest survivors from the production of 500-plus proofs (according to the *Guide Book and Breen estimates*). This piece boasts excellent eye appeal, good field-device contrast, and a strong strike with no carbon spots, although a small grayish water spot on the reverse is undistracting. Population: 6 in 65 Red Cameo, 2 finer (12/13). PCGS# 83629

1870 Two Cent Piece, PR66 Red
Only Two Finer Coins at NGC

- 5032 1870 PR66 Red NGC.** A generous proof mintage of 1,000 two cent pieces was accomplished in 1870. This spectacular Premium Gem exhibits razor-sharp definition on all design elements and the original red surfaces are deeply reflective, with no mentionable distractions. Census: 13 in 66 Red, 2 finer (1/14). NGC ID# 274Z, PCGS# 3644

1873 Two Cent Piece, PR64+ Red and Brown
Open 3 Restrike Example

- 5033 1873 Open 3 PR64+ Red and Brown PCGS.** CAC. All 1873-dated two cent coins were produced in proof format, with the scarcer Open 3 variety being a restrike issue from a mintage of 500 pieces. This high-end Choice example offers sharply detailed design elements with reflective surfaces that show a mix of original red and light brown patina. Population: 61 in 64 (1 in 64+) Red and Brown, 26 finer (12/13).
From The Teich Family Collection. NGC ID# 2754, PCGS# 3655

THREE CENT SILVER

1861 Three Cent Silver, MS67
Stunning Concentric Patina

- 5034 1861 MS67 PCGS.** CAC. Concentric patina on this stunning Superb Gem include ice-blue, orange, medium blue, and gold on surfaces that show pristine preservation and no mentionable distractions. The 1861 mintage of nearly a half-million pieces would dwindle in following years to ridiculously low, token mintages for circulation. This piece is tied for finest at PCGS (1/14). NGC ID# 22ZA, PCGS# 3679

PROOF THREE CENT SILVER

1870 Three Cent Silver, PR67 ★
Peripheral Rainbow Toning

- 5035 1870 PR67 ★ NGC.** An enchantingly toned and strongly mirrored specimen is from late in the three cent silver series. Light frost graces the devices, though contrast is subdued. Brilliant centers are surrounded by rings of green-gold and cerulean at the borders, wider on the reverse. NGC has graded just one numerically finer example (12/13).
Ex: Baltimore Signature (Heritage, 7/2003), lot 5899; Summer FUN (Heritage, 7/2010), lot 3218.
From The Greensboro Collection, Part VI. NGC ID# 27CE, PCGS# 3721

THREE CENT NICKELS

1881 Three Cent Nickel, Lightly Toned MS67

- 5036 1881 MS67 PCGS.** Whispers of faint golden-gray patina show up under magnification over the lustrous surfaces of this Superb Gem. The design elements are sharply impressed, including the lines in the III denomination. Both sides are free of mentionable marks or spots. Housed in a prior generation holder. Population: 8 in 67, 0 finer (12/13). NGC ID# 22NT, PCGS# 3749

1885 Three Cent Nickel, MS63 Low Business-Strike Mintage

- 5037 1885 MS63 NGC.** Only 1,000 business-strike three cent nickels were struck in 1885, the smallest mintage of the series. This attractive Select specimen exhibits well-detailed design elements and lightly marked surfaces that show hints of lavender-gray and champagne-gold toning. Census: 2 in 63, 22 finer (1/14). NGC ID# 275G, PCGS# 3753

PROOF THREE CENT NICKELS

1883 Three Cent Nickel, PR68 Cameo Stunning Contrast

- 5038 1883 PR68 Cameo NGC.** The 1883 has the largest proof mintage of the three cent nickel series (6,609 pieces), and also shows a high survival rate, even with a Cameo finish. Examples in the lofty grade of PR68 Cameo, however, such as the current offering, are rare. Immaculately preserved, untuned surfaces display stunning field-device contrast. Additionally, the strike is strong throughout. Census: 4 in 68 Cameo, 0 finer (12/13).
Ex: FUN Signature (Heritage, 1/2010), lot 450.
From The Greensboro Collection, Part VI. PCGS# 83779

1884 Three Cent Nickel, PR68 Cameo Pale Toning, Deeply Reflective Fields

- 5039 1884 PR68 Cameo NGC.** A relatively large number of survivors are known from the nearly 4,000-piece mintage of 1884 three cent nickels. While extant Cameos are fewer in number, they can still be located with some searching in PR63 to PR65. Examples in the lofty grade of PR68 Cameo, however, are quite elusive. This lightly toned specimen exhibits a full strike and virtually pristine surfaces with pronounced field-motif contrast. Census: 4 in 68 Cameo, 0 finer (12/13).
Ex: 2007 Dallas Auction (Heritage, 11/2007), lot 213.
From The Greensboro Collection, Part VI. PCGS# 83780

1885 Three Cent Nickel, PR66 Deep Cameo Tied for Finest at PCGS

- 5040 1885 PR66 Deep Cameo PCGS. CAC.** Deeply contrasted surfaces and pristine preservation are the chief attributes of this untuned Premium Gem proof 1885 three cent nickel, given the Deep Cameo designation by PCGS and the "green bean" by CAC. This late-series issue was not proof-only but it may as well have been, as only 1,000 coins were struck for circulation. This piece is tied for the finest at PCGS. Population: 3 in 66 Deep Cameo, 0 finer (1/14). PCGS# 93781

SHIELD NICKEL

1866 Rays Shield Nickel, MS66 Satiny and Lightly Toned

- 5041 1866 Rays MS66 PCGS.** The satiny surfaces of this top-notch Premium Gem show few relevant marks over surfaces that are silver-gray with light accents of gold and smoke-gray. Some strike weakness on each side is likely a function of die fatigue for this high-mintage issue. One of the finest at PCGS. Population: 34 in 66 (1 in 66+), 0 finer (12/13). NGC ID# 22NX, PCGS# 3790

PROOF SHIELD NICKELS

1866 Rays Nickel, PR66 Cameo Lightly Toned, Sharply Contrasted

- 5042 1866 Rays PR66 Cameo PCGS.** This lovely piece was struck in the initial year of five cent nickel coinage, and is a low-mintage, two-year proof type coin with a mintage of "600+" proofs, according to the 2014 *Guide Book*, a revised estimate which was only "200+" several years ago. This is a boldly struck coin with nicely mirrored fields and the diagnostic center dot is plain to see on the reverse. What sets this Premium Gem specimen apart from most proofs seen from this year is sufficient contrast between the fields and devices to earn it the Cameo designation. Population: 26 in 66 Cameo, 3 finer (12/13). PCGS# 83817

Proof 1867 Rays Nickel Famous Low-Mintage Variety

- 5043 1867 Rays — Environmental Damage — PCGS Genuine. Proof, Unc Details.** Obverse 2. The date is entered low, and the upright of the 1 is centered between dentils. The most famous rarity of the Shield nickel series, the proof 1867 Rays has a recorded mintage of only 25 pieces. The *Guide Book* places a plus sign after that figure, as it does for all pre-1877 proofs, since Reconstruction-era collectors could purchase individual denominations instead of a complete set, and such sales were not recorded. In a June 2007 article, numismatic researcher John Dannreuther estimated a total mintage of 45 to 80 proofs from all three obverse dies, and a mintage of 15 to 25 pieces of the present die variety. This boldly struck and unabraded specimen has streaky walnut-brown and stone-gray toning. A strong lens reveals minute surface granularity. From *The Teich Family Collection*. NGC ID# 276H, PCGS# 3818

1877 Nickel, PR66
Low-Mintage, Proof-Only Date

- 5044 1877 PR66 PCGS.** This fully struck Premium Gem has medium golden-gray toning. No marks are present, although the lower reverse displays a fingerprint fragment. The mintage is much less than the other proof-only date of the series, the 1878. Housed in a green label holder. Population: 32 in 66, 0 finer (12/13).
Ex: Stan Burger Collection, Part III (Heritage, 4/2010), lot 1089.
 NGC ID# 276U, PCGS# 3831

LIBERTY NICKELS

1886 Liberty Nickel, MS65
Very Scarce in High Grade

- 5045 1886 MS65 PCGS.** From a mintage of 3.3 million pieces, the 1886 Liberty nickel is a very scarce issue in MS65 condition. This attractive Gem displays well-detailed design elements, with just a touch of softness on the stars and ears of corn. The lustrous surfaces show a few highlights of champagne-gold toning and hints of prooflike reflectivity in sheltered areas. Population: 39 in 65, 6 finer (12/13). NGC ID# 22PK, PCGS# 3847

1895 Liberty Nickel, MS66
Vibrant Toning and Top-Notch Eye Appeal

- 5046 1895 MS66 PCGS.** Vivid pastel patina on each side includes a palette of lilac, gold, jade, and pale blue, intermingled with a few dark flecks that appear only under a loupe. A single vertical mark is noted on the cheek. The strike is sharp, save for the lower-left ear of corn, and the eye appeal is top-drawer. A difficult date in such pristine preservation. Population: 15 in 66, 0 finer (12/13). NGC ID# 277A, PCGS# 3856

1896 Nickel, Pastel-Toned MS66

- 5047 1896 MS66 PCGS.** Only 10 other PCGS-certified MS66 pieces have been graded of the 1910, a surprisingly low number considering 8.8 million coins were struck. Medium-density pastel toning is seen over each side, and the strike is strong throughout. The only mark, as such, is a reddish spot of color by star 12 on the obverse. NGC ID# 277B, PCGS# 3857

1906 Liberty Nickel, MS66
None Certified in Higher Numeric Grades

- 5048 1906 MS66 PCGS. CAC.** The 1906 Liberty nickel boasts a large mintage of more than 38 million pieces, but few survivors can match the quality and eye appeal of the present coin. This delightful Premium Gem is sharply detailed throughout and the well-preserved lustrous surfaces show a few highlights of pale gold and lavender-gray toning. Population: 18 in 66 (1 in 66+), 0 finer (12/13). NGC ID# 277H, PCGS# 3867

1912-S Liberty Nickel, MS65
Great Luster and Surfaces

- 5049 1912-S MS65 PCGS.** The 1912-S Liberty nickel is always popular as the first nickel five cent issue struck in San Francisco, although the facility decades previously had struck silver five cent or half dime pieces. The Gem level is the highest usually obtainable, as Premium Gems seldom appear; PCGS has graded only 14 in MS66 with none finer (1/14). The present coin displays attractive pinkish-gray color on surfaces that are well-struck overall, save for the lower-left ear of corn on the reverse. Marks are minimal. A great Gem '12-S for a nice Registry Set. NGC ID# 277R, PCGS# 3875

1912-S Liberty Nickel, MS65
A Low-Mintage Key

- 5050 1912-S MS65 PCGS. CAC. The 1912-S Liberty nickel is a low-mintage key, prized by type collectors as the final date of the series. Blushes of soft sky-blue and lavender toning reside on the lustrous surfaces of this Gem. The design elements are well-struck save for the usual weakness in the corn ear left of the bow. Two shallow semicircular marks in the central reverse appear to be post strike. Very rare any finer. NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

1885 Nickel, PR66 Deep Cameo
Seldom Seen at This Grade Level

- 5051 1885 PR66 Deep Cameo PCGS. The 1885 Liberty nickel proof is exceedingly popular due to its association with the low-mintage circulation strike of the same date. This deeply contrasted Premium Gem proof intermingles gray and gold hues on each side with a sharp strike. A couple of tiny contact marks constitute the grade, including one at the corner of Liberty's mouth. Seldom seen in Deep Cameo. Population: 2 in 66 (1 in 66+) Deep Cameo, 0 finer (12/13). PCGS# 93883

1899 Liberty Nickel, PR67 Cameo
Tied for Finest at PCGS

- 5052 1899 PR67 Cameo PCGS. CAC. A fairly generous mintage of 2,031 proof Liberty nickels was accomplished in 1899 and this spectacular Superb Gem is one of the finest survivors. The deeply mirrored fields contrast boldly with the sharply detailed frosty design elements and the pristine surfaces are blanketed in shades of greenish-gold and cerulean-blue toning. Population: 3 in 67 Cameo, 0 finer (12/13). PCGS# 83897

1904 Liberty Nickel, PR66
Rare Example With Cameo Contrast

- 5053 1904 PR66 Cameo PCGS. The Philadelphia Mint adopted an all-brilliant finish for proof coins in 1902, making cameo contrast rare for proof issues in subsequent years. This spectacular Premium Gem displays sharply detailed design elements with unusually frosty devices that contrast boldly with the deeply mirrored fields. Population: 5 in 66 (2 in 66+) Cameo, 0 finer (12/13). PCGS# 83902

BUFFALO NICKELS

1913 Type One Nickel, Beautifully Toned MS68 Conditionally Rare in This Grade

5054 1913 Type One MS68 PCGS. CAC. As a first-year issue, the 1913 Type One was saved in rather large quantities by the collecting and non-collecting public. Consequently, several thousand have been certified through the Premium Gem level of preservation. MS67s are available with some searching, while examples such as the present one in the lofty grade of MS68 are rare. PCGS and NGC have graded only 24 at that grade level and none finer.

A medley of crimson, orange-gold, lime-green, yellow-gold, and ice-blue toning cascades over the highly lustrous surfaces. The design elements are sharp, including the braid, horn and tail. No significant marks are apparent. Population: 13 in 68, 0 finer (12/13). NGC ID# 22PW, PCGS# 3915

1921-S Nickel, Lightly Toned MS65

5055 1921-S MS65 PCGS. This low-mintage Buffalo nickel was struck in the meager amount of a tad more than 1.5 million pieces, and seldom does anything finer than Gem condition appear. This MS65 PCGS example offers lustrous, lightly toned pinkish-gray surfaces that are well-struck overall, save for a couple of letters in the motto on the reverse. Population: 64 in 65, 8 finer (12/13). NGC ID# 22RU, PCGS# 3948

1921-S Nickel, MS65 Vivid Pastel Toning

5056 1921-S MS65 PCGS. A low-mintage S-mint key in Gem grades to the Buffalo nickel series, the 1921-S is accompanied by (and sometimes overshadowed by) the other S-mint issues of the '20s, such as the 1926-S, but it is quite elusive in MS65. This PCGS example shows great eye appeal with vivid pastel violet, gold, and pinkish patina on each side, accompanied by a strike that is better than usually seen and no major marks. Interesting die cracks appear on each side. Population: 64 in 65, 8 finer (12/13). NGC ID# 22RU, PCGS# 3948

**1921-S Nickel, MS66
Tied for Finest, Sole CAC Example**

- 5057 1921-S MS66 PCGS. CAC.** The glut of millions of 1921-dated Morgan dollars issuing forth largely subsumed all Mint resources for the year, and all other mintages from Philadelphia, Denver, and San Francisco in 1921 were token issuances in comparison, save for the 1921-P cent. The 1921-S nickel saw slightly more than 1.5 million pieces coined, and most were struck from overworked, overused dies. Some examples also show planchet streaks or laminations. This Premium Gem, certified in a green-label holder, is tied for the finest certified of the date with a handful of others. Some metal flowlines appear in the fields, most prominently before the profile, and actually enhance the already-bold luster. The surfaces are well-preserved front and back, complementing attractive pinkish-gold patina. A small die crack runs from the Indian's lower nose to the rim nearby. The strike is somewhat soft on the bison's head and shoulder, but contact marks are minimal. Of the dozen submissions combined at NGC and PCGS, *this is the sole example with the CAC approval*, a factor that prospective bidders will want to take into account. Population: 8 in 66, 0 finer (12/13). NGC ID# 22RU, PCGS# 3948

1923 Nickel, Sharply Struck MS67

- 5058 1923 MS67 PCGS.** Splashes of ice-blue, lavender, and gold-orange toning cascade over the intensely lustrous surfaces of this Superb Gem, and an impressive strike leaves strong detail on the braid, and the bison's horn, tail, and the hair atop the head. Impeccably preserved throughout. NGC ID# 22RV, PCGS# 3949

1923-S Nickel, Appealing MS65

- 5059 1923-S MS65 PCGS. CAC.** The 1923-S nickel is elusive in Gem condition and very rare any finer. Soft champagne-gold and violet patination cascades over the lustrous surfaces of this MS65 specimen. The design features are well-defined, evidenced by strong detail in the braid and the bison's horn and tail. The CAC sticker affirms the coin's pleasing eye appeal. Population: 43 in 65 (1 in 65+), 3 finer (12/13). NGC ID# 22RW, PCGS# 3950

1924 Buffalo Nickel, MS67
Stunningly Attractive Surfaces

5060 1924 MS67 PCGS. The 1924 Buffalo nickel was struck to the extent of more than 21 million pieces, but most certified examples today survive in the lower ranges of Mint State. Nonetheless, Gems are available in quantity. Premium Gems are far less so but still seen; the Superb Gem level at PCGS is a niche currently occupied by only six submissions including the present piece, and duplicates in such numbers are always a possibility (1/14). The present coin is a stunningly attractive Superb Gem displaying essentially pristine surfaces on each side with no mentionable distractions. Generous luster complements pinkish-gold prevailing color with lilac accents on the high points. The small "goatee" under the Indian's chin is a die clash from the motto on reverse. NGC ID# 22RX, PCGS# 3951

1925-S Nickel, Pastel-Toned MS65
Condition Rarity

5062 1925-S MS65 PCGS. The 1925-S Buffalo nickel issue is one that is often overlooked within the series due to the flanking 1924-S and 1926-S dates; where the 1925-S was struck to an amount exceeding 6.2 million coins, the 1924-S saw 1.4 million made, and the 1926-S had the series-low mintage of 970,000 coins. The 1925-S (as well as many other S-mint issues of the decade) is known for poor strikes, a combination of die overuse and dies that were spaced too widely, a misguided effort at Mint economy. The present Gem PCGS-certified 1925-S shows attractive color, pinkish-orange and lilac with some silver remaining. There are few mentionable marks, but the strike is weak on both sides. Evidence of die fatigue appears in the form of metal flowlines and some design voids, for example, just above the bison's right (facing) rear hoof. Both the date and mintmark are well brought up. Despite the strike softness, this piece achieves a higher grade than most certified examples because of the good luster and superior preservation. Population: 26 in 65, 1 finer (12/13). NGC ID# 22S4, PCGS# 3956

1924-D Nickel, Lightly Toned MS65

5061 1924-D MS65 PCGS. CAC. Faint hints of ice-blue and lavender appear on the lustrous surfaces under magnification. This is a sharply struck piece, including the horn and the tail. Only the hair atop the bison's head is weak, as typically seen. Tiny flecks of carbon are visible on the lower obverse. PCGS has seen only three finer. (12/13). NGC ID# 22RY, PCGS# 3952

1926-D Nickel, MS65
Rare Any Finer

- 5063** 1926-D MS65 PCGS. CAC. Intriguingly toned with glimmering luster beneath the blue-violet and peach patina. The horn is sharp, though minor softness affects the bison's shoulder. PCGS has graded only 25 examples as MS66 or finer (1/14).
From The Teich Family Collection. NGC ID# 22S6, PCGS# 3958

1926-S Buffalo Nickel, MS63
Low-Mintage Series Key

- 5064** 1926-S MS63 PCGS. The 1926-S Buffalo nickel is a key issue from a low mintage of 970,000 pieces. This attractive Select specimen displays well-detailed design elements, with a touch of softness on the braid and bison's shoulder. The nickel-gray surfaces are lightly marked and exude satiny mint luster.
From The Teich Family Collection. NGC ID# 22S7, PCGS# 3959

1926-S Nickel, Lustrous MS64

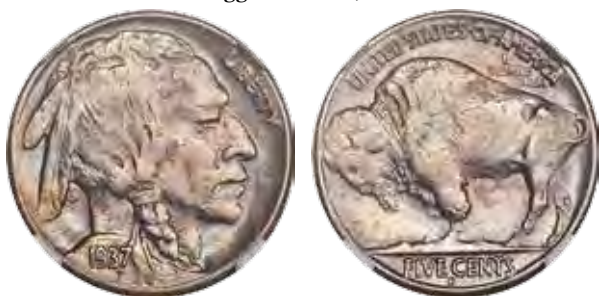

- 5065** 1926-S MS64 PCGS. CAC. As the only regular-issue Buffalo nickel with a mintage of fewer than a million pieces and part of a challenging string of 1920s branch mint dates to boot, the 1926-S five cent enjoys perpetual demand from series enthusiasts. While this near-Gem shows some of the issue's most typical characteristics, including soft detail on the portrait's braid and the bison's shoulder, it turns one typical disadvantage, an eroded set of dies, into a beautiful range of softly frosted luster. Surfaces are lavender-gray with touches of gold-orange at the right margins and center obverse. Elusive any finer. NGC ID# 22S7, PCGS# 3959

**1937-D Three-Legged Buffalo, MS62
Lustrous and Attractive**

5066 1937-D Three-Legged MS62 PCGS. FS-901. The Three-Legged Buffalo possesses a near-universal appeal to collectors of virtually any stripe. This lustrous, attractive, pinkish-gray piece shows a few scattered marks including one thin scrape through the buffalo's front shoulder and face that determine the grade. The strike is softly brought up on the base on which the buffalo stands. NGC ID# 22SX, PCGS# 3982

1937-D Three-Legged Nickel, Well-Struck MS63

5067 1937-D Three-Legged MS63 NGC. FS-901. Soft sky-blue, lavender, and yellow-gold toning reside on the lustrous surfaces of this Select Three-Legged example. Well-struck design elements include the braid and the bison's horn and tail. A few grade-determining marks do not distract. A nice piece for the designated grade. NGC ID# 22SX, PCGS# 3982

**1937-D Three Legged Nickel, MS63
Attractive Rose Patina**

5068 1937-D Three-Legged MS63 PCGS. FS-901. Unusual for this popular mint error variety, the toning is multicolor, with a blush of rich cherry-red on the lower reverse. Slate-gray, lime-green, and apricot-gold are also present. The lustrous and nearly unabraded surfaces further testify to the eye appeal. NGC ID# 22SX, PCGS# 3982

**1937-D Three-Legged Nickel, Attractive MS64
Remarkably Sharp Strike**

5069 1937-D Three-Legged MS64 PCGS. FS-901. The soft, satiny luster has taken on a muted pearl-gray over each side. The strike details on this piece are unusually strong with good definition on the Indian's braid, the bison's head and tail. The satiny surfaces are minimally marked as well. All in all, this is a remarkably attractive example of this popular variety. NGC ID# 22SX, PCGS# 3982

1937-D Three-Legged Nickel, MS65
Rarely Seen in Such High Grade

5070 1937-D Three-Legged MS65 NGC. FS-901. The 1937-D Three-Legged Buffalo and the 1955 Doubled Die Lincoln are the most popular varieties in their respective series. Both are so popular, in fact, that series collectors recognize them by their shortened versions: "Three-Legged Buffalo" and "55 Doubled Die."

Both pieces are available in lower grades, the Three-Legged Buffalo more so than the 1955 Doubled Die. But both become conditional rarities in the higher Mint State grades (and with Red surfaces in the case of the 1955 Doubled Die cent).

All else being equal, inspection of the relative NGC census data for each issue will give some estimate of survival rates. While there are 225 submissions (assuredly not all separate coins) certified in MS64 at NGC of the Three-Legged Buffalo, only 57 such have been certified in MS65, with 20 in MS66. It is thus the Gem level and higher where the Three-Legged Buffalo becomes a true conditional rarity. Based on the NGC data, the 1955 Doubled Die cent also takes a turn in Gem Red grade from conditional scarcity to conditional rarity, a level where NGC has seen only three submissions or certification events.

While Heritage has the privilege of offering many examples of the Three-Legged Buffalo annually, we see comparatively few examples in Gem or higher grades; competition for them is, accordingly, quite stiff when an example crosses the auction block. This is a well-struck Gem whose satiny mint luster is covered in multicolored, iridescent toning. Only a few flecks of carbon prevent an even higher ranking. NGC ID# 22SX, PCGS# 3982

PROOF BUFFALO NICKEL

1937 Nickel, Mildly Contrasted PR68

5071 1937 PR68 PCGS. CAC. The last of the proof Buffalo nickel issues, this date is available through PR67 but rare any finer. All proofs of this date have fully brilliant fields, devices, and edges. Moreover, the mirrored fields offer a mild contrast with the motifs when the coin is tilted slightly under a light source. The essentially untuned surfaces display razor-sharp design elements and are immaculately preserved. These attributes add up to outstanding eye appeal, appropriately recognized by CAC. Population: 16 in 68, 1 finer (12/13). NGC ID# 278Z, PCGS# 3996

EARLY HALF DIMES

1796 Half Dime, Near-Mint
V-1, LM-1, LIKERTY

5072 1796 LIKERTY AU58 PCGS. V-1, LM-1, R.3. The weak upper and lower crossbars on the B punch used to form LIBERTY are responsible for the LIKERTY variety. A strong lens confirms that the crossbars are visible although faint. The present beautifully toned Borderline Uncirculated example offers rich golden-brown and jade-green margins. The bright centers are close to brilliant. The strike is sharp for an early Federal silver coin though the breast feathers show slight blending. Marks are absent aside from two thin lines above the bust tip and on Liberty's neck. NGC ID# 22ZX, PCGS# 94254

1803 Half Dime, Choice AU
Large 8, V-1, LM-2

5073 1803 Large 8 AU55 ANACS. V-1, LM-2, R.4. Rich olive-green, butter-gold, and rose-red toning encompasses this unmarked and attractive Choice AU example. Well struck except on the uppermost reverse stars and cloud 7. Although needed in commerce to replace cut down and worn out Spanish-American silver, Heraldic Eagle half dimes were struck in limited quantity since silver depositors preferred larger denominations. NGC ID# 2329, PCGS# 4269

PROOF BUST HALF DIME

1830 Capped Bust Half Dime, PR66 Second-Finest Certified Possibly Half a Dozen Survivors

5074 1830 PR66 NGC. V-5, LM-9.1, R.7 as a proof. Proof 1830 half dimes are extremely rare. As of (12/13), NGC has certified only four, the present PR66 piece and another PR66 with the star designation that was recently discovered in Europe, a PR64 specimen, and a PR64 Cameo coin. An additional PCGS PR65 from the Eliasberg Collection creates a total third-party census of five examples. There is also an example in the National Numismatic Collection at the Smithsonian Institution.

A delightful proof specimen of the 1830 half dime was included in the collection of Harold P. Newlin, the first numismatist to seriously study die varieties of the denomination. Lot 91 of the Newlin Collection (Captain John W. Haseltine, 4/1883) reads, "1830 A beautiful brilliant proof. Rarer than the above." The preceding coin was a proof 1829 half eagle, and it is interesting that collectors recognized the relative rarity of the 1829 and 1830 proofs as early as 1883. Recent auction appearances of the 1830 proof include the offering of the present coin in lot 848 of our January 2007 FUN Signature, which realized \$57,500.

Over the years, any number of prooflike pieces have been offered as proofs, but the status of the current lot is unquestioned. The portrait is thickly frosted, and the eagle is also icy, despite the presence of original golden-brown peripheral toning. The strike is needle-sharp, and the fields are flashy. A couple of trivial hairlines near star 2 and a pinpoint spot at 7 o'clock define the grade.

Ex: Long Beach Connoisseur Collection (Bowers and Merena, 8/99), lot 79, which realized \$18,400; Benson Collection, Part II (Ira and Larry Goldberg, 2/02), lot 350, which realized \$23,172; FUN Signature (Heritage, 1/2007), lot 848, realized \$57,500; Greensboro Collection.

From The Greensboro Collection, Part VI. NGC ID# 27CL, PCGS# 4301

PROOF SEATED HALF DIMES

1837 Seated Liberty Half Dime, PR63 Deeply Reflective Fields

5075 1837 No Stars, Large Date PR63 NGC. V-1. The date is curved, as opposed to the straight-date Small Date variety. This coin appears to be from an early state of the proof dies, and perhaps the only die state known for the 20 proof pieces struck. The triple-punching on the 8 is clear, with two of the punches far off-target, and the repunching on the other date digits is equally bold. A tinge of lilac is noted on the starless and legendless obverse, as well as the more-familiar reverse. Although a light hairline scrape can be seen in the right field under a loupe, this piece is nonetheless quite appealing. Census: 1 in 63, 7 finer (12/13).

Ex: FUN Signature (Heritage, 1/2007), lot 852.

From The Greensboro Collection, Part VI. NGC ID# 2355, PCGS# 4407

1839 Half Dime, PR65 Cameo Tied for Finest of Only Five Proofs Known

5076 1839 No Drapery PR65 Cameo NGC. This exceptional 1839 proof half dime is tied as the finest known specimen with a single PCGS coin, also with the Cameo designation. Opportunities to acquire any proof 1839 half dime are limited, and a chance to acquire the finest known Gem proof half dime of any early date must be seriously considered.

Our roster is consistent with estimates of previous researchers. In *The Complete Guide to Liberty Seated Half Dimes*, Al Blythe suggests that four to five 1839 proof half dimes are known. Walter Breen, in his 1989 *Encyclopedia of United States and Colonial Proof Coins*, lists four 1839 proof half dimes. NGC has certified a PR65 Cameo, which is the Kaufman coin, a PR65, and two PR64s. In the Bowers and Merena August 1999 sale of the Pittman specimen, the cataloger estimated that “perhaps just a dozen or fewer Proofs [were] made of the date, and with about half that number currently known.”

The following roster of five confirmed proof 1839 half dimes is based on our review of auction appearances:

- 1. PR65 Cameo NGC.** The Kaufman coin appears different from any of the following specimens. It may be the April 1964 Stack's piece, lot 1011, although the quality of the plate precludes a definite match. Phil Kaufman Collection of Early Proof Sets, Part III (Heritage, 4/2008), lot 2373. **The present coin.**
- 2. PR65 Cameo PCGS.** Rarities Night (Stack's Bowers, 11/2012), lot 3068.
- 3. PR65 NGC.** Adolphe Menjou Sale (Numismatic Gallery, 6/1950), lot 108; John Jay Pittman (David Akers, 10/1997), lot 457; Long Beach Connoisseur Collection (Bowers and Merena, 8/1999), lot 84; Richmond Collection (David Lawrence, 3/2005), lot 1081.
- 4. PR64 NGC.** Paul S. Mory, Sr. Collection (Bowers and Merena, 6/2000), lot 423; Ira and Larry Goldberg (5/2001), lot 472. The Bowers and Merena cataloger states that this specimen resided for over a century in a collection formed by an attorney in Vicksburg, Mississippi, in the late 1800s.
- 5. Brilliant Proof.** Major Lenox R. Lohr Collection (Stack's, 10/1956), lot 254; Stack's (1/1991), lot 40; Stack's (10/2002), lot 1155.

Additional appearances:

- A. David Bullowa, May 1952.
- B. Lester Merkin (4/1966), lot 71.
- C. 1971 ANA (Stack's), lot 617.

Bright surfaces display whispers of light reddish-tan patina in the fields, and the strike is complete throughout. Magnification reveals some faint hairlines in the fields intermingled with die polish lines. A light diagonal mark on the right (left facing) breast is the sole marker to identify the coin. Extraordinary deep mirrors frame the silvery motifs on both sides, accenting the cameo appearance.

Ex: Phil Kaufman Collection of Early Seated Proof Sets, Part Three / Central States Signature (Heritage, 4/2008), lot 2373.

From The Greensboro Collection, Part VI. PCGS# 84409

1841 Seated Half Dime, PR65
Very Rare Early Proof, Ex: Pittman
Possibly Finest Known

5077 1841 PR65 NGC. Although we have not seen all proof half dimes of this date that currently exist, we believe this specimen is the finest known, or at least tied for the finest known. While the mintage of 1841 proof half dimes was not recorded, Walter Breen, in his 1988 *Encyclopedia* says “possibly 8 proofs.” This estimate more or less coincides with the current NGC/PCGS population reports, which include five pieces graded by NGC — a PR63, a PR63 Cameo, a PR64, and two PR65 coins, one of which is the present example. PCGS has seen one coin, a PR63.

This coin was once a highlight of the famous John Jay Pittman Collection. In his description of this coin in the Pittman catalog David Akers writes:

“The Proof silver coins of 1841 are all extremely rare, indeed, among the rarest of the entire decade. Unlike the silver dollar and the two copper denominations, which were all struck in additional quantities, the Proof Half Dime was struck only for inclusion in the year’s Proof sets, which probably numbered about 10. No more than 5-6 Proof 1841 Half dimes are known today. Eliasberg, Norweb, Garrett, and Starr, all great collections, failed to have a Proof of this issue.”

The following roster was expanded from our listing in the January 2008 FUN catalog.

Roster of 1841 Proof Seated Liberty Half Dimes

- 1. PR65 NGC.** Public Auction Sale (David Bullowa, 5/1952); John Jay Pittman (David Akers, 10/ 1997), lot 465, realized \$15,400; Phil Kaufman; FUN Signature (Heritage, 1/2008), lot 3018, realized \$46,000; **the present coin.**
- 2. PR65 NGC.** Boys Home Sale (Superior, 5/1990), lot 3567; Phil Kaufman; Boys Town and Mamiye Collections (Bowers and Merena, 3/1998), lot 501. Mr. Kaufman owned this coin when he purchased the Pittman specimen, which he felt was the nicer coin. This duplicate was sold a few months later.
- 3. PR64 NGC.** Harlan P. Smith Collection (S.H. and H. Chapman, 5/1906), lot 1017; John M. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Collection (Bowers and Merena, 5/1996), lot 955; Richmond Collection (David Lawrence, 3/2005), lot 1082, realized \$20,700.
- 4. PR63 NGC.** Pre-Long Beach Sale (Superior, 10/2000), lot 4320, \$6,900; Fairchild Family Trust (Goldberg Coins, 5/2001), lot 4320; Pre-Long Beach Sale (Superior, 6/ 2002), lot 4140, realized \$14,950.
- 5. PR62.** James A. Stack Collection (Stack’s, 11/1989), lot 394.
- 6. PR60 ANACS.** New York International Numismatic Convention (Stack’s, 12/1999), lot 1592; Pre-Long Beach Sale (Superior, 10/2000), lot 4321.
- 7. PR60.** 1987 ANA (Bowers and Merena, 8/1987), lot 237; Public Auction Sale (Stack’s, 3/1991), lot 1504; Public Auction Sale (Stack’s, 3/ 1996), lot 249.
- 8. Proof.** New York Sale (New England Rare Coin Auctions, 3/1997), lot 41.
- 9. Proof.** Smithsonian Institution.

Additional Appearances

- A. PR63 NGC.** Teletrade (4/1992), lot 347, \$8,193. This is almost certainly the PR63 NGC example in number 4 above.
- B. Proof.** William Cutler Atwater (B. Max Mehl, 6/1946), lot 1147. “Proof, but not in full brilliancy. Slightly rubbed on obverse field. A beautiful specimen just the same.”
- C. Proof.** Dr. Charles W. Green (B. Max Mehl, 4/1949), lot 1086.

A wonderful mélange of deep reddish-gold, electric-blue, and violet toning bathes the obverse of this Gem proof, while slightly lighter shades of sky-blue and gold-beige patina reside on the reverse. The depth of the toning does not diminish the high degree of contrast between the mirrored fields and satiny motifs. A bold strike brings out razor-sharp definition on the design elements, and a high wire rim encircling both sides frames sharp dentilation. Well cared-for surfaces render it difficult to discern identifying markers.

This coin is cataloged as Valentine-1, a proof-only variety, as per Daniel Valentine (*The United States Half Dimes*). The two 1’s in the date are slightly lower than the 8 and the 4, a die scratch is visible below the arm holding the Liberty cap, and there is a slight flaw above the D of UNITED. We expect that this specimen’s outstanding eye appeal and technical quality will generate spirited bidding among connoisseurs of Seated Liberty proof coinage.

From The Greensboro Collection, Part VI. NGC ID# 2359, PCGS# 4417

1846 Seated Half Dime, PR67
Rare Early Proof
Finest Known Example

5078 1846 PR67 NGC. This extraordinary 1846 proof half dime, which was once part of Phil Kaufman's collection and displays outstanding technical quality and aesthetic appeal, is the finest known of approximately 11 specimens. The most recent population figures reveal that NGC and PCGS have certified nine specimens in all grades. The former service has graded the current PR67, three PR66 coins, and one each PR65, PR64, and PR63. PCGS has seen a PR65 and a PR64 (12/13).

Walter Breen writes in his 1989 *Proof Encyclopedia* that the 1846 proof half dime was first publicized by Max Mehl in the Will Neil sale (number 8 in the following roster) as a "new and exceedingly rare variety—presumably after Neil's own notes. Mehl there claimed it had been unknown (i.e., unrecognized) until about 1945." Breen retorts, however, that "specimens had been pictured earlier."

Breen, in his 1988 *Complete Encyclopedia* suggests that 14 to 18 1846 proof half dimes possibly survive. Al Blythe (1992) estimates 10 to 12 pieces.

Our research suggests that Breen's estimate of 1846 proof half dime survivors is somewhat high. The following roster summarizes our findings. Some entries are possible duplicates, as the photo quality varies significantly among catalogs, making plate-matching difficult:

Roster of 1846 Proof Seated Liberty Half Dimes

1. **PR67 NGC.** Phil Kaufman; Central States Signature (Heritage, 4/2008), lot 2383, realized \$63,250; **the present coin.**
2. **PR66 NGC.** ANA National Money Show (Bowers and Merena, 4/2005), lot 385. The cataloger indicates a pedigree marker near star 1 and after star 13.
3. **PR66 NGC.** Long Beach Signature (Heritage, 9/2002), lot 687; Long Beach Signature (Heritage, 2/2003), lot 6190. The cataloger notes a lint mark below Liberty's raised arm.
4. **PR66 NGC.** Auction Sale (M.H. Bolender, 3/1956), lot 1230; Floyd T. Starr (Stack's, 10/1992), lot 326; Lexington Collection (Bowers and Merena, 1/1994), lot 1125; Baltimore '93 (Superior, 7/1993), lot 150.
5. **PR65 PCGS.** Richard B. Winsor Collection (S.H. & H. Chapman, 12/1895), lot 775; John G. Mills Collection (S.H. & H. Chapman, 4/1904), lot 1198; J.M. Clapp; Clapp Estate, 1942; Louis E. Eliasberg, Sr.; Eliasberg Collection, Part I (Bowers and Merena, 5/1996), lot 966; Baltimore Auction (Stack's Bowers, 11/2011), lot 1056.
6. **PR65 NGC.** John Jay Pittman (David Akers, 5/1998), lot 1712; Rarities Sale (Bowers and Merena, 1/2000), lot 80; Pre-Long Beach Sale (Superior, 10/2000), lot 4324; Pre-Long Beach Sale (Goldberg Coins, 6/2002), lot 2062. David Akers indicates that the Pittman half dime was part of an original proof set housed in its original presentation case of issue, and is identified by a small scratch between stars 2 and 3.
7. **PR64 PCGS.** FUN Signature (Heritage, 1/1998), lot 6651; Pre-Long Beach Sale (Superior, 10/2000), lot 4325.
8. **PR64.** World's Greatest Collection; F.C.C. Boyd (Numismatic Gallery, 5/1945), lot 239; Will W. Neil (B. Max Mehl, 6/1947), lot 1613; Floyd T. Starr (Stack's, 10/1992), lot 327.
9. **PR63 NGC.** Richmond Collection, Part III (David Lawrence Rare Coins, 3/2005), lot 1087.
10. **PR60 PCGS.** Whitney P. Sunderland (Bowers and Merena, 3/1994), lot 1025.
11. **Proof.** Smithsonian Institution.

Magnificent cobalt-blue toning accented with lavender occupies the centers of both sides of the present coin, and is flanked by soft champagne-beige color. Mirrored fields highlight the devices, especially on the obverse, and a powerful strike leaves uniform and virtually complete delineation on the design features. A faint lint mark is located between Liberty's ankle and star 13. Immaculately preserved surfaces reveal no other pedigree identifiers. Advanced collectors will recognize this unique opportunity to acquire an extremely rare and delightful Seated Liberty proof half dime that is the finest known.

From The Greensboro Collection, Part VI. NGC ID# 235E, PCGS# 4422

**1854 Arrows Half Dime, PR66
Tied for Finest Known**

5079 1854 Arrows PR66 NGC. V-2. This Premium Gem is tied as the finest of 15 to 20 surviving proofs. Formerly in the Phil Kaufman Collection, it illustrates Phil Kaufman's eye for exceptional quality. It is tied with one other coin for the finest certified by NGC.

Proof coin production increased dramatically in 1854 as sets were made for more special customers than any time before. Availability of proof coins and sets to the public had to wait a few more years until 1858, but there is no doubt that certain collectors had special contacts within the Mint to obtain sets. Matthew Stickney was one of those collectors, visiting the Mint nearly every year since the mid-1840s to obtain proofs for his collection.

The date is placed high in the exergue, crowding the base of Liberty with tiny indentations in the rock to accommodate each individual digit. The adjacent arrows to the left and right are long and slender, touching the border dentils. Star 2 is minutely recut. The shield point is over the upright of the 1, and the skirt pendant is centered over the 5. Breen described the same characteristics in his *Proof Encyclopedia*.

Sharp design elements, deeply mirrored fields, and fully lustrous devices create obvious cameo contrast beneath the light gold and lilac toning that prevents a Cameo designation by NGC. Census: 2 in 66, 0 finer (12/13).

Ex: *Phil Kaufman Collection of Early Proof Sets, Part One / ANA Signature* (Heritage, 8/2007), lot 1788.

From *The Greensboro Collection, Part VI*. NGC ID# 235S, PCGS# 4432

**1858 Half Dime, Pastel-Toned PR67
Ex: Floyd Starr**

5080 1858 PR67 NGC. V-8. This is an old friend come back for another visit, the former Floyd T. Starr 1858 half dime which we offered in our Central States Signature some seven years ago, where this remarkable coin realized \$12,650. Pastel lilac and mauve hues accompany pale aqua on the obverse, the reverse displaying orange hues. The strike is somewhat soft in keeping with the Breen *Proof Encyclopedia* description for these dies: "Date rather low and slanting down; 8's have a rather soft, indefinite appearance, as does lower part of the 5. Shield point above serif of 1, slightly r. of tip; skirt pendant over r. tip of 5; left base of 1 above left edge of denticle. Rev.: Die file mark between IC. Lettering is comparatively light." Minor central softness also appears on the reverse at IM of DIME. This lovely Superb Gem proof is free of mentionable contact and numerically tied for the finest certified. Census: 2 in 67 (1 in 67 ★), 0 finer (12/13).

Ex: *Floyd Starr Collection* (Stack's, 10/1992), lot 616; *Central States Signature* (Heritage, 5/2007), lot 2058, as "ex: Starr," PR67. Now reholdered in a new NGC encapsulation.

From *The Greensboro Collection, Part VI*. NGC ID# 235N, PCGS# 4437

1859 Half Dime, PR67 ★ Cameo
Light Peripheral Toning

- 5081 1859 PR67 ★ Cameo NGC. CAC.** Al Blythe writes in *The Complete Guide to Liberty Seated Half Dimes* that 60 to 75 half dime proofs of 1859 have survived. NGC reports a mere 17 pieces in Cameo and Ultra Cameo, only one Cameo has been assigned the coveted Star designation — the present Superb Gem Cameo. This is also the finest CAC-certified example of this issue. Electric-blue and reddish-brown patination gravitates to the margins, more extensively so and deeper in tone on the obverse. The centers remain silver-white. Excellent definition is found on design elements that yield strong contrast with the mirrored fields, and both sides are impeccably preserved.
From The Greensboro Collection, Part VI. PCGS# 84438

1868 Half Dime, Gorgeous PR67 ★ Cameo

- 5082 1868 PR67 ★ Cameo NGC.** NGC and PCGS have given the Cameo designation to just over 50 1868 proof half dimes, and only one other Superb Gem Cameo has received the coveted Star classification. Whispers of gorgeous cobalt-blue and lavender race over well-preserved surfaces, and a solid strike emboldens the design elements.
Ex: National Money Show Signature (Heritage, 3/2008), lot 379. From The Greensboro Collection, Part VI. PCGS# 84451

1871 Half Dime, PR67 Ultra Cameo
Among the Finest

- 5083 1871 PR67 Ultra Cameo NGC.** This stunning Superb Gem proof offers silver-white surfaces on both sides that meld into the desired silver-on-black contrast when turned to the proper angle. Under a high-power loupe both some die rust on the Liberty device and tiny pebbles in the planchet appear. Neither should be considered grade-affecting, although we note them for accuracy. The strike is essentially unimprovable. Census: 4 in 67 Ultra Cameo, 0 finer (12/13).
Ex: Long Beach Signature (Heritage, 9/2008), lot 1623. From The Greensboro Collection, Part VI. PCGS# 94454

EARLY DIME

1807 JR-1 Dime, MS62
Most Popular Date for the Draped Bust Type

- 5084 1807 MS62 NGC. JR-1, R.2.** The sole die pair for this final Draped Bust date. The usual die state with prominent clash marks on the right obverse field. Well struck at the centers though the borders show occasional softness of strike. Lightly toned chestnut-gold on the fields and motifs while the margins offer rich navy-blue patina. NGC ID# 236T, PCGS# 4480

SEATED DIMES

1854-O Seated Liberty Dime, MS67 ★ Single Finest Certified at NGC

- 5085 1854-O Arrows MS67 ★ NGC.** The 1854-O Seated Liberty dime represents the short-lived Arrows design that is always popular with type collectors. This magnificent Superb Gem is sharply detailed and brightly lustrous throughout, with attractive shades of pale gold and cerulean-blue patina. Census: 4 in 67 (1 in 67 ★), 0 finer (12/13). NGC ID# 239B, PCGS# 4606

1867-S Dime, MS64 Well-Detailed and Eye-Catching

- 5086 1867-S MS64 PCGS. CAC.** Delicate green-to-gold toning appears over portions of the pale gray obverse, while the reverse has streaks of golden-brown at the upper zones. Detail is above-average for this earlier California issue, and semireflective peripheral luster is an eye-catching bonus. As a near-Gem, this is a conditionally rare example of an issue that survived mostly in low grades, if at all, despite a mintage of 140,000 pieces; in the first few decades of the American California economy, production of minor silver seldom met the local demand. Population: 4 in 64, 2 finer (12/13). NGC ID# 239V, PCGS# 4646

1873-CC Dime, Fine 15 Pleasing, Original Surfaces

- 5087 1873-CC Arrows Fine 15 NGC.** The low mintage of the 1873-CC has always grabbed the attention of collectors, and the often-seen problematic surfaces of many examples places a strong premium on clean, problem-free examples such as this one. Even wear is seen over the design and numerous small abrasions are scattered throughout, the only mark that merits mention is a small dig above the M in DIME. Medium gray surfaces show a light undertone of red. NGC ID# 23BH, PCGS# 4666

1886-S Seated Dime, MS67 Only Two Finer Pieces at PCGS

- 5088 1886-S MS67 PCGS.** From a mintage of 206,524 pieces, the 1886-S Seated Liberty dime was not heavily saved by contemporary collectors, and the issue is surprisingly difficult to locate in high grade. This spectacular Superb Gem displays well-detailed design elements and vibrant mint luster, with well-preserved brilliant surfaces. Population: 4 in 67, 2 finer (12/13). NGC ID# 23B4, PCGS# 4697

PROOF SEATED DIMES

1858 PR64+ Dime, Cameo Contrasted Generally Unavailable With Contrast

- 5089 1858 PR64+ Cameo PCGS. CAC.** Struck in the first year of increased production for proofs, the 1858 is generally the beginning of any collection of modern proof coinage. The fields are deeply mirrored on each side with noticeably contrasting mint frost over the devices. Each side is mostly brilliant with a light accent of golden around the margins. Population: 6 in 64 (2 in 64+) Cameo, 2 finer (12/13).
From The Teich Family Collection. PCGS# 84747

1884 Dime, PR68 Cameo Untoned and Deeply Reflective

- 5090 1884 PR68 Cameo NGC.** Thick mint frost and untoned, deeply reflective silver surfaces, which easily "fade to black" as the coin is tilted under a light, are the hallmarks of this immaculate Superb Gem Cameo 1884 dime. The proof mintage was 875 pieces, but today this piece is tied for the finest at both NGC and PCGS within the Cameo designation. A tiny lint mark left of the second S in STATES is Mint-produced. Census: 5 in 68 Cameo (1 in 68 ★ Cameo), 0 finer (12/13). PCGS# 84781

**1885 Seated Dime, PR67 Cameo
Pleasing Eye Appeal**

- 5091 1885 PR67 Cameo PCGS. CAC.** The frosty devices appear to be suspended above the mirrored fields of this Superb Gem Cameo. This contrast is heightened by the bold strike on the design elements. Untoned surfaces are immaculately preserved. The pleasing overall eye appeal is affirmed by the CAC sticker. Population: 10 in 67 Cameo, 1 finer (12/13). PCGS# 84782

BARBER DIME

**1893-S Barber Dime, MS66
Only One Finer Coin at PCGS**

- 5092 1893-S MS66 PCGS.** From a mintage of nearly 2.5 million pieces, the rarity of the 1893-S Barber dime in high grade is underappreciated, outside of series specialists. This delightful Premium Gem is well-detailed and lustrous, with well-preserved surfaces that are blanketed in shades of pale blue and greenish-gold toning. Population: 6 in 66, 1 finer (12/13). NGC ID# 23DS, PCGS# 4802

MERCURY DIMES

**1916-D Mercury Dime, XF45
Key Date to the Series**

- 5093 1916-D XF45 PCGS.** The 1916-D Mercury dime is in demand in any level of preservation. Soft bluish-gray and yellow-gold patination bathes both sides of this Choice XF specimen that reveals traces of luster in the recessed areas. The design elements are strongly detailed, including the lines of the fasces. The few light circulation marks do not detract. An excellent choice for a high-grade collection. NGC ID# 23GY, PCGS# 4906

**1916-D Dime, Almost Uncirculated
Highly Collectible Grade**

- 5094 1916-D AU50 NGC.** The low mintage of the 1916-D dime combined with the first year of issue for the new design ensured that collector's attention would be focused on setting aside examples when found in circulation. This is an original piece with silvery-gray surfaces that are accented with charcoal around the devices. Problem-free. NGC ID# 23GY, PCGS# 4906

**1926-D Dime, MS67 Full Bands
Condition and Strike Rarity, Tied for Finest**

- 5095 1926-D MS67 Full Bands PCGS.** The 1926-D Mercury dime is a fairly available issue in the lower Mint State grades, unsurprisingly so, given its mintage exceeding 6.8 million coins. Even Gem Full Bands pieces number several dozen submissions at PCGS, but at the Superb Gem Full Bands level of this piece, that service has seen only five grading events (not necessarily all *separate coins*). Immaculate preservation puts this piece over the top compared to most of its ilk, the satiny surfaces on each side essentially mark-free, boldly struck, and showing pinkish-gray patina with some whispers of charcoal and gold that appear only under a loupe. Population: 5 in 67 Full Bands, 0 finer (12/13). NGC ID# 23HS, PCGS# 4957

**1928-D Dime, MS67 Full Bands
Strike and Condition Rarity**

5096 1928-D MS67 Full Bands PCGS. The Denver and San Francisco mint Mercury dimes of the 1920s are notorious strike and conditional rarities overall, as the facilities were trying to make the dies last overlong, with the result that the dies were spaced too far apart and produced relatively few examples that could be called Full Bands (not to mention the other details, which were often just as poorly struck). This 1928-D in MS67 Full Bands PCGS is one of only four so certified, and none are finer (1/14). Just a touch of cinnamon and gold patina touches the quicksilver surfaces of this Superb Gem, which are uniformly pristine and well-struck. NGC ID# 23HY, PCGS# 4969

**1941 Dime, MS68 Full Bands
Superb Eye Appeal**

5097 1941 MS68 Full Bands PCGS. CAC. Splashes of deep crimson and reddish-gold visit the upper and left obverse of this intensely lustrous dime. Boldly struck design elements culminate in fully struck bands. As expected, both sides are immaculately preserved. Superb eye appeal. Population: 9 in 68 Full Bands, 0 finer (12/13). NGC ID# 23JX, PCGS# 5029

1945-S Micro S Dime, MS67 Full Bands

5098 1945-S Micro S MS67 Full Bands PCGS. FS-512. This is the "mystery punch" variety, the only dies known with a mintmark of this size and shape during the 1940s. The present Superb Gem Full Bands example must have been found from a nice Mint State roll at some point, a largely untuned example with generous mint frost and great eye appeal. Population: 22 in 67 (1 in 67+) Full Bands, 2 finer (12/13). NGC ID# 23KH, PCGS# 5063

**1945-S Micro S Dime, MS67 Full Bands
Elusive Final-Year Issue in High Grade**

5099 1945-S Micro S MS67 Full Bands PCGS. CAC. Ex: Larry Shapiro. An elusive issue with the Full Bands designation, particularly so with such attractive peripheral toning and Superb Gem quality. The strike is full and sharp, and the bands show just enough definition to earn the coveted Full Bands designation from PCGS. Examination of the surfaces finds nothing untoward, and Liberty's face, neck and the fields are all clean. Population: 22 in 67 (1 in 67+) Full Bands, 2 finer (12/13). NGC ID# 23KH, PCGS# 5063

PROOF ROOSEVELT DIME

1968 No S Dime, PR68
First No S Proof Issue

- 5100** 1968 No S PR68 PCGS. Standard practice was to place the mintmark on the reverse of branch mint coins until 1964, with only a few exceptions. However, beginning in 1968, mintmarks were moved to the obverse, usually near the date. In 1968 and a few again in various later years, the S mintmark was left off of proof dies. The key is that those were proof-only issues that were sold as part of complete proof sets. There have probably been instances of mintmarks left off of business strike dies, but how would you know? The first No S proof coins were the dimes of 1968. A small number of lucky collectors who ordered sets that year received the special sets, and word quickly spread in the hobby that all 1968 proof sets required examination. PCGS and NGC have certified a mere 35 1968 No S proof dimes in all grades, indicating the extreme rarity of these coins. This example has deeply mirrored nickel-gray proof surfaces with a hint of peripheral champagne toning. Population: 7 in 68, 0 finer (12/13). NGC ID# 27F3, PCGS# 5245

PROOF TWENTY CENT PIECES

1875 Twenty Cent Piece, PR64 Cameo
Always-Popular Type Coin

- 5101** 1875 PR64 Cameo PCGS. CAC. First year of issue for this odd denomination coin. Proofs have always been of interest to collectors, even in the year of issue, which explains the higher mintage of 2,790 proofs. This is a deeply mirrored example with a strong presence of mint frost over the devices. Each side is almost brilliant with just the slightest hint of toning present. Population: 19 in 64 Cameo, 11 finer (12/13).
From The Teich Family Collection. PCGS# 85303

1877 Seated Twenty Cent, PR61
Proof-Only Issue

- 5102** 1877 PR61 PCGS. The 1877 and 1878 twenty cent mintages were limited to proofs for collectors, with this example one 510 proofs produced for 1877. Nice reflectivity is still evident in the fields, and this piece exhibits a strong strike on brilliant, untuned surfaces. Some expected, grade-limiting hairlines are visible under magnification. The coin retains its eye appeal, however, and it is an eagerly sought proof-only date in this popular series.
From The Teich Family Collection. NGC ID# 27H4, PCGS# 5305

EARLY QUARTERS

1796 Quarter Dollar, Well-Defined XF40 Scarcer B-1 Die Pair

5103 1796 XF40 NGC. B-1, R.4. B-1 is the scarcer variety with the 6 in the date approximately centered between the drapery and border (the "low 6"). 1796 quarters in any grade are the subject of avid collector demand. Although both the silver quarter and gold quarter eagles are first-year types that were introduced in 1796, the quarter is also a one-year type. No more were made until 1804, by which time the design had changed to the Draped Bust with Heraldic Eagle reverse.

Cobalt-blue, forest-green, and crimson patination gravitates to the margins of this XF specimen, being slightly more extensive and deeper on the obverse, and framing the semibright silver-gray centers. The devices display the appropriate design detail, including strong definition on Liberty's hair and facial features, the stars (except the centers), and the eagle's wing, and tail plumage. Moreover, the design elements are well-centered on the planchet and both sides exhibit strong dentilation, attributes seen on virtually all 1796 quarter dollars irrespective of grade or condition. The few light marks visible over each side are consistent with the grade and with a coin that has experienced light to moderate circulation. This piece, a representative that is missing from most collections, will make an excellent addition to a type set of early U.S. coins. Census: 4 in 40, 81 finer (12/13). NGC ID# 23RA, PCGS# 5310

1796 B-2 Quarter Dollar, Minimally Marked XF40
An Important One-Year Type Coin

5104 1796 XF40 PCGS. B-2, R.3. The 6 is high and nearly touches the drapery on this variety, the more frequently seen 1796 quarter. Other diagnostics are: Liberty's highest curls are under the right side of the ER in LIBERTY, the E is higher than the B, and star 15 is distant from the bust.

The 1796 quarter dollar is the second rarest silver type, trailing only the half dollars of 1796-1797, which also combine the Draped Bust and Small Eagle designs. As a one-year design type, it is necessary for the completion of a type collection of U.S. coins. But because of its relatively low mintage of 6,146 pieces and high value in all grades, it is missing from many but the most advanced type sets.

The present XF40 offering displays luminous silver-gray surfaces with well-defined design elements. Liberty's hair detail, facial features, and drapery folds are strong, as are the stars, the eagle's wing and tail feathers, and the clouds. Bold dentils show on both sides and the devices are well centered on the planchet. No adjustment marks or die cracks are visible, and the few contact marks that are present are not serious. Indeed, this is a remarkably clean specimen for a coin that has seen some circulation. We mention a minute horizontal abrasion on the right side of Liberty's chest and a diagonal one to the lower right of the ear only because they might help to identify the coin. This delightful piece of Americana will be an excellent fit for a better-grade early type collection. NGC ID# 23RA, PCGS# 5310

1805 B-2 Quarter, AU50

- 5105** 1805 AU50 NGC. B-2, R.2. Rich cream-gray and autumn-brown toning blankets this moderately worn Draped Bust example. A few hair-thin marks are noted on the left obverse field and Liberty's neck. A fairly late die state with a bold crack connecting most right-side obverse stars. The reverse is prominently clashed. NGC ID# 23RC, PCGS# 5313
-

BUST QUARTER

1818 B-2 Quarter, MS65
Prooflike Obverse
Late Die State

- 5106** 1818 MS65 NGC. B-2, R.1. After a two-year gap in dates, the quarter dollar series resumed in 1818, beginning a run of consecutive years at that did not end until 1825, the longest streak for the much-neglected denomination to that time. Of the ten distinct die pairs used to strike 1818-dated quarters, the B-2 variant is the most accessible and is represented by this Gem.

The obverse of this fully brilliant and untoned Capped Bust quarter is lustrous and prooflike, while the reverse is fully brilliant with frosty surfaces. The strike is bold throughout, with clash marks evident in the fields, especially on the reverse. NGC ID# 23RH, PCGS# 5322

SEATED QUARTERS

1843-O Quarter, Near-Mint

- 5107 1843-O AU58 PCGS.** Small O. Medium chestnut-gray toning adorns this intricately struck New Orleans near-Mint quarter. Luster dominates the borders and devices. Smooth overall, though a glimpse of struck-in grease near the cap is accompanied by faint hairlines, and the left obverse field has a slender mark. NGC ID# 23SS, PCGS# 5405

1858-S Quarter Dollar, AU53 Low-Mintage, Heavily Circulated Issue

- 5108 1858-S AU53 NGC.** An important condition rarity, the 1858-S saw a production of 121,000 coins, but the West Coast economy was starving for small change at the time, and the entire production entered circulation at the time they were issued. This AU specimen will be hard to improve. Both sides are deeply toned gray-brown with hints of charcoal, showing microscopic surface roughness. The combined NGC and PCGS population is three, with just 20 pieces finer. Census: 1 in 53, 15 finer (12/13). NGC ID# 23TK, PCGS# 5447

1872-S Seated Liberty Quarter, XF45 Low-Mintage Rarity

- 5109 1872-S XF45 PCGS.** Only 83,000 Seated Liberty quarters were struck at the San Francisco Mint in 1872 and the issue is even more elusive than that modest total suggests. This lightly worn Choice XF specimen retains traces of original mint luster on the frosty devices and the lightly abraded surfaces display attractive shades of greenish-gold and cobalt-blue toning. Population: 2 in 45, 8 finer (12/13). NGC ID# 23UT, PCGS# 5483

1878-S Quarter, MS65 Unimprovable Quality

- 5110 1878-S MS65 NGC.** A confluence of factors — the Mint Act of 1871, which required the Mint to redeem older minor coins in any quantity, as well as the Bland-Allison Act of 1878, mandating the coinage of millions of silver dollars per month from domestic sources — was responsible for the low mintages of minor silver denominations, in particular, for the later 1870s and lasting until about 1890. The rarity of the 1878-S quarter issue is overshadowed by that of its big brother the half dollar, but only 140,000 pieces were struck, and Gems are seldom seen. This NGC-certified MS65 piece shows some pinkish-lilac accents complementing silvery devices with luxuriant mint frost on both sides. The strike is sharp, and contact evidence is minimal. A great-looking coin that will be quite difficult to improve upon. Census: 4 in 65, 0 finer (12/13). NGC ID# 23VA, PCGS# 5510

PROOF SEATED QUARTERS

1859 Quarter Dollar, PR65 Cameo Significant Contrast

- 5111 1859 PR65 Cameo NGC.** The official mintage for proofs from 1859 is 800 pieces, but it is doubtful that many were actually sold. Proofs can always be found for a price, but pieces with cameo contrast are seldom encountered. Most of each side of this deeply mirrored example is brilliant, and the devices show significant cameo contrast. Census: 4 in 65 Cameo, 9 finer (12/13). PCGS# 85555

1866 Motto Quarter, PR64 Two-Sided Variable Toning

- 5112 1866 Motto PR64 PCGS.** A two-sided color scheme prevails on this coin, silver-gold obverse bounded by iridescent magenta and blue, the reverse a blue palette in the centers ringed by amber-gold. Few contact marks and a sharp proof strike make this first-year Motto proof quarter a high-end piece for the grade. Population: 26 in 64, 14 finer (12/13). NGC ID# 23WX, PCGS# 5565

1870 Quarter, Peripherally Toned PR66 Cameo The Finest Seen at PCGS

- 5113 1870 PR66 Cameo PCGS. CAC.** The 1870 quarter proof is scarcer than suggested by its mintage of 1,000 pieces as unsold pieces were melted. The present PR66 Cameo is the finest seen by PCGS (12/13). Cobalt-blue, lavender, and gold-orange toning around the borders frames the untoned centers. Sharply struck and impeccably preserved. PCGS# 85569

1883 Quarter, Bold and Colorful PR67

- 5114 1883 PR67 PCGS.** This boldly detailed Superb Gem displays pale gold and heather toning on both sides. A splash of steel-blue along the right obverse border and over much of the reverse is accompanied by dabs of lime-green. Among the few finest survivors from this proof year. Population: 8 in 67, 0 finer (12/13). From The Teich Family Collection. NGC ID# 23XF, PCGS# 5584

1886 Quarter, PR67+ Ultra Cameo Pristine Preservation, Optimal Contrast

- 5115 1886 PR67+ Ultra Cameo NGC.** This untoned, silver-white Superb Gem proof shows just a hint of rose color near the extreme rims, but its chief attribute is the extreme contrast between reflective fields and deeply frosted devices. Pristine preservation and an essentially full proof strike make this a top-notch survivor of the original issue of 886 proofs (plus a meager 5,000 coins struck for circulation). Census: 6 in 67 Ultra Cameo (1 in 67+ Ultra Cameo, 1 in 67 ★ Ultra Cameo), 1 finer (1/14). PCGS# 95587

1890 Seated Quarter, PR66+ Ultra Cameo Profound Contrast on Each Side

- 5116 1890 PR66+ Ultra Cameo NGC.** Brilliant untuned surfaces and bold contrast between the richly frosted devices and deeply mirrored fields provide this Premium Gem representative with outstanding visual appeal. As-made strike-throughs appear on both sides. Census: 8 in 66 Ultra Cameo (1 in 66+ Ultra Cameo), 16 finer (12/13). PCGS# 95591

BARBER QUARTER

1901-S Quarter, Well-Defined, Original Good 6
Key to a Barber Quarter Collection

- 5117 1901-S Good 6 PCGS.** Lower-grade specimens of this key-date issue that possess relatively strong design detail and original surfaces are encountered very infrequently. The present Good 6 offering is an example of such a coin. The obverse portrait displays a well-defined jaw line and ear; the eye, mouth, and wreath also show a modicum of detail. The rim is complete (with the exception, of course, of the dentilation). The reverse rim is a bit less strong, but is completely separated from all peripheral letters. This is significant, because many lower-grade pieces, including some VGs, show parts of the rim worn into the letters. The right and left shield borders show separation from the wings and the lower part of the eagle. Each side exhibits two shades of natural gray, with deeper hues in the fields highlighting the lighter devices. Only two marks are worthy of mention, one on the obverse rim above the S in TRUST and another between stars 8 and 9 that extends to the rim. These will aid in identifying the coin. The Barber quarter specialist will want to give this piece serious consideration as it will fit comfortably in a circulated collection. NGC ID# 23YR, PCGS# 5630

PROOF BARBER QUARTERS

1893 Quarter, Untoned PR67 Cameo
Deeply Contrasted Silver-on-Black Surfaces

- 5118 1893 PR67 Cameo PCGS. CAC.** A stunning, untoned silver-on-black Superb Gem Cameo proof, this 1893 quarter certainly verges on Deep Cameo, and in our opinion attains it. The proof strike is full throughout both sides, and the pristine preservation makes contact marks simply a nonissue. A great coin for type purposes. Population: 13 in 67 Cameo, 5 finer (12/13). PCGS# 85679

1912 Barber Quarter, PR67 Cameo
White-On-Black, Few Finer

- 5119 1912 PR67 Cameo PCGS.** This snow-white Superb Gem displays remarkable Cameo contrast for a 20th century Barber proof, with mint frost strongly evident on all devices including the rims. A superior strike accompanies the pristine, deeply mirrored fields. Common as a business strike, this date is anything but common in brilliant proof format with strong Cameo contrast — one of just 700 proofs produced. Very few are found finer. Population: 6 in 67 (1 in 67+) Cameo, 1 finer (12/13). PCGS# 85698

1912 Quarter, PR68 ★ Cameo
Sharply Contrasted

- 5120 1912 PR68 ★ Cameo NGC.** Thick frost and darkly mirrored fields ensure outstanding cameo contrast. Brilliant and immaculate. The Star denomination is infrequently awarded by NGC. As of (12/13), only seven 1912 proofs have secured a Star. None have been certified as Ultra Cameo, with or without a Star. Census: 0 in 68 Cameo, 3 in ★ 68 Cameo, none finer as Cameo (12/13). PCGS# 85698

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, MS63 First-Year Issue, Low-Mintage Date

- 5121 1916 MS63 NGC.** Hermon MacNeil's classic design depicts Liberty standing between two revetments holding an olive branch in one hand and a raised, partially-draped shield in the other. This was the first time a U.S. quarter had a different design than the contemporaneously issued dime and half dollar. For turn-of-the-century collectors who disliked the Barber series designs, this striking depiction of Liberty was an artistic and welcome change for the better. Others viewed the design as radical and immoral, both because of Liberty's exposed breast and shoulder and because of its militaristic symbolism at the time of World War I. Later refinements in the design appeased many critics and improved the technical characteristics of the coin so it would not succumb to premature wear, particularly on the shield, date, and mintmark areas. The low mintage of the 1916 combined with the first year of issue have ensured consistent demand by collectors in all grades over the decades. This is especially true with coins in mint condition. This is a richly toned golden-rose and gray toned example with abundant underlying mint luster. There are few distractions that one would normally associate with the MS63 grade. NGC ID# 242Y, PCGS# 5704

1917 Type One Quarter, MS67 Full Head Great-Looking Type Coin

- 5122 1917 Type One MS67 Full Head PCGS.** The Type One 1917 Standing Liberty quarters are among the most stunning U.S. type coin when blessed with a full strike, as here. Note how the full head details also extend to the full rivets, gown details, and date digits. A peppering of charcoal, amber, and rose accents both sides, interspersed with silver. Contact marks are a nonissue. A great-looking type coin. Population: 72 in 67 (4 in 67+) Full Head, 0 finer (12/13). NGC ID# 242Z, PCGS# 5707

1918/7-S Quarter, XF40 Collector-Grade Overdate

- 5123 1918/7-S XF40 PCGS. FS-101.** A great-looking collector-grade example of the popular Standing Liberty quarter overdate. Moderate, grade-consistent wear appears on each side of this silver-pinkish piece, but there are no singular signs of contact. The diagonal of the 7 inside the 8 is still bold, although there is no "open space" right of the diagonal in the bottom loop due to wear. Nice for the grade. NGC ID# 243A, PCGS# 5726

**1924 Quarter, MS67 Full Head
Frosty and Tied for Finest at PCGS**

- 5124 1924 MS67 Full Head PCGS.** The high-mintage 1924 Standing Liberty quarter, struck to the extent of nearly 11 million coins, is common in lower circulated grades, but it becomes a rarity in the Gem and finer levels. This Superb Gem Full Head PCGS example is tied for finest at that service with nine other submissions (1/14). The frosty silver surfaces show just light traces of color with a sharp strike (save for a couple of shield rivets) and pristine preservation. The date on the redesigned quarters was recessed in 1925, yet this exposed-date 1924 shows a full date at the top and bottom of each digit. NGC ID# 243L, PCGS# 5747

WASHINGTON QUARTERS

**1932-D Washington Quarter, MS65
Registry Set Essential, One Finer at PCGS**

- 5125 1932-D MS65 PCGS.** Gem examples of the key-date 1932-D quarter are certainly at the top of collectors' want lists, doubly desirable given that PCGS has graded only a single piece numerically finer, making piece such as the present MS65 PCGS coin a must for Registry Set purposes. The satiny surfaces show ivory-white centers ringed in russet with light powder-gray interspersed. The few contact marks are inconsequential, and the strike boldly brought up throughout both sides. Population: 71 in 65, 1 finer (12/13). NGC ID# 2448, PCGS# 5791

**1934 Light Motto Quarter, MS67
Among the Finest Known**

- 5126 1934 Light Motto MS67 PCGS. FS-401.** Light Motto quarters are distinguished by the indistinct lettering on the motto and the pointed center of the W in WE. This is among the finest known, and it exhibits strong mint luster with pale golden and ice-blue toning over each side.
From The Teich Family Collection. NGC ID# 244A, PCGS# 5794

**1934 Light Motto Quarter, MS67
Pastel Patina**

- 5127 1934 Light Motto MS67 PCGS. FS-401.** As is typical for this variety, the motto IN GOD WE TRUST is so light that the WE, in particular, is virtually indistinguishable. The 1 in the date is also weak. Pale pastel iridescence makes a stunning appearance on this unmarked, top-grade piece. A prize for variety and Registry Set collectors. Population: 18 in 67 (2 in 67+), 0 finer (12/13). NGC ID# 244A, PCGS# 5794

1936-D Washington Quarter, MS67
Exceptional Registry Set Candidate

5128 1936-D MS67 PCGS. The 1936-D Washington quarter is a better-date in the series, with a reported mintage of 5.3 million pieces. This magnificent Superb Gem offers stone-white surfaces with vibrant mint luster and no mentionable distractions. The design elements are sharply detailed and eye appeal is outstanding. Population: 13 in 67 (1 in 67+), 0 finer (12/13). NGC ID# 244H, PCGS# 5801

1937-S Washington Quarter, MS67
Low-Mintage Issue in High Grade

5129 1937-S MS67 PCGS. CAC. The 1937-S Washington quarter claims the third-lowest business-strike mintage of the series, at 1.6 million pieces. This spectacular Superb Gem exhibits sharply detailed design elements and vibrant mint luster on both sides, with well-preserved brilliant surfaces that show no mentionable distractions. Population: 28 in 67 (2 in 67+), 0 finer (12/13). NGC ID# 244M, PCGS# 5805

1959 Quarter, Rim-Toned MS67
Top-Graded PCGS Example

5130 1959 MS67 PCGS. CAC. Unmarked surfaces are silver-white in the centers with thin border rings of iridescent jade, amber, and rose, a lovely coin. Only six examples (or different grading events) of this Washington quarter issue have achieved the Superb Gem grade at PCGS with none finer, and this CAC-approved piece will no doubt be snapped up by Registry Set aficionados (1/14). NGC ID# 246H, PCGS# 5866

1962-D Quarter, MS67
One of Three Finest at PCGS

5131 1962-D MS67 PCGS. To date, this 1962-D quarter ranks as one of the three finest (at maximum) PCGS-graded survivors from a mintage of more than 127.5 million pieces. Surface ticks and/or impaired luster are the usual culprits that keep the vast majority of Mint State coins from reaching such exalted grade levels. The Mint's emphasis was on quantity, not quality, and the coins show it. The current PCGS Set Registry composition gives a greater weight, 3 points, to the 1959-PD through 1964-PD issues, than to the 1947-D, 1947-S, 1952-S, and 1953-S at 2 points each. This is a simply stunning and flawless coin, untuned save for a faint wash of gold, pristine and boldly struck throughout. Population: 3 in 67, 0 finer (12/13). NGC ID# 246R, PCGS# 5873

1965 Quarter, Choice AU
Struck on a 90% Silver Planchet
Desirable Transitional Alloy Error

- 5132** 1965 — Struck on a 90% Silver Planchet — AU55 NGC. Breen-4416. 6.14 gm. A clad quarter weighs 5.67 gm. Given the enormous and prolonged mintages of 1964 and 1965 dated quarters, it was inevitable that a few 90% silver flans intended for the 1964 dies were instead struck by 1965 dies. Our auction archives list just eight prior appearances of this mint error, in a grade range from XF45 to AU55. The present partially lustrous example is untoned and lightly abraded.

PROOF WASHINGTON QUARTER

1941 Quarter, Pastel-Toned PR68
Pristine Preservation and CAC Approval

- 5133** 1941 PR68 PCGS. CAC. Although CAC does not separate out their approvals between NGC and PCGS, some conclusions can be drawn about this coin. PCGS has certified only three submissions at this grade level, while NGC has seen 25 (12/13). Given that five CAC green stickers are awarded for the 30 submissions in PR68, one can conclude that this piece is *most likely* the only CAC PR68 at PCGS. Standing on its own, this pastel-toned coin offers ice-blue on the obverse margin and reverse center, with lavender central obverse and golden reverse rim, pristine preservation prevailing over all. Simply no distractions appear of any kind. NGC ID# 27HU, PCGS# 5980

EARLY HALF DOLLAR

1806 Half Dollar, Minimally Marked AU53
Pointed 6, Stem, O-115a

- 5134** 1806 Pointed 6, Stem AU53 PCGS. O-115a, R.2. The double-cut TY in LIBERTY aids attribution of the obverse, along with the broad, arcing die crack through the date base and the left-side stars. The reverse shows ME joined at their bases, and a crack connects the tops of UNITED and continues to the edge under the tail. The silver-gray surfaces display luster in the recesses and are minimally marked. NGC ID# 24EJ, PCGS# 6071

BUST HALF DOLLARS

1814 O-104a Half Dollar, MS64
Distinctive Profile

- 5135** 1814 MS64 PCGS. O-104a, R.2. Unusual doubling of the lower profile, from the chin to the lower part of the nose, should be examined by specialists, as it appears to be more than merely a double profile. This Choice Mint State example is a late die state, with most of the State a die cracks described in the Overton reference. Both sides have satin luster with gold and iridescent toning on both sides. Population: 24 in 64, 16 finer (12/13), for all 1814 varieties. NGC ID# 24F3, PCGS# 6105

1836 Lettered Edge Half, O-118, Lustrous MS65

- 5136** 1836 Lettered Edge MS65 PCGS. CAC. O-118, R.3. Hints of champagne-gold patina visit the lustrous surfaces of this Gem, and a solid strike imparts strong definition to the design elements. Both sides are nicely preserved with frosty silver luster. Population: 13 in 65, 5 finer (12/13). NGC ID# 24G2, PCGS# 6169

SEATED HALF DOLLARS

1840-O Half Dollar, MS64
The Rare Small O Variety

- 5137** 1840-O MS64 NGC. WB-103, Small O, High R.7. Randy Wiley and Bill Bugert list the WB-103 variety as high R.7 in Mint State grades. The reverse is severely cracked, as usual for this variety. Lustrous surfaces display wisps of peripheral russet and electric-blue toning. Sharply struck save for minor weakness in the neck feathers and those in the left (facing) leg. A horizontal linear abrasion from the right (facing) arm into the drapery precludes a finer grade. Census: 8 in 64, 1 finer (12/13). NGC ID# 24GN, PCGS# 6235

1852-O Half Dollar, MS64
Rare, Early New Orleans Issue

- 5138** 1852-O MS64 PCGS. WB-101, Die Pair-1, R.4. Large O. With widespread melting of silver coinage in the early 1850s, the mintage of the 1852-O half dollar was limited to 144,000 pieces. This melting was caused by the excess value in bullion content compared to the face value of U.S. subsidiary coinage. The situation changed the following year when Congress lowered the intrinsic value of most silver coinage with the Mint Act of 1853. The 1852-O is one of the scarcest of the early O-mint halves, and is rarely seen in high grades. This piece shows a remarkable full strike on both side, bright satiny mint luster, and just a hint of pale golden toning. A rare opportunity for the half dollar collector. Population: 2 in 64, 1 finer (12/13). NGC ID# 24HM, PCGS# 6269

1875-CC Seated Half, MS64
High-End Carson City Type Coin

- 5139 1875-CC MS64 NGC. CAC.** The 1875-CC half dollar saw a mintage of slightly more than 1 million pieces. This near-Gem example shows satin luster and medium almond-gold and cream-gray toning. The strike is above-average, and no obvious marks occur on either side. Although the issue is readily collected in grades below VF, Uncirculated examples are both rare and desirable. Census: 20 in 64 (1 in 64+), 8 finer (12/13).
Ex: Fort Worth Signature (Heritage, 3/2010), lot 1000. NGC ID# 24KE, PCGS# 6350

1883 Half Dollar, MS65
Prooflikeness and Cartwheel Luster

- 5140 1883 MS65 PCGS. CAC.** The 1883 is one of the premier low-mintage issues among the late-date series of Seated halves. Only 8,000 strikes for circulation were produced. It is easy to see why some have such bright, reflective fields as this piece — many were essentially first-strikes, and the initial die polish did not wear off. This piece displays a slight cartwheel effect in the fields that is intermixed with the reflectivity. The strike is strong throughout, and the otherwise brilliant surfaces show just the faintest trace of golden around the margins. Population: 14 in 65 (1 in 65+), 17 finer (12/13). NGC ID# 24KW, PCGS# 6365

PROOF SEATED HALF DOLLARS

1855-S Branch Mint Proof Half Dollar, PR65

One of Just Three Possible Proofs

The Only Currently Available Example

5141 1855-S PR65 NGC. WB-1. The obverse lacks drapery at the elbow, a sign that the dies were heavily polished prior to striking. In *A Register of Liberty Seated Half Dollar Varieties*, Bill Bugert writes: "Proofs and early business strikes have no clash marks; the no drapery characteristic resulted from the special die preparation for proof strikes." The bottoms of all four digits in the date are weak, especially the 8 and first 5. That weakness is noted on this piece and is visible in the plate of the Smithsonian specimen illustrated in Bugert's reference.

Numismatic literature discusses three different proof 1855-S half dollars, including: one that is now part of the Smithsonian Institution Collection; a second piece that has not been seen since the 1950s; and this specimen, the only example currently available to collectors. Four die varieties are identified for the 1855-S half dollars, and the WB-1 marriage appears to be the first minted. Die state evidence shows that the proofs were the first half dollars minted in San Francisco, prior to any business strikes.

The Smithsonian Institution specimen has been part of the National Numismatic Collection since the time of issue, when San Francisco Mint Superintendent Robert Aiken Birdsall preserved the piece and sent it to Mint Director James Ross Snowden. Walter Breen notes that the 1855-S proof half dollar was held in Division V, Number 79, of the Mint Cabinet, commenting: "an odd place for it, as this section consisted mostly of patterns and pioneer gold." Bill Bugert examined the 1855-S half dollar at the Smithsonian Institution in May 1989. At the time he graded the coin 63+, noted its bright proof surfaces, and observed a die crack between the D and S in the legend.

Walter Breen wrote of an example that appeared in a March 1956 Bolender sale. However, numismatist P. Scott Rubin checked the catalog and found that no such coin was offered. He checked further and found that Bolender did offer an 1855-S proof half dollar in his April 1953 sale. Lot 87 in that 1953 catalog was described as: "1855 San Francisco mint, half-dollar, Proof. Bluish and golden toned. The finest piece known to me, and lists uncirculated at \$150 in Guide Book. This specimen should be worth much more and cost \$167 several years ago." The coin was offered as part of the Louis L. Lincoln half dollar collection.

The third known proof, the piece offered here, has appeared in several auctions since its first appearance in 1955. This piece has brilliant proof surfaces with razor-sharp design motifs and no signs of weakness on either side. The obverse is bright silver with a splash of faint lilac toning near star 13, while the reverse has a delicate golden tone. There were no plates in the Bolender catalog, and the timing is such that the Lincoln specimen may be the same coin offered here. In fact, there is a high probability that it is the same coin, reducing the population from three coins to two, making this piece the only 1855-S proof half dollar available to collectors.

This coin is a numismatic showpiece in any collection and belongs in the cabinet of a numismatist who will appreciate its beauty, rarity, and historical importance.

Ex: Farish Baldenhofer (Stack's, 11/1955), lot 723; Reed Hawn (Stack's, 8/1973), lot 188; Matthew Bryan Collection (NASCA, 11/1977), lot 549; David K. Carnegie (New England Rare Coin Auctions, 11/1980), lot 751; Auction '86 (Paramount, 7/1986), lot 1646; The Rarities Sale (Bowers and Merena, 8/1998), lot 180; Richmond Collection (David Lawrence, 3/2005), lot 1797; Chicago Signature (Heritage, 8/2011), lot 7176. PCGS# 6421

1861 Half Dollar, Nicely Toned PR65

- 5142 1861 PR65 PCGS.** A high-quality representative of the proof No Motto Seated half series, this richly toned example is layered in lavender-charcoal hues. Direct angles reveal pleasing golden-blue undertones, but we are unable to find any outwardly distracting hairlines or contact marks. Crisply impressed throughout with a few swirls of deeper color in the upper-left reverse field. Population: 13 in 65 (1 in 65+), 2 finer (12/13).

Ex: Long Beach Signature (Heritage, 2/2003), lot 7835. NGC ID# 27TL, PCGS# 6415

1865 Seated Half, PR66+ Cameo
Vivid Toning and Bold Contrast

- 5143 1865 PR66+ Cameo PCGS.** Despite the moderate color, this 1865 Seated half displays perceptible field-device contrast along with essentially pristine preservation and top-notch eye appeal. Only 500 proofs were struck of this issue during the last year of the Civil War, and today this PR66+ is among the handful of finest-certified coins at the PCGS Cameo level. A strong light reveals pastel hues of slate, ice-blue and cobalt-blue, and deeper magenta tones on the reverse. A couple of thin marks in the obverse field near star 7 and some minuscule dark flecks that appear under magnification are undistracting. A great-looking type coin. Population: 8 in 66 (1 in 66+) Cameo, 1 finer (1/14). PCGS# 86419

1866 Gem Cameo Proof Half Dollar
First Year of the With Motto Design

- 5144 1866 Motto PR65 Cameo PCGS.** This Gem Cameo proof is basically untuned and free of any singular impairments, although we note a couple of small, squiggly strike-throughs in the obverse fields that may have prevented an even finer grade. A razor-sharp and appealing coin from the first year of the With Motto type. Population: 4 in 65 Cameo, 4 finer (12/13).

Ex: Long Beach Signature (Heritage, 9/2010), lot 5097. PCGS# 86424

1868 Half Dollar, PR65 Cameo
Brilliant, Strongly Contrasted Surfaces

- 5145 1868 PR65 Cameo PCGS.** From a tiny mintage of only 600 pieces, the proof 1868 Seated Liberty half dollar is a scarce coin today in all grades. Coins in PR65 condition, with the Cameo designation are almost unobtainable. The present coin features fully detailed, boldly frosted design elements, and deeply reflective fields that culminate in dramatic Cameo contrast. Population: 7 in 65 Cameo, 2 finer (12/13).

Ex: Long Beach Signature (Heritage, 9/2010), lot 5117. PCGS# 86426

1872 Seated Liberty Half, PR66+ Cameo
950 Examples Struck

- 5146 1872 PR66+ Cameo NGC.** This high-end Premium Gem exhibits pinpoint definition on all design elements and the frosty devices contrast boldly with the deeply reflective fields. The well-preserved surfaces are blanketed in vivid shades of golden-brown toning that yield to a ring of cobalt-blue at the rims. Census: 6 in 66 Cameo (1 in 66+ Cameo, 1 in 66 ★ Cameo), 2 finer (12/13). PCGS# 86430

**1874 Half Dollar, Gem Proof
Two-Year Arrows, Motto Type**

- 5147 1874 Arrows PR65 PCGS.** Small Arrowheads. The Arrows, Motto type was struck for just two years and proofs are very scarce. This nicely struck specimen has a beautifully patinated reverse. Orange, rose-red, powder-blue, and sun-gold form concentric bands on that side. The obverse is primarily peach though the border shows sea-green and lilac, and a streaky ice-blue area is noted on the lower right field. NGC ID# 27UV, PCGS# 6435

**1874 Arrows Half, PR64 Cameo
Vivid Stripes of Iridescence Over the Reverse**

- 5148 1874 Arrows PR64 Cameo PCGS.** Small Arrowheads. The Arrows type is always of interest to collectors, whether it is the 1850s or 1870s versions, each created for weight changes, but one for reduced weight and the other for increased weight. This is a deeply mirrored proof with significant mint frost over the devices. The toning is nothing less than spectacular on the reverse with diagonal bands of iridescence interspersed with thin stripes of brilliance. The obverse is attractive also, but the color is limited to the left margin. Sharply struck with no mentionable contact marks. Population: 22 in 64 (1 in 64+) Cameo, 4 finer (12/13). PCGS# 86435

**1874 Arrows Half Dollar, PR67 Cameo
Sole Finest Cameo Graded**

- 5149 1874 Arrows PR67 Cameo NGC.** The second and last year of the 1870s Arrows half dollars, the 1874 was struck in the amount of 700 pieces. This is a radiant and reflective silver-white example that shows a thin ring of champagne-pink patina at the extreme rims on each side. The devices are well-frosted, producing excellent cameo contrast. Under a loupe, the strike appears uniformly sharp on all the peripheral stars as well as the central devices, save for the eagle's left (facing) claw. This piece is the sole finest Cameo certified at NGC, and there are none numerically finer regardless of contrast level (12/13). PCGS# 86435

**1875 Half Dollar, PR66
Richly Toned Surfaces**

- 5150 1875 PR66 PCGS. CAC.** The business strike 1875 half dollars have a large mintage of more than 8 million pieces. The proofs are not so plentiful, only 700 pieces struck. This is a richly toned example that displays reddish-gray interiors that are surrounded by bands of bright blue at the margins. Underlying the significant colors are bright, reflective proof mirrors. Sharply struck. Population: 9 in 66, 1 finer (12/13). NGC ID# 27U9, PCGS# 6436

1881 Half Dollar, Patinated PR66

- 5151 1881 PR66 PCGS. CAC.** The proof half dollars of 1881 claim a mintage of 975 pieces. Premium Gems such as the present offering are rare and higher-grade examples are nearly unobtainable. Soft cobalt-blue and crimson toning runs over both sides, each of which exhibits sharply struck design elements and is impeccably preserved. Population: 11 in 66, 2 finer (12/13). NGC ID# 27UG, PCGS# 6442

**1882 Half Dollar, PR66+ Cameo
Untoned and Deeply Contrasted**

- 5152 1882 PR66+ Cameo PCGS. CAC.** Just a trace of color appears over surfaces that are deeply contrasted and offer the desirable "silver on black" appearance of Cameo proofs of this era. The proof strike is full throughout both sides. Both proofs and business strikes of this year saw tiny mintage figures. Population: 6 in 66 (2 in 66+) Cameo, 2 finer (12/13). PCGS# 86443

1887 Half Dollar, Toned PR66

- 5153 1887 PR66 PCGS. CAC.** The small 1887 half dollar business-strike mintage of 5,000 pieces places additional date pressure on the proofs from a mintage of only 710 coins. Medium-intensity cobalt-blue and reddish-orange toning covers both sides of this Premium Gem. The design elements are well-struck except for the usual softness in the hair atop Liberty's head. Population: 8 in 66 (1 in 66+), 2 finer (12/13). NGC ID# 27UN, PCGS# 6448

**1888 PR66 Half Dollar
Undesignated Contrast**

- 5154 1888 PR66 PCGS.** Only 832 proofs were struck out of a total mintage for the year of 12,833 half dollars. This is an all-brilliant proof with crystal-clear, deeply mirrored fields. It is curious that the coin has not been designated as a Cameo, as it displays obvious contrast on each side. Fully struck. Population: 15 in 66, 3 finer (12/13). NGC ID# 27UP, PCGS# 6449

**1888 Seated Half, PR66+ Cameo
Finest Coin Certified at PCGS**

- 5155 1888 PR66+ Cameo PCGS. CAC.** This immaculate 1888 half is among the finest known of this important, low-mintage date. PCGS has only certified three PR66 pieces plus this single Plus coin, which stands as the finest certified at this service. The centers are almost brilliant, then deepen to a rich rose patina, and are finally surrounded at the margins by deep blue. Significant contrast is evident between the fields and devices on each side. Fully struck and problem-free, as one would expect from the grade, Plus, and CAC designations. PCGS# 86449

BARBER HALF DOLLAR

1892-O Half Dollar, Lustrous MS65 First-Year-of-Issue

- 5156 1892-O MS65 PCGS.** Only 390,000 half dollars were struck at the New Orleans Mint in 1892, the first year of the Barber design. Gems such as the present offering are rare and finer examples are nearly unobtainable. Lustrous silver-gray surfaces have been well cared for and are well-struck, save for the usual minor softness on the claws and arrow feathers. A small purplish toning spot under star 1 identifies the coin. Population: 14 in 65, 6 finer (12/13). NGC ID# 24LG, PCGS# 6462

PROOF BARBER HALF DOLLARS

1892 Half Dollar, PR66 Cameo Solid Contrast

- 5157 1892 PR66 Cameo PCGS.** A clearly contrasted example with little toning apart from a faint gold-gray layer and splashes of violet-amber at Liberty's jawline and near the rims. Carefully preserved and an all-around appealing first-year proof. Population: 19 in 66 Cameo, 4 finer (12/13).
From The Teich Family Collection. PCGS# 86539

1894 Half Dollar, Remarkably Toned PR66 Well-Preserved Example of This Early Issue

- 5158 1894 PR66 PCGS. CAC.** This third-year Barber issue displays remarkably well-preserved surfaces. The obverse is significantly more deeply toned than the reverse. It shows rich lilac and golden toning intermixed, but only moderately so, while the reverse is brilliant in the center with russet marginal toning. The devices on each side are frosted and show contrast against the illimitable depth of mirroring in the fields. NGC ID# 24NW, PCGS# 6541

1902 Half Dollar, Pastel-Toned PR67

- 5159 1902 PR67 PCGS.** Pristine preservation and vivid patina are hallmarks of this lovely Superb Gem proof 1902 Barber half, tied for the finest at PCGS with five other such submissions (1/14). Pale pastel shades encompass both sides including pink, purple, pale canary-yellow, and violet hues. The strike is strong save for, typically, the upper-right shield corner. NGC ID# 24P6, PCGS# 6549

1905 Barber Half, PR66 Cameo Seldom Seen with Frosted Devices

- 5160 1905 PR66 Cameo PCGS.** A Premium Gem proof with untouched surfaces and brilliant appeal. The devices display a light coat of pleasing mint frost — unusual for proofs of this era that were normally prepared with all-brilliant finish. A blush of vivid blue toning is seen near the date, with similar toning transparently evident near the reverse rims. The surfaces are otherwise untuned with liquid-deep mirrors offsetting the Cameo devices. Fully struck and immensely attractive. Population: 4 in 66 (1 in 66+) Cameo, 2 finer (12/13). PCGS# 86552

1912 Barber Half, PR66+ Cameo Immaculate, Contrasted Proof

- 5161 1912 PR66+ Cameo PCGS.** One of 700 proofs issued for the date and rare with Cameo contrast, this brilliant example is deeply mirrored and visually magnificent. Despite a tiny bit of weakness at the upper right shield corner, this stunning proof is otherwise sharp with white-on-black reflectivity throughout the fields. Mint frost sits upon all the devices for excellent contrast. A few evidences of orange-gold toning reside near the reverse rims but do not affect the overall, brilliant-white impression of this glistening proof. Population: 4 in 66 (2 in 66+) Cameo, 2 finer (12/13). PCGS# 86559

**1913 Barber Half, PR65 Cameo
Boldly Struck, High-Interest Date**

- 5162 1913 PR65 Cameo PCGS.** Desirable for its frosted Cameo contrast and for the rarity of its business strike counterpart, this 1913 proof Barber half is brilliant and highly appealing. Just 627 proofs were made. This example is fully struck with bold devices displaying the most intricate elements of the Barber design. A silver-white Gem, the deep mirrors are free of all but a few microscopic lines near star 3 that keep it from an even higher grade. Rare and popular in this high-end, proof format. Population: 8 in 65 Cameo, 7 finer (12/13). PCGS# 86560

WALKING LIBERTY HALF DOLLARS

**1917-D Walking Liberty Half, MS65
Short-Lived Obverse Type**

- 5163 1917-D Obverse MS65 PCGS.** The 1917-D Walking Liberty half dollar with the prominent obverse mintmark claims a small mintage of 765,400 pieces. The Obverse type was only produced for two years, making the 1917-D a popular date with type collectors. This delightful Gem is well-detailed and brightly lustrous, with well-preserved brilliant surfaces. Population: 75 in 65 (3 in 65+), 5 finer (12/13). NGC ID# 24PR, PCGS# 6570

**1917-D Walking Liberty Half, MS65
First Year With Reverse Mintmark**

- 5164 1917-D Reverse MS65 NGC.** Among the mintmarked issues of 1917 half dollars, the varieties with obverse D or S have the lower mintages and greater fame. It is clear from census data, however, that at the Gem level the reverse-mintmark issues are condition rarities themselves. This 1917-D half dollar with reverse mintmark is primarily pale silver with well-rounded luster and occasional hints of gold against pale silver surfaces. A few tiny marks are clustered on Liberty's skirt, yet the fields are surprisingly abrasion-free. Detail is average with the stub of a thumb visible on the branch hand. Census: 24 in 65 (1 in 65+), 4 finer (10/13). NGC ID# 24PS, PCGS# 6571

**1920-D Half Dollar, MS64+
Strongly Struck and Well-Preserved**

- 5165 1920-D MS64+ PCGS. CAC.** This 1920-D half dollar certified MS64+ by PCGS is quite close to the Gem grade, showing a partial split thumb and bold strike elsewhere on satiny silver surfaces with just a hint of amber-gold in the fields. The noteworthy lack of mentionable abrasions and overall strong eye appeal put this piece into a small minority. Population: 1 in 64+, 49 finer (12/13). NGC ID# 24R4, PCGS# 6581

1921 Half Dollar, AU58
Well-Struck and Minimally Marked

- 5166 1921 AU58 PCGS.** This near-Mint 1921 half dollar displays nearly full mint luster residing on the essentially untoned surfaces along with sharply struck design elements, including Liberty's head and the branch hand. The eagle's plumage is also strong, with partial detail in the feathers on the trailing leg. Remarkably clean for a coin having seen some circulation. NGC ID# 24R6, PCGS# 6583
-

1921-D Walking Liberty Half, MS65
Low-Mintage Series-Key

- 5167 1921-D MS65 PCGS. CAC.** The postwar recession of the early 1920s combined with the huge mintage of Morgan dollars the U.S. Mint was tasked to produce in 1921 resulted in small production totals for other silver denominations at all three active mints that year. At the Denver facility, a series-low business-strike mintage of 208,000 Walking Liberty half dollars was accomplished. Examples in MS65 condition are rare today, and only a handful of finer specimens are known.

The present coin is an impressive Gem with well-detailed design elements that show just a touch of the typical softness on Liberty's wreath hand. Vibrant mint luster radiates from the pristine brilliant surfaces and eye appeal is outstanding. Population: 32 in 65, 3 finer (12/13). NGC ID# 24R7, PCGS# 6584

**1935-D Half Dollar, MS66+
Satin Luster and Minimal Marks**

- 5168** 1935-D MS66+ PCGS. CAC. Pale yellow, gold, and violet hues appear most prominently in an arc on the left of each side of this minimally marked and satin-lustered coin. This Premium Gem 1935-D Walking Liberty half is tied with three other submissions in this grade for the finest certified at PCGS, a well-struck coin of incredible quality. Population: 4 in 66+, 0 finer (12/13). NGC ID# 24RK, PCGS# 6596

**1935-S Half Dollar, MS66
Subtly Toned and Attractive**

- 5169** 1935-S MS66 PCGS. CAC. Subtle multicolored toning appears on portions of the obverse, complementing surfaces that are well-struck (save for the branch hand) and notably free of mentionable abrasions. This Premium Gem 1935-S half is bested by only three numerically finer examples at PCGS (12/13). Quite a nice coin for the grade. NGC ID# 24RL, PCGS# 6597

**1936-D Half Dollar, Satiny MS67+
Sole Finest Certified at PCGS**

- 5170** 1936-D MS67+ PCGS. This completely untuned silver-white 1936-D half dollar is an ultimate coin for collectors who prefer their coins without mentionable patina, satiny, boldly struck, and free of even the most minuscule impairments. Note the sharp detail on Liberty's head, branch hand, and the trailing lower leg of the eagle. A great-looking coin for the issue and the type. *Note that this piece is currently the sole finest certified at PCGS.* Close to MS68 quality. Population: 27 in 67 (1 in 67+), 0 finer (12/13). NGC ID# 24RN, PCGS# 6599

**1938-D Half Dollar, MS67
Key to the 'Short Set'**

- 5171** 1938-D MS67 PCGS. CAC. The 1938-D is the key to the later-date Walkers with an impressively low mintage of less than a half-million coins. This is a lovely Superb Gem with satiny luster and subliminal gold toning. The strike is sharp throughout. This key is tied as the finest certified at the two major services. Population: 36 in 67 (2 in 67+), 0 finer (12/13). Only 13 examples at NGC and PCGS combined have the CAC green sticker of this coin.
Ex: *Clarke Marie Collection, Part I / Long Beach Signature* (Heritage, 9/2004), lot 6800; *Houston Signature* (Heritage, 12/2009), lot 839. NGC ID# 24RV, PCGS# 6605

**1943-S Walking Liberty Half, MS67
None Certified in Higher Numeric Grades**

- 5172** 1943-S MS67 PCGS. CAC. The 1943-S Walking Liberty half dollar is one of the most challenging issues of the late series in high grade, and a weak strike is the norm, rather than the exception. This delightful Superb Gem exhibits much better-than-average detail in most areas, but a touch of softness is still present on Liberty's wreath hand. Vibrant mint luster radiates from the pristine brilliant surfaces, creating tremendous eye appeal. Population: 35 in 67 (1 in 67+), 0 finer (12/13). NGC ID# 24SB, PCGS# 6620

**1945 Walking Liberty Half, MS67+
Phenomenal Type Coin**

- 5173** 1945 MS67+ PCGS. Bright mint luster shines through the subtle yellow patina seen on each side. The 1945 is one of the more frequently seen issues from the 1940s, but coins of this quality and with the strength of strike seen here, are seldom encountered. As expected of an MS67+, the surfaces are remarkable clean and problem-free. NGC ID# 24SF, PCGS# 6624

1947-D Half Dollar, Well-Struck MS67

- 5174** 1947-D MS67 PCGS. The lustrous surfaces of this Superb Gem are visited by splashes of orange toning on the obverse, and a solid strike imparts strong definition to the design elements, including Liberty's head and branch hand. This is a well cared for example. Population: 15 in 67, 0 finer (12/13). NGC ID# 24SN, PCGS# 6631

KENNEDY HALF DOLLAR

1977-D Half Dollar, MS62
Struck on a 40% Silver Planchet
Rare Transitional Alloy Error

- 5175** 1977-D — Struck on a 40% Silver Planchet — MS62 PCGS. 177 gn. The 40% silver alloy, a holdover from the 1965 debasement, was supposed to have been struck for the final time on the 1976-S Bicentennial half dollar and Ike dollar. Murphy's Law ensured that a very small quantity of misplaced or leftover 40% silver planchets ended up between dies for the next year's coinage. Lustrous, lightly toned, sharply struck, and well preserved.

EARLY DOLLARS

1795 Silver Dollar, VF30
B-5, BB-27, Collectible Midrange Example

- 5176** 1795 Flowing Hair, Three Leaves VF30 PCGS. B-5, BB-27, R.1. Bowers-Borckardt Die State II. The most popular and available early dollar combination, the Three Leaves B-5, BB-27 is both *Guide Book* variety and sought-after type coin. This piece shows a few small planchet indents on the obverse and scattered scrapes consistent with the grade on pinkish-silver surfaces. Good eye appeal for the midrange grade. NGC ID# 24WZ, PCGS# 6852

1795 B-7, BB-18 Silver Dollar, VF30
Three Leaves Reverse Type

- 5177** 1795 Flowing Hair, Three Leaves VF30 PCGS. B-7, BB-18, R.3. Bowers Die State I, with two extensions from the left ribbon end on the reverse. This is the usual die state encountered, with later states having a single extension from the left ribbon. This Choice VF specimen has medium gray patina in the fields, with reddish-tan on the devices. The only marks evident on this piece are those grade-consistent marks that are expected, along with a few minor reverse adjustment marks. NGC ID# 24WZ, PCGS# 6852

1795 Flowing Hair Dollar, Toned VF30
B-7, BB-18

- 5178** 1795 Flowing Hair, Three Leaves VF30 PCGS. B-7, BB-18, R.3. Deeply and originally toned in shades of dark-green on the obverse, and light gray on the reverse. There are several crisscrossing adjustment marks on the reverse, otherwise there are relatively few marks on the surfaces of the coin. Overall, a desirable mid-grade example of the Flowing Hair type.
Ex: FUN Signature (Heritage, 1/2005), lot 8102; Long Beach Signature (Heritage, 9/2006), lot 2350. NGC ID# 24WZ, PCGS# 6852

1796 Bust Dollar, XF40
B-4, BB-61, Small Date, Large Letters

- 5179** 1796 Small Date, Large Letters, B-4, BB-61, R.3 XF40 PCGS. Russet, lilac, and cream-gray alternate across the obverse, while blue-green shades dominate the reverse. A loupe locates scattered minor obverse marks, but the reverse is surprisingly unabraded. Ample hair and wing detail remains despite 20 points of wear.
Ex: Long Beach Signature (Heritage, 5/2007), lot 1288. PCGS# 6860

**1796 Small Date, Large Letters Dollar
B-4, BB-61, XF45, Scarce Die State III**

- 5180** 1796 Small Date, Large Letters XF45 PCGS. B-4, BB-61, R.3. Bowers-Borckardt Die State III. This is one of three major *Guide Book* varieties for the year and popular as such. The two Small Date, Large Letters die pairings are the B-4, BB-61 and the B-6, BB-64. The present pairing shows the date small but wide, the Large Letters reverse showing TE in STATES close and a single berry under the first T in STATES. In this scarcer die state, the obverse shows only two tiny wisps of hair remaining on the foremost lock, and die lapping has effaced parts of the palm leaves at ICA on the reverse. The Choice XF grade level is the highest obtainable for the issue before the price of acquisition reaches into the five-digit range. Much appeal is evident here: Pinkish-gray surfaces show considerable luster remaining, and no mentionable contact or planchet adjustment marks appear. PCGS# 6860

**1796 B-4, BB-61 Silver Dollar, AU53
Small Date, Large Letters**

- 5181** 1796 Small Date, Large Letters AU53 NGC. B-4, BB-61, R.3. The obverse has a tiny die chip centered over the 1 in the date, and that is diagnostic for the obverse die that was shared with BB-62. It is always important to check both sides, as BB-62 is an extremely rare variety with a Small Letters reverse. This splendid example has intermingled cobalt-blue, lavender, and light gold toning with a few areas of light silver. A few hidden marks are noted on the reverse of this attractive example. While not a condition census example, this dollar is far finer than most survivors from the die pair. PCGS# 6860

1796 Draped Bust Dollar, B-4, BB-61, AU55
Small Date, Large Letters *Guide Book* Variety

- 5182 1796 Small Date, Large Letters AU55 NGC. B-4, BB-61, R.3.** Bowers-Borckardt Die State I. According to the 2014 *Guide Book*, 79,920 Draped Bust dollars were struck in 1796. Six different die varieties are known for the date. This coin represents the BB-61 variety, with small numerals in the date and one berry located under the first T in STATES on the reverse. The BB-61 is the most available variety of 1796, but most examples seen grade no better than XF. Choice AU specimens, like the present coin, are quite rare. This coin probably fits in at the low end of the Condition Census for the variety, or just barely outside it.

The sharply detailed design elements of this charming AU55 example show just a touch of wear and the pleasing lavender-gray surfaces retain a few traces of original mint luster. Only minor abrasions are evident and some faint planchet adjustment marks can be seen on the upper reverse. This coin should find a home in a fine collection or type set. PCGS# 6860

1796 B-1, BB-66 Dollar, XF40
Small Date, Small Letters

- 5183 1796 Small Date, Small Letters XF40 PCGS. B-1, BB-66, R.4.** Ex: Hesselgesser. Bowers Die State II, the usual state with delicate reverse details removed by die lapping. This piece is attributed to the Hesselgesser Collection, but it is not the primary example of the variety from that collection. Pleasing pewter-gray surfaces have light gold highlights, especially on the obverse. Both sides are generally pleasing, despite scattered marks. Widely spaced horizontal adjustment marks appear on the reverse. NGC ID# 24X3, PCGS# 6859

1796 B-5, BB-65 Dollar, XF40
Large Date, Small Letters

- 5184 1796 Large Date, Small Letters XF40 PCGS. B-5, BB-65, R.2.** This variety is immediately recognized through the omnipresent internal die break at CA of AMERICA. The variable size die break touches both letters and nearly reaches the border, now with a slight die bulge below its lower edge. In fact, this is one of the latest die states we have seen. The present piece has remarkable light silver-gray surfaces with traces of champagne toning. Aside from the usual insignificant, grade-consistent abrasions, the surfaces of this piece are exceptional.
 Ex: *Long Beach Signature* (Heritage, 2/2009), lot 1527. PCGS# 6861

**1798 Bust Dollar, XF45
B-1, BB-82, Intermediate Die State**

- 5185 1798 Small Eagle, 13 Stars XF45 PCGS. B-1, BB-82, R.3.** Bowers Die State II. Although moderately toned in a somewhat mottled fashion, this coin appears to be original and problem-free. This obverse die was eventually paired with a Large Eagle reverse, creating the very rare 1798 B-32, BB-91. This is the second and final use of the reverse die. A glance at the reverse on this example shows the possible reason for this — this coin was struck from an intermediate state of the dies and displays an obvious die break. The crack that connects the denticles with the upper part of the second T in STATES is easily visible from the denticles to the top of the T. Even wear shows over each side with some reflectiveness noted over the obverse. Steel-gray toning is complemented with rose hues at certain angles. Population: 3 in 45, 5 finer (12/13).
Ex: Denver Signature (Heritage, 8/2006), lot 5292. NGC ID# 24X5, PCGS# 6867

**1798 B-13, BB-108 Dollar, XF45
The Usual Die State**

- 5186 1798 Large Eagle, 10 Arrows XF45 PCGS. B-13, BB-108, R.3.** Bowers Die State II, the usual state with the reverse cracked and lapped. Light silver-gray surfaces retain traces of luster on this Choice XF dollar. Slight roughness is noted at the center of the obverse, with faint adjustment marks at the center of the reverse. PCGS# 6876

**1798 Heraldic Eagle Dollar, AU50
B-23, BB-105**

- 5187 1798 Large Eagle, Wide Date, Pointed 9 AU50 NGC. B-23, BB-105, R.3.** Bowers Die State II, showing slight evidence of reverse die lapping, with incomplete details at cloud 3. A few small die flaws are evident in the upper reverse. The hair detail at the top of the obverse is complete. This lovely light silver-gray example has splashes of pewter-gray and amber toning. A few short scratches are noted in the right obverse field. PCGS# 6877

**1798 Large Eagle Silver Dollar, AU50
Wide Date, B-20, BB-102**

- 5188 1798 Large Eagle, Pointed 9, Wide Date AU50 NGC. B-20, BB-102, R.5.** Bowers Die State IV. The rarity of Bolender-20 is undoubtedly due to the early deterioration of its reverse die. On the present coin, a big rim break is beneath the tail and a retained break extends through the R in AMERICA. Lightly toned wheat-gold and silver-gray. Impressively unabraded save for a small obverse rim knock at 4 o'clock and a slender bright area on the reverse field above the eagle's head. Four vertical adjustment marks on the portrait are all as made. PCGS# 6877

1799 B-17, BB-164 Dollar, XF45
Middle Die State

- 5189 1799 7x6 Stars XF45 PCGS. CAC. B-17, BB-164, R.2. Bowers Die State III with delicate cracks. Both sides of this Choice XF dollar exhibit delightful toning, the obverse with ivory at the center, gradually progressing through blue-green, gold, violet, and steel-blue in concentric bands. The reverse is generally light grayish-brown with peripheral iridescence. Both sides have scattered grade-consistent handling marks. NGC ID# 24X7, PCGS# 6878

1802 B-6, BB-241 Dollar, XF40
Usual Late Die State

- 5190 1802 XF40 PCGS. CAC. B-6, BB-241, R.1. Bowers Die State III, the usual die state for this variety. Predominantly gray-brown toning appears on both sides of this attractive dollar, with light silver high points. Scattered marks and trivial scratches on each side are consistent with the grade. NGC ID# 24XB, PCGS# 6895

1803 Small 3 Bust Dollar, VF35
B-4, BB-254

- 5191 1803 Small 3 VF35 PCGS. CAC. B-4, BB-254, R.3. Deeply toned with mauve patina in the fields, while the high points of the devices offer lighter tan-gray color. Hints of luster glint under the wings, legends, and stars, and the reverse in particular has bold details. The upper-right reverse shows faint adjustment marks, as made.
Ex: Dallas Signature (Heritage, 12/2004), lot 6377; Central States Signature (Heritage, 5/2007), lot 931. NGC ID# 24XD, PCGS# 6900

1803 Dollar, Lightly Toned XF45
Small 3, B-5, BB-252

- 5192 1803 Small 3 XF45 NGC. B-5, BB-252, R.3. Scarcer than the Large 3 B-6. Traces of caramel-gold toning overlay the slate-white surfaces of this lightly circulated Draped Bust dollar. Luster fills the eagle, legends, stars, and curls. The occasional marks are relatively minor but we note a small spot above the ribbon.
Ex: Columbus Central States (Heritage, 4/2006), lot 2161. NGC ID# 24XD, PCGS# 6900

SEATED DOLLARS

1857 Seated Dollar, MS64
Only Two Finer at NGC

5193 1857 MS64 NGC. Though the coinage reforms of 1853 adjusted the weights of minor silver coinage, the silver dollar was kept on at its old standard, removing any chance of the denomination being treated as a circulating coin instead of bullion to be melted at a profit. While only a relative handful of coins survive out of a mintage of 94,000 pieces, there are a handful of extraordinary examples such as this near-Gem. Though bluntly struck on peripheral elements such as the stars around Liberty and her visible foot, this coin has decent interior detail. Luster is pale silver with a light green-gold overtone, and while scattered marks affect each side, these are well within the bounds of the grade. NGC ID# 24YW, PCGS# 6945

1872-CC Silver Dollar, VF30
Rare Carson City Issue

5194 1872-CC VF30 NGC. A mintage of just 3,150 pieces places the 1872-CC among the rarest Carson City silver dollars. This midgrade representative has a hint of almond-gold toning on the fields. The motifs display traces of ice-blue. All letters in LIBERTY are readable though BE is slightly faint. One thin mark noted on Liberty's chest. Certified in a prior generation holder. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24ZK, PCGS# 6969

1872-CC Seated Dollar, AU55
Elusive in All Grades

5195 1872-CC AU55 PCGS. There was apparently little need for silver dollars in the western economy during the late 1860s and early 1870s. From 1870 to 1873, the Carson City Mint produced a total of just 18,548 silver dollars, and San Francisco produced 9,000 pieces in 1872, along with a few others in 1870 and 1873.

This important Nevada product is housed in a green-label PCGS holder. Both sides exhibit reflective fields beneath blue-steel and iridescent toning. Minuscule surface marks are consistent with the grade on this highly appealing Choice AU specimen. Population: 10 in 55, 21 finer (12/13).

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24ZK, PCGS# 6969

PROOF SEATED DOLLARS

1863 Seated Dollar, PR62 Cameo
Important Civil War Issue

5196 1863 PR62 Cameo PCGS. CAC. An important Civil War era issue, this 1863 Seated dollar is a splendid example with excellent field-to-device contrast. Hints of pale gold and rich blue peripheral toning enhance the silver surfaces, with fully mirrored fields and sharply defined, satiny devices. Population: 6 in 62 Cameo, 27 finer (12/13).

From The Teich Family Collection. PCGS# 87006

1864 Dollar, Untoned PR63

5197 1864 PR63 PCGS. CAC. This Select example is one of only 470 proof Seated Liberty dollars that were struck in 1864. The bright, essentially untoned surfaces yield a degree of field-device contrast when the coin is tilted slightly under a light source. All of the design elements are fully struck, further enhancing the coin's pleasing eye appeal. Some wispy hairlines in the fields preclude a finer grade. Well-deserving of CAC approval. Population: 56 in 63, 54 finer (12/13).

From The Teich Family Collection. NGC ID# 252J, PCGS# 7007

1864 Seated Dollar, PR64 Cameo
Nicely Toned and Contrasted

5198 1864 PR64 Cameo PCGS. CAC. The 1864 dollar saw a mintage of 470 proofs, a relatively large number of which have apparently survived. Examples designated as Cameos, especially high-grade ones, are a different story. This near-Gem reveals pleasing field-motif contrast, and the strike is complete in all areas. Delicate cobalt-blue, lavender, and golden-brown patina visits both sides, accenting the coin's overall eye appeal. Faint roller marks are noted on parts of Liberty's portrait. Population: 16 in 64 (2 in 64+) Cameo, 3 finer (12/13).

Ex: Dallas Signature (Heritage, 11/2007), lot 970. PCGS# 87007

**1865 Seated Liberty Dollar, PR63 Cameo
Low-Mintage Date**

- 5199 1865 PR63 Cameo NGC.** Only 500 proof Seated Liberty dollars were struck in 1865. This delightful Select example exhibits razor-sharp definition on all design elements, including Liberty's head and the star centers. The richly frosted devices contrast boldly with the deeply mirrored fields. Only a few minor hairlines and contact marks prevent an even higher grade. Census: 16 in 63 Cameo (1 in 63 ★ Cameo), 27 finer (12/13).
From The Teich Family Collection. PCGS# 87008

**1869 Seated Dollar, PR64
Deeply Toned and Well-Struck**

- 5200 1869 PR64 NGC.** Only 600 proofs were reportedly struck of the 1869 Seated Liberty dollar, and most certified examples today are in the Select or near-Gem grade levels, the latter that of the present piece. Deep pinkish-purple areas alternate with scattered silver on surfaces that show a few minor marks determining the grade. The proof strike brings up all details to good advantage. Census: 51 in 64, 33 finer (12/13). NGC ID# 252R, PCGS# 7017

**1872 Seated Dollar, PR63+ Cameo
Excellent Contrast**

- 5201 1872 PR63+ Cameo PCGS. CAC.** Hints of delicate blue toning adhere to the peripheries of this remarkable Select Cameo proof Seated dollar. Otherwise, both sides are entirely untuned with excellent contrast. The devices are sharply rendered and fully lustrous, with deeply mirrored fields. A highly appealing example. Population: 11 in 63 (1 in 63+) Cameo, 19 finer (12/13).
From The Teich Family Collection. PCGS# 87020

**1873 Seated Dollar, PR63 Deep Cameo
Rarely with Thick Contrast**

- 5202 1873 PR63 Deep Cameo PCGS.** This stunning final-year Seated Liberty dollar has brilliant, untuned silver surfaces with extraordinary field-to-device contrast. Those fields are deeply mirrored with faint hairlines that limit the grade. The devices have thick silver luster and bold design motifs. Only one of every 14 submissions has garnered the Deep Cameo designation at PCGS. Population: 4 in 63 (1 in 63+) Deep Cameo, 13 finer (12/13).
From The Teich Family Collection. PCGS# 97021

PROOF TRADE DOLLARS

**1878 Trade Dollar, PR64 Cameo
Pastel-Toned With Blatant Eye Appeal**

- 5203 1878 PR64 Cameo PCGS.** Struck in the year that the Morgan dollar became its nemesis, this near-Gem proof 1878 Trade dollar shows bold contrast despite the pastel patina comprising pale lilac, violet, ice-blue, and tinges of charcoal, a lovely color combination. A few stray marks in the fields do not impede the blatant eye appeal. Population: 19 in 64 Cameo, 12 finer (12/13). PCGS# 87058

1880 Trade Dollar, PR66 Cameo
Sharply Struck and Reflective

- 5204 1880 PR66 Cameo PCGS.** The 1880 proof-only Trade dollar production was 1,987 pieces, and this PCGS example is one of the nicest survivors. The surfaces are lightly gold-toned near the rims and thoroughly contrasted on both sides, with reflective, mirrored fields complementing well-frosted devices. Only a few stray field hairlines seemingly preclude an even finer grade. The small lintmark near star 11 on the obverse is as struck. The proof strike is uniformly sharp throughout both sides. The years from 1879 through 1885 are the years that the proof-only Trade dollar issues overlapped their Morgan dollar counterparts. Population: 10 in 66 (1 in 66+) Cameo, 7 finer (12/13). PCGS# 87060

1881 Trade Dollar, PR65 Cameo
Reflective and Sharply Struck

- 5205 1881 PR65 Cameo NGC.** The 1881 Trade dollar is among the proof-only issues that would — slowly — end the series, here struck to the extent of 960 pieces. This Gem Cameo proof offers well-mirrored and well-contrasted surfaces that are pinkish-gold and sharply struck throughout. Quite minor contact marks are away from the focal points but account for the grade. Census: 21 in 65 Cameo (1 in 65 ★ Cameo), 33 finer (1/14). PCGS# 87061

1881 Trade Dollar, PR67 Cameo
Rarely Seen This Fine

- 5206 1881 PR67 Cameo NGC.** The Trade dollar was not produced in business-strike format after 1878, but the Philadelphia Mint coined a limited number of proof coins every year to satisfy collector demand. This led to a short-lived speculation in Trade dollars that crested early in 1880, leading to a series-record proof mintage of 1,987 pieces that year. By 1881, the demand had dropped off considerably, and only 960 proof Trade dollars were struck. In addition to the smaller mintage, the 1881 issue was plagued by poor workmanship, and most examples seen show areas of flatness on Liberty's head and the upper stars, due to improper spacing of the dies. One of the reverse dies was lapped, resulting in a loss of detail in the eagle's feathers. Few examples show the desirable Cameo effect.

Fortunately, a few high-quality specimens do exist, including the spectacular Superb Gem offered here. This coin exhibits razor-sharp definition in the usual trouble spots on the obverse, but the reverse does show the slight loss of detail in the eagle's feathers that resulted from excessive die polishing. The design elements are richly frosted and contrast dramatically with the deeply reflective fields. The well-preserved surfaces are essentially brilliant, with just the slightest hint of pale gold toning. Eye appeal is terrific. Census: 11 in 67 Cameo (1 in 67+★ Cameo), 3 finer (12/13). PCGS# 87061

1882 Trade Dollar, Toned PR65

- 5207 1882 PR65 NGC.** The 1882 Trade dollar was a proof-only issue from a substantial mintage of 1,097 pieces. Medium-intensity orange and electric-blue toning adorns both sides of this Gem. Traces of mirrored reflectivity cling to the edges of the design elements and within their interstices. This is a crisply struck and nicely preserved specimen. Census: 64 in 65, 38 finer (12/13). NGC ID# 27YU, PCGS# 7062

1883 Trade Dollar, Richly Toned PR65

- 5208 1883 PR65 PCGS.** A richly toned specimen of the last broadly distributed proof Trade dollar issue, modestly contrasted through a rich drape of interior peach patina with blue-to-violet hues around much of the borders. As impressively preserved as it is eye-catching, and much more elusive at the next grade level. Population: 50 in 65, 20 finer (12/13). NGC ID# 27YV, PCGS# 7063

1883 Trade Dollar, PR65 Cameo Rich Border Toning and Eye Appeal

- 5209 1883 PR65 Cameo NGC.** Lovely golden-brown and navy-blue toning enriches the borders of this fully struck and flashy proof-only Gem. The major devices are thickly frosted, and the eye appeal is outstanding. Although the 1883 Trade dollar — the last readily collectible date in the series — can be obtained in higher grades, the quality of the present specimen will satisfy the most demanding specialist. Census: 14 in 65 Cameo, 29 finer (12/13). PCGS# 87063

MORGAN DOLLARS

1878 8 Tailfeathers Morgan, MS66 VAM-17, Colorful Obverse Toning

- 5210 1878 8TF MS66 PCGS. CAC. VAM-17.** The reverse is demurely toned with just a hint of rose-gold around the margins and a silver interior, while the obverse boasts waves of rainbow patina wafting in from the left side toward the center. The 1878 8 Tailfeathers coins are always popular as the first Morgan dollar issues, and this well-struck, unabraded Premium Gem is bound to be a prize for the color aficionados as well. NGC ID# 253H, PCGS# 7072

**1878 Morgan Dollar, Vividly Toned MS66
Strong 7/8 Tailfeathers, VAM-37**

- 5211 1878 7/8TF Strong MS66 PCGS. VAM-37.** Rich patina and pristine preservation are hallmarks of this stunning Premium Gem, one of the 7/4 Tailfeathers varieties. The color palette includes ice-blue and deeper ocean-blue with accents of crimson, violet, rose orange, and gold in broad array throughout both sides, a coin that both color aficionados and variety collectors will have a field day over. The VAM variety is attributed on the reverse by faint die lines under the juncture of the olive stem and leaves, and one die spur protruding from the lower side of the fletchings. The obverse shows the fourth star up from the right of the date showing a broken inside star point. Simply a gorgeous coin, well-struck and with no singular contact. Some wispy peripheral die cracks on the reverse add even more interest. Among the finest of the 7/8 Strong major design variant. Population: 8 in 66, 0 finer (12/13). NGC ID# 2TXZ, PCGS# 7078

**1878-CC Dollar, MS66
Softly Frosted Surfaces**

- 5212 1878-CC MS66 NGC.** Softly frosted silver surfaces show few relevant marks on either side. The untoned centers yield to glints of cinnamon and pale blue near the margins on each side of this first-year Carson City Morgan dollar, a beautiful and problem-free example of the issue with lots of eye appeal and a decent strike. NGC has seen only a handful numerically finer (12/13). NGC ID# 253M, PCGS# 7080

**1878-CC Morgan, MS66
Intense Mint Frost**

- 5213 1878-CC MS66 PCGS. CAC.** All the components of a great type coin are exhibited by this visually alluring Premium Gem. From the first year of issue for the immensely popular Morgan dollar series, this piece is fully struck and displays intense, coruscating mint frost over both sides. Vivid red-gold and cobalt-blue obverse peripheral toning greatly increases the eye appeal of the coin. A few wispy field marks preclude an even loftier grade. PCGS has seen only five numerically finer (12/13).
Ex: Long Beach Signature (Heritage, 9/2007), lot 2324; Long Beach Signature (Heritage, 5/2008), lot 2429. NGC ID# 253M, PCGS# 7080

**1878-S Morgan Dollar, MS65
First-Year Deep Mirror Prooflike Example**

- 5214 1878-S MS65 Deep Mirror Prooflike PCGS.** A sharply detailed Gem from the first year of the Morgan dollar design, this coin features richly frosted devices and deeply reflective fields that show only minor signs of contact. Housed in a green label holder. Population: 16 in 65 Deep Mirror Prooflike, 3 finer (12/13). NGC ID# 253R, PCGS# 97083

1879-CC Morgan Dollar, MS61
Carson City Key

5215 1879-CC MS61 NGC. The 1879-CC Morgan dollar is a low-mintage key from the famous Carson City Mint. This attractive Mint State specimen is well-detailed and the lustrous surfaces show a scattering of minor contact marks, all consistent with the grade. Pleasing shades of pink and golden-brown toning enhance the surfaces. NGC ID# 253T, PCGS# 7086

1879-CC Dollar, Well-Struck MS64+

5216 1879-CC MS64+ PCGS. CAC. Normal Mintmark. The 1879-CC is the second-rarest Morgan dollar from the Carson City Mint after the 1889-CC, with a low reported mintage of 756,000 pieces. Near-Gems can be acquired with relatively little difficulty though Gems are much more challenging. This MS64+ example is essentially color free, and the partially prooflike fields offer some mild contrast with the satiny devices. We need to mention, however, that this prooflikeness is somewhat hazy, as often seen, and not deeply mirrorlike. The design features are well-impressed, including fairly strong definition in the hair over Liberty's ear and on the eagle's breast feathers. A few minor grazes prevent full Gem status. NGC ID# 253T, PCGS# 7086

1879-CC Morgan Dollar, MS62
Popular VAM-3 Guide Book Variety

5217 1879-CC Capped Die MS62 NGC. VAM-3. A Top 100 Variety. The remnants of a smaller CC are easily seen below the primary mintmark and the date shows doubling on all four digits identifying the popular VAM-3 variety. This pleasing MS62 specimen displays sharply detailed design elements and frosty mint luster, with a scattering of minor contact marks on both sides. From The Teich Family Collection. NGC ID# 253T, PCGS# 7088

**1879-CC Dollar, VAM-3, MS64
Popular 'Capped Die' Variant**

- 5218 1879-CC Capped Die MS64 PCGS. CAC. VAM-3.** A Top 100 Variety. The Capped Die 1879-CC dollar has long been known, but only recently have examples been considered worth a premium. Decades ago they were shunned by collectors who thought something was not quite right about the mintmark area. Scholarship has made great strides since those days, and now the so-called Capped Die coins are worth a premium in the better grades of Uncirculated. This piece is from the late die state with a filled G in GOD. The obverse displays whispers of varying intensity reddish-gold and sky-blue around the rims, while soft reddish-gold clings to the reverse margin. Lustrous surfaces are well-struck, though light diagonal roller marks partially obliterate the hair above Liberty's ear. Scattered marks, especially on the reverse, determine the grade. NGC ID# 253T, PCGS# 7088

**1879-O Silver Dollar, MS65+
Seldom Seen Finer**

- 5219 1879-O MS65+ PCGS.** The 1879-O dollar can be obtained with minimal difficulty through near-Gem. The population declines in MS65, and finer specimens are elusive. This high-end Gem offering is one of just eight so-graded by PCGS, with 14 pieces finer (all MS66). Lustrous surfaces are essentially color-free on the obverse, while the reverse assumes medium-intensity hues of russet-gold, blue-green, and whispers of gold-orange and bright rose. The design elements are generally well brought up, including partial definition on the hair over Liberty's ear. A few light scuffs prevent an MS66 grade, but both sides are better-preserved than typical of this issue. NGC ID# 253V, PCGS# 7090

**1879-O Morgan Dollar, MS65+
Condition Rarity**

- 5220 1879-O MS65+ PCGS. CAC.** The 1879-O Morgan dollar is easy to locate in lower Uncirculated grades, but the issue is slightly scarce in MS65 condition and finer grades are rare. This high end Gem is sharply detailed and lightly marked, with lustrous surfaces that show a few highlights of champagne-gold toning. PCGS has graded 14 numerically finer examples (12/13). NGC ID# 253V, PCGS# 7090

**1879-O Morgan Dollar, MS64
Elusive Deep Mirror Prooflike Example**

- 5221 1879-O MS64 Deep Mirror Prooflike PCGS.** This sharply detailed branch mint specimen displays richly frosted design elements and deeply reflective fields, with only minor signs of contact. A few hints of lavender enliven the pleasing surfaces. Housed in a green label holder. Population: 30 in 64 (1 in 64+) Deep Mirror Prooflike, 3 finer (12/13). NGC ID# 253V, PCGS# 97091

**1882-CC Morgan Dollar, MS66+
Deep Mirror Prooflike Registry Set Candidate**

5222 1882-CC MS66+ Deep Mirror Prooflike PCGS. CAC. The 1882-CC Morgan dollar was heavily represented in the GSA holdings and attractive high-quality examples are not too difficult to locate. This high-end Premium Gem stands out for its richly frosted design elements and deeply mirrored fields that show dramatic elements of contrast when the coin is tilted in the light. Population: 66 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer (12/13). NGC ID# 254B, PCGS# 97135

**1883-S Dollar, MS64
Rare Any Finer**

5223 1883-S MS64 NGC. The 1883-S Morgan dollar is surprisingly elusive in high grade, considering its mintage that exceeds 6.2 million pieces. Near-Gems are scarce, but higher grades are quite rare. Both sides are awash with bright luster and are sharply struck, including relatively strong detail in the central areas. Whispers of reddish-gold cling to the rims. NGC ID# 254K, PCGS# 7148

**1884-S Morgan, MS61
Elusive Early S-Mint**

5224 1884-S MS61 ANACS. The 1884-S Morgan is among the most elusive of the early-series S-mint issues in Mint State. This example is frosty on both sides, untuned silver-white on the reverse and with a light wash of gold on the obverse. A few thin abrasions account for the grade, including a series of tiny reeding marks near stars 1-3. Nice for the grade.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 254P, PCGS# 7156

**1887-O Morgan Dollar, MS65+
Seldom Encountered Any Finer**

5225 1887-O MS65+ PCGS. The 1887-O Morgan dollar is slightly scarce in MS65 condition and the population drops off dramatically at the next grade level, making this high-end Gem especially attractive from the standpoint of quality verses value. The design elements are well-detailed and the creamy lustrous surfaces show few signs of contact. PCGS has graded nine numerically finer examples (12/13). NGC ID# 2552, PCGS# 7176

**1888 Dollar, Sharply Struck MS67
An Important Condition Rarity**

5226 1888 MS67 PCGS. The generous mintage exceeding 19 million pieces ensures the ready availability of the 1888 Morgan dollar through the Premium Gem level of preservation. The issue is conditionally rare in Superb Gem, where PCGS and NGC have graded about 100 pieces and only one finer. Bright luster endows the silvery surfaces that exhibit sharply struck design elements. Wonderfully preserved throughout. Population: 28 in 67, 0 finer (12/13). NGC ID# 2555, PCGS# 7182

**1888 Silver Dollar, MS67
Frosty and Untoned**

5227 1888 MS67 PCGS. Generous cartwheel luster complements surfaces that are untuned and virtually free of noticeable contact, making this piece among the few finest certified at PCGS. A couple of tiny reeding marks in the left obverse field before Liberty's profile are well within the context of the grade. The strike is sharp on the hair over the ear as well as on the reverse. Population: 28 in 67, 0 finer (12/13). NGC ID# 2555, PCGS# 7182

**1888-O ‘Scarface’ Dollar, VAM-1B4, MS62
Late-State Obverse, Clashed Reverse**

- 5228 1888-O Scarface MS62 ANACS. VAM-1B4.** Late Die State. Although certified merely as VAM-1B on the ANACS slab this is the true Scarface variety, showing both the obverse crack running from the upper left, all the way through the face and down to the rear neck, as well as the reverse “bearded eagle” and “extra wing feather” features from die clashing. This is a lovely, lustrous silver-gray example with a touch of rim toning, a late-state example of the “Scarface,” which brings far more than the early-state coins. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 133918*

**1888-O ‘Scarface’ Silver Dollar, MS62
VAM-1B4, Dramatic Die State**

- 5229 1888-O Scarface MS62 PCGS. VAM-1B4.** A Top 100 Variety. The final and most prominent die state of the famous “Scarface” variety. The heavy diagonal crack extends from 10 o'clock to the bust truncation and includes Liberty's cheek and neck. Clash marks beneath the eagle's jaw correspond to another numismatic nickname, the “Bearded Eagle.” A lustrous example with light gray toning and the softness of strike at the centers usual for New Orleans issues of the era. PCGS# 133918

**1888-S Morgan Dollar, MS66
Lavish Obverse Patina**

- 5230 1888-S MS66 PCGS.** The 1888-S Morgan dollar issue is popular even in lower grades, but above the Gem level, the certified populations thin out markedly. This Premium Gem PCGS example is one of only 22 such submissions at that service (including one MS66+), and only three are numerically finer in MS67 (12/13). The reverse of this pristine coin is still mostly untinted silver-gray, accented with glints of charcoal, cinnamon, and lilac; the obverse, however, is lavishly patinated in a wide palette of iridescent colors, plum, rose, aqua, and gold all appearing. There are no singular signs of contact, but light roller marks show on the cheek and above Liberty's ear. An extremely attractive condition rarity and a prize for color aficionados. NGC ID# 2557, PCGS# 7186

1889-CC Dollar, Minimally Marked XF45

- 5231 1889-CC XF45 PCGS.** Soft gray patination bathes the semi-bright surfaces of this Choice XF Morgan. The design elements are well-defined though the central areas reveal the usual weakness. Both sides are minimally marked for a large silver coin than has seen some circulation. NGC ID# 2559, PCGS# 7190

1889-CC Morgan, XF45
Attractive Collector-Grade Example

- 5232** 1889-CC XF45 PCGS. CAC. This attractive collector-grade 1889-CC offers dove-gray fields contrasting against lighter silver-gray high points on each side. A few distributed marks are in concert with the grade but not in the least bothersome. This piece with the CAC approval should see considerable interest among series fans. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, Lustrous AU55

- 5233** 1889-CC AU55 PCGS. Slight color change on the cheek and hair above the ear and other high points is indicative of the light wear. Much luster nonetheless still appears on the grayish-pink surfaces of this Choice AU 1889-CC Morgan dollar. Ticks and reeding marks on Liberty's cheek are minor, and many a Morgan specialist will consider making a home for this attractive piece in their collections. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, MS61 Prooflike
Key Carson City Issue, Top-Notch for the Grade

- 5234** 1889-CC MS61 Prooflike NGC. A relatively large percentage of Mint State survivors of the rare 1889-CC silver dollar are Prooflike, and collectors eagerly snap up such coins both for their innate beauty as well as their low survival in absolute terms. The mintage was recorded as 350,000 pieces, but numismatist Rusty Goe believes that all but 25,000 to 100,000 examples of the 1889-CC were later melted. Blatant field-device contrast is the hallmark of this Mint State Prooflike coin, an untuned silver-white example that boasts high-end eye appeal for the assigned grade. A few scattered marks appear on each side, but this piece is top-notch overall. Census: 22 in 61 Prooflike, 72 finer (12/13).
Ex: Minot Collection (Stack's, 5/2008), lot 1806, flip accompanies.
From The Teich Family Collection. NGC ID# 2559, PCGS# 7191
-

**1889-CC Dollar, MS63 Deep Mirror Prooflike
Sharply Struck, Mostly Brilliant**

- 5235 1889-CC MS63 Deep Mirror Prooflike NGC.** In his *Guide Book* on the subject, Q. David Bowers calls the 1889-CC dollar “one of the great keys to the Morgan series, and among Carson City issues it is far and away the most elusive.” Bowers goes on to discuss the supply-demand ratio that makes the 1889-CC so popular: “In comparison to the demand for them, examples are rare in all grades. However, for those who can afford one, attractive MS-63, 64, and 65 coins appear on the market with regularity, and gorgeous DMPL specimens are sometimes offered.” For a Morgan dollar issue with so few Mint State coins available, comparatively speaking, there is a generous proportion of Prooflike and Deep Mirror Prooflike examples in the surviving population. This is one such piece. The fields display remarkable depth of reflectivity and frosted motifs on each side. As expected for the issue, there are numerous small abrasions peppered throughout the fields. The strike is strong throughout. All in all, a highly attractive example of this key issue to the Morgan series. NGC ID# 2559, PCGS# 97191

**1889-O Dollar, Lustrous MS65
Rare Any Finer**

- 5236 1889-O MS65 PCGS.** Morgan dollars struck in 1889 from the New Orleans Mint are scarce, and higher-grade specimens are quite rare. The lustrous surfaces of this Gem display whispers of gold or reddish-gold at the margins, being slightly more extensive and deeper on the reverse. Typically struck, in that the centers are weak. NGC ID# 255A, PCGS# 7192

1889-O Dollar, Lustrous MS65

- 5237 1889-O MS65 PCGS.** Reddish-gold, electric-blue, and lavender toning clings to the margins of this Gem, ceding to silver-gray in the centers. The design elements are well-struck except for the usual weakness in the centers. Lustrous surfaces reveal some light, grade-consistent marks. PCGS has seen just 10 pieces finer (12/13). NGC ID# 255A, PCGS# 7192

**1889-O Morgan Dollar, MS65
Bold Mint Luster**

- 5238 1889-O MS65 NGC.** The strike is sharp for this Southern branch mint, and the coin displays bold overall luster for additional visual impact. With 11.8 million pieces struck, the 1889-O Morgan is readily available in lower grades but rapidly becomes scarce in Choice condition and above. Census: 53 in 65 (1 in 65+), 7 finer (12/13). NGC ID# 255A, PCGS# 7192

1889-O Dollar, MS65
Gorgeous Toning, Seldom Seen Finer

- 5239 1889-O MS65 PCGS.** The 1889-O Morgan dollar issue is quite available in lower Mint State grades, fairly elusive in Gem grade, and seldom seen finer. This colorfully toned MS65 PCGS-graded example offers rich luster under a moderate layer of amber-gold, blue, lavender, and pinkish hues on both sides. The strike is a bit soft on the hair over Liberty's ear and the reverse high points, but there are few mentionable marks, and the gorgeous color will make this a prized Morgan for many eager collectors. PCGS has seen 10 numerically finer (12/13). NGC ID# 255A, PCGS# 7192

1890-CC Dollar, MS65
Rare Any Finer

- 5240 1890-CC MS65 PCGS.** Cobalt-blue, reddish-gold, and crimson toning appears throughout various locations on this lustrous Gem. The design elements are relatively well-struck, including partial detail in the hair over Liberty's ear and the eagle's breast feathers. Well preserved throughout. Difficult to locate any finer. NGC ID# 255D, PCGS# 7198

1890-CC Dollar, Untoned MS65

- 5241 1890-CC MS65 PCGS.** Generous luster prevails on each side of this untuned silver-white Gem 1890-CC certified by PCGS. While examples of the issue are available in this grade, finding and acquiring a nicer one will be a long and expensive search. This piece will fit nicely into a set of mostly untuned Morgans. NGC ID# 255D, PCGS# 7198

1890-S Dollar, Toned MS66+

- 5242 1890-S MS66+ PCGS. CAC.** The 1890-S Morgan, from a mintage that exceeds 8 million pieces, is scarce in Premium Gem and rare any finer. This MS66+ example displays a melange of cobalt-blue, orange, and purple toning on highly lustrous surfaces. Well-struck design elements and impeccable preservation round out the coin's fantastic eye appeal. Population: 7 in 66+, 6 finer (12/13). NGC ID# 255F, PCGS# 7202

1891 Dollar, Toned MS65
Rare in Higher Grades

- 5243 1891 MS65 PCGS.** Beautiful toning consisting of medium-intensity cobalt-blue, lavender, and orange-gold runs over the obverse. The reverse is similar except it lacks the latter color. Semiprooflike fields are evident, especially on the obverse. Typically struck in that the centers are weak, though there is a modicum of detail in the hair over Liberty's ear. Both sides are nicely preserved. Scarce in Gem and extremely rare any finer. NGC ID# 255G, PCGS# 7204

1891-CC Morgan, Silver-White MS65
Generous Luster

- 5244 1891-CC MS65 PCGS.** Generous cartwheel luster rolls around each side of this frosty, untuned silver-white Gem 1891-CC Morgan dollar. A loupe of reveals only a few scattered marks within the context of the grade, chiefly a couple of small ticks on the rear of Liberty's cap. A well-struck and great-looking example of this late Carson City issue. PCGS has seen only 29 submissions numerically finer (1/14). NGC ID# 255H, PCGS# 7206

**1891-CC Dollar, MS65
Vibrant Color and Luster**

- 5245 1891-CC MS65 PCGS. CAC.** The obverse of this late-date Carson City dollar displays patches of antique-gold, green-blue, and gray, while the reverse offers similar hues at the outer zones contrasted against a small silver interior. The strike is typically soft on the hair over Liberty's ear but is better-detailed elsewhere. Generous cartwheel luster shines powerfully through the patina. NGC ID# 255H, PCGS# 7206

**Gem 1891-O Dollar
Above-Average Strike**

- 5246 1891-O MS65 PCGS.** The typical 1891-O Morgan dollar shows extreme weakness over Liberty's ear. The present Gem, however, exhibits better detail than usually encountered, though scuffiness on the slab makes this difficult to see. Lustrous, silvery surfaces are minimally marked. The 1891-O is virtually unobtainable any finer. NGC ID# 255J, PCGS# 7208

**1891-S Dollar, MS66+
Sharply Defined, Minimally Abraded**

- 5247 1891-S MS66+ PCGS. CAC.** Soft sky-blue, lavender, and yellow-gold patina is more evident on the obverse of this S-mint Morgan. The design elements are well-impressed, including fairly strong detail on the eagle's breast feathers. Lustrous surfaces are minimally marked. Population: 4 in 66+, 7 finer (12/13). NGC ID# 255K, PCGS# 7210

**1892 Morgan Dollar, MS65+
Only Four Finer Coins at PCGS**

- 5248 1892 MS65+ PCGS.** From a smallish mintage of just over 1 million pieces, the 1892 Morgan dollar is scarce in MS65 condition, and finer specimens are very rare. This high-end Gem is a good balance of quality and value, with well-detailed design elements and vibrant mint luster throughout. PCGS has graded four numerically finer examples (12/13). NGC ID# 255L, PCGS# 7212

1892-CC Dollar, Brightly Lustrous MS65

- 5249 1892-CC MS65 PCGS. CAC.** Peripheral gold-orange patination is more evident on the obverse of this CC-mint Gem. Bright luster emanates from both sides, each of which exhibits well-struck design elements, including the hair over Liberty's ear and the eagle's breast feathers. A few minor grazes do not detract. Difficult to obtain any finer. NGC ID# 255M, PCGS# 7214

1892-O Dollar, Typically Struck MS65

- 5250 1892-O MS65 PCGS.** As with the majority of 1892-O Morgan dollars, the centers are ill-defined on this Gem example, but the remaining design elements exhibit nice detail. Just a hint of gold-tan color shows up on the lustrous surfaces that reveal a few light grade-consistent marks. PCGS and NGC each have seen a mere five examples finer (12/13). NGC ID# 255N, PCGS# 7216

1892-O Morgan Dollar, MS65
Conditionally Very Rare in Finer Grades

5251 1892-O MS65 PCGS. The 1892-O Morgan dollar enjoyed an adequate mintage of 2.7 million pieces, but the issue is scarce in MS65 condition, and finer examples are very rare. This delightful Gem displays well-detailed design elements and vibrant mint luster on both sides. The creamy surfaces are remarkably free of contact marks and luster grazes. PCGS has graded five numerically finer examples (12/13). NGC ID# 255N, PCGS# 7216

1892-O Morgan Dollar
MS64 Deep Mirror Prooflike

5252 1892-O MS64 Deep Mirror Prooflike ANACS. Certified in an old ANACS holder, this piece has every bit the eye appeal and quality of currently certified MS64 Deep Mirror Prooflike dollars from any of the grading services. The fields fully mirrored and the devices are lustrous, without blemishes on either side. Fully brilliant silver is framed with a gentle ring of peripheral gold toning. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 255N, PCGS# 97217

1893-CC Dollar, MS63
Prize for Toning Enthusiasts

5253 1893-CC MS63 PCGS. The 1893-CC is the last-year Carson City Morgan dollar, a popular semikey in the series, usually found in circulated grades. This vividly toned Select example shows central pink and violet hues ceding to medium blue at the margins on each side. A few thin marks appear on Liberty's cheek within the toning, but this piece will be a prize for color aficionados. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, Minimally Marked MS64
Extremely Rare Any Finer

5254 1893-CC MS64 PCGS. The 1893-CC was the last of the Morgans produced at the Carson City Mint, making them popular with collectors. Several hundred thousand of the 677,000-piece mintage are thought to have been melted under the 1918 Pittman Act. Moreover, mint State examples are known for being heavily bagmarked, consequently, most are in the lower levels of Uncirculated.

Choice specimens such as the present MS64 are the finest most collectors can hope to acquire, and even these will require diligent searching. PCGS and NGC combined have graded fewer than 30 pieces finer (12/13). A few grazes on Liberty's cheek and neck prevent Gem classification, but the lustrous surfaces exhibit well-struck devices, including above-average definition in the hair over the ear and on the eagle's breast feathers. A touch of light gold color hugs the margins. NGC ID# 255S, PCGS# 7222

1893-S Dollar, VF20
Excellent Choice for a Mid-Grade Morgan Set

5255 1893-S VF20 PCGS. The silver-gray surfaces of this key-date example display hints of brightness in the interstices of the appropriately defined design elements. The few minute marks are less than what might be expected for a coin having seen moderate circulation. A pleasing specimen for a mid-grade Morgan collection. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, VF20
Key Issue, Original Patina

5256 1893-S VF20 NGC. Natural, old-silver surfaces display smooth wear and nice details for this key Morgan dollar issue. From the low mintage of 100,000 coins, most survivors are in similar technical grade as this coin, but few have the original appeal of this example. Only scattered abrasions are visible on the coin — most are muted by wear and there are no heavy marks from circulation. The prominent rims are wide and pleasing with no defects. An excellent example for the grade. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, Bright VF25

5257 1893-S VF25 PCGS. The bright silvery surfaces of this VF25 example display traces of mint luster in some of the recessed areas, and the design features are appropriately defined. The most notable abrasions are a couple of lengthy linear marks on Liberty's cheek. All in all, this is a decent example of this key date. NGC ID# 255U, PCGS# 7226

1893-S Dollar, VF30
A Nice Mid-Grade Example

5258 1893-S VF30 PCGS. Whispers of electric-blue and olive-green gravitate to the margins of this key-date representative, joined in the reverse center by deep lavender. The design elements are strongly defined despite high-point wear. Neither side reveals serious abrasions. A nice specimen for a mid-grade Morgan collection. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, VF30
The Key to the Series

5259 1893-S VF30 PCGS. A natural light gray example of this important Morgan dollar key, the business-strike issue that appears on more collector want lists than any other issue. The recorded mintage was 100,000 coins, and most of the survivors from that production are in low grades. This pleasing Choice VF example has natural medium gray surfaces with lighter golden-tan high points. NGC ID# 255U, PCGS# 7226

1893-S Morgan, VF35
Eye-Appealing Key Date

5260 1893-S VF35 PCGS. This Choice VF 1893-S Morgan shows a typical grade for the issue. Much eye appeal remains on pinkish-gray surfaces that show hints of charcoal-gray in the protected areas around the devices. A tick or two on Liberty's cheek and in the obverse field are undistracting and in accord with the grade. An issue that is perennially popular. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Minimally Marked XF45
Excellent Choice for a High-Grade Set

- 5261 1893-S XF45 NGC.** Most surviving examples of the key-date 1893-S Morgan are found in Very Fine grades. Our present Choice Extremely Fine offering displays light silver-gray surfaces that possess luster in the recessed areas. Relatively strong definition is apparent on the design elements, and even the hair over Liberty's ear retains a modicum of detail despite high-point wear. While a few unobtrusive, trivial marks are present, this coin is remarkably clean for a large silver dollar that has seen some circulation. An excellent choice for a high-grade Morgan dollar collection. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Almost Uncirculated
Nearly Brilliant, Lightly Marked

- 5262 1893-S AU50 NGC.** Even though the 1893-S Morgan dollar is the low-mintage winner in the entire collection of business strikes — assuming one discounts the nonexistent 1895 business strikes — they still seem to be rarer than even their low mintage would indicate. The generally acknowledged mintage is an even 100,000 coins, and most today are circulated down to the Very Fine grade range (VF20-VF35). Even so, it is entirely possible that some bags, perhaps a few dozen, remained in storage, likely Uncirculated coins, until they were caught up in the Pittman Act meltings after 1918. Of the survivors, this is a pleasing AU example that is mostly brilliant with a thin outline of toning around the devices. Slight luster remains, also surrounding the devices. Lightly marked for the grade. NGC ID# 255U, PCGS# 7226

1894 Morgan Dollar, Well-Struck MS63

- 5263 1894 MS63 PCGS.** Bright luster emanates from this Select Morgan. Both sides are essentially untoned and exhibit well-struck design elements, including good detail in the hair above Liberty's ear and the eagle's breast feathers. Some minute marks scattered about are in concert with the designated grade. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS64
Hotly Pursued Low-Mintage Issue**

- 5264 1894 MS64 PCGS.** The 1894 Morgan dollar is a hotly pursued low-mintage P-mint issue from within the series, and the near-Gem level is the highest grade that most collectors can hope to attain for the issue. At first glance the appealing surfaces on this MS64 PCGS-graded piece appear merely powder-gray, but then one picks up the slight tinges of pink and gold over each side, more prominent on the reverse. Few relevant contact marks appear for the grade, and generous mint luster prevails throughout both sides. PCGS has certified 26 examples numerically finer (12/13).
Ex: FUN Signature (Heritage, 1/2011), lot 6108. NGC ID# 255V, PCGS# 7228

1894 Silver Dollar, Frosty MS64+

- 5265 1894 MS64+ PCGS.** The 1894 Philadelphia-issue Morgan dollar, with its memorably low mintage of a tad more than 110,000 coins, is near the top of many a collector's want list in higher Mint State grades. Even examples in the lower circulated grades are quite popular, if far more available. This near-Gem certified by PCGS with the Plus designation is free of all but a couple of minor abrasions on Liberty's cheek and chin, quite undistracting but perhaps preventing an MS65 grade. Frosty, untoned, silver-white surfaces show generous luster, a good strike, and bold eye appeal. Population: 11 in 64+, 26 finer (12/13). NGC ID# 255V, PCGS# 7228

**1895-O Morgan, MS60
Lustrous Silver-White Rarity**

- 5266 1895-O MS60 ANACS.** Scattered small- to medium-sized marks appear on each side of this better-date O-mint dollar, determining the grade but failing to defeat the abundant luster that appears on silver-white surfaces lightly accented with rose. Any Mint State 1895-O Morgan dollar is a rarity and a coin that will pique the interest of multiple bidders.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255Y, PCGS# 7236

1895-S Dollar, MS64
Elusive Any Finer

5267 1895-S MS64 PCGS. CAC. With a mintage of only 400,000 pieces, the 1895-S is the scarcer of two business strike varieties known for the year. (The Philadelphia issue of the same date, if it ever existed in business-strike format, has not been seen and must be presumed lost.) This near-Gem example is distinctly toned at the peripheral obverse with dapples of crimson. The rest of the coin is largely silver with just a hint of gold visiting the reverse rim. A handful of small marks on the portrait account for the grade. PCGS has graded only 38 examples as MS65 or finer (1/14). NGC ID# 255Z, PCGS# 7238

1895-S Dollar, MS65
A Semiprooflike Beauty

5268 1895-S MS65 NGC. Most examples of the 1895-S dollar show extensive bagmarks and other abrasions, but this is a relatively mark-free Gem that is particularly smooth on Liberty's cheek. Just as important are this coin's rather unusual surfaces. The typical 1895-S, like many of its predecessors, shows thick mint frost that liberally coats the devices. Not so this semiprooflike piece, minimally toned save for a glimmer of green-gold at the margins. The strike is excellent, as usually seen. An important condition rarity in addition to the overall scarcity that comes from a mintage of only 400,000 pieces. Census: 10 in 65, 4 finer (11/13).
Ex: Long Beach Signature (Heritage, 5/2009), lot 1200; Los Angeles Signature (Heritage, 8/2009), lot 1178. NGC ID# 255Z, PCGS# 7238

**1896 Dollar, MS67+
Spectacular Obverse Rainbow Toning**

- 5269 1896 MS67+ PCGS. CAC.** A wonderful rainbow of colors covers the obverse, while the reverse is brilliant. The surfaces are impressively free from abrasions as well, and the mint luster is richly frosted. There are a number of MS67 examples certified of the 1896 dollar, but only two are finer at PCGS and none are finer at NGC (1/14). NGC ID# 2562, PCGS# 7240

**1896-O Dollar, MS63
Satin Example, Seldom Seen Finer**

- 5270 1896-O MS63 PCGS.** Having a healthy mintage of 4.9 million pieces and plentiful survival, the 1896-O Morgan dollar issue is plentiful in circulated and lower Mint State grades. The Select grade of the present piece is far more obtainable than the handful of higher-graded coins. This untuned silver-white coin boasts satiny mint luster over surfaces that show some scattered luster breaks and minor grazes, in concert with the grade but none singularly distracting. PCGS has seen only 33 submissions in integrally higher grades, most of them in MS64 (1/14). NGC ID# 2563, PCGS# 7242

**1898 Morgan Dollar, MS67
Untoned and Near-Perfect, Ex: Jackson Hole**

- 5271 1898 MS67 PCGS.** This Superb Gem is one of the finest examples known of this otherwise common date. While the 1898 is available in nearly any desired grade, that was not always the case. In the early and middle 20th century, it was considered scarce, as much of the original mintage was stored in Treasury vaults awaiting distribution in the early 1960s. Both sides are well-detailed and display frosty silver luster with exceptional eye appeal. The near-perfect surfaces show no evidence of toning on either side. Population: 55 in 67 (3 in 67+), 0 finer (12/13).
Ex: Jackson Hole Collection, Dallas Signature (Heritage, 4/2007), lot 92, which realized \$4,887.50. NGC ID# 2568, PCGS# 7252

**1900 Dollar, Vibrant MS67+
One of Three Finest at PCGS**

- 5272 1900 MS67+ PCGS.** The 1900 Morgan is readily available through MS65, and can even be acquired in Premium Gem with minimum trouble. Vibrant luster exudes from the untuned surfaces of this high-end Superb Gem. Both sides have been well cared for. Population: 3 in 67+, 0 finer (12/13). NGC ID# 256E, PCGS# 7264

**1901 Dollar, Toned MS64
An Important Condition Rarity**

- 5273 1901 MS64 PCGS.** The 1901 Morgan can be located in circulated grades but is very challenging in Mint State, especially in near-Gem and finer. PCGS and NGC have certified fewer than 50 examples in MS64 and just six specimens higher.

Cobalt-blue, lavender, and gold-orange patination around the borders frames the brilliant centers. The design elements are generally well-struck, with partial detail in the hair over Liberty's ear. Lustrous surfaces reveal just a few minute marks that preclude Gem classification. Population: 31 in 64, 3 finer (12/13). NGC ID# 256J, PCGS# 7272

1903-S Dollar, MS64
Lustrous and Minimally Marked

5274 1903-S MS64 PCGS. CAC. Whispers of faint cobalt-blue and reddish-gold patina are somewhat more extensive and slightly deeper on the reverse of this near-Gem. The design elements are well-struck with some detail showing in the hair over Liberty's ear. Lustrous surfaces reveal a few grade-limiting marks. NGC ID# 256T, PCGS# 7288

1904-S Silver Dollar, MS64
Lovely Toning and Good Preservation

5275 1904-S MS64 PCGS. The 1904-S Morgan is the last S-mint in the series save for the separate-subtype 1921-S, and it is among the most elusive San Francisco issues from the early 20th century. This near-Gem exhibits lovely toning, chiefly pinkish-gray with hints of other iridescent hues. The surfaces show only scattered minor marks that determine the grade, but the eye appeal is high-end. NGC ID# 256W, PCGS# 7294

1904-S Dollar, MS64
Exceptionally Smooth Reverse

5276 1904-S MS64 PCGS. The obverse displays rich caramel-gold toning, although the reverse has only a hint of patina. Lustrous and nicely struck with a pristine reverse and a few minor marks on the left obverse. Like other San Francisco issues near the turn of the century, the 1904-S is challenging to find in Choice Mint State. NGC ID# 256W, PCGS# 7294

1904-S Dollar, MS65
Rare Any Finer

5277 1904-S MS65 NGC. The 1904-S Morgan dollar is elusive in high grade. Gem condition is the finest most collectors can hope to obtain as finer examples are quite rare. Lustrous surfaces display occasional hints of light golden-gray. The centers are weak as typically seen. Census: 30 in 65, 6 finer (12/13). NGC ID# 256W, PCGS# 7294

1904-S Morgan Dollar, Brilliant MS65
Elusive Issue in High Grade

5278 1904-S MS65 PCGS. The dollar denomination was discontinued in 1904, and not minted again until 1921. The Western United States had a "hard money" economy, and examples of the 1904-S were released into circulation over a long period of time. As a result, few examples were left in government storage vaults by the time of the great Treasury releases, and high-grade examples are quite elusive today. The present coin is a well struck Gem, with brilliant surfaces and vibrant, cartwheel mint luster. Only 11 coins have been certified in higher numeric grades at PCGS (12/13). NGC ID# 256W, PCGS# 7294

1904-S Silver Dollar, MS65
Rare in Gem and Finer Grades

5279 1904-S MS65 PCGS. CAC. Hints of delicate gold toning appear over the frosty silver luster on both sides of this Gem Morgan dollar. The 1903-S and 1904-S Morgans both had moderate mintages with rather low survival rates, and are scarce in higher Mint State grades. PCGS has only certified 11 finer examples (12/13). NGC ID# 256W, PCGS# 7294

PROOF MORGAN DOLLARS

1883 Dollar, Toned PR66

- 5280 1883 PR66 NGC.** A degree of field-motif contrast is apparent on this Premium Gem proof when the coin is rotated slightly beneath a light source, especially on the reverse. Orange-gold and lavender toning on the obverse cedes to soft bluish-green on the reverse. The design elements are sharply struck throughout. Census: 20 in 66, 17 finer (1/14). NGC ID# 27Z7, PCGS# 7318

1885 Morgan Dollar, PR67 Cameo Seldom-Seen Quality

- 5281 1885 PR67 Cameo NGC.** Flashy cameo field-device contrast and pristine preservation make this Superb Gem proof 1885 silver dollar among the few finest survivors of the issue. NGC has seen six submissions in PR67 Cameo (including one PR67 ★ Cameo), with four finer; curiously, PCGS has never certified a Cameo in the PR67 grade level (12/13). The silver-gray surfaces are highly reflective but virtually untoned, each side easily producing a “silver on black” contrast as the coin is rotated under a light. The bold proof strike and lack of mentionable marks complete the high eye appeal that is evident throughout. Seldom-seen quality. PCGS# 87320

PEACE DOLLARS

1921 Peace Dollar, Sharply Struck MS66

- 5282 1921 MS66 NGC.** This Premium Gem exhibits one of the sharpest strikes we have seen on a 1921 High Relief Peace dollar, with the central obverse and reverse showing excellent definition. Both sides have soft, frosty silver luster beneath subtle tan toning. NGC has certified only six finer examples (12/13).
Ex: Central States Signature (Heritage, 4-5/2009), lot 3263. NGC ID# 2U4E, PCGS# 7356

1924-S Dollar, Minimally Abraded MS65 Above-Average Strike and Luster

- 5283 1924-S MS65 PCGS.** It is difficult to find a highly attractive 1924-S Peace dollar as the issue is plagued by poor strikes, lackluster surfaces, and excessive bagmarks. This Gem displays pleasing luster and an above-average strike. The few minute marks are undistracting and within the parameters of the designated grade. Freckles of gray bounce across both sides, somewhat more so on the obverse. Housed in a first generation holder. Population: 77 in 65 (1 in 65+), 5 finer (12/13). NGC ID# 257K, PCGS# 7364

1928 Peace Dollar, MS65 Prized Low-Mintage Issue

- 5284 1928 MS65 PCGS.** The 1928 Peace dollar claims the lowest business-strike mintage of the series at 360,649 pieces. The date is only scarce in MS65 condition, but finer specimens are very rare. The present coin offers well-detailed design elements and well-preserved lustrous surfaces under shades of pleasing golden-brown toning. PCGS has graded 12 numerically finer examples (12/13). NGC ID# 257V, PCGS# 7373

1934-S Dollar, Lightly Toned MS64

5285 1934-S MS64 PCGS. The 1934-S is the key to the Peace dollars series. In addition to having one of the smaller mintages (1.011 million pieces), many were released into circulation, making Mint State pieces scarce to rare. Whispers of sky-blue and yellow-gold reside on the lustrous, minimally marked surfaces of this near-Gem and an impressive strike imparts strong definition to the design features. NGC ID# 257Z, PCGS# 7377

PROOF PEACE DOLLAR

1922 Satin Proof Peace Dollar, Very Rare Finish

5286 1922 — Cleaned — Satin Proof ANACS. B2 Reverse. Housed in a small-sized holder and designated as genuine without a numerical grade. In his 1988 *Encyclopedia*, Breen states that "three satin-finish proofs" are known for the 1922 dollar. In his 1977 proof *Encyclopedia*, he elaborates: "rims are build up far more strongly than on business strikes. Inner coronet line exceptionally strong. Full central hair, full feathers, even on upper wing and breast." This silver dollar has light pastel straw-gold and ice-blue toning. Bagmarks are fully absent and the strike is precise, but wispy horizontal hairlines cross the reverse. Personal inspection by the specialist is recommended.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

EISENHOWER DOLLAR

1977-D Eisenhower Dollar, MS63

Struck on a 40% Silver Planchet, Transitional Alloy Error

5287 1977-D — Struck on a 40% Silver Planchet — MS63 NGC. Breen-5774. 24.9 gm. A clad Ike should weigh 22.7 gm. Walter Breen states in his 1988 *Encyclopedia* that about 15 pieces are known. Struck on planchets intended for 40% silver San Francisco Bicentennial Ike dollars. A lustrous and nicely struck mint error with peripheral straw-gold toning and a few minor obverse field grazes.

EARLY PROOF SET

1899 Six-Piece Proof Set, PR64-67 All NGC Certified

5288 1899 Six-Piece Proof Set PR64-67 NGC. The set includes:

Cent PR65 Red NGC. Bright, even red patina is seen over each side. The fields are moderately reflective on the obverse, deeply so on the reverse. The only mentionable flaw is a small carbon spot in the field just below the chin of the Indian.

Nickel PR64 NGC. Good reflectivity on each side, the grade would be even higher were it not for some incidental contact in the left obverse field and a few small specks of carbon.

Dime PR67 NGC. A strong case for a Cameo designation could be made, the visual impact is perhaps restrained by the unusual streaks of multicolored iridescence on each side. Technically, there is little to comment upon.

Quarter PR67 NGC. Well-matched on each side with deep rose patina over most of the surfaces and surrounded at the margins by deep blue toning. A sharply defined, problem-free proof striking.

Half Dollar PR64 NGC. Again, like the dime above, a convincing case could be made for cameo contrast. The centers are just shy of brilliant with pale rose ceding to slightly deeper hues toward the margin, and a thin ring of blue covering the denticles. A couple of shallow slide marks account for the grade.

Dollar PR66 NGC. Splendid toning is seen over each side with the centers light rose, deepening toward the rims, then the peripheries surrounded by deep blue. We see no technical problems worthy of comment. (Total: 6 coins)

GOLD DOLLARS

1850 Gold Dollar, Conditionally Rare MS65

- 5289 1850 MS65 PCGS.** The 1850 gold dollar is moderately scarce in Mint State but conditionally rare in MS65, and nearly unavailable any finer. The lustrous surfaces of this Gem display yellow-gold patina imbued with splashes of apricot. The design features are sharply struck, and neither side reveals significant abrasions. Population: 16 in 65, 4 finer (12/13). NGC ID# 25BF, PCGS# 7509

1855-C Gold Dollar, Bright AU53

- 5290 1855-C AU53 NGC. Variety 2.** The last 5 in the date is to the right below the A in DOLLAR. The bright honey-gold surfaces display traces of luster in the recessed areas, and the design elements are generally well-impressed except for the usual weakness in Liberty's hair. Neither side reveals serious marks. Census: 25 in 53, 76 finer (12/13). NGC ID# 25C5, PCGS# 7533

1855-O Gold Dollar, AU58 Sole O-Mint Type Two

- 5291 1855-O AU58 PCGS. Variety 2.** The Type Two O-mint dollar displays ample luster for the grade, complementing pleasing green-gold toning and light wear on the high points. A few pinscratches appear in the fields, along with faint hairlines. An attractive example of this popular issue, New Orleans' sole contribution to the Type Two gold dollar. Population: 36 in 58, 34 finer (12/13). Ex: *Dallas Signature* (Heritage, 11/2005), lot 3841. NGC ID# 25C7, PCGS# 7535

1857-C Gold Dollar, MS62 One of the Three Finest Known

- 5292 1857-C MS62 NGC. Variety 1.** The only known die pair for the 1857-C gold dollar was used to coin 13,280 pieces. The 1857-C is the first Type Three Charlotte issue. This is a difficult date in all grades and extremely rare in Mint State. The present MS62 example is one of the three finest seen by either NGC or PCGS. Both sides display considerable yellow-gold luster and an above-average strike on the design elements, though portions of Liberty's hair are soft. A couple of planchet defects are noted on each side, a usual characteristic of this issue. NGC ID# 25CE, PCGS# 7545

1860-D Gold Dollar, AU58
Low-Mintage Dahlonega Issue

5293 1860-D AU58 NGC. Variety 12-P. The 1860-D is a challenging gold dollar for numerous reasons. First, the Dahlonega Mint produced only 1,566 gold dollars this year, the majority of which have failed to survive. Second, the 100-125 examples that are extant are apt to grade no higher than XF45, a reality that makes the 1860-D a conditionally rare issue. Finally, the typical 1860-D gold dollar is a poorly struck, heavily abraded coin that offers limited eye appeal for the collector and considerable difficulty for the professional grader.

These criteria guides our analysis of the present near-Mint example. One of only 50-63 1860-D gold dollars believed extant in AU, this coin displays lightly abraded surfaces whose lack of individually mentionable distractions is noteworthy for the issue. Die damage or clogging has left the U in UNITED diagnostically weak, and the left obverse and reverse rims are incomplete. The remaining features are suitably defined, nonetheless, and both sides show traces of a prooflike finish. Predominantly yellow-gold in color with traces of honey-tan overtones. A pleasing coin for the grade.
Ex: Philadelphia 2000 (Heritage, 8/2000), lot 7145. NGC ID# 25CS, PCGS# 7556

1866 Gold Dollar, MS67 ★ Prooflike
Deeply Mirrored, Strong Die Clashing

5294 1866 MS67 ★ Prooflike NGC. CAC. Production rose to 7,130 pieces after dipping to almost half that amount during the Civil War. Several high-grade Prooflike examples are known, and Garrett-Guth comment that, "The 1866 gold dollar was often struck with fully mirrored prooflike surfaces and can be easily confused with Proofs." This example shows the depth of mirroring they refer to; however, the fields are heavily die clashed which would preclude any confusion with proofs. The strike details are strong overall, and the light reddish-gold surfaces display thick mint frost over the devices. Census: 2 in 67 (2 in 67 ★) Prooflike, 1 finer (12/13). PCGS# 77565

1873 Gold Dollar, MS64
Elusive Closed 3 Variety

5295 1873 Closed 3 MS64 PCGS. With a reported mintage of just 1,800 pieces, the 1873 Closed 3 gold dollar is much more elusive than its Open 3 counterpart. This attractive Choice example exhibits sharply detailed design elements and prooflike yellow-gold surfaces that show only minor signs of contact. Population: 7 in 64, 4 finer (12/13). NGC ID# 25DA, PCGS# 7574

1875 Gold Dollar, MS61
Well-Known, Low-Mintage Rarity

- 5296 1875 MS61 PCGS.** The 1875 gold dollar is a famous key date, from a minuscule mintage of just 400 pieces. The present coin is a sharply rendered MS61 example, with brightly reflective, prooflike fields and frosty devices. The surfaces are an attractive greenish-gold color. Population: 5 in 61, 28 finer (12/13). NGC ID# 25DD, PCGS# 7576

1879 Gold Dollar, Reflective MS67
Seldom Located in Such High Grade

- 5297 1879 MS67 PCGS.** Even though the mintage was remarkably low with only 3,000 pieces struck, a considerable number of Uncirculated 1879 gold dollars are known today. However, this is one of only six MS67 pieces so graded at PCGS (12/13). The obverse fields are deeply mirrored, and frosted devices are obvious on each side. Even orange-gold color is seen across the surfaces, and only minor surface flaws can be seen with a magnifier, including an area of porosity toward the top of the reverse. NGC ID# 25DH, PCGS# 7580

1880 Gold Dollar, MS67
Pristine Prooflike Surfaces

- 5298 1880 MS67 PCGS. CAC.** The 1880 gold dollar claims a tiny business-strike mintage of 1,600 pieces, but contemporary numismatists saved a number of high-quality pieces for future generations. This magnificent Superb Gem exhibits sharply detailed design elements and well-preserved prooflike surfaces. PCGS has graded 25 numerically finer examples (12/13). NGC ID# 25DJ, PCGS# 7581

1884 Gold Dollar, Frosty MS67

- 5299 1884 MS67 PCGS.** The business strike mintage of 5,230 coins ensures the scarcity of the 1884 gold dollar in Mint State. Superb Gems such as the present offering are elusive and higher-grade specimens are virtually unobtainable. Frosty surfaces display attractive yellow-gold coloration imbued with traces of lime-green. All design elements are sharply impressed. Population: 16 in 67 (1 in 67+), 5 finer (12/13). NGC ID# 25DN, PCGS# 7585

1887 Gold Dollar, Lightly Patinated MS67

- 5300 1887 MS67 PCGS. CAC.** The 1887 gold dollar is a popular date with a low reported mintage of 7,500 pieces. This Superb Gem displays remarkably smooth, impeccably preserved surfaces that are adorned with variegated light orange-gold and lime-green patination. Frosty luster envelops both sides. Population: 24 in 67, 2 finer (12/13). NGC ID# 25DS, PCGS# 7588

EARLY QUARTER EAGLES

1807 Quarter Eagle, BD-1, Unc Details Eye-Appealing Early Gold Type

- 5301** 1807 — Cleaning — PCGS Genuine. Unc Details. BD-1, R.3. Only a single die pair was apparently used to strike the meager complement of 6,812 quarter eagles for the year 1807 — most of which were probably *dated* 1807, given the Mint's propensity for using and reusing serviceable coinage dies whenever the need arose and the relative abundance of the 1807 issue versus the two known varieties for 1806. The yellow-gold surfaces on this piece may be a bit overbright but there are nonetheless commendable attributes on display. A few scattered contact marks are trivial; the arcing lathe marks visible on the lower bust of Liberty customarily appear on this issue. The strike through the centers is soft, on the eagle's neck, left (facing) wing and lower claws, but much eye appeal remains in spite of the minor distractions. As a nice example of the last-year Capped Bust Right quarter eagle, this piece should appeal to numerous collecting segments. NGC ID# 25FC, PCGS# 7656

1824/1 Quarter Eagle, VG Details Unusual Grade

- 5302** 1824/1 — Rim Damage — PCGS Genuine. VG Details. BD-1, R.5. Few of the 1821 to 1834 quarter eagles entered circulation, and rarely are examples seen with the degree of wear found on this piece. The obverse details are VG, and the reverse details grade Fine. The rim damage mentioned on the PCGS holder is not readily apparent, although the surfaces have myriad marks, especially in the fields of this greenish yellow-gold quarter eagle.

CLASSIC QUARTER EAGLE

1836 Two and a Half, MS63 Block 8, Variety 8

- 5303** 1836 Block 8 MS63 PCGS. Breen-6142, Variety 8, R.3. An original and exceptionally attractive apricot-gold representative. Marks are trivial aside from a solitary field hairline near the nose. The strike is exceptionally sharp for the Classic type, though star 1, the date, and STATES show incompleteness due to minor misalignment of the hammer die. Population: 10 in 63, 13 finer (12/13). PCGS# 97694

LIBERTY QUARTER EAGLES

1840 Quarter Eagle, MS64 Semireflective Beauty

- 5304 1840 MS64 NGC.** Early in the Coronet series there was little demand for the quarter eagle, then the smallest gold denomination in production. A small five-figure mintage occurred in Philadelphia in 1840, followed by the mysterious and famous "Little Princess" of 1841. This near-Gem from the initial issue has luminous lemon-gold interiors with deeper color and a hint of patina at the margins. Semireflectivity is this example's greatest asset, though the interiors show a degree of striking softness, most visibly at the eagle's left (facing) leg. Census: 4 in 64 (1 in 64 ★), 0 finer (1/14). NGC ID# 25GA, PCGS# 7717

1844-D Two and a Half, MS62 Nearly Fully Struck

- 5305 1844-D MS62 NGC. Variety 5-I (formerly 5-H).** An exceptional Dahlonega quarter eagle that has minimal marks and a broad peripheral band of cartwheel luster. The open fields are mildly prooflike. Coined from boldly clashed dies. The strike is uncommonly crisp for the Georgian facility, since only the reverse dentils and the high relief hair curl above the ear lack an absolute impression. Minor, slender strike-throughs (as produced) are noted near stars 2 and 12 and on the reverse beneath the second S in STATES. A mintage of 17,332 pieces confirms the rare date status of this relatively early D-mint emission. Census: 6 in 62, 6 finer (12/13). NGC ID# 25GV, PCGS# 7736

1852-C Two and a Half, AU58 Bright, Problem-Free Surfaces

- 5306 1852-C AU58 PCGS. Variety 1.** Scarce in all grades, the 1852-C quarter eagle had a mintage of only 9,772 pieces. Of that number, Doug Winter estimates that today only 115 to 165 pieces exist in all grades, the vast majority in the VF-XF grade range. This is an upper-end AU example that displays bright orange-gold color and significant mint luster surrounding the devices. Softly struck in the centers, as usually seen. Each side is minimally marked, making this an excellent better-date Charlotte type piece. NGC ID# 25HS, PCGS# 7764

**1857-D Quarter Eagle, MS61
Fully Struck Dahlonega Rarity**

- 5307 1857-D MS61 NGC. Variety 21-N (formerly 20-M).** A moderately prooflike yellow-gold example of this low mintage issue. The strike is essentially full, unusual for the remote Dahlonega facility, which often took a utilitarian approach to striking coins for commerce. The fields are uncommonly free from abrasions, though the portrait has a single slender test mark near the jaw. The San Francisco Mint opened in 1854 and diminished the flow of West Coast bullion to the other branches. Only 2,364 pieces were issued, and survivors are rarer than third-party census reports suggest, due to myriad crackouts and resubmissions over the past three decades. NGC ID# 25JD, PCGS# 7783

**1860-S Quarter Eagle, MS62
Repunched Date**

- 5308 1860-S MS62 PCGS. Breen-6255, "rare."** The 86 in the date shows recutting. Liberty has a small hole within her ear, as made. This deeply toned reddish-orange example is well-struck aside from the eagle's left (facing) leg, and the mintmark is exceptionally sharp, since it was deeply punched into the die. The surfaces are surprisingly smooth for the grade, and the luster is particularly vibrant near the borders. Only 35,600 pieces were struck for this early S-mint issue, and most certified survivors are clustered in XF to AU grades. Population: 4 in 62, 6 finer (12/13). Ex: *National Money Show Signature* (Heritage, 3/2007), lot 1739. NGC ID# 25JU, PCGS# 7793

**1861-S Quarter Eagle, AU58
Seldom Seen, Close to Mint State**

- 5309 1861-S AU58 PCGS.** The low mintage of 24,000 business strikes translated to few survivors of this San Francisco issue in any grade, much less in near-Mint condition such as this gleaming example. This is a high-end coin for the grade, with clean fields and only one or two tiny, insignificant abrasions. The strike is bold except on the eagle, which shows slight weakness on the neck and perhaps a bit of rub from circulation. Brilliant, yellow-gold surfaces are lustrous and near-Mint State. Rare and desirable. Population: 8 in 58, 3 finer (12/13). NGC ID# 25JY, PCGS# 7795

1865 Quarter Eagle, AU58
Low-Mintage Issue of 1,520 Coins

5310 1865 AU58 NGC. For much of its circulating life the quarter eagle denomination was little-loved, scantily manufactured, and seldom-seen, and the effects of Civil War hoarding served only to magnify those tendencies. By 1865 every gold denomination struck in Philadelphia, save for the double eagle, saw tiny mintages. The quarter eagle was struck to the extent of only 1,520 pieces, yet most circulated only lightly. The average grade of certified survivors is a tad below AU53. This near-Mint example is just a hair's breadth away from Uncirculated, a coin that shows some thinning of the luster in the fields rather than notable wear creating the divide. Wheat-gold and reddish-gold areas compete for territory on surfaces that still boast rich luster and only a couple of small contact marks away from the focal points. A well-struck and attractive coin. Census: 7 in 58, 0 finer (12/13). NGC ID# 25K5, PCGS# 7801

1870-S Liberty Head Quarter Eagle, MS61
Rare in Mint State, Strong Appeal

5311 1870-S MS61 PCGS. The resurgence in collector enthusiasm for rare-date gold has helped bring several of the San Francisco Mint rarities to the forefront in the quarter eagle series — this date included. With a low 16,000-piece mintage, the issue is rare in any condition but especially so in Mint State. This MS61 example displays an attractive, antique-gold appearance with orange-gold accents. A bold obverse strike is paired with an above-average reverse, with some softness on the eagle's leg but other feather details more distinct. Bright mint luster resides beneath the attractive patina. A notable rarity, this challenging San Francisco date is seldom offered any finer. Population: 4 in 61, 6 finer (12/13). NGC ID# 25KG, PCGS# 7812

1872 Quarter Eagle, MS61
Rare in Mint State

5312 1872 MS61 NGC. Remarkably few examples of the low 3,000-piece mintage have survived in mint condition. Peach-gold surfaces of this MS61 example display semiprooflike fields that yield mild contrast with the motifs when the coin is tilted under a light source, especially on the reverse. The design elements are well-impressed and the scattered ticks do not unduly disturb. Census: 6 in 61, 5 finer (12/13). NGC ID# 25KK, PCGS# 7815

1873 Open 3 Quarter Eagle
Conditionally Rare MS66

- 5313 1873 Open 3 MS66 PCGS. CAC.** After complaints about the Mint issuing pieces that appeared to be dated 1878 in 1873, the Open 3 logotype went into production. This variant is more available than the Closed 3 of the same year. Smooth, impeccably preserved yellow-gold surfaces display radiant luster and sharply struck design elements. The Open 3 can be located through near-Gem, but higher-grade examples are rare. A shallow linear mark located between Liberty's forehead and stars 4 and 5 might help to identify the coin. Population: 2 in 66, 0 finer (12/13). NGC ID# 25KN, PCGS# 7817
-

PROOF LIBERTY QUARTER EAGLE

1884 Quarter Eagle, Frosted PR66 Cameo

- 5314 1884 PR66 Cameo NGC.** Only 73 proof Liberty quarter eagles were struck in 1884, and the business-strike mintage was less than 2,000 pieces. Probably no more than 30-40 examples of the proof mintage remain extant in all grades. The present coin is a magnificent Premium Gem with sharply detailed, richly frosted design elements that contrast boldly with the brightly mirrored fields. On close inspection, the light greenish-gold surfaces show the orange-peel effect characteristic of the best 19th century gold proofs. This coin should find a home in a fine collection of Liberty quarter eagles. Census: 5 in 66 Cameo (1 in 66 ★ Cameo), 2 finer (12/13). NGC ID# 2887, PCGS# 87910
-

INDIAN QUARTER EAGLES

1909 Quarter Eagle, MS65 Well-Struck and Appealing

- 5315 1909 MS65 PCGS.** The lack of all but the most minuscule marks on the Indian's cheek separates this piece from most of its cohort and confirms the Gem grade level. Auburn-gold surfaces are well-struck throughout as well as uniformly attractive. PCGS has seen only 17 submissions in numerically finer grades (12/13). NGC ID# 288Z, PCGS# 7940

1911 Two and a Half, MS65 Rich Patina, Thick Mint Luster

- 5316 1911 MS65 PCGS.** This Gem type coin is characterized by thick mint frost that covers each side and is accented by rich orange-gold and lilac patina. The strike details are remarkably sharp with complete feather definition at the top of the eagle's wing as well as full detailing on the headdress. NGC ID# 2893, PCGS# 7942

1911 Quarter Eagle, Sharply Struck MS65

- 5317 1911 MS65 NGC.** The yellow-gold surfaces of this Gem display traces of light green and pleasing luster. The design elements are sharply impressed, including the feathers on the eagle's shoulder and legs. Neither side reveals significant marks. NGC has graded only seven examples finer (12/13). NGC ID# 2893, PCGS# 7942

1911-D Two and a Half, AU55 High-End Example of This Key Date

- 5318 1911-D AU55 PCGS. CAC.** The Strong D certification, the deep, attractive reddish-orange color, and the CAC endorsement add up to a winning combination on this Choice AU 1911-D. There are few distractions, and the bold eye appeal is blatant. Only light high-point wear appears, consistent with the grade. Extremely nice for the issue and grade level. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, AU58 Strong D, Variegated Color

- 5319 1911-D Strong D AU58 PCGS.** The 1911-D quarter eagle is a curious issue with a remarkably low mintage for the series, only 55,600 pieces struck when most of the other issues are in the half-million range or just below. This is a piece with an unusual two-toned appearance, with alternating patches of bright yellow-gold and deep, almost brown-gold. The mintmark is strong, as claimed on the insert, but is somewhat difficult to make out because of one of the deeper areas of color. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, Unc Sharpness Undisputed Key to the Series

- 5320 1911-D — Improperly Cleaned — NGC Details. Unc.** A mildly bright but nonetheless attractive example of the widely pursued series key. The mintmark is sharp and the strike shows only trivial blending on the lower portions of the headdress. The honey-gold surfaces are smooth except for a single brief and thin mark near the U in UNITED.

1911-D Quarter Eagle, MS60
Eye-Appealing for the Grade

- 5321 1911-D MS60 NGC.** Far more eye appeal is evident here than the grade might imply, for collectors who want a technical Mint State example rather than an AU or near-Mint piece. The surfaces are well-struck on this key date, and attractive orange-gold color is present, but a couple of dark planchet voids are present, clearly as made at the Mint. Minor ticks appear on the Indian's cheek, not overt. NGC ID# 2894, PCGS# 7943

1911-D Strong D Quarter Eagle, MS62
Rich Orange-Gold Surfaces

- 5322 1911-D Strong D MS62 PCGS Secure. CAC.** Even a quick glance at the mintage figures and prices in the current (2014) *Guide Book* will point up the oddity that is the 1911-D quarter eagle. Every other issue shows a mintage solidly in the six-figure range, yet the 1911-D stands out as a five-figure production of 55,680 pieces. And while the current 2014 *Guide Book* gives prices for VF20 and MS60 examples of \$350 and \$450, respectively, for every other issue in the series, the 1911-D is priced at \$2,850 and \$10,000 in those same grades. In other words, the mintage of the 1911-D is roughly one-tenth that of every other series issue, while the retail prices are from eight to 22 times greater in the VF20-MS60 grade range.

For some collectors, the MS60 grade is a minimum requirement for the acquisition of a 1911-D, yet others find that examples in the AU grade range fit nicely into an overall Mint State collection. This is a solid Mint State piece that displays rich orange-gold mint luster. NGC ID# 2894, PCGS# 7943

**1913 Two and a Half, MS65
Thick Mint Luster, Even Color**

- 5323 1913 MS65 NGC.** The large mintage of 722,000 pieces makes the 1913 a prime target for type collectors, but it remains elusive in Gem condition. The surfaces display thick mint frost, rich color, and no mentionable marks. There is, however, a curious irregularly shaped planchet lamination on the reverse to the left of the eagle's left (facing) leg. NGC ID# 2897, PCGS# 7945

**1914 Indian Quarter Eagle, MS64
Challenging Low-Mintage Date**

- 5324 1914 MS64 PCGS.** The 1914 Indian quarter eagle claims a low mintage of 240,000 pieces and the date is the second-rarest of the series, after the famous 1911-D. This attractive Choice example offers well-detailed design elements and vibrant mint luster on both sides. The lightly marked orange-gold surfaces add to the strong eye appeal. NGC ID# 2898, PCGS# 7946

**1914-D Quarter Eagle, MS65
Incredibly Attractive Condition Rarity**

- 5325 1914-D MS65 PCGS.** The 1914-D quarter eagle is the key to the series in Gem grade, while the 1911-D is the key to the series overall, regardless of grade. There are more high-grade survivors of the low-mintage 1911-D, however, than of the 1914-D, a little-noticed issue for decades within the collecting community. A handful of 1911-Ds are known above MS65 at PCGS, where the Gem grade is the absolute top for the 1914-D. This Gem offers incredibly attractive surfaces that combine a bold strike, pristine preservation, and mellow orange-red color complementing lilac accents. Population: 45 in 65, 0 finer (12/13). A piece sure to appeal to many potential bidders. NGC ID# 2899, PCGS# 7947
-

1927 Quarter Eagle, MS66
A Popular Type Coin

5326 1927 MS66 PCGS. A popular date for type purposes, the 1927 Indian quarter eagle is usually available in high-grade condition. Moreover, it is one of the better-produced and more attractive dates from this series as most are sharply struck and quite lustrous.

The peach-gold surfaces of this highly lustrous Premium Gem display hints of light green. Sharp definition is seen on the design features, including the Indian's hair and headdress feathers and the eagle's shoulder and leg plumage. A few minute, insignificant ticks are within the parameters of the grade designation. Population: 20 in 66, 0 finer (12/13). NGC ID# 289D, PCGS# 7951

PROOF INDIAN QUARTER EAGLES

1908 Indian Quarter Eagle, PR67
Underrated First-Year Issue

5327 1908 PR67 NGC. Ex: Lisa L. An exquisite Superb Gem with pinpoint-sharp devices and unabraded surfaces. The matte finish is uniform aside from a dash of khaki-gold toning beneath the F in OF and hair-thin vertical strike-throughs across the P in PLURIBUS and between stars 5 and 6. These Mint-made features provide important markers for future identification of this first-year matte proof issue. The dies are rotated several degrees counterclockwise. The 1908 is scarcer than suggested by its recorded proof mintage of 236 pieces. Breen notes, "Many reportedly melted, Jan. 2, 1909." Census: 30 in 67 (1 in 67+), 1 finer (12/13).

Ex: Dr. Robert J. Loewinger Collection / FUN Signature (Heritage, 1/2007), lot 3110. NGC ID# 289G, PCGS# 7957

**1911 Quarter Eagle, PR66
A Virtually Pristine Matte Finish**

5328 1911 PR66 PCGS. CAC. This Premium Gem proof displays the darker matte texture that characterizes the 1911 proof quarter eagle production, in sharp contrast to the 1909 and 1910 issues which are of the flashier "Roman Finish" variety. The 1911 proofs are similar to those of 1908 which consisted of a heavy matte texture, but the 1911's finish shows less granularity, along with a slightly darker color.

The khaki-colored surfaces display a slight olive-green shade and exhibit sharply struck design elements. Both sides are devoid of mentionable contacts or of areas of "shiny spots" (that is luster breaks) that often affect the matte finish of this issue. Housed in a prior generation green label holder. Population: 12 in 66, 16 finer (12/13). NGC ID# 289K, PCGS# 7960

THREE DOLLAR GOLD PIECES

1854 Three Dollar, Well-Struck MS64

5329 1854 MS64 PCGS. A delightful near-Gem example, this coin represents the first year of the three dollar gold denomination. Peach-gold coloration displays hints of light green, all overlying lustrous surfaces. The design features are well brought up, and just a few light ticks are consistent with the grade. PCGS has seen only 31 pieces finer (12/13). NGC ID# 25M3, PCGS# 7969

**1854 Three Dollar Gold, MS64
Popular First-Year Type Issue**

5330 1854 MS64 NGC. A delightful Choice representative from the first year of the denomination, this coin exhibits well-detailed design elements and vibrant satiny mint luster. The bright yellow-gold surfaces show a few highlights of rose with only minor signs of contact. NGC has graded 14 numerically finer examples (1/14). NGC ID# 25M3, PCGS# 7969

1854-D Three Dollar, AU58
Bright, Top-Notch Example
Mintage of 1,120 Coins

5331 1854-D AU58 NGC. Variety 1-A. It appears that U.S. Mint and Treasury officials had high hopes for the three dollar gold coin denomination, which made its debut in 1854.

Those hopes faded quickly.

The Philadelphia Mint made an ambitious production of 138,618 coins for the premiere, a record that would go unchallenged through the three-and-a-half decades of the series' subsequent coinage.

In all, four mints, three during the opening year, made the denomination, also including Dahlonega, New Orleans, and San Francisco late to the party, striking its first coins in 1855.

Some numismatists have theorized that the three dollar gold was useful for purchasing 100-stamp sheets of three-cent postage stamps.

The logic of requiring a three dollar coin for such a purpose, as opposed to, say, a quarter eagle and a half dollar, or six half dollars, has always escaped us.

The little Dahlonega Mint in North Georgia even entered the fray in 1854, striking a meager 1,120 pieces of the opening D-mint issue. Dahlonega was a fitting participant, as it (and its sister Charlotte) were accustomed to striking the smaller U.S. gold coins, excluding eagles and double eagles.

The present near-Mint State NGC-graded piece is in the second tier of the Condition Census, as few true Mint State examples survive. The surfaces are bright and satiny greenish-gold with orange overtones. A couple of stray marks are well within the grade context, and the overall eye appeal is top-notch for this high-end rarity. Census: 24 in 58, 9 finer (12/13).

Ex: *Central States Bullet Sale (Heritage, 3/2000)*, lot 421. NGC ID# 25M4, PCGS# 7970

1854-O Three Dollar, AU53

- 5332 1854-O AU53 PCGS. Variety 2.** The South coined the three dollar denomination only in 1854, at Dahlonega and New Orleans. Though the former issue is very costly, the 1854-O is collectible. This pumpkin-gold example is smooth aside from a single line on the right obverse field. The lapped dies state usual for the variety. Population: 49 in 53, 61 finer (12/13).
Ex: West Palm Beach FUN Signature (Heritage, 7/2009), lot 1379, which realized \$5,462.50. NGC ID# 25M5, PCGS# 7971

1855 Three Dollar, Lustrous MS63

- 5333 1855 MS63 PCGS.** This was the second year of the three dollar gold piece. The lustrous surfaces of this Select specimen display yellow-gold, light green, and peach-gold coloration. Additionally, the design elements are well-defined. Scattered light marks prevent a higher grade. Population: 59 in 63 (2 in 63+), 24 finer (12/13). NGC ID# 25M6, PCGS# 7972

1856 Three Dollar, MS62 Attractive Orange-Gold Surfaces

- 5334 1856 MS62 PCGS.** The mintage of the third-year 1856 three dollar gold issue was a moderate 26,010 pieces, a production that would be low for most series but is generous here. More examples were apparently saved in Mint State than during the bloody Civil War years that would follow. This MS62 PCGS-graded example offers sharply struck surfaces with good luster and attractive orange-gold patina. A few scattered marks account for the grade, but the eye appeal is top-notch. Population: 48 in 62 (1 in 62+), 66 finer (12/13). NGC ID# 25M8, PCGS# 7974

1856 Three Dollar Gold, MS63 Rare in Mint State

- 5335 1856 MS63 PCGS.** Launched in 1854 with high hopes, the three dollar gold series circulated for a few years but was never embraced by the public. The denomination was seldom seen in local commerce after 1860. Almost the entire 1856 Philadelphia mintage of 26,010 pieces was released for circulation — today, survivors are common in circulated grades. Select Mint State examples, however, are rare. This MS63 three dollar is particularly sharp, with bold detail on the headdress feathers and on the hair detail below LIBERTY. The reverse detail is bold except for the vertical division on the ribbon knot, which is always weak. Strongly lustrous, it is an attractive example with alternating areas of apricot-gold and yellow-gold. A few minor abrasions are visible with a glass and account for the assigned grade. Population: 30 in 63, 36 finer (12/13). NGC ID# 25M8, PCGS# 7974

1856-S Three Dollar, Medium S, AU58 Die Break on the Reverse

- 5336 1856-S AU58 PCGS. Medium S.** The most often seen die variety for the issue with a "tail" die break from the second L in DOLLARS. Any San Francisco three is very scarce, however. The present orange-gold near-Mint example shows slight wear near the eyebrow, but marks of any consequence are absent. Population: 26 in 58, 11 finer (12/13). NGC ID# 25M9, PCGS# 7975

1857 Three Dollar, MS63 High-End Example

- 5337 1857 MS63 PCGS.** Only three years after the series' inception, the mintage of the 1857 three dollar gold was down to less than 21,000 pieces, and most of the survivors today are circulated. This Select example offers lovely mint luster on peach-gold surfaces with lilac accents in the peripheral areas. Some light clash marks appear on each side and a few scattered marks, none overt. A high-end example of this early three. NGC ID# 25MA, PCGS# 7976

1858 Three Dollar, AU58
2,133 Pieces Struck for Circulation

- 5338 1858 AU58 PCGS.** As suggested by its limited mintage of 2,133 business strikes, the 1858 is one of the rarest three dollar gold pieces. Nearly all went into circulation, leaving just a handful of coins in Mint State. Considerable luster resides on the yellow-gold surfaces of this AU58 specimen, and both sides are well-struck. There are no marks out of the ordinary for the grade. Population: 11 in 58, 10 finer (12/13). NGC ID# 25MC, PCGS# 7978

1859 Three Dollar, Conditionally Rare MS66

- 5339 1859 MS66 PCGS.** The 1859 three dollar gold coin from a mintage under 16,000 pieces is a semi-scarce date. Near-Gems can be located with diligent searching, Gems are more challenging, and finer examples are rare. Bright luster radiates from the yellow-gold and lime-green surfaces of this Premium Gem. The design elements are better-struck than often seen, including the 8 and 5 of the date and the bow knot, elements that are sometimes weak. Both sides are impeccably preserved, further enhancing the coin's overall eye appeal. Population: 5 in 66, 0 finer (12/13). NGC ID# 25MD, PCGS# 7979

1866 Three Dollar, MS62
Semiprooflike and Appealing

- 5340 1866 MS62 PCGS.** Semiprooflike surfaces and attractive wheat-gold color enhance the eye appeal of this 1866 three dollar, a low-mintage issue of only 4,000 coins. A few scattered marks account for the grade, but generous luster and eye appeal are on abundant display. An underrated date within the series. Population: 10 in 62, 17 finer (12/13). NGC ID# 25MM, PCGS# 7987

1868 Three Dollar, Scarce MS62

- 5341 1868 MS62 NGC.** A minuscule mintage of 4,850 pieces ensures the scarcity of the 1868. Yellow-gold surfaces display modest field-device contrast when the coin is rotated slightly under a light source. A small milling mark on Liberty's cheek and occasional faint hairlines in the fields prevent a higher grade. Census: 24 in 62, 12 finer (12/13). NGC ID# 25MP, PCGS# 7989

1868 Three Dollar, MS63
Low-Mintage Date

- 5342 1868 MS63 PCGS.** The 1868 is a rare issue with a small mintage of 4,850 pieces. Unlike later hoarded dates, relatively few were saved in Mint State, and the majority of certified survivors grade AU. This orange-gold representative is well-struck and displays only faint abrasions on the left obverse field. NGC ID# 25MP, PCGS# 7989

**1869 Three Dollar Gold, MS63
Partially Prooflike Surfaces**

- 5343 1869 MS63 NGC.** The 1869 three dollar gold piece is a low-mintage issue, with only 2,500 pieces struck. The date is very rare in MS63 condition and only three coins have been certified in higher numeric grades at either of the leading grading services (1/14). This attractive Select example exhibits well-detailed design elements, with a touch of softness on the ribbon bow. The lightly marked yellow-gold surfaces show prooflike reflectivity in most areas, with a scattering of minor contact marks on both sides. Eye appeal is quite strong for the grade. Census: 2 in 63, 0 finer (1/14). NGC ID# 25MR, PCGS# 7990

**1880 Three Dollar Gold Piece, MS64
Only 1,000 Pieces Struck**

- 5345 1880 MS64 NGC.** According to Mint records, only 1,000 business-strike three dollar gold pieces were struck in 1880, making the issue scarce-to-rare in all grades. The low mintage was recognized by early 20th century coin dealer Thomas Elder, who made a specialty of three dollar gold pieces and marketed several hoards over the years. In lot 975 of his May 1937 catalog of the Wheeler, Von Lieven, and Ross Collections he reported:

"1880. Brilliant Unc. (AD-04). Note - at that time I sold Ben Green several hundreds of \$3s from 1879 to 1880. This may be one of that lot. A very small coinage. Not common today."

Fortunately for present-day collectors a number of high-quality coins have survived, including the present Choice example. This coin exhibits sharply detailed design elements and the vivid greenish-gold surfaces show prooflike reflectivity and few signs of contact. Census: 38 in 64 (3 in 64+, 4 in 64 ★), 21 finer (1/14). NGC ID# 25N3, PCGS# 8002

**1878 Three Dollar, MS64+
Excellent Type Coin**

- 5344 1878 MS64+ PCGS. CAC.** The 1878 three dollar gold piece boasts a mintage of 82,304 pieces, one of the largest production totals of the series. This high-end Choice example exhibits well-detailed design elements and vibrant mint luster and the lightly marked yellow-gold surfaces show a few highlights of rose. This coin should find a home in a fine date set or type collection. NGC ID# 25MZ, PCGS# 8000

1881 Three Dollar, AU55
Attractive Example From a Mintage of 500 Pieces

- 5346 1881 AU55 NGC.** Even within a low-mintage series such as the late-date three dollar gold pieces, the 1881's production figure stands out, at a memorably low 500 circulation strikes — along with the 1883 and 1885, one of only three sub-1,000-piece business strike emissions in the series. This Choice AU example is lustrous, with attractive orange-gold color and showing only light field marks in accord with the grade. NGC ID# 25N4, PCGS# 8003

1887 Three Dollar, Well-Preserved MS65
Great Eye Appeal

- 5347 1887 MS65 NGC.** The yellow-gold surfaces are remarkably free of mentionable abrasions, to the point that two tiny ticks, one just before the forehead, one below the profile, may be all that preclude an MS66 grade on this lovely Gem 1887 three. Liberty's cheek is free of mentionable contact, and the reverse shows similar excellent preservation. Moderate strike softness appears on the bowknot on the reverse, on the tips of the headdress feathers on the obverse, and on the hair curls just below LIBERTY, all as typically seen for the issue. The eye appeal is nonetheless top-notch, making this a great choice for a type or date set. Census: 14 in 65, 5 finer (12/13). NGC ID# 25NA, PCGS# 8009

1888 Three Dollar Gold, MS65
Low-Mintage Late-Series Date

- 5348 1888 MS65 PCGS.** The 1888 three dollar gold piece claims a small mintage of 5,000 pieces, but the issue has a relatively high survival rate. Prominent coin dealer J.W. Scott seems to have purchased a large number of these coins directly from the Mint. He sold them to interested collectors at his shop in New York City for many years afterward. This delightful Gem exhibits sharply detailed design elements and the vivid green and orange-gold surfaces show a mix of vibrant mint luster and prooflike reflectivity. Only minor signs of contact are evident and eye appeal is terrific. Population: 87 in 65 (4 in 65+), 35 finer (12/13). NGC ID# 25NB, PCGS# 8010

1889 Three Dollar, MS63
The Final Year of Production

- 5349 1889 MS63 PCGS.** The unpopular three dollar gold denomination was discontinued after 1889 with a small mintage of 2,300 pieces. Peach-gold and apricot patina resides on the lustrous surfaces of this Select specimen that exhibits well impressed design elements. A few scattered marks do not detract. NGC ID# 25NC, PCGS# 8011

1889 Three Dollar, Lustrous MS65
A Low-Mintage Issue

5350 1889 MS65 PCGS. This final three dollar piece is an elusive, low-mintage issue, with a total production of only 2,300 business strikes. Although the overall survival rate is high, the date becomes very scarce in Gem condition and rare any finer. Ebullient luster emanates from the peach-gold surfaces of this MS65 specimen and a solid strike delivers strong definition to the design elements. These factors add up to yielding great eye appeal. Housed in a prior generation green-label holder. Population: 29 in 65 (1 in 65+), 13 finer (12/13). NGC ID# 25NC, PCGS# 8011

PROOF THREE DOLLAR GOLD PIECES

1854 Three Dollar Gold, PR63 Cameo 10-12 Specimens Known Ex: Loewinger

5351 1854 PR63 Cameo PCGS. The recorded proof mintage of only 15 pieces appears to be on the low side and does not square with the fact that two different pairs of proof dies were employed. On one of those dies, the ES in STATES is in a straight line, and the lettering is bolder and more deeply impressed into the die. On the other die, the S is slightly lower than the E, and the lettering is not so deep. While it is possible that some catastrophic die failure occurred after one or a handful of pieces were struck, more likely is that the recorded mintage is erroneous ... or could restrikes have been made later? Bowers' series reference offers these comments:

"On April 28, 1854, the Mint struck 15 Proof examples that were sent by Mint Director James Ross Snowden to the Secretary of the Treasury James Guthrie in Washington. Others were retained at the Mint, including two by Chief Engraver Longacre. Interested numismatists could obtain specimens there. This was initiated what became an uninterrupted string of Proof issues, although production was exceedingly low for the next several years."

While there is no record of restrikes, this would certainly not be the only U.S. coin for which restrikes are suspected but unproven. As a one-year subtype (with small DOLLARS, 1854 only) and a first-year issue, perhaps the subsequent demand for proof examples required the striking of extra pieces beyond the original 15 coins. Various Mint personnel working there in the 1850s were far from averse to making "on-demand" issues when the correct bell was rung. But that is mere speculation.

The present example offers rich orange-gold surfaces with considerable contrast present. The S in STATES is lower than the E, without the deeply impressed lettering characteristic of the other proof die. A couple of light scrapes are noted on Liberty's cheek, and a couple of dark toning spots on the obverse: one in back of the eye, and one behind the headdress. On the reverse a similar dark spot occurs at the bottom of the 1, and a patch of light yellow-gold patina is noted through DO in DOLLARS. A highly desirable early proof example of this historic and unusual denomination. Population: 2 in 63 Cameo, 3 finer (12/13).

Ex: Dr. Robert J. Loewinger Collection; FUN Signature (Heritage, 1/2007), lot 3121; FUN Signature (Heritage, 1/2010), lot 2144; ANA Signature (Heritage, 8/2010), lot 3461; Philadelphia Signature (Heritage, 8/2012), lot 5329. NGC ID# 289R, PCGS# 88017

EARLY HALF EAGLES

1800 BD-2 Half Eagle, AU55
Scarce Heraldic Eagle Date

5352 1800 AU55 NGC. BD-2, High R.3. Bass-Dannreuther Die State c/c. The 1800 Capped Bust Right half eagle claims a mintage of 37,628 pieces, with five die varieties known for the date. This coin is an example of the BD-2 variety, with a blunt 1 in the date and the upright of E in STATES positioned to the left of a cloud space. The present coin is a moderately circulated representative with well-detailed design elements. The light orange-gold surfaces retain traces of mint luster, with a scattering of minor abrasions on both sides. NGC ID# 25NW, PCGS# 8082

1806 Capped Bust Right Five, AU55
Popular *Guide Book* Variety, BD-6

5353 1806 Round Top 6, 7x6 Stars AU55 PCGS. BD-6, R.2. Bass-Dannreuther Die State d/e. The 1806 half eagle claims a substantial mintage of 64,093 pieces, with six die varieties known for the date. The present coin represents the popular BD-6 variety, the only one with a Round Top 6 in the date. Listed on page 255 of the 2014 *Guide Book*, the BD-6 is an available issue with a surviving population of 600-900 examples in all grades.

The coin offered here is an attractive Choice AU specimen from a late state of the dies with well-detailed design elements and a few die cracks and clash marks on both sides. The pleasing orange-gold surfaces retain traces of original mint luster and show a few minor abrasions, but no planchet adjustment marks. This coin will be a welcome addition to a fine collection or type set. NGC ID# 25P5, PCGS# 8089

**1807 Capped Bust Left Half Eagle, AU58
BD-8, Sharply Struck Throughout**

- 5354** 1807 Bust Left AU58 NGC. BD-8, R.2. The 1807 half eagle coinage consisted of six Draped Bust (right) varieties and two Capped Bust (left) varieties. The BD-8 is more plentiful than BD-7 among the John Reich-designed Capped Bust half eagles. A trace of wear appears on the high points of this lemon-yellow example with a copper spot at the front of the cap and a tiny rim bump below the 1 in the date. The strike is quite sharp throughout both sides, and contact marks are inconsequential. NGC ID# 25P9, PCGS# 8101

**1809/8 BD-1 Five Dollar, MS62
Only Dies for This Scarce Date**

- 5355** 1809/8 MS62 NGC. BD-1, High R.3. The only 1809-dated dies. Traces of recutting near the knob of the 9 are traditionally interpreted as the base of an underdigit 8, though it is possible that the remnants are from a prior impression of an 8 punch. The present green-gold example is boldly struck. The left obverse field and upper reverse field display unimportant contact. Luster dominates the borders and motifs. The strike is virtually full, with inexactness confined to the center of the eagle's neck plumage. The reported mintage is 33,875 pieces, but less than 1% of that figure has survived. The rest were presumably exported as bullion and melted upon overseas arrival. NGC ID# 25PC, PCGS# 8104

**1809/8 Half Eagle, Fully Struck MS63+
BD-1 Variety**

- 5356** 1809/8 MS63+ NGC. BD-1, High R.3. Early half eagles have a reputation for great rarity, but a date collection can be completed (with patience) for the John Reich design from 1807 to 1812. Such a six-piece set would necessarily include the BD-1 1809/8, since it is the only 1809-dated die variety. This butter-gold example displays overlapping sets of clash marks on the reverse field but is only lightly abraded. Cartwheel luster is prominent and the strike is essentially full. Very scarce in all grades, the 1809/8 is rare in Select Mint State. Census: 18 in 63 (1 in 63+), 30 finer (12/13). NGC ID# 25PC, PCGS# 8104

1811 BD-2 Half Eagle, MS61
Small 5

5357 1811 Small 5 MS61 PCGS. BD-2, R.3. Bass-Dannreuther Die State c/d, and this combination of die states is not specifically recorded in the Bass-Dannreuther reference. The obverse die is clashed with a faint die crack connecting stars 9 and 10. The reverse has been lapped with no evidence of the earlier die cracks and rust lumps.

Both varieties have the 5 in 5 D. leaning sharply to the right. The Small 5 has the bottom of that digit well away from the border, while the Large 5 has the bottom of that digit nearly touching the border. This lovely Mint State piece has brilliant lemon-yellow luster with minimal handling marks and exceptional design definition. NGC ID# 25PH, PCGS# 8109

1812 BD-2 Half Eagle, MS62
Narrow Denomination

5359 1812 MS62 PCGS. CAC. BD-2, High R.4. Bass-Dannreuther Die State c/b. The obverse die appears here in its second use, having been lapped after its first use. Light die rust is evident in the left obverse field, with traces of clash marks. The reverse shows die clashing within the vertical shield stripes. This Narrow 5 D variety is quite scarce, with only about 100 to 125 examples known. The other variety survives to the extent of nearly 500 pieces. This brilliant yellow-gold surfaces are fully lustrous with trivial marks, including a small scrape inside stars 1 and 2. The strike is adequate, although not full. NGC ID# 25PL, PCGS# 8112

1812 Five Dollar, Uncirculated Details
BD-1, Wide 5D

5358 1812 — Damaged — NGC Details. Unc. BD-1, R.3. Bass-Dannreuther Die State a/a. The usual 1812 reverse, the "Wide 5D" variety. The reverse open field displays faint scuffs and Liberty's cheek is moderately glossy. The curved die line through the shield is usual for the variety. The shield also displays mint-made roller marks. Overall, this honey-gold example is attractive given its NGC disclaimer.

CLASSIC HALF EAGLE

1834 Classic Head Half Eagle, MS64
Plain 4, McCloskey 2-B Variety

5360 1834 Plain 4 MS64 NGC. Breen-6502, McCloskey 2-B, R.3. The Classic Head design was introduced on half eagles in 1834 with a large mintage of 657,460 pieces, some with the old Crosslet 4 in the date but mostly with the newer Plain 4 style. The new design marked a change in the specifications for all U.S. gold coins, instituted because the intrinsic value of the old tenor gold pieces exceeded their face value and they no longer circulated.

The present coin is an impressive Choice specimen, with well-detailed design elements and partially prooflike fields. The vivid greenish-gold surfaces show just a few minor contact marks and hairlines and overall eye appeal is outstanding. Census: 43 in 64 (2 in 64 ★), 8 finer (1/14). NGC ID# 25RR, PCGS# 8171

LIBERTY HALF EAGLES

1847-C Half Eagle, Sharply Struck MS62
Lower Condition Census Example

5361 1847-C MS62 NGC. Surprisingly, all 84,000-plus half eagles of the 1847-C vintage were struck from only a single pair of dies; the obverse shows the right top of the 7 touching the bust, the 1 close to the left-side bust. The C mintmark is centered under the juncture of the fletchings and stem. This khaki-gold piece offers quite a sharp strike save for the highest point of Liberty's curls, showing full star centrils and beads in the hair bun. The eagle and shield details on the reverse are similarly bold. Light field chatter rather than mentionable marks account for the grade. This piece and a number of others so graded are tied for the bottom of the Condition Census. Census: 3 in 62, 2 finer (12/13). NGC ID# 25TN, PCGS# 8233

**1852-C Variety 1 Half Eagle, MS61
Rotated Reverse**

- 5362 1852-C — Rotated Dies — MS61 NGC. CAC. Variety 1.** This is the usual variety for the 1852-C half eagles, and the reverse is rotated counterclockwise about 45 degrees. This extraordinary Charlotte half eagle has brilliant yellow surfaces with faint green tendencies, exhibiting myriad grade-limiting marks. The fields are reflective and provide a wonderful frame for the lustrous devices. Both sides exhibit a full strike, including a bold mintmark. Census: 10 in 61, 26 finer (1/14). NGC ID# 25UB, PCGS# 8251

**1854 Half Eagle, MS64
Impressive Surfaces, Tied for Finest Graded**

- 5363 1854 MS64 NGC.** From a mintage of 160,675 pieces, the 1854 half eagle is unknown in grades above MS64; PCGS shows three at this level, NGC six, without even an MS64+ finer (12/13). This impressive Choice example displays well-detailed design elements with a touch of softness on the eagle's head. The lustrous orange-gold surfaces show a few hints of lilac and a couple of minor contact marks. Census: 6 in 64, 0 finer (12/13). NGC ID# 25UG, PCGS# 8256

**1859-C Half Eagle, AU58
Seldom Seen Finer**

- 5364 1859-C AU58 NGC. Variety 1.** The 1859-C half eagle in terms of rarity is in the midrange of issues of the denomination from Charlotte, but examples in the near-Mint State grade of the present piece are quite elusive, and Mint State examples are downright rare. This khaki-gold piece shows good luster remaining, but it shows the strike weakness, particularly on the reverse, that is characteristic of the issue. Scattered marks are in concert with the grade. Census: 30 in 58, 11 finer (1/14). NGC ID# 25VC, PCGS# 8281

**1859-S Half Eagle, AU58
Virtually Unavailable in Full Mint State**

- 5365 1859-S AU58 NGC.** This rare, mintmarked No Motto issue saw its 13,220 piece production enter circulation almost in its entirety, with few Uncirculated examples put aside or saved by happenstance. The major grading services report less than a handful of Mint State certifications, some of which may be multiple submissions. This near-Mint example is attractive and bold, with only a bit of the usual weakness on the eagle's neck. Mint luster remains around the peripheries and near the central devices. A few abrasions are scattered on the slightly reflective surfaces, the most noticeable being a short mark on Liberty's jaw that will serve as a hallmark for this rare five. Census: 8 in 58 (1 in 58+), 2 finer (1/14). NGC ID# 25VE, PCGS# 8283

**1868-S Half Eagle, MS61
Tied With One Other for Finest Certified**

5366 1868-S MS61 NGC. The 1868-S half eagle saw an increase over the meager mintages of the previous San Francisco issues, to some 52,000 pieces; most survive today, however, in well-circulated condition. This Mint State example is a surprise, as NGC and PCGS have each certified a single piece in the MS61 level with none finer (or else this is the same piece twice). Many of the S-mint half eagles from the 1850s and 1860s are unknown — or virtually unknown, depending on the issue — in Uncirculated condition. (A sole 1864-S certified MS65+ by PCGS is a phenomenal exception, particularly for an issue estimated by that service to survive to the extent of only 20 to 30 pieces in all grades.)

The present 1868-S, according to the NGC online Census Report, is the highest-graded of the issue at that service, although there is also one MS60, making only three Mint State examples combined at both services. As expected for the MS61 grade level, this NGC-graded piece shows a few bagmarks and ticks. On the other hand, the reddish-orange surfaces accented with lilac tinges show a surprisingly robust strike for an S-mint half eagle of this vintage, and strong eye appeal is furthered by a goodly amount of mint luster on both sides. An important offering of this S-mint conditional rarity. NGC ID# 25W6, PCGS# 8316

**1873-CC Half Eagle, AU50
Low-Mintage Rarity**

5367 1873-CC AU50 PCGS. Variety 2-B. A scant mintage of 7,416 pieces ensures the rarity of the 1873-CC, especially given the absence of gold coin collectors in the West prior to the 20th century. Despite the low mintage, two die varieties are confirmed. Variety 2-B is the low mintmark variant and is less rare than its high mintmark alternative. The present wheat-gold representative shows softness on the curls, fletchings, and horizontal shield lines but the stars and wings are intricately detailed. Marks are minimal given the alloy and brief service in circulation. Population: 3 in 50, 6 finer (12/13). NGC ID# 25WL, PCGS# 8331

**1881 Half Eagle, MS66
Semireflective Luster**

5368 1881 MS66 NGC. Fully detailed through the centers and on the peripheral stars alike. Pale yellow interiors are semireflective, while deeper orange tones and a few small coppery areas are present at the margins. Despite a mintage of more than 5.7 million pieces, better-than-Gem coins are rare. NGC has certified only one example as MS67 or better (12/13). NGC ID# 25XD, PCGS# 8354

1881-CC Half Eagle, Unc Details
Variety 1-A, The Only Dies

5369 1881-CC — Improperly Cleaned — NGC Details. Unc. Variety 1-A. This is the only known 1881-CC half eagle variety, with the mintmark centered over the V in FIVE. The mintage of this issue was 13,886 coins, and most survivors are well circulated, with an average certified grade of just over XF40. The neck feathers on this piece are a trifle indistinct, but all other details are boldly defined. The rich yellow-gold surfaces have a polished appearance without a glass. However, close inspection under a loupe reveals a fine-grained matte texture.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

1898 Half Eagle, MS65+
Sharply Struck and Richly Lustrous

5370 1898 MS65+ NGC. The P-mint half eagles and quarter eagles of the late 19th century are among the best-produced and best-struck Liberty Head issues, as this high-end Gem amply demonstrates. Rich luster radiates from surfaces that are free of mentionable marks and border on a full strike, save for the high-point hair on the obverse. A couple of tiny copper alloy spots are present but undistracting. Census: 25 in 65 (1 in 65+), 6 finer (1/14). NGC ID# 25YP, PCGS# 8396

INDIAN HALF EAGLES

1908 Indian Half Eagle, MS65
Popular First-Year Type Coin

5371 1908 MS65 PCGS. Bela Lyon Pratt's innovative incuse Indian design was introduced on the half eagle and quarter eagle in 1908, making the date an important one for series enthusiasts and type collectors alike. A substantial mintage of 577,845 pieces was accomplished and many examples were saved by contemporary collectors and the general public for their novelty value. As a result, the 1908 is a reasonably available issue in Mint State grades, slightly scarce at the MS65 level, and rare in finer grades.

The present coin is an attractive Gem, with well-detailed design elements and vibrant mint luster. The well-preserved orange and reddish-gold surfaces show only minor signs of contact and eye appeal is outstanding. PCGS has graded only 22 numerically finer examples (12/13). NGC ID# 28DE, PCGS# 8510

1909-D Indian Head Half Eagle, MS65
Scarce This Fine

5372 1909-D MS65 NGC. By far the largest mintage of the Indian Head half eagle series with more than 3.4 million pieces struck, this Denver Mint issue is seldom available any finer than this conditionally scarce, boldly struck five. Most Uncirculated examples grade MS62 or MS63. This is a frosted, undisturbed Gem, with soft underlying luster and unabraded fields. PCGS and NGC together have certified just 7 pieces of a higher numeric grade (1/14). NGC ID# 28DJ, PCGS# 8514

1909-O Half Eagle, AU55
Only O-Mint Indian Five

- 5373** 1909-O AU55 NGC. *Variety 1*. The 1909-O Indian half eagle is the final gold coin produced at the New Orleans Mint, with a small reported mintage of 34,200 pieces. The 1909-O is also the only O-mint Indian half eagle, making it a “must have” issue for mintmark type collectors. This attractive Choice AU example exhibits sharply detailed design elements with just a touch of wear and the lightly abraded green and orange-gold surfaces retain much original mint luster. Eye appeal is quite strong for the grade. This coin should find a home in a fine collection of Southern gold or a mintmark type set. *From Christopher Bently’s Nob Hill Collection. NGC ID# 25ZK, PCGS# 8515*

1909-O Five Dollar, AU55
Sharp Mintmark, Pleasing Overall Surfaces

- 5374** 1909-O AU55 PCGS. Even if collectors could afford a Gem or near-Gem 1909-O half eagle, precious few are known, and they trade well into the six-figure range. Upper-end AU examples of the 1909-O half eagle are elusive, but they nonetheless survive in considerably larger quantities than the Mint State coins, even those in the MS60-MS63 range. For many collectors, an example in the range of AU55 to MS62 will be the ideal compromise between cost and aesthetic appeal. (Even Select examples of the 1909-O can be pricey.)
- Fortunately, the strike is usually decent, but it is the mintmark, often seen weak, and the generally subdued luster that will determine the eye appeal, or lack thereof, of many potential purchases. The 1909-O is certainly an issue where it pays to look at a number of examples and take one’s time before finding that *perfect piece for the grade*. This Choice AU is just that: perfect for the grade. Significant mint luster remains on each side of the rich orange-gold surfaces, the mintmark is completely formed, and there are only slight abrasions scattered over each side. *From The Teich Family Collection. NGC ID# 25ZK, PCGS# 8515*

1929 Half Eagle, AU58
Lightly Circulated Key Date

- 5375 1929 AU58 NGC.** It is a curiosity why the 1929 half eagles were struck at all during the first year of the Great Depression. Despite the original mintage of 662,000 pieces, most of the issue was apparently melted shortly after its production. The 1929 is the rarest single issue in the Indian Head series, and the present piece is an unusual one, in that it shows evidence of light circulation, unlike most survivors. The slight circulation wear nonetheless poses an opportunity for series fans. Slight high-point rub is detectible on the Indian's brow, the headdress, and the forward eagle's wing on the reverse. Antique-gold surfaces nonetheless retain essentially full luster, and generous eye appeal is blatant throughout both sides. A couple of hair-thin scrapes appear on the reverse, running through the eagle's neck. This piece would nestle nicely in a Mint State set as an attractive example of this key issue.
From Christopher Bently's Nob Hill Collection. NGC ID# 2800, PCGS# 8533
-

EARLY EAGLES

1801 BD-2 Eagle, XF45
Mysterious 'Spines'

- 5376 1801 XF45 PCGS. BD-2, R.2.** There are two known die varieties for 1801 eagles. The BD-1 die pair is elusive, and the BD-2 is the most plentiful variety of any early eagle from 1795 to 1804. Its only contender is 1799 BD-10. Bass-Dannreuther Die State a/a, with no clash marks or evidence of die lapping on either side. The mysterious spines in Liberty's cap are present on nearly every known example. At first glance they seem like clash marks from the vertical shield stripe, but they are evenly spaced across the cap, ruling out that possibility. Both sides of this greenish-gold eagle have myriad minuscule marks that are especially noticeable in the fields, although the surfaces retain considerable luster for the grade. NGC ID# 2627, PCGS# 8564
-

1801 Ten Dollar, AU50
Scarce Heraldic Type, BD-2

- 5377 1801 AU50 PCGS Secure. BD-2, R.2.** A richly detailed example of the elusive Heraldic Eagle design. Pumpkin-gold luster fills the curls, plumage, and legends. The open fields and high points are light green-gold. Marks are few and generally subdued. The usual die state with "nine vertical spines in cap," as described by Harry W. Bass, Jr. in his early gold notebook. These spines are mint-made damage to the obverse die, reminiscent of the Spiked Chin 1804 half cent variety and perhaps from a similar cause, such as a foreign object struck into the hardened die. NGC ID# 2627, PCGS# 8564

LIBERTY EAGLES

1850 Large Date Eagle, MS61
Popular Guide Book Variety, Rare in Mint State

- 5378 1850 Large Date MS61 NGC.** Two different obverse dies are known for the Large Date variety, the most perceptible difference being the position of the 1 in the date related to the forward bust tip. This is the Large Date obverse with the date further right, the 1 somewhat right of the lowest point of the bust. Wheat-gold surfaces show a few scattered marks and numerous obverse die cracks at the periphery. The Large Date is commoner than the Small Date but nonetheless quite rare in Mint State. Census: 8 in 61, 9 finer (1/14). NGC ID# 2637, PCGS# 8603

1858 Eagle, XF45
Lightly Circulated, Still Lustrous

- 5379 1858 XF45 PCGS Secure.** Only 2,521 Liberty eagles were struck in 1858, making the date rare in all grades. This attractive Choice XF example is lightly worn, yet it shows well-detailed design elements and still-lustrous yellow-gold surfaces complementing a few rose highlights. Population: 11 in 45, 16 finer (12/13). NGC ID# 263W, PCGS# 8625

1865-S Ten, 865 Over Inverted 186, AU53
Unabraded and Eye-Appealing

- 5380** 1865-S 865 Over Inverted 186 AU53 NGC. Large S. To the novice this variety looks like 1865 over 981, but the latter digits are in reality an inverted 186 date logotype that the engraver first entered upside-down, then corrected. Both the Normal Date and Inverted Date varieties are condition rarities, understandably given the low mintage for both combined, 16,700 pieces. The Normal Date is actually a tad rarer but the curiosity factor of the blundered-date variety makes it popular, as does its separate *Guide Book* listing. This apricot-orange piece is surprisingly unabraded, but both moderate strike softness and light high-point wear are confined largely to the central devices. Excellent eye appeal. Census: 3 in 53, 5 finer (12/13). NGC ID# 28ED, PCGS# 8643

1867-S Eagle, Well-Struck AU58
Seldom Seen, Unknown Any Finer

- 5381** 1867-S AU58 NGC. The 1867-S eagle had a moderate mintage of 9,000 pieces, but this early San Francisco Mint-era product clearly circulated far and wide. Examples are elusive in any grade, and the average certified survivor is barely XF40. The 1867-S eagle remains today, despite somewhat looser grading standards, an issue that is unknown in Mint State. Even trades at the AU58 level are blue-moon events: The last trade of an AU58 NGC example that we could find was Superior Galleries' Long Beach Elite sale in 2005, where lot 1910 changed hands for \$18,975.

The present offering of this AU58 NGC coin marks the first time we have handled an example of the 1867-S higher than AU55 since we began our Permanent Auction Archives in 1993. The surfaces retain generous amounts of luster on each side, the prevailing orange-reddish coloration ceding to hints of lilac in the protected areas. The strike is strong although incomplete, and only minor ticks appear on each side, in concert with the grade. This piece poses a momentous opportunity for Western gold specialists. NGC ID# 264M, PCGS# 8652

1870-CC Eagle, XF45
The Rarest CC Ten

5382 1870-CC XF45 NGC. Variety 1-B. The more common variety, with the first C of the mintmark slightly higher. The 1870-CC, as the first eagle from the Carson City Mint, is one of the most popular dates in the entire Liberty Head ten dollar series. While its 5,908-piece mintage is higher than that of six other Carson City tens, it is the rarest eagle from this mint.

The 1870-CC circulated extensively, evidenced by most known examples being well worn. Douglas Winter (2001) estimates that 35 to 45 examples are known; Rusty Goe (2003) suggests 70 to 80 pieces; and the PCGS website estimates 45 to 60 examples are extant. NGC and PCGS have certified fewer than 80 specimens in all grades, none finer than AU55.

Uniform yellow-gold coloration runs over the semibright surfaces on both sides of this Choice XF example, and traces of luster are seen in some of the recessed areas. The design elements are typically struck, including the usually seen minor weakness in the hair curl above Liberty's ear, the eagle's neck feathers, and the arrow feathers. Distributed marks are somewhat fewer and less serious than ordinarily seen on surviving specimens, making the coin's overall eye appeal better than that usually encountered. The aficionado of Liberty Head eagles or Carson City coinage will want to give serious consideration to this rarity as it does not appear at auction all that frequently. Census: 6 in 45, 11 finer (12/13). NGC ID# 264U, PCGS# 8658

**1874-CC Eagle, AU53
Well-Detailed Example**

- 5383 1874-CC AU53 PCGS. CAC. Variety 1-A.** Only a single die pair was needed to strike the reported 16,767 1874-CC eagles, most of which circulated extensively, likely within a few years of their production. The 1 in the date is somewhat closer to the bust than to the denticles, and the tiny CC mintmark shows the second C a tad higher than the first and centered under the tip of the fletchings. This wheat-gold example shows far fewer marks than normal for the grade on surfaces that are well-struck and quite eye-appealing. Note the sharp star centrils, the beads in the hair bun, and the well-detailed eagle's feathers. Population: 7 in 53, 14 finer (1/14). NGC ID# 2658, PCGS# 8670

**1878 Liberty Eagle, MS64
Only One Finer Coin at PCGS**

- 5384 1878 MS64 PCGS.** Mint records indicate 73,780 Liberty eagles were struck at the Philadelphia Mint in 1878, a substantial mintage in the context of the series. The issue is rare in Choice condition however. This well-detailed MS64 specimen displays lightly marked surfaces with vibrant mint luster on both sides. Population: 9 in 64, 1 finer (12/13). NGC ID# 265J, PCGS# 8680

**1880-CC Ten Dollar, Near-Mint
Minimally Abraded**

- 5385 1880-CC AU58 NGC. CAC. Variety 1-B.** Three die varieties are known despite a low mintage of 11,190 pieces. The present crisply struck butter-gold Borderline Uncirculated example displays scattered minute field strike-throughs (as made) but abrasions are inconsequential. The eye appeal is excellent. Census: 25 in 58 (1 in 58+), 11 finer (12/13). NGC ID# 265T, PCGS# 8688

**1888-O Liberty Eagle, MS63
Popular O-Mint Type Coin**

- 5386 1888-O MS63 NGC. CAC. Variety 1.** From a mintage of 21,335 pieces, the 1888-O eagle is an available date in the context of the O-mint series. This is due in part to the discovery of a couple of hoards in the 1980s and 1990s. Examples in MS63 condition, like the present coin, are still quite rare. The design elements are well-detailed, with a touch of the typical flatness on the stars, and the lustrous orange-gold surfaces show highlights of rose. Census: 12 in 63, 0 finer (12/13). NGC ID# 266L, PCGS# 8713

**1897 Liberty Eagle, MS65
Seldom Encountered in Higher Grades**

- 5387 1897 MS65 NGC.** Although the 1897 Liberty eagle claims a large mintage of 1 million pieces, the issue is surprisingly difficult to locate in high grade and specimens in MS65 condition are rare. This lustrous Gem exhibits sharply detailed design elements and well-preserved yellow and rose-gold surfaces. Census: 20 in 65, 7 finer (12/13). NGC ID# 267D, PCGS# 8737

1897 Eagle, Fully Struck MS65

5388 1897 MS65 PCGS. This lovely Gem 1897 eagle hails from a mintage just slightly more than 1 million coins, but few survivors approach the quality evident here. Orange-gold surfaces host brilliant luster and a strike that appears full throughout. A tiny copper alloy spot occurs just before Liberty's chin. Insignificant contact marks are unworthy of further mention. Some interesting die cracks connect several of the peripheral elements on the obverse. Population: 8 in 65, 2 finer (12/13). NGC ID# 267D, PCGS# 8737

**1901 Liberty Ten, MS66+
Ideal Type Coin**

5389 1901 MS66+ PCGS. The 1901 Liberty eagle was produced in large numbers and the date is reasonably available in high grade today, making it a favorite with type collectors. The population thins out dramatically above the Gem level, however, and high-end Premium Gems, like the present coin, are quite rare. The design elements are sharply detailed and the well-preserved peach-gold surfaces radiate vibrant mint luster. Population: 29 in 66 (1 in 66+), 1 finer (12/13). NGC ID# 267P, PCGS# 8747

**1903-O Eagle, MS64
Lustrous Anachronism From New Orleans**

5390 1903-O MS64 PCGS. Variety 3. The 1 in the date is centered over a dentil, the low O mintmark is repunched on the lower left. The O-mint gold coins of the early 20th century are prized by numismatists as anachronisms, leftovers from the crumbling New Orleans Mint, which opened in 1838 and struck its last gold coins in 1909, the 1909-O half eagles. This 1903-O eagle is from a production exceeding 112,000 pieces and is one of 15 submissions in MS64 at PCGS, with a single MS65 finer (1/14). Superlative orange-gold luster beams from well-struck surfaces that show a few scattered scrapes in concert with the grade. NGC ID# 267W, PCGS# 8753

**1907 Liberty Head Ten Dollar, MS65
Sharply Struck**

5391 1907 MS65 NGC. The 1907-PDS Liberty Head issues were the last of their long-running ilk, soon to be replaced by the Saint-Gaudens design. This Philadelphia Mint Gem certified by NGC offers generous luster on each side over orange-gold surfaces with a sharp strike and lots of eye appeal. Marks are minimal, as expected for the grade. Census: 85 in 65 (2 in 65+), 6 finer (1/14). NGC ID# 2688, PCGS# 8763

INDIAN EAGLES

1907 No Periods Eagle, Sharply Struck MS66+

5392 1907 No Periods MS66+ PCGS. CAC. After a few iterations of the Saint-Gaudens eagle issue that saw limited mintages, the design made its broader debut with the 1907 No Periods design (so named for the lack of the periods that had flanked the words in E PLURIBUS UNUM, among other places).

The yellow-gold surfaces of this high-end Premium Gem are imbued with traces of apricot and lime-green. This is complemented by sharply struck design elements that include strong definition on the Indian's hair and headdress and the feathers on the eagle. This impeccably preserved coin yields fantastic eye appeal, aptly recognized by CAC. Population: 23 in 66+, 8 finer (12/13). NGC ID# 28GF, PCGS# 8852

5393 No Lot

1910 Indian Head Ten Dollar, MS65 Scarce, Well-Preserved Example

5394 1910 MS65 PCGS. The relatively low output of 318,500 circulation strikes and a proportionately low number of certified Gem examples has not, for some reason, translated to much difference in price versus common-date eagles, making this an attractive candidate for type collectors. This yellow-gold candidate displays frosted surfaces imbued with satiny mint luster. The strike is a touch soft on the feather details as well as the high points of the eagle, but the surfaces are unabraded and appealing. Population: 57 in 65 (2 in 65+), 26 finer (12/13). NGC ID# 28GR, PCGS# 8865

1910-D Eagle, MS65 Abundant Eye Appeal

5395 1910-D MS65 PCGS. A perfect coin for type purposes, this Gem 1910-D shows satiny luster over appealing orange-gold surfaces with a decent strike and abundant eye appeal. Only a few stray luster grazes and tiny marks on the cheek of Liberty preclude an even finer grade. Seldom seen finer. Population: 83 in 65 (1 in 65+), 41 finer (12/13). NGC ID# 28GS, PCGS# 8866

**1911 Indian Eagle, MS67
Ideal Type Coin**

5396 1911 MS67 NGC. The 1911 is an issue of high quality that offers the type collector a slightly unconventional but satisfactory option for the Saint-Gaudens eagle. Garrett and Guth write in their *Encyclopedia of U.S. Gold Coins*: "Aside from the 1926 and 1932 issues, this is one of the most obtainable issues." In a relative sense, this extends even to the MS67 level, though at that point even the 1911 is a definite condition rarity. The present piece has smooth and vibrant lemon-gold surfaces. The strike is particularly pleasing, adding another dimension to the eye appeal. Census: 9 in 67 (1 in 67 ★), 3 finer (12/13).

Ex: *Long Beach Signature* (Heritage, 5/2009), lot 1791. NGC ID# 28GT, PCGS# 8868

**1914 Eagle, Well-Struck MS64+
Top-Notch Eye Appeal**

5397 1914 MS64+ PCGS. Brilliant cartwheel luster radiates from each side of this near-Gem 1914 eagle, a piece quite close to the MS65 category due to its lack of mentionable marks, the lovely luster, and strong strike. The 1914 eagle is a well-produced issue, as this piece shows, with eye appeal that is top-notch. Population: 2 in 64+, 44 finer (12/13). NGC ID# 28H2, PCGS# 8875

**1915 Indian Ten, MS65
Vivid Color, Vibrant Mint Luster**

5398 1915 MS65 NGC. From a mintage of 351,075 pieces, the 1915 Indian eagle is not too difficult to locate in high grade. This spectacular Gem displays sharply detailed design elements throughout, with vivid greenish-gold surfaces that radiate vibrant mint luster. Eye appeal is terrific. Census: 93 in 65 (2 in 65+, 1 in 65 ★), 27 finer (1/14). NGC ID# 28H5, PCGS# 8878

**1916-S Eagle, MS63+
Elusive S-Mint Issue**

5399 1916-S MS63+ PCGS. This Select Mint State orange-gold 1916-S eagle shows accents of lilac on the lower reverse. Scattered, mostly trivial marks on the device high points and in the field that account for the grade, along with a couple of small alloy spots, also on the reverse. Much luster gleams from each side. An elusive S-mint eagle issue in this grade, as well as in finer ones. Population: 95 in 63 (2 in 63+), 58 finer (12/13). NGC ID# 28H7, PCGS# 8880

1920-S Eagle, Mint State Important Series Key, Seldom Offered

5400 1920-S MS60 NGC. The 1920-S Indian Head eagle would be the last issue of the series struck at the San Francisco Mint for a solid 10 years, until the 1930-S issue would mark the end of the S-mint coins. (The common 1926 issue from Philadelphia would intervene between the two S-mint issues.) The 1920-S was itself the first in the series since the 1916-S, regardless of mint. After the 1930-S, the ultracommon 1932 and the ultra-rare 1933 would finish off the series for good.

The 1920-S production was neither large nor small at 126,500 pieces, but clearly most of the mintage was melted at some point. Today the issue is among the most elusive of the entire series, perhaps behind only the 1933 (also a melt rarity) and the 1907 Rolled Rim. Nonetheless, some examples of the 1920-S clearly circulated to some degree, and most survivors range in the AU55 to MS61 grade levels.

This piece boasts far more collector appeal than the grade might imply. Ample luster coats the orange-gold surfaces throughout each side. Scattered scrapes determine the grade, including a patch of thin marks on Liberty's cheek and others in the left obverse field, just above Liberty's eye level. The eagle's neck shows a pair of deep digs, with other smaller marks on the reverse. The obverse strike is far sharper than seen on many examples, even though TY shows minor weakness. Notable softness appears on the lower reverse, in the area around the eagle's claws where they join the branch and the lettering below.

Astute series specialists will undoubtedly recognize the offering of this piece for the important opportunity that it represents. Census: 3 in 60, 23 finer (12/13).

From Christopher Bently's Nob Hill Collection. NGC ID# 28H8, PCGS# 8881

1930-S Eagle, Elusive MS65 Seldom Seen So Fine

5401 1930-S MS65 PCGS. After striking the 1920-S eagles, the San Francisco Mint went a full decade before producing the 1930-S issue, the last mintmarked member of the Indian Head eagles.

The original mintage was small; the survival was far smaller yet.

Only 96,000 examples of the 1930-S eagle were struck off. Most of those coins never saw circulation. The horrid Great Depression had descended over the American economy the year before, its harbinger the precipitous stock market crash of October 1929. Ten dollars was a great deal of money when millions of Americans were hoping for a job and scrounging just to make ends meet.

Although some few survivors of the issue show evidence of light circulation, the overwhelming majority of the couple of hundred examples extant today are in the lower Mint State grades. PCGS currently shows 95 submissions of the 1930-S in all grades, with one in AU53, seven in AU58. The Mint State examples at PCGS form a tight cluster in the MS61 through MS64 grades. Gems are rare, and anything finer will require long and diligent searching, as the few different coins existing in those grades appear to be in quite strong hands.

The sole finest 1930-S eagle at PCGS is the MS67 ex: Dr. Steven Duckor-Jim O'Neal coin, a piece that we offered in our FUN Signature (Heritage, 1/2009), lot 3529, which realized a strong \$299,000. PCGS shows only five submissions in MS66, and it has been nearly five years since we have offered an MS66 PCGS coin. The last such was in our Baltimore Signature (Heritage, 3/2009), lot 3195, the former Henry Chapman-Floyd Starr coin, which garnered \$92,000.

Given the infrequency of appearances of Premium Gem or finer coins, we suspect that this PCGS-certified Gem 1930-S will incite spirited bidding when it comes to auction. Generous luster runs over both sides of this piece, which shows prevailing reddish-orange surface color tinged by glints of lilac in the fields and the high points of each side. Contact marks are negligible, although the few tiny marks on the cheek account for the grade. Some strike softness on the hair curls over Liberty's brow are as expected on the issue. Population: 15 in 65 (1 in 65+), 5 finer (12/13).

From Christopher Bently's Nob Hill Collection. NGC ID# 28HA, PCGS# 8883

LIBERTY DOUBLE EAGLES

1850 Double Eagle, AU58

Ex: S.S. Republic

- 5402 1850 AU58 NGC. Ex: S.S. Republic. This first-year double eagle saw little commercial activity in its first year of existence and then sank in a shipwreck in 1865. Today it is a near-Mint representative of a popular issue, radiant lemon-yellow with a number of wispy abrasions but little actual wear. Housed in an S.S. Republic presentation case with informative booklet and disk included. NGC ID# 268F, PCGS# 8902

1852 Twenty Dollar, MS61

Repunched Date, FS-301

- 5403 1852 MS61 PCGS. FS-301. Repunched Date. The first set of date digits is repunched north of the second punches, seen most boldly on the 1, 5 (especially; top, middle, and bottom), and 2. Rich luster appears on both sides of this orange-gold twenty, held back from a higher grade by scattered, still relatively undistracting abrasions. A die crack passing through the lower date digits adds further to the interest. NGC ID# 268K, PCGS# 8906

1855-S Bold S Twenty, AU53

From the S.S. Central America

- 5404 1855-S Bold S AU53 PCGS. CAC. Ex: S.S. Central America. SSCA 6488. Variety 14B, Bold S. This is one of the earlier S-mint varieties found aboard the doomed S.S. Central America, which sank in 1857. Lustrous yellow-gold surfaces are sharply struck throughout and show a scattering of mostly light marks and grade-consistent circulation wear. Population: 3 in 53, 39 finer (12/13). Ex: Baltimore ANA Signature (Heritage, 8/2008), lot 10075. PCGS# 70044

1857-O Double Eagle, XF45

Very Scarce O-Mint Issue

- 5405 1857-O XF45 PCGS. CAC. Variety 1. Most New Orleans double eagles are dated between 1850 and 1853. Subsequent O-mint issues are typically formidable rarities, although within that range the 1857-O is more available than most. 30,000 pieces were struck, and third party services have certified about 200 unimpaired examples. The present canary-gold representative is well defined and displays noticeable luster. Abrasions are fairly minor aside from a horizontal mark beneath Liberty's eye. NGC ID# 2694, PCGS# 8921

1857-S Spiked Shield Double Eagle, MS63

An S.S. Central America Classic

- 5406 1857-S MS63 PCGS. Variety 20A. Ex: S.S. Central America. SSCA 3708. Spiked Shield. More heavily patinated than the usual Central America coin, particularly on the reverse, though the obverse remains bright. Excellent detail with wispy abrasions and a shallow cut to the right of the date. Offered with certificate of authenticity, faux-book case, and outer box. NGC ID# 2696, PCGS# 8922

1857-S Spiked Shield Double Eagle, Bright MS64

- 5407 1857-S MS64 PCGS. Variety 20A. Ex: S.S. Central America. SSCA 4757. Spiked Shield. The bright yellow-gold surfaces display occasional whispers of apricot. This is a sharply struck piece with pleasing luster and just a few minute marks that preclude Gem status. A faint fingerprint is visible in the right reverse field. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, MS64
Spiked Shield Variety

5408 1857-S MS64 NGC. CAC. Variety 20A. Robert Evans' "Spiked Shield" variety is identified by two short die scratches to the left of, and penetrating the shield. At one time unavailable in high grade, the 1857-S was well-represented in the S.S. *Central America* shipwreck, where the present coin almost certainly originated. The issue has become the favorite choice of collectors seeking a representative of the Type One double eagle.

The present coin is a delightful Choice example, with radiantly lustrous surfaces that display peach-gold and orange toning. The design elements are sharply struck, and just a few small marks prevent an even higher grade. A very attractive '57-S double eagle.

Ex: *Central States Signature* (Heritage, 4/2006), lot 4196. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, MS65
Quintessential Type Coin

5409 1857-S MS65 PCGS. At one time the 1857-S double eagle was considered a condition rarity. In 1982, David Akers calculated an average auction grade of just under XF40. Today, as a result of the S.S. *Central America* treasure, the average auction grade is MS61, according to Jeff Garrett and Ron Guth.

This incredible Gem has rich orange-gold luster and bold design definition. The distinctive coloration suggest that this piece was part of the S.S. *Central America* treasure, although it resides today in a generic PCGS holder. This is an excellent candidate for a high quality U.S. gold type set. NGC ID# 2696, PCGS# 8922

**1857-S Twenty Dollar, MS65
Bold S, S.S. Central America Prize**

- 5410 1857-S MS65 PCGS. CAC. Variety 20B.** Ex: S.S. *Central America*. SSCA 4838. This Bold S Gem 1857-S bears every hallmark of stemming from the S.S. *Central America*, that famed and ill-fated shipwreck that foundered in an Atlantic hurricane in the same year this piece was struck. The Spiked Shield and Bold S varieties were two of those most frequently found in the salvaged cargo of the doomed ship. This piece shows great luster and pristine preservation on boldly struck surfaces. Medium orange-yellow centers meld with deeper reddish-orange near the rims, a beautiful coin regardless of the source. PCGS has seen only 49 finer (1/14). NGC ID# 2696, PCGS# 8922

**1859-S Twenty Dollar, AU55
San Francisco Type One Issue**

- 5411 1859-S AU55 NGC. CAC.** Attractive yellow-gold color and ample remaining mint luster earn this lightly circulated double eagle extra points for eye appeal. The expected surface abrasions are present but are not too distracting. As a popular, branch mint issue, this San Francisco twenty was a greater rarity prior to some modest shipwreck finds including 67 examples pulled from the S.S. *Republic*. Reasonably sharp for the grade, this example is desirable for date collectors since the 1859 Philadelphia and New Orleans issues are quite rare and expensive. NGC ID# 269C, PCGS# 8928

**1860 Double Eagle, MS62
Mint State Type One**

- 5412 1860 MS62 NGC.** All Mint State Type One double eagles are scarce and desirable, but especially so when significant bagmarks and abrasions are nowhere to be seen on smooth, attractive surfaces such as this coin possesses. Although nearly 100 examples of this Philadelphia date were salvaged from the S.S. *Republic*, MS62 or finer representatives remain rare. This radiant twenty is apricot-gold with cartwheel mint luster. The portrait is unmarked, with the surrounding fields pleasing and unabraded. A bold strike completes the appeal. Census: 11 in 62 (2 in 62+), 6 finer (1/14). NGC ID# 269D, PCGS# 8929

1865 Double Eagle, MS63
Ex: S.S. Republic

5413 1865 MS63 NGC. Ex: S.S. Republic. As part of the rehabilitation of the once-rebel city of New Orleans, the S.S. Republic set sail for the Louisiana port with a cargo of much-needed gold and silver coins. The ship sank, however, and its treasure lay at the bottom of the ocean for more than a century. This double eagle, struck the same year as the shipwreck, never had a chance to circulate and thus is unworn. Pale golden surfaces have a number of light abrasions in the portrait area but the reverse is relatively clean. Housed in a faux-wood S.S. Republic presentation case and offered with informative booklet and DVD still in shrinkwrap. NGC ID# 269U, PCGS# 8943

1866 Double Eagle, MS62
Type Two Condition Rarity

5414 1866 MS62 PCGS. CAC. As the Guide Book lists it, the Type Two Liberty double eagles (reverse showing IN GOD WE TRUST and the denomination as TWENTY D.) begin with the Philadelphia issue of 1866. Of course, few collectors of the time paid any attention to the circulation examples and most were lost to commerce. This rare Mint State representative has rich sunset-orange and yellow-gold coloration with broadly swirling luster. Though Liberty's neck shows a sizable cut, other marks generally are wispy and unobtrusive. All in all, an appealing coin. Population: 5 in 62, 1 finer (12/13). NGC ID# 269X, PCGS# 8949

1866-S Liberty Twenty, AU53
First Type Two Issue

- 5415 1866-S Motto AU53 PCGS. Some double eagles were struck with the Type One design early in the year at the San Francisco Mint, but most coins of this denomination feature the Type Two design, with the motto IN GOD WE TRUST. This pleasing Type Two example is lightly worn and minimally abraded for the grade, with pleasing greenish-gold surfaces that retain traces of original mint luster. Population: 34 in 53, 82 finer (12/13). NGC ID# 269Y, PCGS# 8950

1869 Twenty, AU58
Scarce Philadelphia Issue

- 5416 1869 AU58 NGC. With speculators trying to corner the gold market and the financial district in turmoil, apparently few Mint State double eagles were set aside in 1869. This lustrous, near-Mint example is a good alternative to a Mint State coin and much more affordable. A modest assortment of abrasions are seen (as expected), as are a couple of minor rim nicks. The color and luster, however, are outstanding. Bright yellow-gold enhances a strong strike amid minimal wear. Census: 75 in 58, 10 finer (1/14). NGC ID# 26A5, PCGS# 8955

1869-S Double Eagle, AU58
Lustrous, Lightly Circulated Type Two S-Mint

- 5417 1869-S AU58 PCGS. All 11 of the S-mint Type Two double eagles from 1866-S to 1876-S inclusive were struck in amounts from several hundred thousand each up to 1.6 million for the 1876-S, and there is not a tremendous market differentiation between them. The 1869-S is nonetheless seldom seen above the lower Mint State levels. This near-Mint piece shows attractive eye appeal over reddish-orange surfaces with much luster remaining and scattered minor marks consistent with a short stay in circulation. Population: 63 in 58 (2 in 58+), 49 finer (12/13). NGC ID# 26A6, PCGS# 8956

1870-CC Double Eagle, AU Sharpness
Rarest Carson City Gold Coin
Seldom Seen in Any Grade

5418 1870-CC — Cleaned — ANACS. AU Details. Variety 2-B.

The second C in the mintmark is higher than the first, and both C's are centered over NT in TWENTY. The upright of the 1 in the date is centered over a dentil.

Abraham "Abe" Curry founded the town of Carson in the western portion of the Utah Territory in 1858, naming it for the Indian scout and explorer Kit Carson, a town that would later become known as Carson City. The famous Comstock Lode of silver and gold would be discovered the following year, in 1859, but it would be 1870 before the Carson City Mint would finally open for coinage operations.

On February 3, 1870, the Carson City Mint officially struck its first coins, silver dollars dated 1870-CC, as reported in the February 5 edition of the *Daily Alta California* newspaper. The founder of Carson City, Abraham Curry, served as the first superintendent of the new mint.

In keeping with the character of the Comstock Lode, the Carson City Mint would strike during its first year the largest three circulating denominations each in silver and gold — silver quarters, half dollars, and dollars, along with gold half eagles, eagles, and double eagles.

The "1870-CC" date is a magical one for collectors, and no more so than when associated with the twenty dollar denomination, America's largest circulating denomination of the classic era of U.S. gold coinage. The 1870-CC double eagle has a noted and well-earned reputation as the most expensive among the Liberty Head double eagles. Curiously, the Carson City Mint required two die pairs to strike the pieces. Today it is estimated that no more than 45 or 50 examples survive in all grades — a survival rate of 1.25% to 1.4% of the original mintage of 3,789 coins. Mint State examples of the 1870-CC double eagle are unknown.

An example with AU Details such as the present coin is bound to be the object of *particular attention* on the part of multiple bidders. The surfaces are bright, even yellow-gold, showing light wear consistent with the AU Details grade on each side. A few light marks in the field are as expected, but none are overt or, indeed, large enough to serve as pedigree identifiers.

Offerings of 1870-CC double eagles are infrequent, even at Heritage, and they are noteworthy. Searching back through our Permanent Auction Archives, we find that the last offering was an XF40 NGC-graded piece in our Dallas Signature (Heritage, 10/2012), lot 6210, which brought a hearty \$193,875 after 11 distinct bidders joined in the fracas. The overall rarity of the issue make it by far the most elusive Carson City gold coin, and second within the Liberty Head double eagles only to the extremely rare 1861 Philadelphia Paquet issue.

We expect that this desirable, well-detailed, and eminently collectible 1870-CC double eagle will also rouse much collector attention at the auction block. NGC ID# 26A8, PCGS# 8958

1873 Open 3 Double Eagle, Conditionally Rare MS64

5419 1873 Open 3 MS64 PCGS. The 1873 Open 3 double eagle can be located through MS63 with diligent searching, but higher-grade examples are extremely rare. Indeed, PCGS and NGC combined have graded only 11 near-Gem pieces and a mere two specimens finer.

The present MS64 displays highly lustrous golden-orange surfaces that exhibit well-struck design features, though portions of Liberty's hair are soft, as usually seen. A few minute marks preclude Gem classification but take nothing away from the coin's pleasing eye appeal. Population: 9 in 64, 1 finer (12/13). NGC ID# 26AH, PCGS# 8967

Carson City Mint, 1875
(Nevada Historical Society)

1873-CC Double Eagle, MS61
Condition Census Specimen
Variety 1-A

5420 1873-CC MS61 PCGS. Variety 1-A. Normal Date. All 1873-CC double eagles have a Closed 3 date logotype, from dies sent Philadelphia to Carson City early in the year. While the Philadelphia and San Francisco Mints soon switched to the Open 3 logotype, it appears that no such dies were sent to Carson City.

When David Akers compiled his auction analysis of double eagles, published in 1982, he wrote: "The 1873-CC is decidedly rare in AU and, although I have seen a couple of 'sliders,' I have never had the opportunity to see a real unc. Reportedly a few uncs do exist but I do not know the present location of one." During the last quarter century, PCGS has certified just 11 submissions as MS60 or finer, and only two of those grading events achieved higher grades than this example, one in MS62 and one other in MS63. NGC has certified one finer example as MS62. In the 20 years since we began archiving our auction sales, we have only offered a Mint State 1873-CC double eagle on 11 previous occasions. Seven of those offerings were graded MS60.

The mintage of the 1873-CC double eagle was 22,410 coins, and mintages of other gold issues at Carson City in 1873 were similarly low. The total face value of gold minted in Nevada during the year was just \$530,710, despite total gold deposits valued at more than \$5 million. Gold production spiked dramatically at Carson City in 1874, with more than \$2.5 million in gold coins produced that year.

Despite higher certification totals, there are certainly less than 10 Mint State survivors of this issue. The present piece likely ranks among the top three or four survivors from that population. Both sides have frosty orange-gold luster with scattered marks that are mostly inconsequential. A noticeable nick appears on Liberty's chin. The surfaces are exceptional, with an identifying spot below the D in UNITED. Population: 5 in 61, 2 finer (12/13). NGC ID# 26AJ, PCGS# 8968

1874-CC Double Eagle, AU53

- 5421** 1874-CC AU53 PCGS. Variety 2-A. This lemon-gold Carson City type coin is moderately bright and displays scattered field marks, most noticeable on the left obverse and between the EN in TWENTY. The cheek is glossy and exhibits abrasions usual for the grade. Luster emerges from design elements.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AP, PCGS# 8971

1874-CC Twenty, AU55
Early Carson City Issue

- 5422** 1874-CC AU55 NGC. Variety 1-A. The orange-gold, still-lustrous surfaces show quite a few scattered abrasions, more prominently on the obverse, and some smoke-gray patina is evidence of what was likely long-term bag storage. One of the larger-mintage CC double eagle issues.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AP, PCGS# 8971

1875-CC Double Eagle, MS61
A Favorite CC-Mint Type Coin

- 5423** 1875-CC MS61 PCGS. From a mintage of 111,151 pieces, the 1875-CC Liberty double eagle is one of the most available Carson City issues and a favorite choice of mintmark type collectors. Examples can be located through MS62 with relatively little difficulty, but are challenging any finer.
Soft orange-gold and lime-green patination runs over both sides of this MS61 example, and each possesses considerable mint luster. The design elements are well-struck except for minor weakness in some of the obverse stars and portions of Liberty's hair. The most noteworthy mark is a vertical scrape on Liberty's cheek. NGC ID# 26AT, PCGS# 8974

1875-CC Double Eagle, MS61
Great Eye Appeal

5424 1875-CC MS61 PCGS. Variety 4-A. The surfaces display far more eye appeal than the MS61 grade might suggest, and we believe that in general these MS61-certified Carson City coins — at least, those high-end for the assigned grade, such as this example — offer a considerable market opportunity at today's levels. The surfaces are orange-gold and quite lustrous with an overlay of field chatter, which only under a high-power loupe resolves into a scattering of marks, none overt. The 1875-CC double eagle was a large production during the heyday of the Carson City Mint, more than 111,000 pieces. The sharp strike adds further to the allure. NGC ID# 26AT, PCGS# 8974

1877-CC Double Eagle, AU58
First Type Three Carson City Twenty

5426 1877-CC AU58 NGC. The 1877-CC double eagle was the first Carson City production of the Type Three design, showing TWENTY DOLLARS on the lower reverse superseding the previous TWENTY D. of 1866-76 Type Twos. The orange-gold surfaces on this near-Mint State example are remarkably well-preserved and free of any major signs of contact, although some light field chatter is a sign of a short spate in circulation. The moderate mintage of this issue was 44,565 pieces, but Mint State pieces are seldom seen. This is a great-looking example for its grade; finding a nicer one will be quite a challenge. NGC has seen only 18 submissions numerically finer (12/13). NGC ID# 26AZ, PCGS# 8983

1877-CC Double Eagle, AU53

5425 1877-CC AU53 NGC. Variety 1-A. Five die varieties are confirmed despite a low mintage of 42,565 pieces. Apparently orders for double eagles were interspersed with the production of Seated coinage. The present Carson City twenty has greater luster extent than is usual for the AU53 level, and also retains its original apricot-gold toning. Small marks are scattered but none are individually consequential. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26AZ, PCGS# 8983

**1879-S Double Eagle, Sharply Struck MS62
Virtually Unobtainable Any Finer**

5427 1879-S MS62 PCGS. Many 1879-S double eagles were shipped overseas for international trade, and large numbers have returned to the States in recent decades. Most survivors are Extremely Fine or About Uncirculated. Mint State examples are scarce, and when located are primarily in MS62 and lower grades.

Variegated peach-gold and lime-green patination runs over both sides of this MS62 specimen. The design elements are sharply impressed, including the strands of Liberty's hair, the obverse star centrils, and the eagle's plumage. Scattered tiny marks interfere minimally with the coin's luster flow. Population: 71 in 62, 4 finer (12/13). NGC ID# 26B9, PCGS# 8991

**1880 Double Eagle, MS61
Rare Any Finer**

5428 1880 MS61 NGC. The 1880 Liberty double eagle, from a low mintage of 51,420 pieces, is scarce-to-rare in all grades. Mint State examples, when they are located, are mainly in MS60 to MS61. Yellow-gold surfaces exhibit sharply struck design elements, including strong detail in Liberty's hair and the star centrils. Scattered light marks result in just minor disruption in the luster flow. Census: 28 in 61, 8 finer (12/13). NGC ID# 26BA, PCGS# 8992

**1882-CC Double Eagle, AU55
Lustrous and Attractive**

5429 1882-CC AU55 PCGS Secure. Variety 1-B. The second C in the mintmark is higher than the first. The peripheral die crack joining the bottoms of TWENTY DOLLARS is often seen on this reverse, which appears more often than the 1-A variety, with second C lower. This Choice AU coin still retains most of its original luster over attractive orange-gold surfaces. NGC ID# 26BF, PCGS# 8997

**1884-CC Double Eagle, MS60
Popular Mintmark Type Issue**

5430 1884-CC MS60 NGC. Variety 1-A. From a substantial mintage of 81,139 pieces, the 1884-CC Liberty double eagle is a relatively available Carson City issue and a popular choice of mintmark type collectors. This attractive Mint State piece is well-detailed and lustrous, with yellow and rose-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 26BK, PCGS# 9001

**1884-CC Twenty, MS61
Bright Luster**

5431 1884-CC MS61 NGC. Variety 1-A, sole dies for the year with the 4 in the date tilted a bit right. Golden-orange surfaces on this Mint State coin show bright luster but numerous heavy reeding marks and other contact marks in the obverse fields and on the profile of Liberty account for the grade. The reverse is more lightly abraded. NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, Sharply Struck MS61

5432 1884-CC MS61 PCGS. CAC. Variety 1-A. The only known die pair. Large numbers of the 1884-CC double eagle were shipped overseas and have been returning over the past several decades. The date is available up to and including MS61, but becomes scarce in MS62 and rare any finer. Gem and higher-grade examples are virtually unobtainable.

The yellow-gold surfaces of this MS61 specimen reveal distributed small marks that impede somewhat the coin's luster flow. Sharply struck design features are evident over both sides. This last attribute undoubtedly helps to account for the recognition by CAC. NGC ID# 26BK, PCGS# 9001

**1887-S Double Eagle, MS62
Type Three Issue, Scarce**

5433 1887-S MS62 NGC. This San Francisco issue is known as a heavily exported date, with many surviving examples cluttered with bagmarks and abrasions from repeated transport and storage. This example shows a lightly abraded portrait and surrounding fields, but the number and severity of abrasions are less than often seen. The coin is a brilliant yellow-gold with a glimpse of ocean-green at the rims. Boldly struck and appealing. NGC ID# 26BS, PCGS# 9007

1890 Double Eagle, Conditionally Scarce MS63

5434 1890 MS63 NGC. A modest mintage approaching 76,000 coins provides today's collectors with a supply of Mint State survivors in MS60 to MS62. Select examples such as the present offering are very scarce, however, and finer specimens are extremely rare. Lustrous surfaces display yellow-gold coloration and exhibit well impressed design features. A few minute marks limit the grade. Census: 17 in 63, 5 finer (12/13). NGC ID# 26BX, PCGS# 9013

**1890-CC Double Eagle, AU55
Minimal Marks and Rich Color**

5435 1890-CC AU55 PCGS. Variety 1-A. The last high-mintage Carson City twenty, the 1890-CC saw a production exceeding 91,000 pieces. This still-lustrous example is curiously free of mentionable circulation marks. The sharp strike and rich reddish-gold color provide excellent eye appeal. This coin would fit nicely into either a circulated type set or an affordable assembly of Carson City gold. Ex: Indianapolis Central States Signature (Heritage, 4/2001), lot 7996.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BY, PCGS# 9014

**1890-CC Doubled Die Reverse Double Eagle
Sharply Struck AU58**

5436 1890-CC Doubled Die Reverse AU58 ANACS. Variety-1-A. Most 1890-CC double eagles are this die variety with a doubled die reverse. However, the present lot represents the scarce early die state with full tail feathers and clear die doubling on PLURIBUS and TWENTY. The yellow-gold surfaces of this near-Mint example exhibit sharply struck design elements, including strong definition in Liberty's hair and the star centrils. NGC ID# 26BY, PCGS# 9014

1893-CC Double Eagle, Sharply Struck AU55

5437 1893-CC AU55 PCGS. Variety 1-A. The scarcer of the two known die marriages, which share the same reverse die but have slightly different date locations. Traces of luster reside in the recessed areas of this peach-gold Choice AU twenty dollar. The design elements are sharply struck throughout. NGC ID# 26C9, PCGS# 9023

**1895-S Double Eagle, MS64+
Conditionally Rare Any Finer**

5438 1895-S MS64+ PCGS. Although the 1895-S Liberty twenty claims a large mintage of 1.1 million pieces, the issue is conditionally rare at the MS65 level. This high-end Choice example exhibits well-detailed design elements and vibrant mint luster throughout, with virtually pristine peach-gold surfaces. PCGS has graded eight numerically finer examples (12/13). NGC ID# 26CE, PCGS# 9028

**1900 Twenty Dollar, MS65
Lustrous and Well-Struck**

5439 1900 MS65 NGC. The 1900 double eagle's mintage exceeding 1.8 million pieces makes it seem generous until compared with the 1904's elephantine production, more than 6.2 million coins. The orange-gold surfaces of this Gem are broadly lustrous, well-struck, and only lightly marked, in concert with the grade. A great alternative to the 1904 for type purposes. NGC ID# 26CP, PCGS# 9037

**1901 Gem Twenty Dollar
Slightly Better 20th Century Date**

5440 1901 MS65 PCGS. The first 1 in the date is repunched, with extra metal visible below the serif and the base. A lustrous and well-struck Gem that has a few diagonal streaks of honey-gold patina across the portrait. There is a minor contact mark on the jaw of Liberty. A lower mintage issue.
Ex: Long Beach Signature (Heritage, 6/2002), lot 7024. NGC ID# 26CS, PCGS# 9039

**1901 Double Eagle, MS65
Great-Looking Type Candidate**

5441 1901 MS65 PCGS. Mellow rose-gold color, a sharp strike, and generous mint luster are hallmarks of this Gem 1901 double eagle, an unusually high grade for a Liberty Head twenty. This piece is bested numerically by only four submissions at PCGS and would make a great-looking coin for type purposes. NGC ID# 26CS, PCGS# 9039

**1904 Liberty Double Eagle, MS66
Only One Finer at NGC**

5442 1904 MS66 NGC. The 1904 Liberty double eagle is a popular type issue from a huge mintage of more than 6 million pieces. Examples in Premium Gem condition are scarce, however, and finer grades are extremely rare. This delightful MS66 specimen displays well-preserved orange-gold surfaces and vibrant mint luster on both sides. NGC has graded only one numerically finer example (12/13). NGC ID# 26CY, PCGS# 9045

**1904-S Twenty Dollar, MS65
Boldly Struck**

5443 1904-S MS65 NGC. The S-mint double eagle of 1904 had a gargantuan mintage nearly as large as its P-mint sibling of the same year, 5.1 million versus 6.3 million. This Gem 1904-S certified by NGC shows the typical bold S-mint strike over lustrous apricot-gold surfaces unimpeded by any singular contact. A great-looking type coin. NGC ID# 26CZ, PCGS# 9046

PROOF LIBERTY DOUBLE EAGLE

1897 Double Eagle, PR64 Ultra Cameo An Important and Impressive Offering

5444 1897 PR64 Ultra Cameo NGC. If proof gold coinage is considered the caviar of American numismatics, then the proof Liberty Head double eagles must be considered the Beluga caviar of the specialty. The later Saint-Gaudens gold coinage was produced with the matte or satin finishes, which proved mighty unpopular with collectors of the era. Even today, opinions among advanced collectors seem more mixed.

In literal contrast, the Liberty Head double eagle proofs (and other proof gold coins of the era), at least up through 1902 when the Mint changed its method of manufacture, show high-contrast, reflective fields and frosted devices, often achieving the coveted Cameo or Deep/Ultra Cameo designation at the grading and certification companies.

The Ultra Cameo or Deep Cameo Liberty Head twenties are exceedingly popular and are not only stunning visually, they are also the most impressive and largest proof gold denomination of the classic era of U.S. numismatics, prizes that are fiercely contested when they cross the auction block.

The 1897 double eagle proofs saw a recorded mintage of 86 pieces, nominal within the series. It is doubtful that more than 20 to 25 examples survive today, despite the inflated population figures. Garrett and Guth call the date “underrated” and note that the double eagles dated after 1897 “become much more available.”

The first and most obvious hallmark of this near-Gem Ultra Cameo proof is, understandably, the profound cameo contrast created between reflective, mirrored surfaces and frosty devices on the surfaces, yellow-gold overall and showing the gold-on-black appearance so treasured by numismatists for these coins. It requires a loupe to observe a few scattered contact marks, including one just before the lower neck near star 1. The orange-peel texture often seen on proof gold is as expected; the proof strike has created full design details throughout both sides. An important proof gold offering. Census: 3 in 64 Ultra Cameo, 5 finer (12/13). NGC ID# 26EJ, PCGS# 99113

HIGH RELIEF DOUBLE EAGLES

MCMVII High Relief Twenty Wire Rim, AU Details

- 5445** 1907 High Relief, Wire Rim PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. The lemon-gold surfaces are lustrous and show only a hint of wear on Liberty's raised knee and the crest of the front wing. As always for this coveted type, the rays near the sun are lightly brought up. Only 12,367 pieces were struck. Faintly hairlined, but many collectors would be delighted to acquire this example. From The Teich Family Collection. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, Unc Details Wire Rim

- 5446** 1907 High Relief, Wire Rim — Improperly Cleaned — NCS. Unc. Details. This satiny yellow-gold High Relief has traces of orange overtones in the fields, with boldly executed design motifs. While scattered marks and faint cleaning lines are evident on both sides, this example retains excellent eye appeal. From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, MS62 Wire Rim

- 5447** 1907 High Relief, Wire Rim MS62 PCGS. The Wire Rim variety was the initial production of High Relief Saint-Gaudens double eagles, followed by the Flat Rim coins, and eventually the Arabic Numerals Low Relief coins. This example has a nearly complete wire rim on the obverse, and a partial wire rim on the reverse. The usual small nicks are evident on the thin raised fin on this example, with other scattered marks on both sides, most noticeably at 7 o'clock on the reverse. The lemon-yellow surfaces are fully brilliant and lustrous, with delicate bluish overtones. NGC ID# 26F2, PCGS# 9135

**MCMVII High Relief, Wire Rim Twenty, MS63
Rich Color and Thick Satiny Luster**

5448 1907 High Relief, Wire Rim MS63 PCGS. In describing the Ultra High Relief Saint-Gaudens double eagle, Dr. Robert J. Loewinger, in his reference on proof gold coins, says, in part:

“Liberty’s skirt shows two folds on the side of her right leg (left field); the underside of the skirt’s oval is very large; the Capitol building in the background is very small. Thirteen rays appear in the field to the left and 13 to the right, all emanating from behind the figure of Liberty. The MCMVII is distant from the drapery.”

In characterizing the business strike “Regular High Relief,” as he calls it, Loewinger points out a few differences with the design:

“Note the MCMVII lettering is close to the drapery. The Capitol is large; there are 3 narrower folds in the skirt just beyond the left leg; there is a small oval section in the underside of the skirt; there are 13 rays in the sunburst and a softness of detail in the device and lettering.”

While, of course, the vastly different height of the relief is the chief and most easily noticed variation, the marked inequality in the Capitol, and in the size of the “ovals” beneath the skirt; the variance in the number of skirt folds to the left of Liberty; and the different positioning of the date are also quite obvious when one views the coins, or photos of them, side by side.

This piece displays a tiny rim tick at 3 o’clock and a couple of hair-thin marks in the fields that prevent an even finer grade, but much eye appeal remains on the lovely orange-gold surfaces. There are no singular abrasions. Traces of the wire rim appear, as usual, over much of both sides.

Ex: *ANA Signature (Heritage, 7-8/2008)*, lot 3384. NGC ID# 26F2, PCGS# 9135

**1907 High Relief Double Eagle, MS63+
High Extruded Rim Around Part of the Obverse**

5449 1907 High Relief, Wire Rim MS63+ PCGS. When Augustus Saint-Gaudens produced his magnificent design for the High Relief twenty dollar, Neoclassicism had long since been abandoned in most artistic circles, yet it remained on U.S. coinage. That would change during the Renaissance period for coin designs that lasted until 1921. However, a curious paradox exists with Saint-Gaudens’ design for the double eagle. It is both forward-looking as well as grounded in Classical sculpture and the high-relief coinage of the ancient Greeks. This is a fully detailed example of his Classically inspired design. The wire rim is nearly complete around both sides with an especially pronounced high rim on the obverse between 12 and 4 o’clock. A few light contact marks are present, but none are worthy of individual mention. Just the slightest hint of reddish patina is present on each side. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, Net XF40

- 5450** 1907 High Relief, Flat Rim — Cleaned — ANACS. AU Details, Net XF40. This example is described as cleaned, but the honey-gold and pale blue surfaces suggest are smoothed with blunted details. The appearance is that of a burnished gold piece. This example will prove affordable for the budget-minded collector. From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 9136
-

1907 High Relief Double Eagle, MS63
Less Available Flat Rim Type

- 5451** 1907 High Relief, Flat Rim MS63 PCGS. An attractive satiny example of one of the most popular and impressive of all American coin designs. The obverse of this piece shows a few minor luster grazes in the fields and a hint of stacking friction on Liberty's knee and breasts. The reverse is quite frosty with only trivial stacking friction and a few small contact marks. The Flat Rim variant is about four times rarer than its Wire Rim counterpart. A great coin for the person desiring a medium grade, medium priced example of Saint-Gaudens' most famous work. Ex: Dallas Signature (Heritage, 12/2004), lot 7071. PCGS# 9136
-

1907 High Relief Twenty, MS65
Scarcer Flat Rim Variant

5452 1907 High Relief, Flat Rim MS65 NGC. Even those who are geniuses in their given field can go just so far with their God-given abilities. At some point in any artist's life, hard work must complement natural ability. Hard work was a lifelong habit for Augustus Saint-Gaudens. When he was in his teens, he worked as a cameo-cutter by day, and attended the Cooper Institute in the evenings. In his *Reminiscences*, Saint-Gaudens was justifiably proud of the hard work during his youth. In a humorous and somewhat self-effacing quote from his biography, he reflected on his lifetime potential:

"With such an incentive I became a terrific worker, toiling every night until eleven o'clock after the class was over, in the conviction that in me another heaven-born genius had been given to the world. I can remember thinking in public conveyances, that if the men standing on the platform around me could realize how great a genius was rubbing elbows with them in the quiet-looking boy by their side, they would be profoundly impressed."

The habits of the "terrific worker" in his youth continued throughout Saint-Gaudens' career, taking on more sculptural commissions than he could complete. This workload required him to establish a French-inspired *atelier* system that employed numerous workmen of varying degrees of ability. Toward the end of his life, Saint-Gaudens still used this *atelier* system and it was primarily Henry Hering, the most trusted of this inner group of artists, who ran interference between the Mint and the president to finally complete and strike the High Relief twenties in 1907. Hering and Chief Engraver Charles Barber later modified Saint-Gaudens' design to produce the Arabic Numerals version of the double eagle that was suitable for high-speed coinage and mass production.

Only 12,367 High Relief double eagles were struck in 1907 and about three quarters of the survivors show a thin fin, or wire rim around the edges of the coin, caused by metal extruding through the narrow gap between the die and collar when the coins were struck. This feature was considered undesirable at the time, and mint personnel worked hard to eliminate it by adjusting the milling and planchet size of the coins. They were successful, and the coins produced later in the year have a flat rim, like the present coin.

The coin offered here is a delightful Gem, with well-detailed sculptural design elements and vibrant mint luster. The reddish-gold surfaces are free of large or distracting contact marks and eye appeal is quite strong. Census: 85 in 65 (1 in 65+), 91 finer (12/13). PCGS# 9136

1907 Flat Rim High Relief Twenty, MS66
One of the Few Known With a Completely Flat Rim

5453 1907 High Relief, Flat Rim MS66 NGC. The striding figure of Liberty used by Augustus Saint-Gaudens is inextricably linked to the figure of Liberty that leads General Sherman in the Sherman Monument at the entrance to New York's Central Park. Both are essentially the same figure. In *The Greater Journey*, David McCullough gives the background for the model Saint-Gaudens used for the Sherman Monument and by extension for the figure of Liberty on the 1907 twenty dollar gold piece:

"Several busts and studies of Victory had also been done in New York prior to Saint-Gaudens's departure for Paris. The young woman who posed for him was a twenty-four year old model named Hettie Anderson from South Carolina, whom he described as 'the handsomest model I have ever seen ...' Few were to know that she was an African-American, but for Saint-Gaudens and the others who did, it must have seemed especially fitting that she be the one to lead the triumphant Union commander on his way."

Just as few were to know the identity of the sculptor's model for the Sherman Monument, likewise few numismatists know who served as the model for Saint-Gaudens' double eagle. And just as fitting as it is for an African-American to lead the way for General Sherman in his march through the South, it seems just as appropriate for Liberty, as depicted by Hettie Anderson, to lead the way forward into the new American century on the 1907 twenty dollar gold pieces. The realism practiced by Augustus Saint-Gaudens and seen throughout all his sculptural works was groundbreaking for the sculptors that followed him. The veristic creations of Adolph Weinman and Hermon MacNeil were made possible by the naturalism seen on the ten and twenty dollar gold pieces designed by Saint-Gaudens.

This is an impressive example of this significantly scarcer High Relief variant, seen here with a flat rim. This is one of the very few pieces we have ever seen with a completely flat rim around each side. The surfaces display light, even reddish patina and thick, satiny mint luster. The only pedigree identifiers we see are a light smudge of reddish patina near the obverse rim at 9 o'clock and a couple of marks across the rays below the eagle on the reverse. PCGS# 9136

SAINT-GAUDENS DOUBLE EAGLES

1907 Arabic Numerals Saint, MS66 Great Eye Appeal

- 5454 1907 Arabic Numerals MS66 PCGS.** The 1907 Arabic Numerals is important to collectors as the first year type of this mass-circulation issue. The average certified survivor is only MS63. This Premium Gem is a gorgeous example exhibiting pinkish hues over brilliant yellow-gold surfaces. This is virtually the finest available quality, as PCGS has seen only 16 finer submissions. A great-looking type coin.
Ex: Pittsburgh Signature (Heritage, 8/2007), lot 7727. NGC ID# 26F5, PCGS# 9141

1908 No Motto Twenty, Gorgeous MS67 A Wells Fargo Example

- 5455 1908 No Motto, Wells Fargo Nevada MS67 PCGS.** This gorgeous apricot-gold Superb Gem displays frosty luster and is sharply struck, including Liberty's facial features, the fingers on both hands, the panes of the Capitol building, and the eagle's plumage. Impeccable preservation rounds out the coin's outstanding eye appeal. PCGS# 99142

1908 No Motto Twenty, MS67 Wells Fargo Hoard Coin

- 5456 1908 No Motto, Wells Fargo Nevada MS67 PCGS.** The Wells Fargo Nevada Hoard was among the more storied and fantastic caches of Saint-Gaudens double eagles ever encountered, thousands of examples of this single date in near-perfect condition — even 10 coins that PCGS certified MS69. The present Superb Gem boasts the strong eye appeal over orange-reddish surfaces that these pieces are known for. Strong luster, a razor-sharp strike, and a notable paucity of marks all contribute to the grade. PCGS# 99142

1908 No Motto Double Eagle, MS68 Ex: Wells Fargo, Nevada Holding

- 5457 1908 No Motto, Wells Fargo Nevada MS68 NGC.** Short rays obverse. Even by the extraordinary standards of the Wells Fargo hoard, the preservation of the present No Motto twenty is exceptional. Patience a strong lens are required to locate even the most inconsequential contact. The strike is precise aside from the leg plumage, which is usually incomplete on this briefly coined design subtype. Ideal for the collector in search of a single outstanding example for a high grade type set. President Roosevelt opposed IN GOD WE TRUST on coinage since it could be spent on ungodly pursuits. Congressmen facing reelection differed and restored the motto. PCGS# 99142

1908-D Motto Twenty Dollar, MS65 Scarcer Early Saint-Gaudens Issue

- 5458 1908-D Motto MS65 PCGS.** This first Denver With Motto issue is surprisingly scarce, especially in Gem condition. The soft mint frost covers the usual slightly granular texture seen on each side, and light reddish-gold patina is intermixed with faint traces of lilac. There are no marks of consequence on either side. NGC ID# 26F9, PCGS# 9148

1908-S Twenty Dollar, AU55
Low-Mintage Issue of 22,000 Coins

- 5459 1908-S AU55 PCGS.** The mintage of the 1908-S double eagle was a memorably low 22,000 pieces, ensuring the relative rarity of the issue from the outset — far unlike many later-series issues, high-mintage productions that would become “melt rarities.” This Choice AU 1908-S shows scattered scrapes and marks under a loupe, none of them overt, but softly frosted yellow-gold surfaces are still quite attractive. NGC ID# 26FA, PCGS# 9149

1908-S Double Eagle, Sharply Defined AU58

- 5460 1908-S AU58 NGC. CAC.** The design elements on this near-Mint orange-gold double eagle are sharply impressed, evidenced by the detail in Liberty's facial features and fingers on the branch hand, the panes on the Capitol building, and the eagle's feathers. Distributed light marks are within the confines of the designated grade. NGC ID# 26FA, PCGS# 9149

1908-S Double Eagle, AU58
A Low-Mintage Issue

- 5461 1908-S AU58 NGC. CAC.** Just 22,000 double eagles were struck at the San Francisco Mint in 1908, a tiny production figure for any 20th century business-strike issue. This near-Mint specimen displays yellow-gold surfaces that retain a good amount of luster. Well-struck design elements include strong detail on the pillars and panes of the Capitol building. The few light marks are insignificant. NGC ID# 26FA, PCGS# 9149

1908-S Saint-Gaudens Double Eagle, MS62
Elusive Issue in Mint State Grades

- 5462 1908-S MS62 PCGS.** The 1908-S Saint-Gaudens double eagle has a reported mintage of just 22,000 pieces, the lowest business-strike total of the series, discounting the famous 1907 High Relief issue. The 1908-S is scarce in high grade, being one of the few Saint-Gaudens double eagles that is seen more often in circulated grades than Mint State. This attractive MS62 example exhibits well-detailed design elements and vibrant mint luster throughout. The rich green and orange-gold surfaces are remarkably free of large or distracting contact marks and eye appeal is quite strong for the grade. Population: 60 in 62 (1 in 62+), 77 finer (12/13). NGC ID# 26FA, PCGS# 9149

1909 Double Eagle, MS64
Rich Mint Bloom

- 5463 1909 MS64 PCGS.** Rich mint bloom appears on both sides of this frosty near-Gem 1909 double eagle, certified by PCGS. Areas of golden-yellow alternate with bits of deeper wheat-gold. A peppering of small marks prevents the Gem grade, but the eye appeal is great for the grade. PCGS has seen only 26 numerically finer, making this piece a tempting value proposition for an underrated date. NGC ID# 26FB, PCGS# 9150

**1909-D Double Eagle, MS63
Low-Mintage Issue**

5464 1909-D MS63 PCGS. This peach-gold example has potent luster and a good strike, though the eagle's breast and Liberty's raised knee display slight blending. A lens reveals minor marks, the most apparent on the upper right obverse field. The uncommonly low mintage of 52,500 pieces has made the 1909-D a longtime favorite among Saint-Gaudens collectors. NGC ID# 26FD, PCGS# 9152

**1909-D Saint-Gaudens Double Eagle, MS64
Scarce Early Issue**

5465 1909-D MS64 NGC. From a mintage of just 52,500 pieces, the 1909-D Saint-Gaudens double eagle was once extremely rare in Mint State grades. Fortunately for present-day collectors, a number of 1909-D Saints surfaced in foreign holdings in the 1960s, but most of those coins graded no better than MS63. The issue is still scarce in MS64 condition and finer examples are very rare. This impressive Choice specimen is well-detailed and lustrous, with lightly marked orange-gold surfaces. Census: 81 in 64 (1 in 64+), 7 finer (1/14). NGC ID# 26FD, PCGS# 9152

**1909-S Twenty Dollar, MS65
Repunched Mintmark**

5466 1909-S MS65 PCGS. The mintmark is lightly repunched, visible on the serifs. Olive-green and orange-gold endow this lustrous and boldly struck Gem. A lens reveals minor marks though the eye appeal is pleasing. Collectible in the present grade but a very costly acquisition any finer. NGC ID# 26FE, PCGS# 9153

**1909-S Double Eagle, MS66
Conditionally Rare, One Finer at PCGS**

5467 1909-S MS66 PCGS. The surfaces on each side of this Premium Gem are remarkably free of all but the most inconsequential marks, and smooth, flowing, frosted luster complements the rich reddish-orange color. The strike is also sharply executed on this piece, show all the pillars in the Capitol dome and good detail on Liberty's rock and sandals. This coin is a conditional rarity in so fine a grade. MS64 examples of the 1909-S are available, Gems not so, and this Premium Gem constitutes one of the few finest at PCGS, which has seen only eight such submissions with one numerically higher (12/13). NGC ID# 26FE, PCGS# 9153

1910 Double Eagle, Bright MS65

5468 1910 MS65 PCGS. Seldom does the 1910 Saint-Gaudens date appear in any grade finer than MS65; PCGS has seen only four numerically higher, including one in MS66+. This Gem offers bright mint luster over apricot-gold surfaces that are well-struck and relatively unmarked for the grade. A fine example for a type or date set. NGC ID# 26FE, PCGS# 9154

1910-S Double Eagle, Sharply Struck MS65

- 5469 1910-S MS65 PCGS.** Peach-gold coloration is imbued with hints of light green, especially on the reverse. This sharply struck Gem includes excellent detail on the fingers of both hands, the pillars and panes of the Capitol building, and the eagle's plumage. Higher-grade specimens are nearly unobtainable. NGC ID# 26FH, PCGS# 9156

**1912 Twenty Dollar, MS64
Very Scarce Any Finer**

- 5470 1912 MS64 PCGS.** A peach-gold Choice Saint-Gaudens twenty whose vibrant luster and good strike confirm the quality. Occasional unobtrusive marks include one on the base of the eagle's breast. First year of the final design subtype with 48 stars across the obverse periphery, made necessary by the addition of New Mexico and Arizona into the Union. Housed in a green label holder. NGC ID# 26FM, PCGS# 9160

**1913-S Saint-Gaudens Twenty, MS64
Popular Low-Mintage Issue**

- 5471 1913-S MS64 PCGS.** The 1913-S Saint-Gaudens double eagle is always popular because of its low reported mintage of just 34,000 pieces. This impressive Choice example exhibits well-detailed design elements, with a touch of the often-seen softness on the lower left obverse. The well-preserved orange-gold surfaces are brightly lustrous. PCGS has graded 23 numerically finer examples (12/13). NGC ID# 26FR, PCGS# 9163

**1913-S Twenty, MS64
Boldly Struck and Lustrous**

- 5472 1913-S MS64 PCGS.** The 1913-S double eagle issue holds the record for the second-smallest mintage among the With Motto twenties (behind the 1908-S), struck to the paltry sum of 34,000 pieces. This near-Gem is certified in a green-label PCS holder, testimony to its remaining undisturbed in same for a couple of decades now. The orange-gold surfaces display copious luster and equal eye appeal, despite a smattering of small, inconsequential marks. The strike is quite bold and sharp throughout, even while stopping short of full. PCGS has seen only 223 submissions numerically finer (1/14). NGC ID# 26FR, PCGS# 9163

**1914 Double Eagle, MS64
Five-Figure Mintage**

- 5473 1914 MS64 PCGS.** Warm sun-gold luster through much of each side with wheat-gold elements also present. Overall eye appeal is strong and only a few abrasions in the right obverse field preclude an even finer designation. The 1914 double eagle has a five-figure mintage and is tough in finer grades. PCGS has certified just 39 examples as MS65 or finer (1/14). NGC ID# 26FS, PCGS# 9164

**1915 Twenty Dollar, MS64
Final World War I Philly Issue**

- 5474 1915 MS64 PCGS.** Philadelphia double eagle mintages were fairly low between 1911 and 1915, failing to surpass 200,000 in any of those five years. The present peach-gold example offers dynamic luster. The strike is sharp except for slight blending on the eagle's breast plumage. The reverse is minimally abraded and the obverse field exhibits wispy grazes. NGC ID# 26FV, PCGS# 9167

1915 Saint-Gaudens Twenty, MS64
Scarce Any Finer

5475 1915 MS64 NGC. From a smallish mintage of 152,000 pieces, the 1915 Saint-Gaudens double eagle is very scarce in grades above the MS64 level. This charming Choice example displays sharply detailed design elements and vibrant mint luster, with lightly marked orange-gold surfaces and outstanding eye appeal. NGC ID# 26FV, PCGS# 9167

1915 Double Eagle, MS65
Only the Dr. Duckor Specimen Is Finer at PCGS

5476 1915 MS65 PCGS. The 1915 double eagle is one of those curious issues within the Saint-Gaudens series that is widely available in the lower Mint State grades, but the Gem level is absolutely "as good as it gets," save for a single NGC-graded MS66 and one MS65+ at PCGS (the latter being the Dr. Duckor coin, which we offered in our 2012 FUN Signature). The Gem submissions at NGC and PCGS are about evenly split, 40 at NGC and 44 at PCGS (12/13). The 1915 double eagle is a well-produced issue; this example shows the typical generous luster for which it is well-known, over splendid yellow-gold surfaces that are also well-struck and well-preserved. No mentionable marks appear on either side. NGC ID# 26FV, PCGS# 9167

1915-S Twenty, Satiny MS66
None Finer at PCGS

5477 1915-S MS66 PCGS. Several hoards of 1915-S twenties have been found, the most notable a cache of 1,000 pieces in Central America in 1983. This is a splendid, high-grade example that shows only the slightest matte-like texturing of the surfaces. Each side displays bright, satiny mint luster with a slight tinge of lilac interspersed with the otherwise even reddish-gold patina. There are no marks of consequence, as one would expect from an MS66, but a tiny, round planchet void is seen as a darker speck of color in the right obverse field. NGC ID# 26FW, PCGS# 9168

1922-S Twenty Dollar, MS64
Lustrous, Two-Toned Surfaces

5478 1922-S MS64 PCGS. Among mintmarked Saints from the 1920s, the 1922-S is one of the more available issues (along with the 1923-D). It is scarce in MS64 condition, however, and only rarely seen finer. This piece shows magnificent reddish-gold and lilac patina over thick mint frost. Well struck and minimally abraded. NGC ID# 26G4, PCGS# 9174

**1923-D Twenty Dollar, MS67
Rich Cartwheel Luster**

- 5479 1923-D MS67 PCGS.** The 1923-D Saint-Gaudens double eagle is doubly popular, first for its status as a mintmarked issue, and more importantly for its well-earned reputation as one the best-produced issues of the entire series. The Denver Mint made more than 1.7 million examples of this issue, yet this Superb Gem is among a few dozen of the finest certified at PCGS. Rich cartwheel luster complements well-struck surfaces imbued with orange-gold patina, a lack of mentionable contact marks, and superlative eye appeal. An optimal type coin. Population: 66 in 67, 0 finer (12/13). NGC ID# 26G6, PCGS# 9176

**1924 Saint-Gaudens Twenty, MS66+
Bright and Well-Struck**

- 5480 1924 MS66+ PCGS. CAC.** "Brightest and best" is the beginning of a familiar Christmas tune, and it could well apply to this high-end Premium Gem 1924 Saint, one of the nicest examples for type one could possibly imagine. Only the most picayune surface ticks preclude an MS67 grade on surfaces that are bright orange-gold, extremely well-struck, and thoroughly eye-appealing. With the CAC approval, this piece will make a nice post-Christmas stocking stuffer. Population: 56 in 66+, 85 finer (12/13). NGC ID# 26G7, PCGS# 9177

**1924-D Twenty Dollar, MS63
Flowing Luster and Mellow Color**

- 5481 1924-D MS63 PCGS.** Mellow, rich reddish-orange color and flowing luster are blatant on this appealing better-date Saint-Gaudens issue. A scattering of small- to medium-sized marks appears primarily on the obverse, to a lesser extent the reverse, precluding a finer grade. The 1924-D in former decades was believed to be among the rarest issues in the series, and even today it is scarce at the near-Gem level and very rare in Gem condition. NGC ID# 26G8, PCGS# 9178

**1924-D Twenty, MS63
Sharply Struck and Appealing**

- 5482 1924-D MS63 PCGS.** Rich mint luster appears on each side of this Select Mint State 1924-D twenty dollar, a piece that boasts an extremely sharp strike on surface that show prevailing mellow orange-red color complementing accents of canary-yellow near the rims on each side. The eye appeal is uniformly excellent. NGC ID# 26G8, PCGS# 9178

**1924-D Double Eagle, MS64
Noted Melt Rarity**

5483 1924-D MS64 PCGS. Frosty gold-orange and wheat hues dominate this near-Gem Denver double eagle. While more than 3 million 1924-D twenties were struck, the vast majority never left government control and were melted during the 1930s. PCGS has graded just 11 pieces in MS65 and better condition (1/14). NGC ID# 26G8, PCGS# 9178

**1924-S Double Eagle, MS63
Bright Reddish-Orange Color**

5484 1924-S MS63 PCGS. The 1924-S issue in the Saint-Gaudens series was at one time thought to survive to the extent of a mere handful of pieces, but later discoveries of European hoards have increased the populations. The issue is still scarce today, however. This is an outstanding Select example showing deep reddish-orange color and rich luster over softly frosted surfaces. Die bulging makes the stars inside the rim stand out, and a scattering of moderate marks is in keeping with the grade. NGC ID# 26G9, PCGS# 9179

**1924-S Twenty, MS63
Rich Mint Luster**

5485 1924-S MS63 NGC. The rich prevailing orange-reddish color is accented with areas of lilac and generous mint luster throughout both sides. A couple of small alloy spots are unobtrusive. The strike is better than normal, and a modicum of scattered, minor marks determines the grade. Excellent eye appeal on this better-date issue. NGC ID# 26G9, PCGS# 9179

**1924-S Twenty Dollar, MS63
Interesting Matte-Like Finish Texture**

5486 1924-S MS63 PCGS. A lustrous and original pumpkin-orange representative. Marks are minor for the grade and the strike is sharp except on Liberty's nose. A loupe reveals a mint-made matte-like finish, especially on the reverse and the obverse margin. The mintage approached 3,000,000 pieces but is of only historical interest because most were melted by the Treasury on the heels of the 1933 gold recall. NGC ID# 26G9, PCGS# 9179

**1925 Double Eagle, MS67
None Graded Finer**

5487 1925 MS67 NGC. Generous cartwheel mint luster radiates from each side of this Superb Gem 1925 double eagle, tied for the finest certified of the date at NGC and PCGS. The strong strike and minimal abrasions — confined to a couple of ticks on Liberty's face and midsection — comprise the high grade and bold eye appeal. Census: 22 in 67, 0 finer (12/13). NGC ID# 26GA, PCGS# 9180

**1925-D Twenty Dollar, MS63
Scarce Issue in This and Finer Grades**

5488 1925-D MS63 PCGS. The 1925-D was a high-mintage issue, as many Saints were in the 1920s, with 2.9 million pieces struck. As expected, most were melted, converted into gold bars, and stored in Fort Knox. However, a surprising number were actually dropped into circulation prior to the Gold Recall of 1933. This is an Select Uncirculated example that was most likely retrieved from Europe sometime in the past 60 years. The mint luster is bright and shows even yellow-gold color with a few small marks scattered about. Slight striking softness is seen over the devices on each side. NGC ID# 26GB, PCGS# 9181

**1925-D Double Eagle, MS64
Seldom Seen Finer**

- 5489 1925-D MS64 NGC.** The 1925-D double eagle is a prize even at the near-Gem level, as they are attractive and well-made coins, conditionally scarce. Gems are essentially the finest obtainable (although there are two MS66 at PCGS, which are likely the same coin), and they will require a long and arduous pursuit, as the 1925-D is likely one of the most underrated, if not *the* most underrated, issues in the series in that grade. This MS64 NGC example certainly shows many of the virtues of a higher grade, including copious luster and good overall eye appeal. The strike is a bit soft on some of the peripheral elements, however, particularly the Capitol dome. Census: 87 in 64 (1 in 64+, 2 in 64 ★), 8 finer (12/13). NGC ID# 26GB, PCGS# 9181

**1925-S Twenty Dollar, MS61
Better-Date Series Issue**

- 5490 1925-S MS61 NGC.** A few blunt contact marks appear on Liberty's face, neck, and torso, along with scattered other marks that determine the grade. Much luster occurs on reddish-gold surfaces that retain good eye appeal, despite the abrasions. Any Mint State example of this better-date Saint is desirable and collectible. NGC ID# 26GC, PCGS# 9182

**1925-S Twenty Dollar, MS62
Lustrous and Relatively Unmarked**

- 5491 1925-S MS62 NGC.** Although struck in formidable quantity, the 1925-S had the same fate as all other San Francisco issues from the Roaring Twenties. The coins were mostly held back by the Treasury and eventually melted after Franklin Roosevelt's 1933 gold recall. The 1925-S is more available in circulated grades than in Mint State, presumably due to a small local release. But the present lustrous, yellow-gold example is unworn and surprisingly void of consequential marks. NGC ID# 26GC, PCGS# 9182

1925-S Double Eagle, MS63
High Mintage, Low Survival

1926-D Twenty Dollar, MS63
Bright, Satiny Surfaces, Seldom Seen Finer

5492 1925-S MS63 PCGS. The 1925-S Saint-Gaudens double eagle is one of several mintmarked issues from the twenties that have high mintages and extremely low survival rates. More than 3.7 million of these pieces were produced. Some were exported while others entered circulation as indicated by the large number of certified pieces in grades lower than MS60.

This Select Mint State double eagle has brilliant yellow-gold surfaces with dappled orange toning to enhance its eye appeal. The surfaces exhibit scattered grade-consistent marks, including a few noticeable marks on the eagle's wings. PCGS has only certified 26 examples in finer grades. NGC ID# 26GC, PCGS# 9182

5494 1926-D MS63 PCGS. The 1926-D double eagle at one time was considered the rarest of the rare, and even today it remains an important condition rarity within the series, even though several other issues (such as the 1927-D and 1921) have overtaken it for the top positions. The Select grade of the present example is seldom bettered, and this coin shows many virtues for the given grade. Bright, satiny surfaces display rich, even reddish patina on each side. The surfaces are minimally abraded for the grade level, making this a superb acquisition for a fine Saint-Gaudens set. Population: 51 in 63, 27 finer (12/13).

Ex: George Coymann Collection / FUN Signature (Heritage, 1/2003), lot 9377. NGC ID# 26GE, PCGS# 9184

1926 Saint-Gaudens Twenty, MS66+
Conditionally Rare in Finer Grades

5493 1926 MS66+ PCGS. CAC. The 1926 Saint-Gaudens double eagle is not too difficult to locate at the MS66 level, but the issue is very rare in finer grades, making this high-end Premium Gem a good balance of quality and value. The design elements are razor-sharp throughout and the pristine surfaces radiate vibrant mint luster. PCGS has graded three numerically finer examples (12/13). NGC ID# 26GD, PCGS# 9183

**1926-S Double Eagle, MS63
Mass-Melted Issue**

5495 1926-S MS63 PCGS. Orange-gold and olive-green compete for territory across this lustrous and precisely struck example. Minor field grazes limit the grade. Though the 1926-S had a generous mintage, most remained in Treasury vaults and were ultimately melted. However, up to a couple thousand pieces did escape the smelter when they were paid to foreign merchants prior to the 1933 gold recall. Most of those have returned to the U.S. and are insufficient to meet collector demand. NGC ID# 26GF, PCGS# 9185

**1926-S Twenty, Highly Lustrous MS64
Rich Reddish-Gold and Lilac Patina**

5496 1926-S MS64 NGC. The 1926-S was once considered a great rarity in the Saint-Gaudens series, until examples began to be expatriated from European sources in the early 1950s. It is still scarce, and especially so in high grades. This is a beautiful near-Gem example that displays rich reddish-gold centers with lilac-tinted margins. Sharply struck throughout and minimally abraded. NGC ID# 26GF, PCGS# 9185

**1926-S Double Eagle, MS64
Even Color, Bright Mint Luster**

5497 1926-S MS64 PCGS. The mint luster is bright and softly frosted over each side and covered with an even layer of light reddish patina. The strike details are strong, but not quite full in all areas on this minimally marked, better-date Saint. The 1926-S is a better-date S-mint in MS64, and is rare in Gem and finer condition. NGC ID# 26GF, PCGS# 9185

**1929 Double Eagle, MS64
Important Late-Date Issue**

5498 1929 MS64 PCGS. Following several large mintage issues through much of the 1920s, the 1929 had a reduced mintage, combined with a low survival rate. This issue is the first of the scarce late date series of Saint-Gaudens double eagles. Nearly all known examples are Mint State, routinely encountered in the lower numerical grades from MS60 to MS63. Choice Mint State pieces like this example are scarce, and finer coins are rare. PCGS has only certified 31 finer examples.

This lovely piece has frosty yellow-gold luster with delicate bluish-green peripheries. The surfaces are pleasing, with only a few trivial marks on each side. A coppery-orange toning splash over Liberty's outstretched arm will identify this piece. NGC ID# 26GL, PCGS# 9190

**1929 Saint-Gaudens Double Eagle, MS64
Famous Late-Date Rarity**

5499 1929 MS64 PCGS. The 1929 inaugurates the final elusive segment of the Saint-Gaudens double eagle series, with every issue from this year through 1933 being a major rarity. While this issue is the least rare of this group, it is still a coveted key date whose appearance at auction is an occasion of note among specialists. Only a minuscule percentage of the nearly 1.8 million pieces minted survived the recall of gold coinage in the 1930s.

The elusive nature of the 1929 was recognized at an early date and its prestige was probably even higher in the 1940s than it is today. The first auction appearance we have been able to locate was in lot 61 of Sale 416 (Morgenthau, 6/1940), which realized \$61. Thus, the coin sold for more than three times face value only 11 years after it was minted in an economy that was still feeling the effects of the Great Depression. Auction prices have continued to rise over the years, and the pinnacle in price for an MS64+ example was in our 2011 FUN Signature (lot 5320), a coin that realized \$63,250.

This exceptional piece displays vibrant satiny mint luster and sharply detailed design elements throughout. The bright yellow-gold surfaces exhibit a few highlights of rose and are completely free of the copper spots seen on some examples of this date. The surfaces are remarkably free of all but the most insignificant contact marks, suggestive of an even higher grade. Visual appeal is tremendous. Population: 90 in 64 (12 in 64+), 31 finer (12/13).

Ex: FUN Signature (Heritage, 1/2004), lot 3275. NGC ID# 26GL, PCGS# 9190

1931 Twenty Dollar, MS64
Exceptionally Attractive Example of This Rarity

5500 1931 MS64 PCGS. CAC. The 1931 Saint-Gaudens double eagle is a formidable rarity in the series, prized by numismatists for the beauty of its design and its mysterious, elusive nature. David Akers considers it the sixth rarest date of the 53-coin series, and the second most elusive of the famous “late date” Saints; second only to the famous 1930-S.

Among 20th century U.S. gold coins, no group is more celebrated than the later collectible dates in the Saint-Gaudens double eagle series, from 1929-1932. These coins have mystified collectors since the late 1930s, when they were first seriously collected. Mint records indicate these issues were produced in ample numbers, but the supply in numismatic hands has always been minuscule. Of course, the explanation of this paradox is that the great majority of these coins were never released from storage in Treasury vaults and Federal Reserve Banks. They were produced and held as backing for currency at a time when the United States was still on the gold standard. When Franklin Roosevelt took the country off the gold standard, and called in domestic holdings of gold via executive order in 1933, almost the entire production of these dates was quickly removed from the storage facilities. The coins were later melted into gold ingots and stored in the Fort Knox Bullion Repository.

In the case of the 1931 double eagle, a reported mintage of 2.9 million pieces was achieved at the Philadelphia Mint, but very few examples were released before the Gold Recall took effect. Mint records studied by Dr. Charles W. Green in the 1940s reveal only 45 coins were actually released through official channels. However, many more pieces were saved from melting by Treasury officials and Mint personnel who exchanged older, more common double eagles for the rare 1931 coins, and sold them at a profit to Philadelphia and New York area coin dealers.

David Akers estimates the surviving population of Mint State 1931s at 65-85 pieces, almost all of which are in mint condition. The 1931 has always been treated as a featured attraction in its infrequent auction appearances, and record prices often attend these offerings. When a magnificent Superb Gem specimen was offered as lot 6710 of the Phillip H. Morse Collection (Heritage, 11/2005), it realized \$254,500, a record price at the time. The same coin was recently offered as lot 3650 of the ANA Signature Auction (Heritage, 8/2010), where it realized a new record of \$322,000.

This example has smooth, frosted surfaces with rich reddish patina, and there are no obvious abrasions on either side. The strike is strong overall with only localized weakness noted on the eagle's breast feathers and Liberty's nose. There are no alloy spots as seen on many 1931 twenties. Exceptionally appealing and strongly suggestive of an even higher grade. Population: 26 in 64, 35 finer (12/13). NGC ID# 26GN, PCGS# 9192

COMMEMORATIVE SILVER

1900 Lafayette Dollar, MS65 First Silver Dollar Commemorative

- 5501** 1900 Lafayette Dollar MS65 PCGS. DuVall 1-B. The Lafayette dollar of 1900 was the first commemorative silver dollar and the first legal tender coin to depict an American president. Reported distribution was only 36,026 pieces and most examples seen are in AU or lower Mint State grades today. This well-detailed Gem displays lustrous, lightly marked surfaces under shades of lavender-gray toning. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, MS65 Bright Luster and Sharp Strike

- 5502** 1900 Lafayette Dollar MS65 PCGS. CAC. DuVall 2-C. The 1900 Lafayette dollar is the only silver dollar in the classic commemorative series. This impressive Gem features well-detailed design elements and bright mint luster, under attractive shades of sea-green and lavender-gray toning. The well-preserved surfaces are free of mentionable distractions. NGC ID# 28N8, PCGS# 9222

1939 Arkansas Half Dollar, MS66+ Only Two Finer Coins at PCGS

- 5503** 1939 Arkansas MS66+ PCGS. Ex: Young Collection. The 1839 Arkansas commemorative half dollar claims a small distribution total of 2,104 examples. This high-end Premium Gem exhibits well-detailed design elements and pleasing satiny mint luster. The well-preserved surfaces display hints of light blue and golden-brown toning. Population: 40 in 66 (5 in 66+), 2 finer (12/13). NGC ID# 28JA, PCGS# 9249

1892 Columbian Half, PR64 Only 100 Proofs Struck

- 5504** 1892 Columbian PR64 NGC. This all-brilliant proof striking shows complete definition on the seams, rigging, waves, planking, globes, and borders. Only 100 proofs were struck, and this is one of the clearest examples we have seen recently. The fields are nicely mirrored and there is just the slightest contrast evident against the devices. A couple of light slide marks are all that prevent an even higher grade. Census: 20 in 64, 10 finer (12/13). PCGS# 9295

1920 Maine Centennial Half, MS67 Frosty, Top-Notch Example

- 5505** 1920 Maine MS67 PCGS. CAC. Frosty surfaces are richly lustrous and mostly untinted silver-white, save for a light sprinkling of cinnamon patina at the extreme rims. This Superb Gem is certified by PCGS and tied for the finest at that service. A loupe reveals a notable absence of relevant contact. The CAC approval further separates this piece from most of its cohort, a top-notch example. Population: 32 in 67 (2 in 67+), 0 finer (12/13). NGC ID# 28KN, PCGS# 9326

1921 Missouri Half, MS66 Lightly Toned, Boldly Struck

- 5506** 1921 Missouri MS66 PCGS. Ex: Gutttag Family. This Premium Gem Missouri commemorative half is tied for the finest certified at PCGS — which has never certified a numerically higher example of this issue — with about three dozen other submissions (1/14). Pale lilac patina is accented in the centers of each side by amber-gold and iridescent colors. Contact marks are inconsequential on this boldly struck piece. NGC ID# 28KS, PCGS# 9330

**1921 Missouri 2★4 Half, MS66
Tied for Finest at PCGS**

- 5507** 1921 Missouri 2x4 MS66 PCGS. The obverse (2★4) side is a rather consistent pinkish-silver, while the reverse shows cascading vertical waves of silver alternating with amber-gold. The good strike and paucity of mentionable contact puts this Premium Gem PCGS example in a tie with 29 other submissions at that service, and none are finer (1/14). A key to the commemorative half series, as is the non-2★4 version in this grade. NGC ID# 28KR, PCGS# 9331

**1921 2x4 Missouri Half Dollar, MS66
A Key to the Series**

- 5508** 1921 Missouri 2x4 MS66 NGC. Bright luster radiates from both sides of this Premium Gem commemorative half, each of which displays occasional splashes of russet toning. Strong definition is seen on the design elements. Close examination reveals no significant marks. This issue is one of the keys to the Commemorative series. Census: 58 in 66 (1 in 66 ★), 0 finer (1/14). NGC ID# 28KR, PCGS# 9331

**1921 Missouri 2x4 Half, MS66
No Numerically Finer Coins at PCGS**

- 5509** 1921 Missouri 2x4 MS66 PCGS. Only 5,000 examples of the 1921 Missouri half dollar with the popular 2x4 motif were distributed, making the issue rare in MS66 condition. This impressive Premium Gem exhibits sharply detailed design elements and vibrant mint luster under attractive shades of champagne-gold and amber toning. Population: 29 in 66 (1 in 66+), 0 finer (12/13). NGC ID# 28KR, PCGS# 9331

**1921 Missouri Half Dollar, MS66
More Elusive 2x4 Variant**

- 5510** 1921 Missouri 2x4 MS66 PCGS. The 1921 Missouri commemorative half dollar is an elusive issue and the popular 2x4 variant is more difficult to locate than its plain counterpart. This delightful Premium Gem is sharply detailed and brightly lustrous, with attractive hints of champagne-gold and lavender-gray toning. Population: 29 in 66 (1 in 66+), 0 finer (12/13). NGC ID# 28KR, PCGS# 9331

**1936 Oregon Trail Half Dollar, MS68
Among the Finest Certified**

- 5511** 1936 Oregon MS68 NGC. CAC. With a reported distribution of just over 10,000 pieces, the 1936 Oregon Trail half dollar is one of the most popular and beautiful issues of the silver commemorative series. This spectacular MS68 example is sharply detailed and brightly lustrous throughout, with attractive highlights of lavender and champagne-gold toning. Census: 4 in 68 (1 in 68 ★), 0 finer (12/13). NGC ID# 28L3, PCGS# 9345

1936-D Texas Half Dollar, Magnificent MS68

- 5512** 1936-D Texas MS68 PCGS. Just over 9,000 specimens of the 1936-D Texas half dollar were distributed and few survivors can match the quality and eye appeal of the coin offered here. This magnificent MS68 example is sharply detailed throughout, with vibrant mint luster and a few highlights of champagne-gold and amber toning. Population: 14 in 68 (1 in 68+), 0 finer (12/13). NGC ID# 28LV, PCGS# 9387

1953-S Washington-Carver Half, MS67
Splendid Original Color and Excellent Preservation

- 5513 1953-S Washington-Carver MS67 PCGS. CAC.** For some reason, many of the Washington-Carver halves that survive in high grade — a minority of those existing — display splendid original coloration. Between the remarkable color and the excellent surface preservation such pieces must show to achieve a high grade, this small minority of Washington-Carver coins forms a memorable, tiny subset in the silver commemorative series that series specialists eagerly pursue. This Superb Gem 1953-S is one such memorable example. Bountiful cartwheel luster radiates from each side, despite a moderate layer of pale peripheral copper color surrounding pale jade-green centers on each side. As expected, the few marks visible at all are of no significance. Population: 9 in 67 (1 in 67+), 0 finer (12/13). NGC ID# 28N2, PCGS# 9440

1954 Washington-Carver Half, MS67
Among the Finest Graded

- 5514 1954 Washington-Carver MS67 PCGS. CAC.** We have only sold one other MS67 of this issue, and that was more than two years ago in our 2011 February Long Beach Signature. That coin was NGC-certified and brought \$9,000. The Washington-Carver issues are well-known as condition rarities, primarily because of the numerous small but pervasive abrasions seen on the jugate portraits on the obverse. This example is refreshingly free from abrasions on the central devices. Each side also displays bright mint frost that is mostly untuned in the centers but turns to light iridescence at the margins. PCGS has only certified one other piece in this lofty grade and NGC has graded three (12/13). Predictably, neither service has certified one finer. NGC ID# 28N3, PCGS# 9442

COMMEMORATIVE GOLD

1903 Louisiana Purchase/McKinley Gold Dollar
Highly Lustrous MS67

- 5515 1903 Louisiana Purchase/McKinley MS67 PCGS. CAC.** A medley of peach-gold and lime-green toning runs over the highly lustrous surfaces of this Superb Gem commemorative, and the design elements are uniformly well-struck. Close examination indicates that both sides are devoid of mentionable marks. Population: 88 in 67, 2 finer (12/13). NGC ID# 26HB, PCGS# 7444

1905 Lewis and Clark Gold Dollar, MS65
Key Gold Commemorative Issue

- 5516 1905 Lewis and Clark MS65 NGC.** The 1905 Lewis and Clark gold dollar is a key issue in the gold commemorative series, considerably more elusive than its 1904 counterpart. This delightful Gem displays well-detailed design elements and vibrant mint luster throughout. The pleasing yellow-gold surfaces show only minor signs of contact. NGC ID# 26HD, PCGS# 7448

1905 Lewis and Clark Gold Dollar, MS65
Very Scarce in Higher Grades

- 5517 1905 Lewis and Clark MS65 PCGS.** From a distribution of just 10,000 pieces, the 1905 Lewis and Clark gold dollar is very scarce in grades above the MS65 level. This attractive Gem displays well-detailed design elements and vibrant mint luster, with unmarked orange-gold surfaces. Overall eye appeal is tremendous. NGC ID# 26HD, PCGS# 7448

**1915-S Pan-Pac Quarter Eagle, MS63
Apricot-Gold and Lemon-Yellow Surfaces**

- 5518** 1915-S Panama-Pacific Quarter Eagle MS63 PCGS. Gold CAC. The omnipresent swirling mint luster that this issue is well-known for is much on display here, on deep apricot-gold surfaces whose appeal is further heightened by occasional lemon-yellow accents and relatively few marks. A terrific-looking coin.
From The Teich Family Collection. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS65
Pleasing Eye Appeal**

- 5519** 1915-S Panama-Pacific Quarter Eagle MS65 NGC. Only 6,749 quarter eagles were distributed in 1915 in conjunction with the Panama-Pacific International Exposition. Attractive wheat-gold coloration resides on the lustrous surfaces of this Gem, and neither side reveals mentionable marks. These attributes, along with well-struck design features, add up to pleasing overall eye appeal. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Two and a Half, MS65
Relatively Unmarked for the Grade**

- 5520** 1915-S Panama-Pacific Quarter Eagle MS65 NGC. Consistent auburn-gold surfaces show rich, thickly frosted mint luster and a paucity of mentionable marks, in keeping with the grade on this Gem NGC-certified piece. The obverse margins, under a loupe, reveal some inconsequential areas of charcoal color. A sharp-looking example of this popular classic gold commemorative. NGC ID# 26HK, PCGS# 7450

**1915-S Pan-Pac Two and a Half, MS65
Beautiful Reddish-Orange Patina**

- 5521** 1915-S Panama-Pacific Quarter Eagle MS65 NGC. Superlative eye appeal is the hallmark of this Gem NGC-graded 1915-S Pan-Pac quarter eagle, a coin richly layered in mint luster and covered with an even, beautiful patina of reddish-orange. Some lighter wheat-gold accents appear in the interstices on the obverse, and there are no marks of any consequence. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS65
Only 6,749 Pieces Distributed**

- 5522** 1915-S Panama-Pacific Quarter Eagle MS65 PCGS. The 1915-S Panama-Pacific quarter eagle was part of a five-coin issue struck to commemorate the opening of the Panama Canal and the recovery of San Francisco after the great earthquake. This delightful Gem is well-detailed and lustrous, with lightly marked orange-gold surfaces. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Two and a Half, MS67
Tied for Finest at PCGS**

- 5523 1915-S Panama-Pacific Quarter Eagle MS67 PCGS. CAC.** The 1915-S Panama-Pacific quarter eagle is the largest gold commemorative coin from that famed observance — now nearly a century in the rear-view mirror — that most numismatists can afford, save for the few with pockets deep enough to acquire a nice Pan-Pac round or octagonal fifty dollar piece. This Superb Gem with the added CAC approval is also one of the finest survivors of the issue. PCGS has seen 29 submissions at this top grade level; none are finer (12/13). Rich, swirling luster complements the mellow apricot-orange color, and no mentionable contact impedes the excellent eye appeal. The strike is uniformly bold. A tiny reddish-brown toning area at PA(CIFIC) is likely an alloy spot, as made at the Mint and in any case undistracting. Population: 29 in 67, 0 finer (12/13). NGC ID# 26HK, PCGS# 7450

TERRITORIAL GOLD

**1860 Clark, Gruber & Co. Five Dollar, MS61
K-2, Elusive in Mint State**

- 5524 1860 Clark, Gruber & Co. Five Dollar MS61 PCGS.** Clark, Gruber & Company successfully operated as a private mint in Colorado during the early part of the 1860s, until their operations were purchased by the federal government in April of 1863. Initially used as an assay office, the facilities became a full-fledged branch mint in 1906. The Clark, Gruber five dollar gold pieces of 1860 closely resemble their federal counterparts in design, aside from the PIKES PEAK GOLD DENVER legend on the reverse. The issue is not difficult to locate in lower circulated grades, but Mint State examples are elusive.
- This well-detailed MS61 example retains much of its original mint luster and eye appeal. The bright canary-gold surfaces show a scattering of minor contact marks on both sides, all consistent with the grade. Listed on page 394 of the 2014 *Guide Book*. Population: 6 in 61, 15 finer (12/13). PCGS# 10136

S.S. CENTRAL AMERICA GOLD BAR

36.40-Ounce Kellogg & Humbert Gold Ingot An S.S. Central America Treasure

5525 36.40-Ounce Kellogg & Humbert Gold Ingot. CAGB-738.

Ex: *S.S. Central America*. A disaster such as the sinking of a ship focuses the attention of people on what is truly important, life itself. It also brings out the best and worst in people. A passage from *America's Lost Treasure* is of interest, focusing on the tale of survivor William Chase:

"Some of the men unbuckled their gold-stuffed belts and flung their hard-earned treasure upon the deck to lighten their weight. Chase claimed that he could easily have picked up thousands of dollars, if he thought he had a chance of reaching safety with this treasure. Shortly before eight o'clock, the *Central America*, with its decks now awash, was rapidly filling with water and sinking lower into the sea. In a dinner conversation earlier in the voyage Captain Herndon had told the Eastons that if his ship were ever to go down, he would go with it. Now, having done everything he could to save the women and children, and wondering if he could have done anything different to avoid the imminent tragedy, Captain Herndon retired to his quarters. Stoic and proud, he returned to the wheelhouse wearing his full-dress uniform."

Of the gold ingots that slipped to the bottom of the sea 150 years ago, the most plentiful were those from the well-respected firm of Kellogg & Humbert. More than 400 of these ingots were recovered in 1988. In spite of its considerable heft, the present piece is actually one of the smaller ingots recovered. The smallest from Kellogg & Humbert was 5.71 ounces and the largest weighed an amazing 933.94 ounces. At the time the *Central America* sank, this particular ingot was valued at \$620.77.

The ingot is 52 mm tall, 41 mm wide, and 30 mm deep. The top side reads: No 1028/36.40 OZ/825 FINE/\$620.77. The individual ingot number is repeated at the top of the back side. The company imprint is neatly impressed on the right side. Two assay chips are out of opposing corners, as always. Bright overall with no traces of the rust that is often seen on these ingots.

Ex: *Long Beach Signature* (Heritage, 9/2007), lot 4162.

CALIFORNIA FRACTIONAL GOLD

Undated Liberty Octagonal Dollar, Bright MS61
BG-501

- 5526** Undated Liberty Octagonal 1 Dollar, BG-501, Low R.5, MS61 NGC. Typically struck with some mushiness of detail noted on both sides; roller marks pretty much obliterate the detail on the lower-right side of the eagle. Bright, yellow-gold surfaces display hints of prooflikeness in the fields that yield mild contrast with the motifs. Census: 1 in 61, 2 finer (1/14). PCGS# 10478

PATTERNS

1858 Flying Eagle Cent, PR66
Judd-193, Shield Reverse

- 5527** 1858 Flying Eagle Cent, Judd-193, Pollock-236, Snow-PT11a, R.5, PR66 NGC. The obverse is the issued Small Letters 1858 Flying Eagle design. The reverse is similar to the issued 1860 cent but the shield is broad and ornamented. Struck in copper-nickel with a plain edge. This high grade apricot-gold representative has a full strike and lacks any contact marks. Carbon is virtually absent. Census: 2 in 66, none finer (12/13). PCGS# 11844

1865 With Motto Quarter in Copper
Judd-426, PR64 Red and Brown

- 5528** 1865 Quarter Dollar, Judd-426, Pollock-498, R.6, PR64 Red and Brown NGC. Ex: Exemplar Collection. The standard Seated Liberty With Motto design first introduced in 1866. Struck in copper with a reeded edge. The 1863 through 1865 With Motto Seated Liberty patterns are undoubtedly restrikes minted in the 1870s. These With Motto pattern issues are extremely popular as they share designs with the regular issue coins. This fully struck example displays a mixture of variegated red, brown, and lime-green toning over each side. PCGS# 70611

1866 Washington Five Cent Pattern in Nickel
Judd-481, PR66 Cameo

- 5529** 1866 Five Cents, Judd-481, Pollock-571, Low R.7, PR66 Cameo PCGS. CAC. A head of Washington faces right on the obverse, with the date below and GOD AND OUR COUNTRY around. The final 6 in the date is much larger than the first 6 and is apparently recut at least once. The reverse has a large 5 within a laurel wreath with UNITED STATES OF AMERICA around. Struck in nickel with a plain edge. Only 10 to 12 examples are believed known in nickel with another five or six known in copper. This is a spectacular example. The obverse has a medal-like appearance, and the fields display the deepest mirroring and provide a "black" background for the frosted devices. PCGS# 60677

**1867 Seated Dollar in Brass
Judd-593, Gem Proof**

- 5530** 1867 Dollar, Judd-593, Pollock-657, High R.7, PR65 NGC. CAC. Ex: Samuel Bergard Collection. From regular issue dies with a reeded edge, but struck in brass instead of silver. Early editions of Judd state only 5 pieces were struck, which matches the combined total certified by NGC and PCGS. The present specimen is fully struck and displays rich olive-green and peach-gold toning. Moderate carbon near star 12 and on the upper reverse identifies the present specimen.
Ex: Frank M. Sterling Collection (*Heritage*, 5/2009), lot 1413; Orlando FUN Signature (*Heritage*, 7/2010), lot 4480; Samuel J. Bergard Collection (*Stack's*, 3/2012), lot 4192. PCGS# 60805

**1870 Standard Silver Half in Silver
Judd-981, PR66 Cameo**

- 5531** 1870 Standard Silver Half Dollar, Judd-981, Pollock-1101, High R.6, PR66 Cameo PCGS. CAC. Liberty faces right, her hair tied in a bun, wearing a starless diadem inscribed LIBERTY. IN GOD WE TRUST is on a scroll at the bottom rim, with UNITED STATES OF AMERICA around. On the reverse a wreath of corn and cotton encloses 50 / CENTS, the latter in an upcurving arc, with STANDARD at the upper rim and the date 1870 inside the wreath. Struck in silver with a reeded edge. Less than a half dozen pieces are believed known of this pattern. This example is deeply mirrored with strongly contrasting mint frost over the devices. Attractively toned light peach-gold and navy-blue. Essentially flawless surfaces. PCGS# 61227

**1870 Standard Silver Half in Copper
Judd-990, PR64 Red and Brown**

- 5532** 1870 Standard Silver Half Dollar, Judd-990, Pollock-1119, High R.7, PR64 Red and Brown PCGS. CAC. Standard Silver design. Liberty faces right wearing a headband with a single star, a scroll below, and UNITED STATES OF AMERICA above. The reverse is similar to that used in 1869 with 50 CENTS in the center, surrounded by a wreath of oak and laurel, with 1870 below and STANDARD SILVER above. Struck in copper with a plain edge. This fully struck and unabraded specimen retains ample orange-gold, especially on the obverse, while the borders exhibit shades of aquamarine and rose-red at the borders. A few specks of carbon appear on each side. PCGS# 71236

1877 Sailor Head Dime in Copper, PR65 Brown
Judd-1498, Reeded Edge

- 5533** 1877 Sailor Head Ten Cents, Judd-1498, Pollock-1651, Low R.7, PR65 Brown NGC. William Barber's portrait of Liberty resembles the famous Sailor Head design but lacks the "sailor" collar. 13 tiny stars are widely spaced, and the date is at the exergue. Regular issue dime reverse. A coin without a country since UNITED STATES OF AMERICA is absent. Struck in copper with a reeded edge. Fully struck and flashy with iridescent orange-red and ocean-blue patina. Limited in grade solely by minute marks on the cheek and the field near the chin. PCGS# 61833

GSA DOLLARS

1879-CC Dollar, MS62
GSA Holder

- 5534** 1879-CC MS62 NGC. When the General Services Administration offered Carson City Morgan dollars in the 1970s, there were nearly 3 million coins marketed by that organization. Included were 4,100 examples of the 1879-CC, seemingly a substantial number of coins until one considers that more than 960,000 examples of the 1884-CC were marketed.

This Normal Mintmark 1879-CC Morgan dollar has satiny silver luster with brilliant surfaces and a splash of gold toning on the reverse. Moderate marks are present on the portrait while the reverse is markedly finer. A box accompanies the lot but no certificate is present. PCGS# 407086

1879-CC Dollar, MS63 Prooflike
GSA Holder

- 5535** 1879-CC MS63 Prooflike NGC. VAM-4. An early die state without the chip on the left side of the 8 in the date. A wisp of gold toning graces the upper obverse, but most of this lustrous semikey Carson City dollar is brilliant. The fields are smooth while the cheek and neck display wispy marks. No box or certificate are included. From The Teich Family Collection. PCGS# 407087

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000..

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-443-8425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments for Signature auctions; Internet-only auction bidding increments are approximately half of these amounts (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment
< - \$10	\$1
\$10 - \$29	\$2
\$30 - \$49	\$3
\$50 - \$99	\$5
\$100 - \$199	\$10
\$200 - \$299	\$20
\$300 - \$499	\$25
\$500 - \$999	\$50
\$1,000 - \$1,999	\$100
\$2,000 - \$2,999	\$200
\$3,000 - \$4,999	\$250
\$5,000 - \$9,999	\$500

Current Bid	Bid Increment
\$10,000 - \$19,999	\$1,000
\$20,000 - \$29,999	\$2,000
\$30,000 - \$49,999	\$2,500
\$50,000 - \$99,999	\$5,000
\$100,000 - \$199,999	\$10,000
\$200,000 - \$299,999	\$20,000
\$300,000 - \$499,999	\$25,000
\$500,000 - \$999,999	\$50,000
\$1,000,000 - \$4,999,999	\$100,000
\$5,000,000 - \$9,999,999	\$250,000
>\$10,000,000	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is

an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1500 and there is no sales tax on coins in Texas) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes..
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if assigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor

Terms and Conditions of Auction

- under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.
- 36B. Auctioneer shall not be liable for any loss caused by or resulting from:
- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
 - b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgs.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558; Michael J. Sadler, # 1304630, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 11-19-12

HOW TO COLLECT POLITICAL MEMORABILIA

Few categories embody Americana quite like political memorabilia—the umbrella term that includes everything related to the world of political campaigns and causes, but not pieces from the task of governing itself. Banners, pinback buttons, mechanical pieces, and even china sets have all been produced to promote candidates, and a vibrant collectors' market exists for all of these. Political collectors often prefer jugates—the term for pieces that feature two portraits side by side, usually a presidential candidate and vice presidential running mate.

"The iconography of political campaigns is not just fun to look at, it reflects the mood of the time and the changing folkways of political campaigns," Dr. Arthur Schlesinger, the Pulitzer Prize-winning historian, once told a reporter. Andrew Jackson's 1824 campaign was the first to mass-produce trinkets promoting the candidate, and pinback buttons have been a staple of the electoral process ever since.

Tom Slater, Director of Americana Auctions at Heritage, says that over the past few years, Vietnam-era protest material has come into its own as a sought after category. On the other side, the Women's Suffrage market overheated over the past decade and prices have since slipped. Hot movie releases like Lincoln can lead to an influx of new collectors but, more often than not, prices return to normal once the publicity fades.

The challenge and the fun in collecting political memorabilia come from the lack of definitive resources on the category. "There is a steep learning curve, with no guidebooks and no checklists," says Slater. "You have to learn about political history to know what the best objects are and how to collect them."

Collectors generally pay more for pieces from campaigns where little memorabilia was produced, and sometimes that means losing tickets are worth more than winning tickets. Beginning with the 1968 election, campaigns produced a wide variety of items specially targeted at collectors. "Those aren't as pure but they're still fun," says Slater, adding that some rare variations from post-1968 campaigns can still run well into the thousands. The holy grail for pinback collectors—an 1864 jugate featuring Abraham Lincoln with running mate Andrew Johnson—sold for \$56,000 at a 2012 Heritage auction.

For political collectors, three factors determine value: condition, rarity, and significance of the subject (Abraham Lincoln items are much more highly prized than those for his political opponents, for example). An item which possesses all three qualities is sure to command a premium price. Age does play a role as well: a George Washington item is going to sell for more than a Bill Clinton item of comparable rarity and interest.

To view and search past Political Memorabilia auction results, members are invited to use Heritage's free Auction Archives.

Storage guidelines for buttons are similar to other collectibles. Humidity can lead to spotting and staining, and heat and dryness can cause cracking. Slater tells the story of a renowned California collector whose widow stored his collection in the attic; by the time she had an appraiser come, the memorabilia was all but ruined. For more information on political collecting, consider joining the 2,000-member American Political Items Collectors, a non-profit membership organization (<http://www.apic.us/>).

Items being sold are from the extensive collection of Eric P. Newman Numismatic Education Society (a Missouri not-for-profit corporation) and have been assembled over a period of 90 years. Proceeds of the sale of all items will be used exclusively for supplementing the Society's museum operations and scholarly numismatic research efforts and for the benefit of other not-for-profit institutions selected by Eric P. Newman Numismatic Education Society for public purposes.
